(iv) The basis to the partnership of contributed property. To the extent that a determination with respect to a contribution can be made from these and similar partnership-level determinations, therefore, the determination is more appropriately made at the partnership level. To the extent that that determination requires other information, however, that determination is more appropriately made at the partner level. For example, it may be necessary to determine whether the contribution of the property causes recapture from the contributing partner of the credit provided under section 38 in certain circumstances in which that determination is irrelevant to the partnership.

(2) *Distribution.* For purposes of its books and records, or for purposes of furnishing information to a partner, the partnership needs to determine:

(i) The charter of an amount transferred to a partner (for example, whether it is a distribution, a loan, or a repayment of a loan);

(ii) The amount of money distributed to a partner;

(iii) The adjusted basis to the partnership of distributed property; and

(iv) The character of partnership property (for example, whether an item is inventory or a capital asset). To the extent that a determination with respect to a distribution can be made from these and similar partnership-level determinations, therefore, the determination is more appropriately made at the partnership level. To the extent that that determination requires other information, however, that determination is more appropriately made at the partnership level. Such other information would include certain factors used in determining the partner's basis for the partnership interest, such as the amount that the partner paid to acquire the partnership interest from a transferor partner if that transfer was not covered by an election under section 754.

(3) *Transactions to which section 707(a) applies.* For purposes of its books and records, the partnership needs to determine:

(i) The amount transferred from the partnership to a partner or from a partner to the partnership in any transaction to which section 707(a) applies;

(ii) The character of such an amount (for example, whether or not it is a loan; in the case of amounts paid over time for the purchase of an asset, what portion is interest); and

(iii) The percentage of the capital interests and profits interests in the partnership owned by each partner. To the extent that a determination with respect to a transaction to which section 707(a) applies can be made from these and similar partnership-level determinations, therefore, that determination is more appropriately made at the partnership level. To the extent that the determination requires other information, however, that determination is more appropriately made at the partner level. Examples of such other information are the cost to the partner of goods sold to the partnership and the extent to which the partner may be treated under section 267(c) as the constructive owner of a capital or profits interest actually owned by another.

(4) *Application of section 751.* For purposes of its books and records, or for purposes of furnishing information to a partner for use in applying section 751, the partnership needs to determine:

(i) The fair market value and adjusted basis of the partnership's—

(A) Unrealized receivables (within the meaning of section 751(c)),

(B) Substantially appreciated inventory (within the meaning of section 751(d)), and

(C) Other property;

(ii) A partner's share of each of the classes of assets described in paragraph (c)(3)(i) of this section; and

(iii) Whether a distribution to a partner is a disproportionate distribution subject to section 751(b).

To the extent that a determination with respect to the application of section 751 can be made from these and similar partnership-level determinations, therefore, that determination is more appropriately made at the partnership level. To the extent that the determination requires other information, however, that determination is more appropriately made at the partner level. An example of such other information is the amount realized by a partner on the sale of a partnership interest.

Par. 2. A new § 301.6511(g)–1 is added to read as follows:

§ 301.6511(g)–1 Special rule for partnership items of federally registered partnerships.

(a) *In general.* In the case of any tax imposed by subtitle A with respect to any person, the period for filing a claim for credit or refund of any overpayment attributable to any partnership item of a federally registered partnership shall not expire before the later of—

(1) The date which is 4 years after the date prescribed by law (including extensions thereof) for filing the partnership return for the partnership taxable year in which the item arose, or

(2) If the taxpayer or a general partner or a person authorized to act on behalf of the partnership, as provided in § 301.6501(o)–2(d), consents to extend the period for assessing a deficiency attributable to the partnership item before the date specified in paragraph

(a)(1) of this section, the date 6 months after the expiration of the extension.

(b) *Limits on amount of credit or refund not applicable.* In the case of a claim for credit or refund of any income tax overpayment attributable to any partnership item of a federally registered partnership, the limitations provided in section 6511(b) (2) and (c) shall not apply if the claim is filed within the period described in paragraph (a) of this section.

(c) *Special periods of limitation with respect to carryback of net operating loss, capital loss, etc.* The provisions of section 6511(g) must also be taken into account in applying the various special periods of limitation prescribed in section 6511(d). Thus, to the extent that a carryback is attributable to a partnership item of a federally registered partnership, the period for filing a claim for credit or refund of an overpayment attributable to that carryback shall not expire before the date determined under paragraph (a) of this section with respect to the partnership taxable year in which the item arose.

(d) *Definitions.* For purposes of this section, the terms "partnership item" and "federally registered partnership" have the same meaning as such terms have when used in section 6501(o), § 301.6501(o)–2(c), and § 301.6501(o)–3.

(e) *Effective date.* The provisions of this section are effective generally for partnership items arising in partnership taxable years beginning after December 31, 1978 and before September 4, 1982. This section shall not apply, however, to any partnership taxable year with respect to which the amendments made to Code section 6511(g) by section 402 of the Tax Equity and Fiscal Responsibility Act of 1982 are effective. See section 407(a)(3) of that Act.

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[T.D. ATF–131; Reference Notice No. 431]

Arroyo Seco Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes an American viticultural area in Monterey County, California, known as "Arroyo Seco." The establishment of viticultural areas and the use of viticultural area names in wine labeling and advertising will allow wineries to designate the specific grape-growing area where their wines come from, and will help consumers to identify the wine they purchase.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Charles N. Bacon, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, Telephone: 202–566–7626.

SUPPLEMENTARY INFORMATION:

Background

ATF regulations in 27 CFR Part 4 allow the establishment of definite viticultural areas. These regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements. Section 9.11, Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. Approved American viticultural areas are listed in 27 CFR Part 9.

Section 4.25a(e)(2) outlines the procedures for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

ATF was petitioned by the Arroyo Seco Winegrowers and Vintners, an association composed of grapegrowers and vintners with vineyards in the Arroyo Seco area, to establish a viticultural area within Monterey County, California known as "Arroyo Seco." In response to their petition, ATF published a notice of proposed rulemaking, Notice No. 431, in the **Federal Register** on November 3, 1982 [47 FR 49860] proposing the establishment of the Arroyo Seco viticultural area.

General Description of Arroyo Seco

The Arroyo Seco viticultural area is a triangular shaped area adjacent to the Arroyo Seco Creek which flows into the Salinas River near Soledad. The total area comprising the Arroyo Seco viticultural area is 28.5 square miles or 18,240 acres. Within the area there are about 8,500 acres of vineyards and two bonded wineries.

Supporting Evidence

Name. Arroyo Seco is the name given to a land grant and rancho existing in the vicinity of the viticultural area. Arroyo Seco, meaning "dry-creek" is the name of the creek flowing through the viticultural area. Vineyards were first planted in this area in 1962 by Mirassou Sales, a San Jose Winery. In 1963, Wente Brothers of Livermore, California, planted vineyards along the Arroyo Seco Creek which are known as Wente's Arroyo Seco Vineyards. Since 1963, many other vineyards have been planted in this region and Arroyo Seco has been used in numerous magazines, newspapers, and wine publications in describing wines from this region.

Geographical features. Topography distinguishes the Arroyo Seco viticultural area from surrounding areas. This area consists of sloping bench land surrounding the Arroyo Seco Creek. The highest elevations of over 600′ occur to the west on the Sierra de Salinas, foothills of the Santa Lucas Mountains. A ridgeline of between 500′ and 300′ in elevation separates Arroyo Seco from areas immediately to the south. From these elevations, the area slopes gradually downward to the lowest points of 180′ elevation on the north along the Arroyo Seco Creek, and 220′ elevation on the west along the Salinas River. It is this sloping bench land high above the Salinas River which provides adequate drainage and freedom from frost for area vineyards.

Climate. The climate of the Arroyo Seco area is unique in amount of rainfall, temperature range, and the variability of the winds.

The major climatic influences are the Pacific Ocean and Monterey Bay. To the west, the Santa Lucas Mountains block damaging Pacific rains from the area. Winds off Monterey Bay, however, blow down the Salinas River, cooling the valley and providing a moderate climate. The cooling effects of the wind make the northern Salinas Valley quite cold. Gonzales is classified as Region I on the scale developed by Winkler and Amerine to measure degree days, with 2350 degree days. In the Arroyo Seco area, the climate is considered Region II. Soledad, to the immediate north, registers 2880 degree days while Wente's Arroyo Seco Vineyards average between 1875 and 2250 degree days. The cooling effect of the wind diminishes further south. King City averages 3150 degree days, placing it in Region III while San Miguel is classified as Region IV. The growing season is approximately 245 days.

Rainfall is sparse in the Arroyo Seco viticultural area. Soledad averages just 9.5 inches per year, less than received to the north where Salinas averages 13.7 inches and Gonzales 12.3 inches per year. Because of the sparse rainfall, all vineyards within the Arroyo Seco region irrigate, using water from Arroyo Seco Creek rather than from the Salinas River.

Soils. The soils in the Arroyo Seco area consist of a series of gravelly and

fine sandy loams well suited to the cultivation of grapes. The viticultural area is an alluvial fan formed by well drained soils with slopes ranging from 0 to 9 percent. Principal soil series include Mocho, Lockwood, Arroyo Seco, Rincon, Elder, and Chular. The prominent soils, Chular and Arroyo Seco, are coarse sandy loams derived from decomposed granite washed down from the Gavilan Mountains. These soils are gravelly and low in lime content similar to the vineyards in the Medoc and Graves districts of Bordeaux, and to the better vineyards in the Palatinate.

Viticultural history. Wine grapes were first planted in the vicinity of Arroyo Seco between 1830 and 1840 at the nearby Mission Soledad. Winegrowing, however, never became important in Monterey County because it was considered a "poor area" for viticulture. Strong winds off Monterey Bay and the arid climate of the Salinas River Valley deterred the planting of wine grapes. During Prohibition, only 400 acres of vineyards survived in Monterey County, and this acreage was halved in the years following Repeal.

It was not until the early 1960's that vineyards were planted in the Arroyo Seco region. Three wineries, Paul Masson, Wente Brothers, and Mirassou, feeling the effects of urbanization in Santa Clara and Alameda Counties, began searching for new areas in California in which to plant vineyards. These wineries noted the conclusion of a report prepared by professors Maynard Amerine and A. J. Winkler of the University of California. Their report concluded that Monterey County contained Region I and II climatic areas and was suited to the growing of premium quality grapes.

Acting on the recommendations contained within the Amerine-Winkler report, Paul Masson and Mirassou planted vineyards between Soledad and Greenfield in 1962, and in 1963 Wente Bros. planted vineyards along the Arroyo Seco Creek west of Greenfield. The first wines were produced from Arroyo Seco grapes in 1966.

Since 1962, nearly 8,500 acres of premium varietal grapes have been planted in the Arroyo Seco viticultural area including Pinot Blanc, Riesling, Gewurztraminer, Chardonnay, Gamay, Cabernet Sauvignon, Petit Sirah, and Sauvignon Blanc.

No Comments Received

The notice of proposed rulemaking, Notice No. 431, contained a 45 day comment period. No comments were received during this comment period. Based on the information contained in the petition, the Arroyo Seco viticultural area is established as proposed.

The exact boundaries of the Arroyo Seco viticultural area are described in the regulatory text of § 9.59, and are unchanged from those proposed.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. This rule will allow the petitioner and other persons to use an appellation of origin, "Arroyo Seco," on wine labels and in wine advertising. This final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities, or impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this final rule will not have a significant economic impact on a substantial number of small entities.

Compliance With Executive Order 12291

It has been determined that this final rule is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Drafting Information

The principal author of this final rule is Charles N. Bacon, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection, Viticultural areas, Wine.

Authority and Issuance

Accordingly, under the authority contained in 27 U.S.C. 205, the Director is amending 27 CFR Part 9 as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The table of sections in 27 CFR Part 9 is amended by adding § 9.59. As amended, the table of sections reads as follows:

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.59 Arroyo Seco.

* * * * *

Par. 2. Subpart C is amended by adding § 9.59. As added, § 9.59 reads as follows:

§ 9.59 Arroyo Seco.

(a) *Name.* The name of the viticultural area described in this section is "Arroyo Seco."

(b) *Approved maps.* The appropriate maps for determining the boundaries of the Arroyo Seco viticultural area are four U.S.G.S. quadrangle maps. They are entitled:

(1) "Greenfield, California," 7.5 minute series, edition of 1956;

(2) "Paraiso Springs, California," 7.5 minute series, edition of 1956;

(3) "Soledad, California," 7.5 minute series, edition of 1955; and

(4) "Sycamore Flat, California," 7.5 minute series, edition of 1956 (photoinspected 1972).

(c) *Boundaries.* The Arroyo Seco viticultural area is located in Monterey County, California. The beginning point is found on the "Sycamore Flat" U.S.G.S. map at the junction of Arroyo Seco Road and the Carmel Valley Road (indicated as the Jamesburg Road on the map).

(1) Then east following Arroyo Seco Road to the southwest corner of Section 22, T. 19 S., R. 5 E.

(2) Then east following the southern boundaries of Sections 22, 23, 24, 19, and 20 to the southeastern corner of Section 20, T. 19 S., R. 6 E.

(3) Then northeast in a straight line for approximately 1.3 miles to the summit of Pettits Peak.

(4) Then northeast in a straight line for approximately 1.8 miles to the point where the 400' contour line intersects the northern boundary of Section 14, T. 19 S., R. 6 E.

(5) Then east following the 400' contour line to a point immediately west of the Reservoir within the Posa de los Ositos Land Grant.

(6) Then following the ridge line in a northeasterly direction for approximately 7.5 miles to U.S. Highway 101 at the intersection of Underwood Road.

(7) Then east following Underwood Road to its intersection with the Posa de los Ositos Land Grant.

(8) Then north following the boundary of the Posa de los Ositos Land Grant to the west bank of the Salinas River.

(9) Then northwest following the west bank of the Salinas River to the southern boundary of Section 17, T. 18 S., R. 7 E.

(10) Then due west for approximately 2.0 miles following the southern boundary of Section 17, and continuing to U.S. Highway 101.

(11) Then following U.S. Highway 101 in a northwesterly direction to its intersection with Paraiso Road.

(12) Then south following Paraiso Road to the intersection with Clark Road.

(13) Then south in a straight line for approximately 1.8 miles to the northeast corner of Section 5, T. 19 S., R. 6 E.

(14) Then due south following the eastern boundaries of Sections 5, 8, and 17, to Arroyo Seco Road.

(15) Then southwest in a straight line for approximately 1.0 mile to Bench Mark 673.

(16) Then west in a straight line for approximately 1.8 miles to Bench Mark 649.

(17) Then northwest in a straight line for approximately 0.2 mile to the northeast corner of Section 23, T. 19 S., R. 5 E.

(18) Then west following the northern boundaries of Section 23 and 22 to the northwest corner of Section 22, T. 19 S., R. 5 E.

(19) Then south in a straight line for approximately 1.0 mile to the point of beginning.

Signed: March 21, 1983.

Stephen E. Higgins,

Acting Director.

Approved: March 31, 1983.

David Q. Bates,

Deputy Assistant Secretary (Operations).

BILLING CODE 4810-31-M

---

27 CFR Part 9

[T.D. ATF-130; Reference Notice No. 400]

Cole Ranch Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes a viticultural area in Mendocino County, California, named "Cole Ranch." The Bureau of Alcohol, Tobacco and Firearms (ATF) believes that the establishment of "Cole Ranch" as a viticultural area and its subsequent use as an appellation of origin on wine labels and in wine advertisements will allow wineries to better designate, and help consumers to better identify, the wines from this distinctive grape-growing area.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Steve Simon at (202) 566-7626.

SUPPLEMENTARY INFORMATION:

Background

ATF regulations in 27 CFR Part 4 allow the establishment of definite viticultural areas and the use of an approved viticultural area as an appellation of origin on wine labels and in wine advertisements. In 27 CFR 4.25a(e)(1) and 9.11, the term "viticultural area" is defined as a delimited, grape-growing region distinguishable by geographical features. In 27 CFR 4.25a(e)(2), procedures for proposing an American viticultural area are outlined. Those procedures allow any interested person to submit a petition for establishment of an American viticultural area.

In response to a petition from the proprietor of Cole Ranch in Ukiah, California, ATF published a notice of proposed rulemaking, Notice No. 400, in the **Federal Register** on December 4, 1981 (46 FR 59273), which proposed the "Cole Ranch" viticultural area in Mendocino County, California. ATF solicited public comment concerning the proposed area.

Only one comment was received in response to this notice: Fetzer Vineyards, Redwood Valley, California, which supported the proposal to establish "Cole Ranch" as a viticultural area. Fetzer Vineyards and several other wineries purchase grapes from this viticultural area. Both Fetzer Vineyards and Chateau St. Jean label their wines produced from these grapes with a "Cole Ranch" appellation. Other wineries which purchase grapes from the Cole Ranch vineyard are Parson's Creek Winery, Souverain Cellars, Navarro Winery, Husch Vineyards, Frei Brothers Winery and Dolan Vineyard. The information furnished by the petitioner and the supporting comment were sufficient for ATF to make a final decision concerning the establishment of "Cole Ranch" as a viticultural area.

Evidence of Name

The "Cole Ranch" viticultural area is located in a small, narrow mountain valley most of which is on the 500-acre ranch owned by the Cole family. The valley is approximately one mile in length and a half mile across at its widest point. It contains approximately 150 acres of land. Small areas of this valley are owned by neighboring property owners whose statements, supporting the petition, were submitted to ATF by the petitioner. At least one of those other owners has enough land for potential commercial vineyard development. The only grape grower at present, however, is the Cole family. Vines were planted in 1973, and grapes were first harvested in 1975. Now there are 61 acres planted with Cabernet Sauvignon, Johannisberg Riesling, and Chardonnay grapes.

The small valley comprising this viticultural area has no name on a map. In viticultural circles, however, the area has become well-known by the name of "Cole Ranch," after the name of the property in which it primarily lies. As mentioned, several nationally marketed wines have had the designation "Cole Ranch" appear prominently on their lables. Various publications on wine production also refer to the area as "Cole Ranch" or "Cole Vineyard" and have given the name national exposure.

ATF has reservations about approving a viticultural area named after someone's private ranch or vineyard. Normally, it would not be best to designate (or appear to designate) a ranch or vineyard as a viticultural area, even if shown to be different from the surrounding area, as long as there is any other name by which the viticultural area is known. In the case of "Cole Ranch," however, there is no such other name. "Cole Ranch" meets the regulatory criteria for a viticultural area, and no one objected to the proposed name during the comment period.

Geographical Evidence

In accordance with 27 CFR 4.25a(e)(2), a viticultural area must also possess geographical features which distinguish the viticultural features of the area from those of surrounding areas.

Evidence submitted by the petitioner shows that "Cole Ranch" is isolated by topography from other grape-growing areas and is extremely limited in size by both topography and soils. The area is a tiny valley surrounded by the steep mountains of the Coastal Ranges. The nearest other vineyard is 1½ miles away and 800 feet lower in elevation. The soils of the "Cole Ranch" viticultural area range from deep, gravelly clay loam to shallow, gravelly silty clay, and are distinguishable from the mountain soils of the immediately surrounding area.

AFT believes that the valley floor elevation of "Cole Ranch" at 1400 feet and its geographical location in a

narrow coastal mountain valley 25 miles from the Pacific Ocean give the area a climate distinguishable from surrounding areas. "Cole Ranch" viticultural area is generally cooler than nearby grape-growing areas to the east, and warmer than those to the west. However, at the beginning and end of the growing season, "Cole Ranch" is cooler than surrounding areas both to the east and to the west. Thus the temperature pattern of "Cole Ranch" is unique. In addition, "Cole Ranch" receives on an average more rainfall (normally 40–45 inches) than the neighboring Ukiah area (normally 32 inches).

Boundaries

ATF is approving the "Cole Ranch" viticultural area boundaries as proposed by the petitioner. Based on features which can be found on a United States geological survey map, the boundaries follow the contour line at an elevation of 1,480 feet, the north line of section 19 and the local Boonville-Ukiah Cutoff Road.

Miscellaneous

ATF does not wish to give the impression that, by approving "Cole Ranch" as a viticultural area, it is approving the quality of the wine from that area or endorsing the wine. ATF is approving the area as being viticulturally distinct from surrounding areas, not better than other viticultural areas. By approving "Cole Ranch," wine producers are allowed to claim a distinction on labels and advertisements as to the origin of the grapes. ATF will not allow statements or claims that these wines are better because they originated from an approved viticultural area. Any commercial advantage gained can only be substantiated by consumer acceptance of "Cole Ranch."

Compliance With Executive Order 12291

It has been determined that this final rule is not a "major rule" within the meaning of Executive Order 12291, 46 FR 13193 (1981), because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The notice of proposed rulemaking which resulted in this final rule contained a certification under section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that, if promulgated as a final rule, it would not have a significant impact on a substantial number of small entities. The requirements in 5 U.S.C. 603 and 604 for a final regulatory flexibility analysis, therefore, do not apply to this final rule.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection Viticultural areas, Wine.

Drafting Information

The principal authors of this final rule are Joan Deerwester, Armida N. Stickney, and Steve Simon, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms. Other personnel in offices of ATF and the Department of the Treasury participated in the development of this final rule, both as to matters of substance and style.

Authority and Issuance

This Treasury decision (final rule) is issued under the authority contained in 27 U.S.C. 205 (49 Stat. 981, as amended).

Accordingly, 27 CFR Part 9 is amended by adopting, subject to minor editorial changes, the amendatory language proposed in Notice No. 400 in the **Federal Register** on December 4, 1981, (46 FR 59273) which reads as follows.

PART 9—AMERICAN VITICULTURAL AREAS

1. The table of sections in 27 CFR Part 9 Subpart C, is amended by adding § 9.42 to read as follows:

Subpart C—Approved American Viticultural Areas

* * * * *

9.42 Cole Ranch.

* * * * *

2. Subpart C is amended by adding § 9.42 to read as follows:

§ 9.42 Cole Ranch.

(a) *Name.* The name of the viticultural area described in this section is "Cole Ranch."

(b) *Approved map.* The approved map for the Cole Ranch viticultural area is the U.S.G.S. map entitled "Elledge Peak Quadrangle California—Mendocino County," 7.5 minute series (topographic), 1958.

(c) *Boundaries.* The boundaries of the Cole Ranch viticultural area are located in Mendocino County California and are as follows:

(1) The point of beginning is the intersection of the 1480-foot-elevation contour line with the Boonville-Ukiah Cutoff Road near the southest coner of section 13;

(2) The Boundary follows the 1480-foot-elevation contour line southerly, then easterly, within section 24, then easterly and northwesterly within section 19 to its first intersection with this section line. The boundary proceeds due west on the north section line of section 19 until it intersects with the Boonville-Ukiah Cutoff Road;

(3) The boundary follows this road northwesterly to the point of beginning.

Signed: March 21, 1983.

Stephen E. Higgins,

Acting Director.

Approved: March 31, 1983.

27 CFR Part 9

[T.D. ATF-129; Reference Notice 415]

North Fork of Roanoke Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes a viticultural area in parts of Roanoke and Montgomery Counties in southern Virginia to be known as "North Fork of Roanoke." The Bureau of Alcohol, Tobacco and Firearms (ATF) believes the establishment of North Fork of Roanoke as a viticultural area and its subsequent use as an appellation of origin on wine labels and in wine advertisements will allow wineries to better designate the specific grape-growing area where their wines come from and will enable consumers to better identify the wines they may purchase.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: James A. Hunt, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226 (202–566–7626).

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF–53 (43 FR 37672, 54624) revising regulations in 27 CFR

Part 4 allowing the establishment of definite viticultural areas. These regulations also allow the name of an approved viticultural area to be used as an appellation of origin in wine labeling and advertising. On October 2, 1979, ATF published Treasury Decision ATF-60 (44 FR 56692) which added a new Part 9 to 27 CFR for the listing of approved viticultural areas.

Section 9.11, Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical characteristics. Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

MJC Vineyard in Blacksburg, Virginia, petitioned ATF to establish a viticultural area to be named "North Fork of Roanoke."

In response to this petition, ATF published a notice of proposed rulemaking, Notice No. 415, in the Federal Register on July 27, 1982 (47 FR 32448), proposing the establishment of the North Fork of Roanoke viticultural area.

Historical and Current Evidence of the Name

The name of the area, North Fork of the Roanoke, is taken from the river which runs through the viticultural area. The petitioner submitted evidence to show the name has its origin back to the early settlers and that the name North Fork of Roanoke is established today as a recreation area. The petitioner and other commenters requested the name be shortened to North Fork of Roanoke.

Geographical Features

The petitioner established that the viticultural area is well defined geographically because the North Fork of the Roanoke River flows southwesterly for ½ its length, then reverses its direction around Pearis Mountain and flows northeasterly an additional 10 miles to form the main body of the Roanoke River. The viticultural area is bounded on the west by the Alleghany Mountain ridges of the Eastern Continental Divide, on the south by the Pedler Hills, and on the north and east by the Pearis and Ft. Lewis Mountains.

The petitioner submitted data to distinguish the features of the viticultural area from surrounding areas as follows:

(a) *Elevation*—The valley floor of the North Fork begins in Roanoke County at an elevation of 1800 feet. As the river flows through Montgomery County it falls 600 feet before reentering Roanoke County to form the main body of the Roanoke River. Both the Pearis and Ft. Lewis Mountains overlook the North Fork. These rise to elevations of 3100 feet. The viticulturally significant part however, is an uneven but frost free area between 1700 and 2100 feet of elevation on the southeast facing slopes of the Continental Divide and lower fringe of the north facing slopes of Pearis Mountain.

(b) *Soil*—The viticulturally productive slopes are principally made up of Frederick and Poplimento soils with limestone characteristics of the southeast facing slopes and limestone/sandstone layers characteristic of the north facing slopes. The soil in the viticultural area is significantly different than that found in the surrounding hills and ridges. On the north and west are the Alleghany ridges and the Jefferson National Forest which are largely unsuited for agriculture.

(c) *Climate*—The micro climate for grape production in the viticultural area is excellent due largely to the protection the valley derives from its location between two high ranging, parallel and northwest facing mountain ridges. The mountains protect the valley and its southeast facing slopes from destructive storms and limit excessive rainfall in the growing season. The average rainfall in the viticultural area is 39.5 inches as contrasted with 44 inches and more annually in the western mountains. Air and soil drainage on the slopes are good. Prevailing westerlies wash out potentially troubling pollutants and keep vine diseases to a minimum. An early morning fog from the North Fork characteristically cools the vines in the summer. Despite variations in elevation, the growing season in the North Fork is relatively constant averaging 170 days with a heat summation of about 2800 degree days between the 28 degrees F Spring and Fall frosts. Winters are mild with temperatures below −5 degrees F occuring only every 12 to 15 years with a 150 year record low of −16 degrees F in 1977. Summer highs rarely exceed 90 degrees F and the pattern of warm days and cool nights is conducive to wine grape quality.

Comments

The only comments received during the comment period were from the petitioner, a professor from Virginia Polytechnic Institute in Blacksburg, Virginia, and a vineyard owner in the petitioned for area. All three strongly supported establishing the North Fork of the Roanoke viticultural area described in the notice of proposed rulemaking published in the Federal Register on July 27, 1982.

In the notice of proposed rulemaking the question of reducing the size of the proposed North Fork of the Roanoke viticultural area was raised since the area is 22 miles long with only 49 acres of grapes on five vineyards. The commenters opposed reducing the size of the viticultural area because potential sites for grape production are scattered throughout the 22 mile long valley and an estimated 1200 acres could be developed utilizing 15 to 20 acres vineyard sites. The commenters also pointed out that reducing the size of the valley would cause a problem in distinguishing a viticultural area from surrounding areas since the valley as a whole is clearly distinguishable.

The notice of proposed rulemaking also asked for more information regarding the viticultural area name. The commenters stated that the name "North Fork of Roanoke" would be preferred because it is simpler and shorter.

Because of comments, the petitioned-for boundaries are approved without change and the name of the viticultural area will be "North Fork of Roanoke."

Miscellaneous

ATF does not wish to give the impression by approving North Fork of Roanoke viticultural area that it is approving or endorsing the quality of the wine from this area. ATF is approving this area as being viticulturally distinct and not better than other areas. By approving the area, wine producers are allowed to claim a distinction on labels and advertisements as to origin of the grapes. Any commercial advantage gained can only come from consumer acceptance of North Fork of Roanoke wines.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this final rule will not have

a significant economic impact on a substantial number of small entities.

Executive Order 12291

It has been determined that this final rule is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Disclosure

A copy of the petition and the comments received are available for inspection during normal business hours at the following location: ATF Reading Room, Room 4405, Office of Public Affairs and Disclosure, 12th and Pennsylvania Avenue, NW, Washington, DC.

Drafting Information

The principal author of this document is James A. Hunt, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection, Viticultural areas, Wine.

Authority and Issuance

Accordingly, under the authority contained in Section 5 of the Federal Alcohol Administration Act (45 Stat. 981, as amended; 27 U.S.C. 205), 27 CFR Part 9 is amended as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The table of sections in 27 CFR Part 9, Subpart C, is amended to include the title of §9.65 as follows:

SUBPART C—Approved American Viticultural Areas

Sec.

* * * * *

9.65 North Fork of Roanoke.

Paragraph 2. Subpart C is amended by adding § 9.65 to read as follows:

Subpart C—Approved American Viticultural Areas

§ 9.65 North Fork of Roanoke.

(a) *Name.* The name of the viticultural area described in this section is "North Fork of Roanoke."

(b) *Approved maps.* The appropriate maps for determining the boundaries of the North Fork of Roanoke viticultural area are 7.5 minute series 1965 U.S.G.S. Virginia maps titled: Looney Quadrangle, McDonalds Mill Quadrangle, Glenbar Quadrangle, Elliston Quadrangle, Ironto Quadrangle, Blacksburg Quadrangle, Newport Quadrangle and Craig Springs Quadrangle.

(c) *Boundaries.* The North Fork of Roanoke viticultural area is located in parts of Roanoke and Montgomery Counties in southern Virginia. The point of beginning is in the north at the intersection of State Routes 785 and 697 in Roanoke County. The line follows State Route 697 northeast over Crawford Ridge to the intersection at State Route 624. The viticultural area line turns southwest on State Route 624 along the boundary of the Jefferson National Forest and then continues across the Montgomery County line to U.S. 460 (business). The line follows U.S. 460 (business) south through the town of Blacksburg. The line then continues on U.S. 460 (bypass) to the intersection of U.S. 460 east where it turns east for approximately 1 mile to the intersection of U.S. Interstate Highway 81 at Interchange 38 at State Route 629, then follows State Route 629 (which later becomes State Route 622 north of Bradshaw Creek) 2 miles across the Roanoke County line to where it intersects the Chesapeake and Potomac Telephone Company right-of-way. The line then turns northwest along the C & P right-of-way over Pearis Mountain to the point where the right-of-way intersects State Route 785, one quarter mile northeast of the intersection of State Routes 785 and 697 and then follows State Route 784 back to the starting point.

Signed: March 18, 1983.

Stephen E. Higgins,

Acting Director.

Approved: March 31, 1983.

David Q. Bates,

Deputy Assistant Secretary (Operations).

BILLING CODE 4810-31-M

27 CFR Part 9

[T.D. ATF-132; Reference Notice No. 435]

Santa Ynez Valley Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes an American viticultural area in Santa Barbara County, California known as "Santa Ynez Valley." The establishment of viticultural areas and the use of viticultural area names in wine labeling and advertising will allow wineries to designate the specific grape-growing area where their wines come from, and will help consumers to identify the wine they purchase.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Charles N. Bacon, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, Telephone: 202-566-7626.

SUPPLEMENTARY INFORMATION:

Background

ATF regulations in 27 CFR Part 4 allow the establishment of definite viticultural areas. These regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements. Section 9.11, Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. Approved American viticultural areas are listed in 27 CFR Part 9.

Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

ATF was petitioned by the Firestone Vineyard, a bonded winery in Los Olivos, to establish a viticultural area in Santa Barbara County, California, to be known as "Santa Ynez Valley." This viticultural area is a valley contered around the Santa Ynez River, and contains a total of 285 square miles with 1,200 acres of vineyards. In response to this petition, ATF published a notice of proposed rulemaking, No. 435, in the **Federal Register** on November 24, 1982 [47 FR 53048] proposing the establishment of the Santa Ynez Valley viticultural area.

Supporting Evidence

The following evidence was presented in the petition to support the proposed viticultural area.

Name. The name "Santa Ynez" was given to the mission established in 1804 by the first European settlers in the valley. This mission was dedicated to Saint Agnes, and Santa Ynez was the name applied to the town, river, and valley.

Viticultural history. Grape-growing and winemaking were extensive in Santa Barbara County prior to Prohibition. The Santa Ynez Valley itself contained over 5,000 acres of vineyards. However, Prohibition ended the industry in the valley, and vineyards were not replanted after Repeal.

In 1969, the first commercial vineyards since Prohibition were planted just east of Solvang. Additional acreage was planted during the next decade, especially 1972-1973, by winemakers attracted to the climate of the valley, and its remoteness from urban encroachment. Today there are over 20 vineyards encompassing 1,200 acres within the viticultural area, and eight bonded wineries have been established. Major grape varietals include Cabernet Sauvignon, Riesling, Chardonnay, Merlot, Sauvignon Blanc, Gewurztraminer, and Pinot Noir. Commercial production of Santa Ynez Valley wines began in the mid 1970's, and the Santa Ynez Valley, California appellation currently appears on may labels of wines from the region.

Geographical features. Topography and geography distinguish the Santa Ynez Valley viticultural area from surrounding areas. The valley itself surrounds the Santa Ynez River and is defined by mountains to the north and south, by Lake Cachuma and the Los Padres National Forest to the east, and by a series of low hills to the west.

To the north, the Purisima Hills rise from 1,200 to 1,700 feet in elevation, and separate the Santa Ynez Valley from the Los Alamos Valley. Similarly, the San Rafael Mountains separate the valley from the Santa Maria Valley, previously approved as an American viticultural area. These mountains generally range in elevation from 1,400 to 2,600 feet.

The Santa Ynez Mountains on the south separate the Santa Ynez Valley from the Pacific Ocean; these mountains range in elevation from 800 to 2,500 feet. To the west, the Santa Ynez Valley narrows, and the Santa Rita Hills separate it from the Lompoc Valley.

Within the Santa Ynez Valley, the Santa Ynez River flows west, descending in elevation from 750 feet at Lake Cachuma to approximately 125 feet at the extreme western end. Vineyards within the valley range in elevation from 200 to 400 feet for those planted in proximity to the Santa Ynez River, to 1,300–1,500 feet in elevation for vineyards planted in the foothills of the San Rafael Mountains. Around Los Olivos, vineyards range between 650 feet and 900 feet in elevation, those around Santa Ynez are between 500 and 600 feet in elevation, while vineyards planted near Buellton range from 300 to 600 feet in elevation.

Climate. The Santa Ynez Valley is a cool Region II on the scale developed by Winkler and Amerine of the University of California to measure degree days. Solving in the center of the valley registers an average of 2680 degree days. This contrasts with 1970 degree days (Region I) in nearby Lompoc, and with 2820 degree days for Santa Barbara, south of the Santa Ynez Mountains. Within the Santa Ynez Valley, summertime temperatures increase from west to east following the Santa Ynez River upstream.

The Santa Rita Hills to the west block the colder ocean air, prevalent at Lompoc, from entering the Santa Ynez Valley and act to moderate the valley's climate. To the east, the boundary of the viticultural area is drawn along recognizable map features which approximately delineate the cooler temperatures of the Santa Ynez Valley from warmer temperatures further inland.

Rainfall averages 16 inches within the Santa Ynez Valley although it is variable from year to year. Fog also plays an important factor in the climate of the viticultural area by keeping the valley cool and moist during the growing season. Fog is present to elevations of 1,000 to 1,200 feet in the valley and nearly all vineyards are influenced by it.

Soils. Northern Santa Barbara County contains 14 major soil associations, but the Santa Ynez Valley contains only 7 major associations. Vineyard plantings are confined almost entirely to 3 of these soil associations.

The Positas-Ballard-Santa Ynez association consists of well-drained fine sandy loams to clay loams. These soils occur on level to moderately steep slopes in the upper Santa Ynez Valley at elevations of 500 to 1,000 feet.

Another association, the Chamise-Arnold-Crow Hill association, consists of well-drained to excessively well-drained sand loams and clay loams. These soils are found on gentle to very steep slopes on high terraces and uplands. Elevations range from 200 to 1,500 feet.

The Shedd-Santa Lucia-Diablo association consists of steep, well-drained shaly clay loams and silty clay loams. These soils occur on uplands from 200 to 3,000 feet in elevation.

A few vineyards are planted in the Sorrento-Mocho-Camarillo soil association. These soils are nearly level and consist of well-drained to somewhat poorly-drained sandy loams and silty clay loams. They are found on the flood plains and alluvial fans along the Santa Ynez River.

Boundaries. The boundaries of the Santa Ynez Valley viticultural area consist of many land grant and section boundaries. In most cases, these boundaries closely approximate ridgelines, but have been used because they are more easily described on U.S.G.S. maps. The boundaries are fully described in the regulatory text of § 9.54.

Discussion of Comments

In Notice No. 435, ATF requested public comments on the proposed viticultural area. ATF noted that the area, as proposed, contains about 285 square miles, but only 1,200 acres of vineyards, and requested ways in which the proposed area could be reduced in size.

Five comments were received from Santa Barbara County wineries, farms, and consumers. All of these comments favored establishing the Santa Ynez viticultural area as proposed without any reduction in size.

One respondent noted that it would be inappropriate to reduce the area in size since "there are producing vineyards in the furthest extremities of the proposed area." Therefore, reduction in size would necessarily exclude some vineyards from the viticultural area. Another respondent stated that the proposed viticultural area is consistent with the definition of a delimited grape-growing region, and that the proposed area already represents only about one third of the actual Santa Ynez Valley. Finally, another respondent pointed out that if the area were reduced in size, it would prompt the establishment of adjacent viticultural areas which would only mislead or confuse the consumer.

On the basis of all evidence presented with the petition and in written comments, ATF has concluded the boundaries should be adopted as proposed, and the viticultural area should include the entire petitioned for 285 square miles.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. This rule allows the petitioner and other persons to use an appellation of origin, "Santa Ynez Valley," on wine labels

and in wine advertising. This final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities, or impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this final rule will not have a significant economic impact on a substantial number of small entities.

Compliance With Executive Order 12291

It has been determined that this final rule is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection, Viticultural areas, Wine.

Drafting Information

The principal author of this final rule is Charles N. Bacon, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority and Issuance

Accordingly, under the authority contained in 27 U.S.C. 205, the Director is amending 27 CFR Part 9 as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The table of sections in 27 CFR Part 9 is amended by adding § 9.54. As amended, the table of sections reads as follows:

Sec.

* * * * *

Subpart C—Approved American Viticultural Areas

* * * * *

9.54 Santa Ynez Valley.

* * * * *

Par. 2. Subpart C is amended by adding § 9.54 which reads as follows:

§ 9.54 Santa Ynez Valley.

(a) *Name.* The name of the viticultural area described in this section is "Santa Ynez Valley."

(b) *Approved maps.* The appropriate maps for determining the boundaries of the Santa Ynez Valley viticultural area are 12 U.S.G.S. quadrangle maps. They are entitled:

(1) "Figueroa Mountain, Cal.", 7.5 minute series, edition of 1959;

(2) "Foxen Canyon, Cal.", 7.5 minute series, edition of 1964;

(3) "Lake Cachuma, Cal.", 7.5 minute series, edition of 1959;

(4) "Lompoc, Cal.", 7.5 minute series, edition of 1959 (photorevised 1974);

(5) "Lompoc Hills, Cal.", 7.5 minute series, edition of 1959;

(6) "Los Alamos, Cal.", 7.5 minute series, edition of 1959;

(7) "Los Olivos, Cal.", 7.5 minute series, edition of 1959 (photoinspected 1974);

(8) "Santa Rosa Hills, Cal.", 7.5 minute series, edition of 1959;

(9) "Santa Ynez, Cal.", 7.5 minute series, edition of 1959 (photorevised 1974);

(10) "Solvang, Cal.", 7.5 minute series, edition of 1959 (photorevised 1974);

(11) "Zaca Creek, Cal.", 7.5 minute series, edition of 1959; and

(12) "Zaca Lake, Cal.", 7.5 minute series, edition of 1964.

(c) *Boundaries.* The Santa Ynez Valley viticultural area is located within Santa Barbara County, California. The beginning point is found on the "Los Alamos, California" U.S.G.S. map where California Highway 246 (indicated as Highway 150 on the Los Alamos map) intersects with the 120°22'30" longitude line.

(1) Then north following the 120°22'30" longitude line to Cebada Canyon Road.

(2) Then northeast following Cebada Canyon Road and an unnamed jeep trail to the northern boundary of Section 9, T. 7 N., R. 33 W.

(3) Then east following the northern boundaries of Sections 9, 10, 11, 12, 7, and 8 to the northeast corner of Section 8, T. 7 N., R. 33 W.

(4) Then south following the eastern boundaries of Sections 8 and 17 to the intersection with the boundary dividing the La Laguna and San Carlos de Jonata Land Grants.

(5) Then east following the boundary between the La Laguna and the San Carlos de Jonata Land Grants to the intersection with Canada de Santa Ynez.

(6) Then northeast in a straight line for approximately 3.6 miles to Benchmark 947 at U.S. Highway 101.

(7) Then northeast in a straight line for approximately 2.6 miles to the southwest corner of the La Zaca Land Grant.

(8) Then following the boundary of the La Zaca Land Grant north, then east to its northeast corner.

(9) Then east in a straight line for approximately 2.0 miles to the point of intersection of the La Laguna and Sisquoc Land Grants with the Los Padres National Forest.

(10) Then following the boundary of the Los Padres National Forest south, east, and south until it intersects with the eastern boundary of Section 29, T. 7 N., R. 29 W.

(11) Then south following the eastern boundaries of Sections 29, 32, 5, 8, and 17 to the boundary of the Cachuma Recreation Area at Bitt Benchmark 1074.

(12) Then following the boundary of the Cachuma Recreation Area west and south to the point of intersection with the Los Padres National Forest.

(13) Then south and west following the boundary of the Los Padres National Forest to its intersection with the Las Cruces Land Grant at the southwest corner of Section 12, T. 5 N., R. 32 W.

(14) Then north following the boundary of the Las Cruces Land Grant to the southeast corner of Section 26, T. 6 N., R. 32 W.

(15) Then west following the southern boundaries of Sections 26, 27, 28, and 29 to the intersection with the northern boundary of the San Julian Land Grant at the southwestern corner of Section 29, T. 6 N., R. 32 W.

(16) Then northwest following the boundary of the San Julian Land Grant to its intersection with the 120° 22'30" longitude line.

(17) Then northwest in a straight line for approximately 3.2 miles to the point where Santa Rosa Road intersects Salsipuedes Creek.

(18) Then following Salsipuedes Creek downstream to the point of confluence with the Santa Ynez River.

(19) Then northeast in a straight line for approximately 1.4 miles to an unnamed hill, elevation 597 feet.

(20) Then northeast in a straight line for approximately 1.7 miles to the point of beginning.

Signed: March 24, 1983.

W. T. Drake,
Acting Director.

Approved: April 4, 1983.

David Q. Bates,
Deputy Assistant Secretary (Operations)

BILLING CODE 4810-31-M

Office of the Secretary

31 CFR Part 3

Legal Review of Certain Small Tort Claims

AGENCY: Department of the Treasury.

ACTION: Final rule.

SUMMARY: Under the existing regulations governing claims against the Department of the Treasury under the Federal Tort Claims Act, all claims must be forwarded to the legal division of the bureau or office out of whose activities the claim arose. This final rule amends 31 CFR 3.3 such that legal review of certain claims for less than $500 will not be mandatory.

The Treasury Department has determined that certain small tort claims do not merit the time and expense of legal review. By eliminating the requirement of legal review of certain small tort claims, Treasury Department attorneys will be able to spend more time on significant tasks, and thus a more efficient allocation of employee efforts will be realized.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Jordan Luke, Assistant General Counsel (Enforcement & Operations), Room 2310, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, D.C. 20220 (202/566–5404)

SUPPLEMENTARY INFORMATION:

This final rule would eliminate the requirement of legal review of certain tort claims under $500. Each bureau or office of the Treasury Department will retain the right to subject all tort claims to legal review. Thus, this rule is optional; it is intended only for those bureaus or offices that determine that legal review of certain small tort claims is not necessary.

Under this rule, each bureau or office may elect to process tort claims for less than $500 without legal review, if such claims do not involve personal injuries or automobile damage, or do not arise out of an incident that is likely to result in multiple claims or claimants.

Authority

This final rule is promulgated under the authority of 28 U.S.C. 2672.

Executive Order 12291

This final rule is not subject to the provisions of Executive Order 12291 because the rule is related to agency organization, management or personnel.

Regulatory Flexibility Act

This rule is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because no notice of proposed rulemaking is required under 5 U.S.C. 553. A notice of proposed rulemaking is not required because this rule addresses rules of agency procedure: The processing of certain small tort claims.

Drafting Information

The principal author of this document was Ramon Estrada, Office of the General Counsel, Department of the Treasury. However, other Treasury personnel participated in its development.

List of Subjects in 31 CFR Part 3

Claims, Federal tort claims; Claims regulations.

Promulgation of Regulations

Part 3, Treasury Regulations (31 CFR Part 3) is amended as set forth.

BILLING CODE 4810-25-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[A–4–FRL 2347–2]

Standards of Performance for New Stationary Sources; Supplemental Delegation of Authority to Mississippi

AGENCY: Environmental Protection Agency.

ACTION: Informational notice.

SUMMARY: On December 23, 1982, the State of Mississippi requested a delegation of authority for the implementation and enforcement of several additional categories of New Source Performance Standards.

EPA's review of Mississippi's laws, rules, and regulations shows them to be adequate for the implementation and enforcement of these Federal standards, and the Agency has made the delegations as requested.

EFFECTIVE DATE: The effective date of the delegations of authority to Mississippi is March 25, 1983.

ADDRESSES: Copies of the request for delegation of authority and EPA's letter of delegation are available for public inspection at EPA's Region IV Office, 345 Courtland Street, N.E., Atlanta, Georgia 30365.

All reports required pursuant to the newly delegated standards should not be submitted to the EPA Region IV office, but should instead be submitted to the following address: Mr. Dwight Wylie, Chief, Air Quality Control, Bureau of Pollution Control, P.O. Box 10385, Jackson, Mississippi 39209.

FOR FURTHER INFORMATION CONTACT: Denise W. Pack, 404–881–3286.

SUPPLEMENTARY INFORMATION: Sections 101, 110, and 111 of the Clean Air Act authorize the Administrator to delegate his authority to implement and enforce the National Standards of Performance for New Stationary Sources (NSPS) to any State which has submitted adequate implementation and enforcement procedures.

On November 30, 1981, EPA delegated to the State of Mississippi the authority to implement the Standards of Performance for New Stationary Sources (NSPS). On December 23, 1982, Mississippi requested that EPA delegate the authority for the NSPS categories that had been promulgated subsequent to the original delegation of November 30, 1981:

1. *Lead Acid Battery Manufacture, 40 CFR, Part 60, Subpart KK,* as promulgated on April 16, 1982.
2. *Phosphate Rock Operations, 40 CFR, Part 60, Subpart NN,* as promulgated on April 16, 1982.
3. *Asphalt Processing and Asphalt Roofing Manufacture, 40 CFR, Part 60, Subpart UU,* as promulgated on August 6, 1982.
4. *Industrial Surface Coating, Large Appliances, 40 CFR, Part 60, Subpart SS,* as promulgated on October 27, 1982.
5. *Surface Coating-Metal Furniture, 40 CFR, Part 60, Subpart EE,* as promulgated on October 29, 1982.
6. *Metal Coil Surface Coating, 40 CFR, Part 60, Subpart TT,* as promulgated on November 1, 1982.

Action. I reviewed all of the pertinent Mississippi laws, rules, and regulations and found them to be adequate for the implementation and enforcement of

these categories of NSPS. I therefore delegated to the State of Mississippi my authority for the source categories listed above on March 25, 1983.

The Office of Management and Budget has exempted this delegation from the requirements of Section 3 of Executive Order 12291.

This notice is issued under the authority of Sections 101, 110, and 111 and of the Clean Air Act, as amended (42 U.S.C 7401, 7410, 7411, and 7601).

Dated: April 4, 1983.

John A. Little,

Acting Regional Administrator.

40 CFR Part 180

[PP 2E2653/R548; PH-FRL 2348-6]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Cyano(3-Phenoxyphenyl) Methyl 4-Chloro-Alpha-(1-Methylethyl) Benzeneacetate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for residues of the insecticide cyano(3-phenoxyphenyl)methyl 4-chloro-alpha- (1-methylethyl)benzeneacetate in or on the raw agricultural commodities eggplant and peppers. The regulation to establish maximum permissible levels for residues of the insecticide in or on the commodities was requested in a petition by the Interregional Research Project No. 4 (IR-4).

EFFECTIVE DATE: April 15, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs, Emergency Response Section, Registration Division (TS-767C), Environmental Protection Agency, Rm. 716B, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202; (703-557-1192).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule published in the **Federal Register** of March 16, 1983 (48 FR 11132) that announced that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition number 2E2653 to EPA on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of Florida, Massachusetts, Maryland, New Jersey and Puerto Rico.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for residues of the insecticide cyano(3-phenoxyphenyl)methyl 4-chloro-alpha-(1-methylethyl)benzeneacetate in or on the raw agricultural commodities eggplant and peppers at 1.0 ppm.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule.

The pesticide is considered useful for the purpose for which the tolerances are sought. It is concluded that the tolerances would protect the public health and are established as set forth below.

Any person adversely affected by this regulation may within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

41 CFR Ch. 1

[FPR Temp. Reg. 69]

Patents; Temporary Regulation

AGENCY: General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This temporary regulation prescribes revised guidance regarding the rights of the Government and its contractors in patents under research and development contracts. The basis for this temporary regulation is President Reagan's February 18, 1983, Memorandum on Government Patent Policy. The intended effect is to extend in principle the current implementation of Public Law 96-517 beyond small businesses and non-profit organizations.

DATES:

Effective date: April 5, 1983, but may be observed earlier.

Expiration date: April 5, 1985.

FOR FURTHER INFORMATION CONTACT: Philip G. Read, Director, Office of Federal Procurement Regulations (VR), Office of Acquisition Policy, (202-523-4755).

SUPPLEMENTARY INFORMATION:

a. On February 18, 1983, President Reagan issued a Memorandum to the Heads of Executive Departments and Agencies that established a new Government Patent Policy. The new policy replaces the 1971 Presidential Patent Policy Statement that formed the basis for the patent rights clauses of the Federal Procurement Regulations (FPR) in section 1-9.107. Accordingly, interim instructions are necessary pending a full modification of FPR sections 1-9.107-1 through 1-9.107-6.

b. The primary thrust of President Reagan's Memorandum is that, to the extent permitted by law, agency patent policy concerning the disposition of rights to inventions made under federally funded research and development contracts, grants, and cooperative agreements shall be the

same or substantially the same as applied to small business firms and nonprofit organizations under Chapter 38 of Title 35 of the U.S. Code (Pub. L. 96–517). As a result, the new Patent Policy Memorandum provides recipients of Government contracts, grants, and cooperative agreements for the performance of research and development activities with a first option to retain title to inventions made under such arrangements, except in those situations provided for in 35 U.S.C. 202(a).

c. The Presidential Memorandum also provides that where an agency makes certain determinations, the rights of the Government or obligations of the recipient of the research and development contract, grant, or cooperative agreement, set forth in 35 U.S.C. 202–204, may be waived or omitted. These interim instructions do not specifically implement this provision of the Presidential Memorandum inasmuch as implementation should be undertaken through the normal FPR deviation procedures.

In 41 CFR Chapter 1, FPR Temporary Regulation is added to the Appendix at the end of the chapter.

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)))

Dated: April 5, 1983.

Ray Kline,

Acting Administrator of General Services.

Federal Procurement Regulations Temporary Regulation 99

April 5, 1983.

To: Heads of Federal Agencies

Subject: Patents

1. *Purpose.* This temporary regulation implements President Reagan's February 18, 1983, Memorandum on Government Patent Policy.

2. *Effective date.* This regulation is effective April 5, 1983, but may be observed earlier.

3. *Expiration date.* This regulation expires April 5, 1985.

4. *Background.*

a. On February 18, 1983, President Reagan issued a Memorandum to the Heads of Executive Departments and Agencies that established a new Government Patent Policy.[1] The new policy replaces the 1971 Presidential Patent Policy Statement that formed the basis for the patent rights clauses of the Federal Procurement Regulations (FPR) in section 1–9.107. Accordingly, interim instructions are necessary pending a full modification of FPR sections 1–9.107–1 through 1–9.107–6.

b. The primary thrust of President Regan's Memorandum is that, to the extent permitted by law, agency patent policy concerning the disposition of rights to inventions made under federally funded research and development contracts, grants, and cooperative agreements shall be the same or substantially the same as applied to small business firms and nonprofit organizations under Chapter 38 of Title 35 of the U.S. Code (P. L. 96–517). As a result, the new Patent Policy Memorandum provides recipients of Government contracts, grants, and cooperative agreements for the performance of research and development activities with a first option to retain title to inventions made under such arrangements, except in those situations provided for in 35 U.S.C. 202(a).

c. The Presidential Memorandum also provides that where an agency makes certain determinations, the rights of the Government or obligations of the recipient of the research and devlopment contract, grant, or cooperative agreement, set forth in 35 U.S.C. 202–204, may be waived or omitted. These interim instructions do not specifically implement this provision of the Presidential Memorandum inasmuch as implementation should be undertaken through the normal FPR deviation procedures.

5. *Explanation of changes.* The policies and procedures in Subpart 1–9.1 are modified by the instructions in this temporary regulation.

a. The patent rights clause in contracts with small business firms and nonprofit organizations shall be in accordance with OMB Circular A–124.

b. Each contract with other than a small business firm or nonprofit organization that has as a purpose the performance of experimental, developmental, or research work, and is to be performed in the United States, its possessions, or Puerto Rico, shall contain the patent rights clause at FPR § 1–9.107–5(b) unless it is determined in accordance with paragraph c.(1) of this regulation that the patent rights clause of § 1–9.107–5(a) is appropriate, with both clauses modified in accordance with paragraph 5.(e) of this regulation.

c. (1) A contract, with other than a small business firm or nonprofit organization, may contain the patent rights clause at FPR § 1–9.107–5(a):

(a) when the contract is for the operation of a Government-owned research or production facility; or

(b) in exceptional circumstances when it is determined by the Agency that restriction or elimination of the contractor's right to retain title will better promote the policy and objectives of the Presidential Memorandum of Government Patent Policy of February 18, 1983; or

(c) when it is determined by a Government authority which is authorized by statute or Executive order to conduct foreign intelligence or counter-intelligence activities that the restriction or elimination of the contractor's right to retain title is necessary to protect the security of such activities.

(2) When it is determined in accordance with paragraph 7(a) of OMB Circular A–124 that alternative provisions are appropriate in a contract with a small business firm or nonprofit organization, the patent rights clause at FPR § 1–9.107–5(a) may be used in the contract.

d. For arrangements other than contracts, such as grants and cooperative agreements, with other than small business firms or nonprofit organizations, it is recommended that the patent rights clause of OMB Circular A–124 or FPR § 1–9.107–5(b), as appropriate, be used in cooperative agreements.

e. In using the clause at either FPR § 1–9.107–5(b) or § 1–9.107–5(a), the following modifications are to be made:

(1) To ensure proper flow-down of the applicable patent rights clause, subparagraph (i)(2) should be rewritten as follows:

"(2) Unless otherwise authorized or directed by the Government Contracting Officer in any subcontract hereunder where a purpose of the subcontract is the conduct of experimental, developmental, or research work, the Contractor shall include this patent rights clause modified to identify the parties in a subcontract with other than a small business firm or nonprofit organization; or the patent rights clause of OMB Circular A–124 modified to identify the parties in any subcontract with a small business firm or nonprofit organization. In event of refusal by a subcontractor to accept the proffered clause, the Contractor:"

(2) The following should be substituted for subparagraph (c)(i):

"(1) Hereby grants to the Government a nonexclusive, nontransferrable, paid-up license to make, use, and sell each subject invention throughout the world by or on behalf of the Government of the United States."

6. *Comments invited.* Agencies and interested parties are invited to comment on this regulation during the 30 day period following publication in the Federal Register. Consideration will be given to the comments in the preparation of a permanent amendment of the FPR. Comments should be forwarded to Philip G. Read, General Services Administration (VR), Washington, D.C. 20405.

February 10, 1982.

Circular No. A–124

Note.—OMB Circular A–124 was originally published in the **Federal Register** of February 19, 1982 at 47 FR 7560.

To the Heads of Executive Departments and Establishments

Subject: Patents—Small Business Firms and Nonprofit Organizations

1. *Purpose.* This Circular provides policies, procedures, and guidelines with respect to inventions made by small business firms and nonprofit organizations, including universities, under funding agreements with Federal agencies where a purpose is to perform experimental, developmental, or research work.

2. *Rescissions.* This Circular supersedes OMB Bulletin 81–22 effective March 1, 1982.

3. *Authority.* This Circular is issued pursuant to the authority contained in 35 U.S.C. § 206 (§ 6 of P.L. 96–517, "The Patent and Trademark Amendments of 1980").

4. *Background.* After many years of public debate on means to enhance the utilization of the results of Government funded research, Public Law 96–517 was enacted. This Act gives non-profit organizations and small businesses, with limited exceptions, a first right of refusal to title in inventions they have made in performance of Government grants and contracts. The Act takes precedence over

[1] See the weekly compilation of Presidential Documents, Vol. 19, No. 7, p. 252.

approximately 26 conflicting statutory and administrative policies.

Under the Act, the Office of Federal Procurement Policy (OFPP) is responsible for the issuance of the regulations implementing 35 U.S.C. § 202–204 after consultation with the Office of Science and Technology Policy (OSTP). On July 2, 1981, OMB Bulletin 81–22 was issued to provide interim regulations while agency and public comments were sought. Based on a review of these comments, this Circular is issued to establish permanent implementing regulations and a standard patent rights clause.

5. *Policy and Scope.* This Circular takes effect on March 1, 1982, and will be applicable to all funding agreements with small business firms and domestic nonprofit organizations executed on or after that date. This includes subcontracts at any tier made after March 1, 1982, with small business firms and nonprofit organizations even if the prime funding agreement was made prior to March 1, 1982. Unless prohibited by law, agencies are encouraged to treat subject inventions made under funding agreements made prior to July 1, 1981, in substantially the same manner as contemplated by P.L. 96–517 and this Circular for inventions made under funding agreements entered into subsequent to July 1, 1981. This can be accomplished through the granting of waivers of title on terms and conditions substantially similar to those set forth in the standard clause of Attachment A.

Agencies should be alert to determining whether amendments made after March 1, 1982, to funding agreements entered into prior to July 1, 1981, result in new funding agreements subject to this Circular and the Act. Renewals and continuations after March 1, 1982, of funding agreements entered into prior to July 1, 1981, should be normally treated as new funding agreements.

This Circular is intended to establish uniform and coordinated implementation of 35 U.S.C. § 200–206 so as to foster the policy and objectives set forth in 35 U.S.C. § 200.

6. *Definitions.* As used in this Circular—

a. The term "funding agreement" means any contract, grant, or cooperative agreement entered into between any Federal agency, other than the Tennessee Valley Authority, and any contractor for the performance of experimental, developmental, or research work funded in whole or in part by the Federal Government. Such term includes any assignment, substitution of parties, or subcontract of any type entered into for the performance of experimental, developmental, or research work under a funding agreement, as herein defined.

b. The term "contractor" means any person, small business firm or nonprofit organization that is a party to a funding agreement.

c. The term "invention" means any invention or discovery which is or may be patentable or otherwise protectable under Title 35 of the United States Code.

d. The term "subject invention" means any invention of a contractor conceived or first actually reduced to practice in the performance of work under a funding agreement.

e. The term "practical application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

f. The term "made" when used in relation to any invention means the conception or first actual reduction to practice of such invention.

g. The term "small business firm" means a small business concern as defined at section 2 of Public Law 85–536 (15 U.S.C. § 632) and implementing regulations of the Administrator of this Circular, the size standards for small business concerns involved in Government procurement and subcontracting at 13 CFR 121.3–8 and 121.3–12, respectively, will be used.

h. The term "nonprofit organization" means universities and other institutions of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. § 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. § 501(a)) or any nonprofit scientific or educational organization qualified under a state nonprofit organization statute.

7. *Use of the Patent Rights (Small Business Firm or Nonprofit Organization) (March 1982) Clause.*

a. Each funding agreement awarded to a small business firm or domestic nonprofit organization which has as a purpose the performance of experimental, developmental or research work shall contain the "Patent Rights (Small Business Firm or Nonprofit Organization) (March 1982)" clause set forth in Attachment A with such modifications and tailoring as may be authorized in Part 8, except that the funding agreement may contain alternative provisions—

(1) when the funding agreement is for the operation of a Government-owned research or production facility; or

(2) in exceptional circumstances when it is determined by the agency that restriction or elimination of the right to retain title to any subject invention will better promote the policy and objectives of Chapter 38 of Title 35 of the United States Code; or

(3) When it is determined by a Government authority which is authorized by statute or executive order to conduct foreign intelligence or counterintelligence activities that the restriction or elimination of the right to retain title to any subject invention is necessary to protect the security of such activities.

b. (1) Any determination under Part 7.a.(2) of this Circular will be in writing and accompanied by a written statement of facts justifying the determination. The statement of facts will contain such information as the funding Federal agency deems relevant and, at minimum, will (i) identify the small business firm or nonprofit organization involved, (ii) describe the extent to which agency action restricted or eliminated the right to retain title to a subject invention, (iii) state the facts and rationale supporting the agency action, (iv) provide supporting documentation for those facts and rationale, and (v) indicate the nature of any objections to the agency action and provide any documentation in which those objections appear. A copy of each such determination and written statement of facts will be sent to the Comptroller General of the United States within 30 days after the award of the applicable funding agreement. In cases of determinations application to small business firms, copies will also be sent to the Chief Counsel for Advocacy of the Small Business Administration.

(2) To assist the Comptroller General to accomplish his or her responsibilities under 35 U.S.C. § 202, each Federal agency that enters into any funding agreements with nonprofit organizations or small business firms during the applicable reporting period shall accumulate and, at the request of the Comptroller General, provide the Comptroller General or his or her duly authorized representative the total number of prime funding agreements entered into with small business firms or nonprofit organizations that contain the patent rights clause of Attachment A during each period of October 1 through September 30, beginning October 1, 1982.

c. (1) Agencies are advised that Part 7.a. applies to subcontracts at any tier under prime funding agreements with contractors that are other than small business firms or nonprofit organizations. Accordingly, agencies should take appropriate action to ensure that this requirement is reflected in the patent clauses of such prime funding agreements awarded after March 1, 1982.

(2) In the event an agency has outstanding prime funding agreements that do not contain patent flow-down provisions consistent with either this Circular or OMB Bulletin 81–22 (if it was applicable at the time the funding agreement was awarded), the agency shall take appropriate action to ensure that small business firms or domestic nonprofit organizations subcontractors under such prime funding agreements that received their subcontracts after July 1, 1981, will receive rights in their subject inventions that are consistent with P.L. 96–517 and this Circular. Appropriate actions might include (i) amendment of prime contracts and/or subcontracts; (ii) requiring the inclusion of the clause of Attachment A as a condition of agency approval of a subcontract; or (iii) the granting of title to the subcontractor to identified subject inventions on terms substantially the same as contained in the clause of Attachment A in the event the subcontract contains a "deferred determination" or "acquisition by the Government" type of patent rights clause.

d. To qualify for the clause of Attachment A, a prospective contractor may be required by an agency to certify that it is either a small business firm or a domestic nonprofit organization. If the agency has reason to question the status of the prospective contractor as a small business firm or domestic nonprofit organization, it may file a protest in accordance with 13 C.F.R. 121.3–5 if small business firm status is questioned or require the prospective contractor to furnish evidence to establish its status as a domestic nonprofit organization.

8. *Instructions for Modification and Tailoring of the Clause of Attachment A.*

a. Agencies should complete the blank in paragraph g.(2) of the clause of Attachment A in accordance with their own or applicable Government-wide regulations such as the FPR or DAR. The flow-down provisions of the clause cited by the agency should, of course, reflect the requirement of Part 7.c.(1).

b. Agencies should complete paragraph 1. "Communications" at the end of the clause of Attachment A by designating a central point of contact for communications on matters relating to the clause. Additional instructions on communications may also be included in paragraph 1.

c. Agencies may replace the italicized or underlined words and phrases with those appropriate to the particular funding agreement. For example *"contract"* could be replaced by "grant", *"contractor"* by "grantee", and *"Contracting officer"* by "grants officer." Depending on its use, *"Federal agency"* can be replaced either by the identification of the agency or by the specification of the particular office or official within that agency.

d. When the agency head or duly authorized designee determines at the time of contracting with a small business firm or nonprofit organization that it would be in the national interest to acquire the right to sublicense foreign governments or international organizations pursuant to any existing treaty or agreement, a sentence may be added at the end of paragraph b. of the clause of Attachment A as follows:

"This license will include the right of the Government to sublicense foreign governments and international organizations pursuant to the following treaties or international agreements: ——; or pursuant to any future treaties or agreements with foreign governments or international organizations."

The blank in the above should be completed with the names of applicable existing treaties or international agreements. The above language is not intended to apply to treaties or agreements that are in effect on the date of the award which are not listed. The above language may be modified by agencies by deleting the reference to future treaties or agreements or by otherwise more narrowly defining classes of future treaties or agreements. The language may also be modified to make clear that the rights granted to the foreign government or international organization may be for additional rights beyond a license or sublicense if so required by the applicable treaty or international agreement. For example, in some cases exclusive licenses or even the assignment of title in the foreign country involved might be required. Agencies may also modify the language above to provide for the direct licensing by the contractor of the foreign government or international organization.

e. To the extent not required by other provisions of the funding agreement, agencies may add additional subparagraphs to paragraph (f) of the patent rights clause of Attachment A to require the contractor to do one or more of the following:

(1) Provide periodic (but no more frequently than annually) listings of all subject inventions required to be disclosed during the period covered by the report;

(2) Provide a report prior to the close-out of a funding agreement listing all subject inventions or stating that there were none;

(3) Provide notification of all subcontracts for experimental, developmental, or research work; and

(4) Provide, upon request, the filing date, serial number and title; a copy of the patent application; and patent number and issue date for any subject invention in any county in which the contractor has applied for patents.

Part 9. *Publication or Release of Invention Disclosures.*

a. 35 U.S.C. § 205 provides as follows:

"Federal agencies are authorized to withhold from disclosure to the public information disclosing any invention in which the Federal Government owns or may own a right, title, or interest (including a nonexclusive license) for a reasonable time in order for a patent application to be filed. Furthermore, Federal agencies shall not be required to release copies of any document which is part of an application for patent filed with the United States Patent and Trademark Office or with any foreign patent office."

b. To the extent authorized by 35 U.S.C. § 205, agencies shall not disclose to third parties pursuant to requests under the Freedom of Information Act (FOIA) any information disclosing a subject invention for a reasonable time in order for a patent application to be filed. With respect to subject inventions of contractors that are small business firms or nonprofit organizations, a reasonable time shall be the time during which an initial patent application may be filed under paragraph c. of the clause of Attachment A or such other clause that may be used in the funding agreement. However, an agency may disclose such subject inventions under the FOIA, at its discretion, after a contractor has elected not to retain title or after the time in which the contractor is required to make an election if the contractor has not made an election within that time. Similarly, an agency may honor an FOIA request at its discretion if it finds that the same information has previously been published by the inventor, contractor, or otherwise. If the agency plans to file itself when the contractor has not elected title, it may, of course, continue to avail itself of the authority of 35 U.S.C. § 205.

c. As authorized by 35 U.S.C. § 205, Federal agencies shall not release copies of any document which is part of an application for patent filed on a subject invention to which a small business firm or nonprofit organization elected to retain title.

d. A number of agencies have policies to encourage public dissemination of the results of work supported by the agency through publication in Government or other publications of technical reports of contractors or others. In recognition of the fact that such publication, if it included descriptions of a subject invention, could create bars to obtaining patent protection, it is the policy of the executive branch that agencies will not include in such publication programs, copies of disclosures of inventions submitted by small business firms or nonprofit organizations, pursuant to paragraph c. of the clause of Attachment A, except that under the same circumstances under which agencies are authorized to release such information pursuant to FOIA requests under Part 9.b. above, agencies may publish such disclosures.

e. Nothing in this Part is intended to preclude agencies from including in the publication activities described in the first sentence of Part 9.d., the publication of materials describing a subject invention to the extent such materials were provided as part of a technical report or other submission of the contractor which were submitted independently of the requirements of the patent rights provisions of the contract. However, if a small business firm or nonprofit organization notifies the agency that a particular report or other submission contains a disclosure of a subject invention to which it has elected or may elect title, the agency will use reasonable efforts to restrict its publication of the material for six months from date of its receipt of the report or submission or, if earlier, until the contractor has filed an initial patent application. Agencies, of course, retain the discretion to delay publication for additional periods of time.

f. Nothing in this Part 9 is intended to limit the authority of agencies provided in 35 U.S.C. § 205 in circumstances not specifically described in this Part 9.

10. *Reporting on Utilization of Subject Inventions.*

a. Paragraph h. of the clause of Attachment A provides that agencies have the right to receive periodic reports from the contractor on utilization of inventions. In accordance with such instructions as may be issued by the Department of Commerce, agencies shall obtain such information from their contractors. Pending such instructions, agencies should not impose reporting requirements. The Department of Commerce and the agencies, in conjunction with representatives of small business and nonprofit organizations, shall work together to establish a uniform periodic reporting system.

b. To the extent any such data or information supplied by the contractor is considered by the contractor, or its licensee or assignee, to be privileged and confidential and is so marked, agencies shall not, to the extent permitted by 35 U.S.C. § 202(c)(5), disclose such information to persons outside the Government.

11. *Retention of Rights by Inventor.* Agencies which allow an inventor to retain rights to a subject invention made under a funding agreement with a small business firm or nonprofit organization contractor, as authorized by 35 U.S.C. § 202(d), will impose upon the inventor at least those conditions that would apply to a small business firm contractor under paragraphs d. (ii) and (iii); f. (4); h.; i.; and j. of the clause of Attachment A.

12. *Government Assignment to Contractor of Rights in Invention of Government Employee.* In any case when a Federal employee is a co-inventor of any invention made under a funding agreement with a small business firm or nonprofit organization and the Federal agency employing such co-

inventor transfers or reassigns the right it has acquired in the subject invention from its employee to the contractor as authorized by 35 U.S.C. 202(e), the assignment will be made subject to the same conditions as would apply to the contractor under the clause of Attachment A.

13. *Exercise of March-in Rights.*

a. The following procedures shall govern the exercise of the march-in rights of the agencies set forth in 35 U.S.C. § 203 and the clause at Attachment A.

b. Whenever an agency receives information that it believes might warrant the exercise of march-in rights, before initiating any march-in proceeding in accordance with the procedures of Part 13.c.-h. below, it shall notify the contractor in writing of the information and request informal written or oral comments from the contractor. In the absence of any comments from the contractor within 30 days, the agency may, at its discretion, proceed with the procedures below. If a comment is received, whether or not within 30 days, then the agency shall, within 60 days after it receives the comment, either initiate the procedures below or notify the contractor, in writing, that it will not pursue march-in rights based on the information about which the contractor was notified.

c. A march-in proceeding shall be initiated by the issuance of a written notice by the agency to the contractor and its assignee or exclusive licensee, as applicable, stating that the agency is considering the exercise of march-in rights. The notice shall state the reasons for the proposed march-in in terms sufficient to put the contractor on notice of the facts upon which the action would be based and shall specify the field or fields of use in which the agency is considering requiring licensing. The notice shall advise the contractor (assignee or exclusive licensee) of its rights, as set forth in this Circular and in any supplemental agency regulations. The determination to exercise march-in rights shall be made by the head of the agency or designee, except as provided in part 13.j. below.

d. Within 30 days after receipt of the written notice of march-in, the contractor (assignee or exclusive licensee) may submit, in person, in writing, or through a representative, information or argument in opposition to the proposed march-in, including any additional specific information which raises a genuine dispute over the material facts upon which the march-in is based. If the information presented raises a genuine dispute over the material facts, the head of the agency or designee shall undertake or refer the matter to another official for fact-finding.

e. Fact-finding shall be conducted in accordance with the procedures established by the agency. Such procedures shall be as informal as practicable and be consistent with principles of fundamental fairness. The procedures should afford the contractor the opportunity to appear with counsel, submit documentary evidence, present witnesses and confront such persons as the agency may present. A transcribed record shall be made and shall be available at cost to the contractor upon request. The requirement for a transcribed record may be waived by mutual agreement of the contractor and the agency. Any portion of a fact-finding hearing that involves testimony or evidence relating to the utilization or efforts at obtaining utilization that are being made by the contractor, its assignee, or licensees shall be closed to the public, including potential licensees.

f. The official conducting the fact-finding shall prepare written findings of fact and transmit them to the head of the agency or designee promptly after the conclusion of the fact-finding proceeding. A copy of the findings of fact shall be sent to the contractor (assignee or exclusive licensee) by registered or certified mail.

g. In cases in which fact-finding has been conducted, the head of the agency or designee shall base his or her determination on the facts found, together with any other information and argument submitted by the contractor (assignee or exclusive licensee), and any other information in the administrative record. The consistency of the exercise of march-in rights with the policy and objectives of 35 U.S.C. § 200–206 and this Circular shall also be considered. In cases referred for fact-finding, the head of the agency or designee may reject only those facts that have been found that are clearly erroneous. Written notice of the determination whether march-in rights will be exercised shall be made by the head of the agency or designee and sent to the contractor (assignee or exclusive licensee) by certified or registered mail within 90 days after the completion of fact-finding or the proceedings will be deemed to have been terminated and thereafter no march-in based on the facts and reasons upon which the proceeding was initiated may be exercised.

h. An agency may, at any time, terminate a march-in proceeding if it is satisfied that it does not wish to exercise march-in rights.

i. The procedures of this Part shall also apply to the exercise of march-in rights against inventors receiving title to subject inventions under 35 U.S.C. § 202(d) and, for that purpose, the term "contractor" as used in this Part shall be deemed to include the inventor.

j. Notwithstanding the last sentence of Part 13.c., a determination to exercise march-in in cases where the subject invention was made under a contract may be made initially by the contracting officer in accordance with the procedures of the Contract Disputes Act. In such cases, the procedures of the Contract Disputes Act will apply in lieu of those in Parts 13.d.–g. above (except that the last sentence of Part 13.e. shall continue to apply). However, when the procedures of this Part 13.j. are used, the contractor, assignee, or exclusive licensee will not be required to grant a license and the Government will not grant any license until after either: (1) 90 days from the date of the contractor's receipt of the contracting officer's decision, if no appeal of the decision has been made to an agency board of contract appeals, or if no action has been brought under Section 10 of the Act within that time; or (2) the board or court, as the case may be, has made a final decision in cases when an appeal or action has been brought within 90 days of the contracting officer's decision.

k. Agencies are authorized to issue supplemental procedures, not inconsistent herewith, for the conduct of march-in proceedings.

14. *Appeals.*

a. The agency official initially authorized to take any of the following actions shall provide the contractor with a written statement of the basis for his or her action at the time the action is taken, including any relevant facts that were relied upon in taking the action:

(1) A refusal to grant an extension under paragraph c.(4) of the clause of Attachment A.

(2) A request for a conveyance of title under paragraph d. of the clause of Attachment A.

(3) A refusal to grant a waiver under paragraph i. of the clause of Attachment A.

(4) A refusal to approve an assignment under paragraph k.(1) of the clause of Attachment A.

(5) A refusal to approve an extension of the exclusive license period under paragraph k.(2) of the clause of Attachment A.

b. Each agency shall establish and publish procedures under which any of the agency actions listed in Part 14.a. above may be appealed to the head of the agency or designee. Review at this level shall consider both the factual and legal basis for the action and its consistency with the policy and objectives of 35 U.S.C. § 200–206 and this Circular.

c. Appeals procedures established under Part 14.b. above shall include administrative due process procedures and standards for fact-finding at least comparable to those set forth in Part 13.e.–g. of this Circular whenever there is a dispute as to the factual basis for an agency request for a conveyance of title under paragraph d. of the clause of Attachment A, including any dispute as to whether or not an invention is a subject invention.

d. To the extent that any of the actions described in Part 14.a. are subject to appeal under the Contracts Dispute Act, the procedures under that Act will satisfy the requirements of Parts 14.b. and c. above.

15. *Licensing of Background Patent Rights to Third Parties.*

a. A funding agreement with a small business firm or a domestic nonprofit organization will not contain a provision allowing a Federal agency to require the licensing to third parties of inventions owned by the contractor that are not subject inventions unless such provision has been approved by the agency head and a written justification has been signed by the agency head. Any such provision will clearly state whether the licensing may be required in connection with the practice of a subject invention, a specifically identified work object, or both. The agency head may not delegate the authority to approve such provisions or to sign the justification required for such provisions.

b. A Federal agency will not require the licensing of third parties under any such provision unless the agency head determines that the use of the invention by others is necessary for the practice of a subject

invention or for the use of a work object of the funding agreement and that such action is necessary to achieve practical application of the subject invention or work object. Any such determination will be on the record after an opportunity for an agency hearing, and the contractor shall be given prompt notification of the determination by certified or registered mail.

16. *Administration of Patent Rights Clause.*

a. It is important that the Government and the contractor know and exercise their rights in subject inventions in order to ensure their expeditious availability to the public, to enable the Government, the contractor, and the public to avoid unnecessary payment of royalties, and to defend themselves against claims and suits for patent infringement. To attain these ends, contracts should be so administered that:

(1) Inventions are identified, disclosed, and an election is made as required by the contract clause;

(2) The rights of the Government in such inventions are established;

(3) When appropriate, patent applications are timely filed and prosecuted by contractors or by the Government;

(4) The rights in patent applications are documented by formal instruments such as licenses or assignments;

(5) Expeditious commercial utilization of such inventions is achieved.

b. With respect to the conveyance of license or assignments to which the Government may be entitled under the clause of Attachment A, agencies should folllow the guidance provided in 41 CFR 1–9.109–5 or 32 CFR 9–109.5.

c. In the event a subject invention is made under funding agreements of more than one agency, at the request of the contractor or on their own initiative, the agencies shall designate one agency as responsible for administration of the rights of the Government in the invention.

17. *Modification of Existing Agency Regulations.*

a. Existing agency patent regulations or other published policies concerning inventions made under funding agreements shall be modified as necessary to make them consistent with this Circular and 35 U.S.C. § 200–206. Agency regulations shall not be more restrictive or burdensome than the provisions of this Circular.

b. After March 1, 1982, this Circular and 35 U.S.C. §200–206 shall take precedence over any conflicting agency regulations or policies.

18. *Lead Agency Designation.* In order to assist the Office of Federal Procurement Policy to ensure that 35 U.S.C. § 200–206 and this Circular are implemented in a uniform and consistent manner, the following responsibilities are assigned to the Department of Commerce (hereafter referred to as "The Department"). Other agencies shall fully cooperate and assist in the carrying out of these responsibilities:

a. The Department will monitor agency regulations and procedures for consistency with the Act and this Circular, and it shall provide recommendations to OFPP and agencies whenever it finds inconsistencies.

b. The Department will consult with representatives of 19 agencies and contractors to obtain advice on—

(1) the development of the periodic reporting system required under Part 10 of this Circular, and

(2) changes in this Circular which may be needed based on actual experience under the Circular.

c. The Department will accumulate, maintain, and publish such statistics and analysis on utilization and activities under this Circular and under Government patent policies and practices generally, as may be agreed to between the Department and OFPP.

d. The Department will make recommendations to OFPP on changes that may be needed in this Circular.

19. *Sunset Review Date.* This Circular shall have a policy review no later than three years from the date of its issuance.

20. *Inquiries.* All questions or inquiries should be submitted to the Office of Management and Budget, Office of Federal Procurement Policy, telphone number (202) 395–6810.

Donald E. Sowle,

Administrator.

David A. Stockman,

Director.

Attachment A—Circular A–124

The following is the standard patent rights clause to be used in funding agreements as provided in Part 7.

Patent Rights (Small Business Firms and Nonprofit Organizations) (March 1982)

a. *Definitions.*

(1) "Invention" means any invention or discovery which is or may be patentable or otherwise protectable under Title 35 of the United States Code.

(2) "Subject Invention" means any invention of the *Contractor* conceived or first actually reduced to practice in the performance of work under this *contract.*

(3) "Practical Application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

(4) "Made" when used in relation to any invention means the conception or first actual reduction to practice of such invention.

(5) "Small Business Firm" means a small business concern as defined at Section 2 of Public Law 85–536 (15 U.S.C. § 632) and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this clause, the size standards for small business concerns involved in Government procurement and subcontracting at 13 C.F.R. 121.3–8 and 13 C.F.R. 121.3–12, respectively, will be used.

(6) "Nonprofit Organization" means a university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. § 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue code (26 U.S.C. § 501(a)) or any nonprofit scientific or educational organization qualified under a state nonprofit organization statute.

b. *Allocation of Principal Rights.*

The *contractor* may retain the entire right, title, and interest throughout the world to each subject invention subject to the provisions of this clause and 35 U.S.C. 203. With respect to any subject invention in which the *contractor* retains title, the Federal Government shall have a non-exclusive, non-transferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States the subject invention throughout the world.

c. *Invention Disclosure, Election of Title and Filing of Patent Applications by Contractor.*

(1) The *contractor* will disclose each subject invention to the *Federal agency* within two months after the inventor discloses it in writing to *contractor* personnel responsible for patent matters. The disclosure of the *agency* shall be in the form of a written report and shall identify the *contract* under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding, to the extent known at the time of the disclosure, of the nature, purpose, operation, and the physical, chemical, biological or electrical characteristics of the invention. The disclosure shall also identify any publication, on sale or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to the *agency*, the *contractor* will promptly notify the *agency* of the acceptance of any manuscript describing the invention for publication or of any on sale or public use planned by the *contractor.*

(2) The *contractor* will elect in writing whether or not to retain title to any such invention by notifying the *Federal agency* within twelve months of disclosure to the *contractor;* provided that in any case where publication, on sale or public use has initiated the one year statutory period wherein valid patent protection can still be obtained in the United States, the period for election of title may be shortened by the *agency* to a date that is no more than 60 days prior to the end of the statutory period.

(3) The *contractor* will file its initial patent application on an elected invention within two years after election or, if earlier, prior to the end of any statutory period within valid patent protection can be obtained in the United States after a publication, on sale, or public use. The *contractor* will file patent applications in additional countries within either ten months of the corresponding initial patent application or six months from the date permission is granted by the Commissioner of Patents and Trademarks to file foreign patent applications where such filing has been prohibited by a Secrecy Order.

(4) Requests for extension of the time for disclosure to the *agency*, election, and filing may, at the discretion of the *funding Federal agency*, be granted.

d. *Conditions When the Government May Obtain Title.*

(1) The *contractor* will convey to the *Federal agency*, upon written request, title to any subject invention:

(i) If the *contractor* fails to disclose or elect the subject invention within the times specified in c. above, or elects not to retain title.

(ii) In those countries in which the *contractor fails to file patent applications within the times specified in c. above; provided, however, that if the contractor* has filed a patent application in a country after the times specified in c., above, but prior to its receipt of the written request of the *Federal agency*, the *contractor* shall continue to retain title in that country.

(iii) In any country in which the *contractor* decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in reexamination or opposition proceeding on, a patent on a subject invention.

e. *Minimum Rights to Contractor.*

(1) The *contractor* will retain a nonexclusive, royalty-free license throughout the world in each subject invention to which the Government obtains title except if the *contractor* fails to disclose the subject invention within the times specified in c., above. The *contractor's* license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the *contractor* is a party and includes the right to grant sublicenses of the same scope to the extent the *contractor* was legally obligated to do so at the time the *contract* was awarded. The license is transferable only with the approval of the *funding Federal agency* except when transferred to the successor of that party of the *contractor's* business to which the invention pertains.

(2) The *contractor's* domestic license may be revoked or modified by the *funding Federal agency* to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with applicable provisions in the Federal Property Management Regulations. This license will not be revoked in that field of use or the geographical areas in which the *contractor* has achieved practical application and continues to make the benefits of the invention reasonably accessible to the public. The license in any foreign country may be revoked or modified at the discretion of the *funding Federal agency* to the extent the *contractor*, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical application in that foreign country.

(3) Before revocation or modification of the license, the *funding Federal agency* will furnish the *contractor* a written notice of its intention to revoke or modify the license, and the *contractor* will be allowed thirty days (or such other time as may be authorized by the *funding Federal agency* for good cause shown by the *contractor*) after the notice to show cause why the license should not be revoked or modified. The *contractor* has the right to appeal, in accordance with applicable regulations in the Federal Property Management Regulations concerning the licensing of Government-owned inventions, any decision concerning the revocation or modification of its license.

f. *Contractor Action To Protect the Government's Interest.*

(1) The *contractor* agrees to execute or to have executed and promptly deliver to the *Federal agency* all instruments necessary to (i) establish or confirm the rights the Government has throughout the world in those subject inventions to which the *contractor* elects to retain title, and (ii) convey title to the *Federal agency* when requested under paragraph d. above, and to enable the Government to obtain patent protection throughout the world in that subject invention.

(2) The *contractor* agrees to require, by written agreement, its employees, other than clerical and nontechnical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the *contractor* each subject invention made under contract in order that the *contractor* can comply with the disclosure provisions of paragraph c. above, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. This disclosure format should require, as a minimum, the information required by c.(1) above. The *contractor* shall instruct such employees through employee agreements or other suitable educational programs on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to U.S. or foreign statutory bars.

(3) The *contractor* will notify the *Federal agency* of any decision not to continue the prosecution of a patent application, pay maintenance fees, or defend in a reexamination or opposition proceeding on a patent, in any country, not less than thirty days before the expiration of the response period required by the relevant patent office.

(4) The *contractor* agrees to include, within the specification of any United States patent application and any patent issuing thereon covering a subject invention, the following statement, "This invention was made with Government support under (identify the contract) awarded by (identify the *Federal agency*). The Government has certain rights in this invention."

g. *Subcontracts.*

(1) The *contractor* will include this clause, suitably modified to identify the parties, in all subcontracts, regardless of tier, for experimental developmental or research work to be performed by a small business firm or domestic nonprofit organization. The subcontractor will retain all rights provided for the *contractor* in this clause, and the *contractor* will not, as part of the consideration for awarding the subcontract, obtain rights in the subcontractor's subject inventions.

(2) The *contractor* will include in all other subcontracts, regardless of tier, for experimental, developmental or research work the patent rights clause required by (*cite section of agency implementing regulations, FPR, or DAR*).

(3) In the case of subcontracts, at any tier, when the prime award with the Federal agency was a contract (but not a grant or cooperative agreement), the agency, subcontractor, and the contractor agree that the mutual obligations of the parties created by this clause constitute a contract between the subcontractor and the Federal agency with respect to those matters covered by this clause.

h. *Reporting on Utilization of Subject Inventions.*

The *contractor* agrees to submit on request periodic reports no more frequently than annually on the utilization of a subject invention or on efforts at obtaining such utilization that are being made by the *contractor* or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the *contractor*, and such other data and information as the *agency* may reasonably specify. The *contractor* also agrees to provide additional reports as may be requested by the *agency* in connection with any march-in proceeding undertaken by the *agency* in accordance with paragraph j of this clause. To the extent data or information supplied under this section is considered by the *contractor*, its licensee or assignee to be privileged and confidential and is so marked, the *agency* agrees that, to the extent permitted by 35 USC § 202(c)(5), it will not disclose such information to persons outside the Government.

i. *Preference for United States Industry.*

Notwithstanding any other provision of this clause, the *contractor* agrees that neither it nor any assignee will grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention or produced through the use of the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by the *Federal agency* upon a showing by the contractor or its assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

j. *March-in Rights.*

The *contractor* agrees that with respect to any subject invention in which it has acquired title, the *Federal agency* has the right in accordance with the procedures in OMB Circular A—— (and agency regulations at——) to require the *contractor*, an assignee or exclusive licensee of a subject invention to grant a non-exclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the *contractor* assignee, or exclusive licensee refuses such a request, the *Federal agency* has the right to grant such a license itself if the *Federal agency* determines that:

(1) Such action is necessary because the *contractor* or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use.

(2) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the *contractor*, assignee, or their licensees;

(3) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the *contractor*, assignee, or licensees; or

(4) Such action is necessary because the agreement required by paragraph i of this clause has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of such agreement.

k. *Special Provisions for Contracts with Non-profit Organizations.*

If the *contractor* is a non-profit organization, it agrees that:

(1) Rights to a subject invention in the United States may not be assigned without the approval of the *Federal agency*, except where such assignment is made to an organization which has as one of its primary functions the management of inventions and which is not, itself, engaged in or does not hold a substantial interest in other organizations engaged in the manufacture or sale of products or the use of processes that might utilize the invention or be in competition with embodiments of the invention provided that such assignee will be subject to the same provisions as the *contractor*);

(2) The *contractor* may not grant exclusive licenses under United states patents or patent applications in subject inventions to persons other than small business firms for a period in excees of the earlier of:

(i) five years from first commercial sale or use of the invention; or

(ii) eight years from the date of the exclusive license excepting that time before regulatory agencies necessary to obtain premarket clearance, unless on a case-by-case basis, the Federal agency approves a longer exclusive license. If exclusive field of use licenses are granted, commercial sale or use in one field of use will not be deemed commercial sale or use as to other fields of use, and a first commercial sale or use with respect to a product of the invention will not be deemed to end the exclusive period to different subsequent products covered by the invention.

(3) The *contractor* will share royalties collected on a subject invention with the inventor; and

(4) The balance of any royalties or income earned by the *contractor* with respect to subject inventions, after payment of expenses (including payments to inventors) incidental to the administration of subject inventions, will be utilized for the support of scientific research or education.

1. *Communications.* (Complete according to instructions at Part 8.b. of this Circular).

(End of Clause)

41 CFR Ch. 1

[FPR Amdt. 230]

Policies To Maximize Use of Competition and Minimize the Number of Noncompetitive Procurements

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment adds policies and procedures pertaining to: (i) Procurement planning, (ii) publicizing procurement opportunities, (iii) justification of noncompetitive procurements, (iv) management controls designed to maximize the use of competitive procurement, and (v) unsolicited proposals. The new policies and procedures are based on recommendations made in General Accounting Office report B-206577 (April 7, 1982) entitled, "Less Sole-Source, More Competition Needed on Federal Civil Agencies' Contracting." The intended effect is to minimize the number of noncompetitive procurements and maximize the use of competition.

EFFECTIVE DATE: May 9, 1983.

FOR FURTHER INFORMATION CONTACT: Philip G. Read, Director, Office of Federal Procurement Regulations, Office of Acquisition Policy (202-523-4755).

SUPPLEMENTARY INFORMATION:

List of Subjects

41 CFR Part 1-1

Administrative practices and procedures, Environmental protection, Government procurement, Labor surplus areas, Minority businesses, Recycled material, Small business.

41 CFR Part 1-3

Cost accounting standards, Government procurement, Procurement by negotiation, Small purchases, Types of contracts.

41 CFR Part 1-4

ADP equipment, Architect-Engineer services, Computer technology, Government procurement, Unsolicited proposals, Utilities.

PART 1-1—GENERAL

The table of contents for Part 1-1 is amended to add one entry under Subpart 1-1.3 and revise one entry under Subpart 1-1.10 as follows:

1-1.342 Advance procurement planning systems and procedures.

1-1.1003-3 Synopses of special notices used in connection with market searches for competitive sources.

Subpart 1-1.3—General Policies

Section 1-1.342 is added to read as follows:

§ 1-1.342 Advance procurement planning systems and procedures.

(a) The head of each executive agency shall establish advance procurement planning systems and procedures that include:

(1) Procurement procedures providing lead time and cut-off dates for preparing solicitations, obtaining and evaluating bids or proposals, making preaward surveys, performing contract audits, negotiating, and making contract awards in an orderly manner;

(2) Procedures for developing, monitoring, and updating advance procurement plans; and

(3) Review procedures for last-quarter spending.

(b) A prime objective of these procedures shall be to ensure that the efforts of all personnel responsible for the procurement of property and services are coordinated as early as practicable to obtain required items of requisite quality, on time, and at the lowest price. Consistent with that objective is the responsibility to eliminate inefficiencies normally associated with hurried or unnecessary end-of-year procurements and to award contracts on a competitive basis as required by applicable laws and regulations.

Subpart 1-1.10—Publicizing Procurement Actions

1. Section 1-1.1001 is revised to read as follows:

§ 1-1.1001 General policy.

(a) Proposed procurements shall be publicized as prescribed in this Subpart 1-1.10 to increase competition, thus assisting small business and labor surplus area concerns and broadening participation in Government procurement programs. In addition, market searches for competitive sources shall be publicized when required by this Subpart and § 1-3.107(b) for the purpose of enhancing competition and reducing the number of noncompetitive procurements.

(b) Refer to § 1-4.1109-6 for the policy relating to publicizing the intent to place orders against ADP schedule contracts and the actions required following the synopsis.

2. Section 1–1.1003–2 is amended to revise paragraph (a)(5) to read as follows:

§ 1–1.1003–2 General requirements.

(a) * * *

(5) Procurements that are made by an order placed under an existing contract except as provided in § 1–4.1109–6 with respect to nonmandatory ADP Schedule contracts;

* * * * *

3. Section 1–1.1003–3 is revised to read as follows:

§ 1–1.1003–3 Synopses of special notices used in connection with market searches for competitive sources.

(a) *General.* The term "sources-sought synopsis" means the type of Commerce Business Daily (CBD) notice designed to identify potential sources for procurements (e.g. §§ 1–1.1003–7(b)(7) and (b)(12)). The sources-sought synopsis provides an opportunity for the marketplace to indicate its interest in submitting bids, offers, proposals, or quotations for a future procurement. It is normally used to discover if more than one firm is interested and qualified to provide a particular product, service, or research capability, although a solicitation is not yet available. This type of synopsis has particular application when one contractor is thought to be uniquely capable of meeting the Government's minimum requirements and verification of this opinion is needed. The requirements for use of the sources-sought synopsis are set forth in the following paragraphs of this section and in § 1–3.107(b).

(b) *Research and development.* Sources-sought or advance notices publicizing the Government's interest in a given field of research and development may be published in the CBD, using the general format outlined in § 1–1.1003–7(b)(7), except where security considerations prohibit such publication. Sources-sought notices are required under specific circumstances set forth in § 1–3.107(b)(2) when noncompetitive procurements are anticipated. Such notices will enable potential sources to learn of research and development programs and provide these sources with an adequate opportunity to submit information that will permit evaluation of their research and development capabilites. Each subsequent specific procurement of research and development shall be publicized in the CBD as required by § 1–1.1003–2 unless: (1) One of the exceptions stated therein is applicable, or (2) a sources-sought or advance notice had been published in the CBD and such notice was sufficiently specific to permit potential sources to identify an interest in the forthcoming procurement, and provided for them to request solicitations for the procurement. (Refer to § 1–3.107(b)(4) for a description of that notice when a noncompetitive procurement has been approved and a particular concern is considered to be a sole source.)

(c) *Property and services.* Sources-sought notices publicizing the Government's interest in anticipated property or service procurements may be published in the CBD, using the general format outlined in § 1–1.003–7(b)(12), except where security considerations prohibit such publication. A sources-sought synopsis must be published in connection with market searches for sources of property or services, other than those discussed in paragraphs (b), (d) and (e) of this section, when in accordance with the provisions of §1–3.107(b), agencies are required to use a sources-sought synopsis to test the marketplace for competitive sources. If one or more potential contractors are identified as a result of such a market search, they shall be solicited. In conjunction with that solicitation, the specific procurement of the property or service shall be publicized in the CBD as required by § 1–1.1003–2 unless: (1) one of the exceptions stated therein is applicable, or (2) a sources-sought synopsis had been published in the CBD, and such notice was sufficiently specific to permit potential sources to identify an interest in the forthcoming procurement, and was provided for them to request solicitations for the procurement. (Refer to § 1–3.107(b)(4) for a description of that notice when a noncompetitive procurement has been approved and a particular concern is considered to be a sole source.) No potential contractor shall be disqualified as nonresponsible unless the procedures for determining responsibility set forth in § 1–1.1205 have been followed.

(d) *Architect-engineer and related services with fees over $10,000.* For each contract for which the fee is expected to exceed $10,000, a notice of intention to contract for architect-engineer services shall be published in the Synopsis. The notice shall be prepared in accordance with § 1–1.1003–7(b)(9) and shall solicit submission of Standard Form 254, Architect-Engineer and Related Services Questionnaire, and, when applicable, Standard Form 255, Architect-Engineer and Related Services Questionnaire for Specific Project, from those persons or firms that are eligible for consideration, but do not have current data on file with the procuring agency or office. The notice will be published sufficiently in advance to afford architect-engineer firms an adequate opportunity to submit to the procurement office a statement of qualifications and performance data applicable to the expected requirements of that procurement office. Synopses of contract awards shall be in accordance with § 1–1.1004.

(e) *Architect-engineer and related services with fees $10,000 and under.* Agencies may employ the procedures in paragraph (d) of this section. Alternatively, however, agencies may publicize each contract estimated to be $10,000 and under only in the area where the project is to be performed. Copies of the announcement shall be publicly displayed at the procuring office and appear in at least one daily newspaper circulated in the local area. Professional societies in the area of project consideration should also be notified in writing.

4. Section 1–1.1003–7 is amended to revise paragraph (b)(7), reserve paragraphs (b)(10) and (b)(11), and add a new paragraph (b)(12) as follows:

§ 1–1.1003–7 Preparation and transmittal.

* * * * *

(b) * * *

(7) *Research and development item.* Sources-sought notices described in § 1–1.1003–3(b) that publicize the Government's interest in a given field of research and development and invite the submission of information as to research and development capabilities, shall be headed "Research and Development Sources Sought." This heading shall be followed by a statement similar to the following (modifications may be made to suit agency needs):

"Concerns having research and development capabilities in the field of (Be specific), ——— and whose facilities and personnel include (Describe in substantial detail minimum facilities and personnel required) ——— are invited to submit complete information to the procuring office listed in this notice within —— calendar days from the date of this notice (no less than 20 days should be entered). Information furnished should include the total number of employees and professional qualifications of scientists, engineers, and technical personnel; a description of general and special facilities; an outline of previous projects; a statement regarding industrial security clearance, if previously granted; and other available descriptive literature. This is not a formal solicitation. However, concerns that respond may request to receive a copy of a particular solicitation when it becomes available. This notice may represent the only official notice of such a solicitation."

* * * * *

(10) [Reserved]
(11) [Reserved]

(12) *Property or service item.* Notices described in § 1–1.1003–3(c) as sources-sought synopses shall be headed, "Property Sources Sought" or "Service Sources Sought." This shall be followed by a statement similar to the following (modifications may be made to suit agency needs):

"Concerns having the ability to furnish the following property (services) are requested to give written notification (including the telephone number for a point of contact) to the procuring office listed in this notice within —— calendar days (no less than 20 days should be entered) from the date of this synopsis:

(Describe the requirement so as to furnish a complete property (service) description, and a condensation of other essential information, to provide concerns with an intelligible basis for judging whether they have an interest in the procurement. Such information may include a statement regarding the Government's belief that the property or service may be available only from a sole source and the reasons for such belief.)

This is not a formal solicitation. However, concerns that respond should furnish detailed data concerning their capabilities and may request to receive a copy of the solicitation when it becomes available. This notice may represent the only official notice of such a solicitation."

PART 1–3—PROCUREMENT BY NEGOTIATION

The table of contents for Part 1–3 is amended to add two entries under Subpart 1–3.1 as follows:

Sec.
1–3.107 Justification of noncompetitive procurements.
1–3.108 Management controls designed to maximize the use of competitive procurement.

Subpart 1–3.1—Use of Negotiation

1. Section 1–3.107 is added to read as follows:

§ 1–3.107 Justification of noncompetitive procurements.

(a) *Circumstances permitting noncompetitive procurements.* While competition must be obtained on negotiated procurements to the maximum practicable extent in accordance with § 1–3.101, there are several circumstances under which noncompetitive procurements may be justified. These circumstances are as follows:

(1) The agency is authorized or required by statute to award a contract to a specified source; e.g., awards to the Blind or other Severely Handicapped, Prison Industries, and the SBA under section 8(a) of the Small Business Act. Contracting officers are cautioned that 41 U.S.C. 252(c)(10) (see § 1–3.210) does not constitute such statutory authority. The latter cite merely provides authority to use negotiation procedures instead of formal advertising when the agency is faced with a sole source of supply situation.

(2) The Government's need for a product or service is so urgent that there is not enough time to obtain competition; i.e., a serious emergency will not permit the delay inherent in obtaining competition and the agency finds that only one known source can meet the Government's needs within the required time. However, urgency in itself does not necessarily justify a noncompetitive procurement decision unless fully supported by the facts of the procurement situation. A search for other sources, to the extent reasonable in the circumstances, shall be conducted (see paragraph (b) of this section).

(3) The data, such as drawings or other specifications needed for competition, are not available to the Government and there are no alternative ways of obtaining competition, such as redescribing the requirement in terms of function or performance required (see paragraph (d) of § 1–3.101 for agencies' responsibility to foster competitive conditions on subsequent procurements).

(4) There is one source that, because of unique capabilities, is the only one capable of meeting the Government's minimum requirements. The term "minimum requirements" is a limitation referring to only those features that are essential to meeting the Government's need. (See paragraph (b) of this section for actions that must be taken before this circumstance may be cited as justification for a noncompetitive procurement.)

(5) An award must be directed to one source because the head of the agency has determined that disclosure of the property or service to be obtained to more than one source would jeopardize the national security. It should be recognized, however, that § 1–3.212 authorizes the negotiation of purchases and contracts "for property or services as to which the agency head determines that the character, ingredients, or components thereof are such that the purchase or contract should not be publicly disclosed." Accordingly, the use of a noncompetitive procurement should be based on the most persuasive reasons.

(6) An award must be directed to a specified source because the agency head has determined that it is in the public interest to procure technical equipment or parts that require standardization and interchangeability in special situations or particular localities; and there is a reasonable basis for concluding that (i) only one source can provide such standardization and interchangeability and (ii) it is neither practical nor economical to establish more than one source. This circumstance shall not be cited for initial procurement of equipment and spare parts that ultimately will be standardized or for the arbitrary selection of the equipment of certain suppliers. (Refer to § 1–3.213 for a complete discussion of the stringent standards that must be met for this circumstance, which is both a circumstance permitting noncompetitive procurement when standardized equipment or interchangeable parts are available from only one source and a circumstance permitting negotiation. Also see paragraph (b) of this section for actions that must be taken before this circumstance may be cited as justification for a noncompetitive procurement. The intent is that a market search be undertaken before the standardization determination is made by the agency head.)

(7) An award must be directed to a specified source because only one source can satisfy the Government's legitimate need for an item compatible with existing equipment. However, if other sources are able to modify or adjust their products to produce acceptable items, they shall be given an opportunity to compete. See paragraph (b) of this section for actions that must be taken before this circumstance may be cited as justification for a noncompetitive procurement.

(8) A follow-on award must be directed to a specified source because it is not feasible to obtain competition for follow-on procurements. In such a case, it must be demonstrated that a noncompetitive award is necessary to avoid (i) duplications of cost to the Government for the property or service being procured (i.e. a substantial investment of some kind would have to be duplicated at Government expense by another source entering the field and the magnitude of this investment is so large that it would not be possible to overcome its effect through the use of competition), or (ii) unacceptable delays in accomplishing the agency's mission objectives. However, follow-on contract should not be awarded noncompetitively merely because of:

(A) The prior experience of the incumbent, if the incumbent is not uniquely capable of meeting the Government's minimum requirements;

(B) The agency's desire to avoid administrative inconvenience, including

the costs and effort associated with using the competitive process; or

(C) The fact that the Government will incur costs by changing contractors. (See paragraph (b) of this section for actions that must be taken before this circumstance may be cited as justification for a noncompetitive procurement. If the source was previously selected on a noncompetitive basis, a complete justification pursuant to paragraph (c) of this section shall be included in the contract file supporting the basic noncompetitive procurement as well as the instant procurement.)

(b) *Market search for competitive sources.* (1) As used herein, the term market search refers to attempts to ascertain whether other qualified sources capable of satisfying the Government's requirement exist. This testing of the marketplace may range from written or telephone contacts with knowledgeable Federal and non-Federal experts regarding similar or duplicate requirements, and the results of any market test recently undertaken, to the more formal sources-sought announcements in pertinent publications (e.g., technical/scientific journals, or the Commerce Business Daily).

(2) A market search for competitive sources shall be undertaken before a written noncompetitive procurement justification (see paragraph (c) of this section) may be approved on the basis of the circumstances permitting noncompetitive procurements cited in paragraphs (a)(4), (a)(6), (a)(7), and (a)(8) of this section, and before a justification citing paragraph (a)(2) when the degree of urgency is not so acute as to preclude some time for a market search. The extent of the search shall depend on what is reasonable in the circumstances to ensure that competition is not feasible. However, except as provided in paragraph (b)(3) of this section, a sources-sought synopsis (see §§ 1–1.1003–3 (b) and (c)) must be published in the Commerce Business Daily (CBD) to identify interested concerns before the circumstances cited in paragraphs (a)(4) and (a)(7) of this section may be used to justify a noncompetitive procurement over $10,000. Other reasonable steps, such as (i) contacting potentially capable firms, trade associations, and local businesses, (ii) consulting contractor directories, and (iii) contacting the Small Business Administration, should also be undertaken when appropriate. If only one source is identified as a result of the market search, this fact may be used to support a noncompetitive procurement justification as discussed in paragraph (c) of this section.

(3) When procurement solicitations are published in the CBD in accordance with the requirements of § 1–1.1003–2 and only one response is received, this fact may be used to support a noncompetitive procurement justification in lieu of the sources-sought synopsis discussed in paragraph (b)(2) of this section.

(4) Even though a noncompetitive procurement justification (see paragraph (c) of this section) is approved, and a sources-sought synopsis was published in accordance with paragraph (b)(2) of this section, the procurement action shall be published in the CBD pursuant to § 1–1.1003–2 in accordance with the publicizing requirements in 15 U.S.C. 637(e), *unless* the sources-sought synopsis was sufficiently specific to permit potential sources to identify an interest in the forthcoming procurement, and provided for them to request solicitations for the procurement. This will permit potential sources to identify themselves as required by the statute. The second CBD notice, if it is required, may state that a particular concern is considered to be a sole source and that the agency proposes to negotiate a contract with the concern on that basis. However, should additional sources submit offers before the closing date, they will be considered. This synopsizing requirement does not apply to an agency's intent to negotiate an unsolicited proposal on a noncompetitive basis in accordance with § 1–4.910 if a public solicitation would violate the prohibitions against disclosure of unsolicited contractor data that are set forth in § 1–4.911.

(c) *Written noncompetitive procurements justification.* A written noncompetitive procurement justification that documents the facts and circumstances substantiating the infeasibility of competition is required for each noncompetitive procurement over $10,000, except those involving orders under existing contracts (FPMR § 101–26.4 and FPR § 1–4.1109–6 are applicable to orders under GSA Schedule contracts), or modifications within the current scope of work and existing terms and conditions. This justification shall:

(1) Identify the problem, mission deficiency, or need that the procurement is intended to satisfy;

(2) Provide the facts supporting citation of one or more of the circumstances set forth in paragraph (a) of this section that permit use of a noncompetitive procurement;

(3) Demonstrate how the agency knows that the contractor is the only one that can meet the Government's minimum requirements. This justification requirement applies whenever the circumstances set forth in paragraphs (a)(2), (a)(3), (a)(4), (a)(5), (a)(6), (a)(7), or (a)(8), of this section are cited. Refer to the topics of review responsibility in § 1–3.108(e) to ensure that the justification is adequately documented;

(4) Describe the market search that was conducted if required by § 1–3.107(b), including whether a sources-sought synopsis or advance notice inviting competition was publicized in the Commerce Business Daily;

(5) Describe the reasons why a market search could not be undertaken in connection with an unsolicited proposal (see § 1–4.910(b)); and

(6) Be reviewed at a level higher than the contracting officer in accordance with § 1–3.101(d) and agency procedures. (Also see § 1–3.108(e).)

2. Section 1–3.108 is added to read as follows:

§ 1–3.108 Management controls designed to maximize the use of competitive procurement.

Agencies shall install management procedures or controls to ensure compliance with the requirements of §§ 1–3.101 and 1–3.107. Following is a list of techniques that are recommended for use in measuring organizational accountability for obtaining competition and promoting the use of competition:

(a) The Federal Procurement Data System should be used by agencies participating in it as a tool for tracking and measuring the progress of efforts undertaken to increase competition by agencies, components, and purchasing offices (see paragraphs (b) through (e) of this section). The approach used should emphasize the:

(1) Periodic analyses of the system's data on noncompetitive awards by such categories as purchasing office and product or service code;

(2) Pinpointing of areas having the greatest opportunity for increasing competition by identifying areas having a high incidence of noncompetitive procurements; and

(3) Measuring of incremental yearly progress.

(b) Agency heads should communicate a strong commitment to competition to personnel throughout their agencies. To this end, agency officials should be directed to use the competitive process, unless the Government would be injured by doing so and they demonstrate that competition is not feasible (see § 1–3.107). Responsibility should be placed on program, technical, and procurement

officials heading the various offices for making a good faith effort to maximize the use of competition.

(c) Procurement training provided to agency technical, program, and procurement personnel should emphasize the avoidance of noncompetitive awards and techniques designed to achieve this objective.

(d) Especially in potential sole source situations, agency requesting officials should be required to notify procurement offices as soon as requirements become known to maximize the time available for conducting the market search for potential sources and obtaining competition.

(e) Agencies should ensure that the required reviews of noncompetitive procurement decisions are effectively made (see §§ 1–3.101(d) and 1–3.107(c)(6)). The adequacy of the documentation of noncompetitive procurement justifications is of particular importance and should be emphasized in all procurement reviews. As each justification for noncompetitive procurement is reviewed, the reviewer should ascertain and evaluate:

(1) The reasons why the procurement cannot be competed;

(2) The adequacy of the grounds for excluding all other actual or potential offerors;

(3) Any further action that can be taken to obtain competition in the instant procurement; and

(4) Any action that is needed to avoid the need for a subsequent or a continued noncompetitive procurement.

PART 1–4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Subpart 1–4.9—Unsolicited Proposals

1. Section 1–4.910 is amended to revise paragraphs (b) and (c) and add paragraph (d) to read as follows:

§ 1–4.910 Method of procurement.

* * * * *

(b) If it can be accomplished without violating the prohibitions of § 1–4.911, a market search shall be undertaken in accordance with § 1–3.107(b) to assist in determining whether the substance of the proposal is available to the Government without restriction from another source. If the market search discloses that competition is feasible, offerors shall be provided a solicitation document stating the Government's minimum requirements as well as evaluation criteria, but not the particular ideas, proprietary information, or solution contained in the unsolicited proposal. If a market search would violate § 1–4.911, an explanation shall be set forth in the noncompetitive procurement justification pursuant to § 1–3.107(c)(5), and it shall not be undertaken.

(c) Unless a competitive procurement is otherwise appropriate, a negotiated noncompetitive procurement emanating from an unsolicited proposal is permissible if (1) the market search, when undertaken in accordance with paragraph (b) of this section, discloses no potential competitors; (2) the unsolicited proposal receives a favorable technical evaluation (see § 1–4.908(d)); and (3) a written noncompetitive procurement justification is prepared and reviewed when required by § 1–3.107(c). Based on a comprehensive evaluation of the proposal, the technical office shall provide the facts and circumstances that preclude competition and that support a recommended noncompetitive action, as well as other data required by § 1–3.107(c).

(d) When it is determined that the subject matter of an unsolicited proposal is acceptable for award on a noncompetitive basis, the unsolicited proposal will serve as the basis for negotiation.

2. Section 1–4.911 is revised to read as follows:

§ 1–4.911 Prohibitions.

(a) Agencies shall not permit all or any part of an unsolicited proposal to be used as the basis, or as a portion, of a solicitation, or in negotiation with other firms unless the offeror is notified of and agrees to the intended use. However, nothing herein precludes the Government from using any data, concept, or idea that it could have used had the unsolicited proposal not been submitted. With respect to data (see § 1–4.913(a)) tendered in an unsolicited proposal, disclosure of information, which concerns or relates to trade secrets, processes, operations, style of work, or apparatus, and other matters, may result in the imposition of a criminal penalty under the provisions of 18 U.S.C. 1905.

(b) It is not the intent of these regulations to disclose the originality of thought and the creativity and innovativeness of a proposed approach contained in an unsolicited proposal in market searches undertaken pursuant to § 1–4.910(b). Especially in the area of scientific research, it may be the proposer's definition of a problem and the proposer's recommended approach to a solution that is of interest to the Government which up to that time may have been unable to define the problem, develop a requirement, and solicit the marketplace for solutions. The aforementioned attributes of an unsolicited proposal are a part of the ideas, proprietary information, or solutions that § 1–4.916(b) prohibits the Government from disclosing in attempts to achieve competition. Unless a market search for competitive sources can be undertaken without disclosing such data, it shall not be performed.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: April 7, 1983.

Ray Kline,

Acting Administrator of General Services.

BILLING CODE 6820–61–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

41 CFR Parts 3–1 and 3–7

Indian Preference in Employment, Training, and Subcontracting Opportunities

AGENCY: Office of the Secretary, HHS.

ACTION: Final rule.

SUMMARY: The Office of the Secretary, Department of Health and Human Services is amending the Department's procurement regulations by adding a new section and two contract clauses on Indian preference.

The new section and contract clauses implement section 7(b) of the Indian Self-Determination and Education Assistance Act (Pub. L. 93–638; 88 Stat. 2205; 25 U.S.C. 450e(b)).

Section 7(b) of the Indian Self-Determination and Education Assistance Act requires that any contract, subcontract, grant, or subgrant awarded pursuant to the Act, the Act of April 16, 1934 (48 Stat. 596; 25 U.S.C. 452), as amended, or any other Act authorizing Federal contracts with or grants to Indian organizations or for the benefit of Indians shall require that, to the greatest extent feasible: (1) Preferences and opportunities for training and employment in connection with the administration of the contracts or grants be given to Indians, and (2) Preference in the award of subcontracts and subgrants in connection with the administration of the contracts or grants be given to Indian organizations and Indian-owned economic enterprises as defined in section 3 of the Indian Financing Act of 1974 (Pub. L. 93–262; 88 Stat. 77; 25 U.S.C. 1452).

Section 3–1.360, Indian preference in employment, training, and subcontracting opportunities, implements section 7(b) and provides direction for applying the Indian

Preference clause (§ 3–7.5015) and the Indian Preference Program clause (§ 3–7.5016). It also provides definitions of pertinent terms and instructions on compliance enforcement and Indian tribal preference requirements.

The Indian Preference and Indian Preference Program clauses stipulate the responsibilities of contractors regarding the employment and training of Indians and the award of subcontracts to Indians and Indian organizations.

Section 3–1.360 and the clauses parallel the comparable issuance published by the Department of Interior, wherever feasible and practical, to promote uniformity and consistency of application. The comparable Department of Interior procurement regulations, §§ 14–1.354 Indian preference in employment, training and subcontracting opportunities, 14–7.5002 Indian preference, and 14–7.5003 Indian preference program were published on October 31, 1979 (44 FR 62513).

EFFECTIVE DATE: The amendment is effective April 15, 1983.

FOR FURTHER INFORMATION CONTACT: E. S. Lanham, Division of Procurement Policy, OPAP–OPAL–OASMB–OS, Department of Health and Human Services, Room 539H, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201 (202–245–6791).

SUPPLEMENTARY INFORMATION: On October 20, 1981, the proposed rule concerning Indian preference was published in the **Federal Register** (46 FR 51410) and invited public comments by December 21, 1981. Ten responses were received from the public and several others were received from activities within the Department.

Several respondents commented that the scope of the Department's implementation of section 7(b) applies to only federally recognized Indian Tribes and organizations and should be expanded to include non-federally recognized Indian groups and organizations.

Implementation of section 7(b) should not apply to non-federally recognized Indian groups and organizations because it is the intent of Pub. L. 93–638, the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450), particularly sections 4 and 7 of it (25 U.S.C. 450 b. and 25 U.S.C. 450 e., respectively), and other "Indian" laws cited in Pub. L. 93–638, to apply only to Indian Tribes and organizations recognized by the Federal Government.

One respondent recommended the deletion of the word "specifically" in § 3–1.360(b)(1) (i) and (ii), stating that inclusion of the word in both places was assuming too restrictive an approach in implementing section 7(b).

The word "specifically" accurately connotes the intent of section 7(b) and is consistent with the Department of Interior's regulations implementing section 7(b) (Title 41, CFR Chapter 14, § 14–1.354 (b)(1) (ii) and (iii)).

Several respondents offered comments regarding § 3–1.360(b)(2) concerning the dollar thresholds and application of the Indian Preference Program contract clause. One respondent recommended that the dollar thresholds for applicability of the Indian Preference Program clause for both construction and nonconstruction work be lowered to $25,000. Another respondent recommended the dollar threshold for use of that clause for construction work be raised to $500,000. The same respondent also recommended that the dollar thresholds required for use of the Indian Preference Program clause also be applied to the Indian Preference clause referenced in § 3–1.360(b)(1), and that the contracting officer's discretionary authority to apply the Indian Preference Program clause, regardless of the dollar threshold of the proposed solicitation and resultant contract stated under § 3–1.360(b)(2), be deleted.

Section 7(b) requires application of Indian preference "* * * to the greatest extent feasible." We have strived to balance the potential for accomplishing section 7(b)'s purpose against the administrative burdens of contracting.

We concluded that there would be few subcontracting opportunities and the requirements of the clause would be overly burdensome for contracts below the cited thresholds. The thresholds cited were deemed to be fair, realistic and the generally minimum levels practical. However, the regulation recognizes that in a particular circumstance(s) contracts for an amount less than the threshold might present opportunities for Indian employment, training and subcontracting. Accordingly, the regulation provides contracting officers with discretionary authority to use the clause even if the estimated amount of the contract is less than the threshold. The Department believes that its approach in allowing discretionary authority is consistent with section 7(b), i.e., to promote preferences and opportunities whenever the circumstances indicate that they exist.

Similarly, we concluded that a $500,000 threshold for construction work would be excessive and would result in the loss of legitimate Indian preference opportunities, if adopted. On the other hand, thresholds are inappropriate and unnecessary for the Indian Preference clause. The practical limitations and burdens that exist in the application of the Indian Preference Program clause do not exist here. The clause requires a contractor to put forth its best efforts to employ Indians and Indian organizations and does not impose undue burden.

A respondent recommended deletion of the second sentence under (1) of § 3–1.360(d) *Compliance enforcement,* stating that the Federal Government should assume complete responsibility for any compliance reviews. The sentence states that the "reviews may be conducted with the assistance of the Indian Tribe(s) concerned."

Apparently, the respondent has assumed that the Government's authority may be compromised if Indian Tribes are allowed to participate in the compliance reviews. This is not the case. The Government retains complete authority and is to exercise it in accordance with the terms of the contract. The sentence was added to afford the Indian Tribe(s) an opportunity to see first-hand what results the requirements of the contract clauses are producing since the Tribe will have many interests in the performance and outcome of the contract. Again, we believe this is within the intent of the legislation. It is also consistent with the policy stated in the comparable paragraph of the Department of the Interior's regulations.

Several respondents objected to either the implication or manner of expression of the phrase "* * * and must not hinder the Government's right to award contracts and to administer their provisions" in the second sentence of § 3–1.360(e)(2) *Tribal preference requirements.*

The sentence has been changed to incorporate the language recommended by one of the respondents. The passage now reads "* * * and must not conflict with any Federal statutory or regulatory requirement concerning the award and administration of contracts." The same language has been substituted in paragraph (c) of the Indian Preference Program clause.

The Department has also made two changes to § 3–1.360 based on comments received from activities within the Department. Section 3–1.360(b) Applicability has been rewritten to clarify when and by whom the contract clauses are to be used. Under item (1) of § 3–1.360(e) *Tribal preference requirements,* the third sentence has been amended to remove the requirement that supplemental tribal

preferences be approved by the Department's Office of Procurement Policy.

In regard to the two contract clauses, Indian Preference and Indian Preference Program, the ten percent differential for Indian responsive bids or acceptable proposals for subcontracts under the contract has been eliminated. Numerous respondents, both within and outside the Department, offered comments concerning the application of the ten percent differential. As a result, the Department has reconsidered its position and is removing all references to the differential primarily because it could serve as a deterrent to the competitive procurement process and would likely create overwhelming administrative burdens for the Government and the contractor.

In addressing the Indian Preference clause (§ 3–7.5015), one respondent recommended deletion of the second sentence of paragraph (a) of the clause stating that the hiring of Indians who are not fully qualified to perform the work would be counterproductive and possible safety hazards.

It is the intent of section 7(b) to promote the employment and training of Indians to allow those not fully qualified for a specific job to be trained on the job and become fully qualified. In situations where a contractor can show that the employment of a certain individual in a particular position would be counterproductive or a safety hazard regardless of the training or opportunities offered, the contractor has the right to deny employment. No change has been made in the regulation.

The same respondent also objected to paragraph (f) that requires inclusion of the Indian Preference clause in all subcontracts awarded at any tier under the contract. The respondent recommended that only first tier subcontractors be affected.

The Department considered this issue when drafting the proposed rule and determined that it was intent of section 7(b) to have all subcontracts, regardless of tier, to be subject to the Indian Preference clause requirements.

Several respondents offered comments on the Indian Preference Program clause (§ 3–7.5016). One respondent indicated that, under paragraph (a)(3) of the clause, the requirement that the contractor notify the Indian Tribe not less than twenty calendar days prior to commencement of work did not offer sufficient leadtime for a Tribe to do the necessary planning and recruiting. The respondent recommended this action take place not more then twenty calendar days after the award of the contract. The Department agrees and has made the necessary change.

A respondent indicated that Indian-owned economic enterprises must learn to compete not only with each other but with the larger economic environment and, hence, recommended deletion of the second sentence in paragraph (a)(4) of the clause, modification of the sixth sentence, and deletion of the seventh, eighth, and ninth sentences.

The recommended changes proposed by the respondent would negate section 7(b) which requires that preference in the award of subcontracts be given to Indian organizations and Indian-owned economic enterprises. Therefore, the changes were not incorporated into the final regulation.

Another respondent also offered comments on paragraph (a)(4), recommended deletion of that paragraph, and proposed that the Department adopt an approach similar to the subcontracting program requirements of Pub. L. 95–507, which amended the Small Business Act. The respondent recommended that the Department require offerors (bidders) to submit as part of the proposal (bid) a subcontracting plan indicating maximum utilization of Indian organizations and Indian-owned economic enterprises as subcontractors or suppliers under the contract or be found non-responsive if no subcontracting plan or an inadequate plan is submitted. The respondent indicated that contractors are not complying with the subcontracting requirements of the present clause (as implemented by the Department of Interior), and stated the subcontracting plan approach would simplify administration and compliance aspects of the clause.

The Department believes the approach recommended by the respondent is innovative, but believes the present wording and method of paragraph (a)(4) is more comprehensive and will be less burdensome to prospective offerors or bidders. Paragraph (a)(4) is clear that the contractor must establish a subcontracting program which gives preference to Indian organizations and Indian-owned economic enterprises. It requires that specific actions be performed by the contractor and contracting officer, pertinent information be furnished to Indian firms by the contractor explaining subcontracting opportunities, close coordination be established between the contractor and the Indian Tribe(s) on or near whose reservation the work is to be preformed and public announcement of subcontracting opportunities be made. The respondent's proposed revision of paragraph (a)(4) provides for none of these features. Further, by requiring inclusion of the clause in the solicitation, the prospective contractor is made fully aware of its responsibilities during the bid or proposal preparation stage and is on notice that it must establish and conduct a subcontracting program which gives preference to Indian organizations and Indian-owned economic enterprises if awarded the contract. Failure by the contractor to comply with the requirements of the clause once the contract is awarded would result in action by the contracting officer to remedy the situation, including, possibly, contract termination. Finally, proper enforcement of the requirements of paragraph (a)(4) by the contracting officer will alleviate problems concerning administration and compliance.

Therefore, the proposed language in paragraph (a)(4) has been retained.

One respondent recommended deletion of most of paragraph (a)(5) of the clause to keep the record-keeping burden to reasonable proportions.

We agree that record-keeping and other administrative burdens should be kept to a minimum. However, we believe it is not unreasonable to require that a contractor maintain limited records evidencing its compliance with the provisions of the Indian Preference Program clause. However, the paragraph has been modified to delete references to personal identifiers, thus reducing the amount of information that needs to be reported.

The same respondent recommended deletion of the wording in paragraph (d), which requires inclusion of the Indian Preference Program clause in all subcontracts awarded at any tier under the contract, and recommended that only a first tier subcontractor be covered.

As indicated in a previous response, the Department determined that the intent of section 7(b) is to require all subcontracts, regardless of tier, to be subject to the requirements of the Indian Preference Program clause (and the Indian Preference clause).

Another respondent recommended that paragraph (e) of the clause be expanded to allow the contracting officer greater authority in the event of contractor noncompliance with the clause, such as being able to require the contractor to pay back or provide other forms of relief to Indians or businesses harmed by the contractor's failure to comply.

Without addressing the validity of the suggested change, the Department has modified both clauses to make it clear that the contracting officer may impose any sanctions authorized by law or by other provisions of the contract.

The Department of Health and Human Services has determined that this rule will not have a significant economic impact on a substantial number of small entities, and, therefore, does not require the preparation of a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980, Pub. L. 96–354.

The Department of Health and Human Services has determined that this rule is not a "major rule" as defined under Executive Order 12291, and hence, a regulatory impact analysis is not required.

The Department of Health and Human Services has determined that this rule does not contain collections of information subject to review by the Office of Management and Budget under the paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

List of Subjects in 41 CFR Parts 3–1 and 3–7.

Government procurement.

The provisions of this amendment are issued under 5 U.S.C. 301; 40 U.S.C. 486(c).

Therefore, Title 41 CFR Chapter 3 is amended as set forth below.

Dated: April 11, 1983.

Henry G. Kirschenmann, Jr.,

Deputy Assistant Secretary for Procurement, Assistance and Logistics.

1. Under Subpart 3–1.3, *General Policies*, of Part 3–1, *General*, § 3-1.360, *Indian preference in employment, training, and subcontracting opportunities*, is added to 41 CFR Chapter 3. In addition, the table of contents for Part 3–1 is amended to add the new section as follows:

PART 3–1—GENERAL

* * * * *

Subpart 3–1.3—General Policies

* * * * *

Sec.

3–1.360 Indian preference in employment, training, and subcontracting opportunities.

* * * * *

§ 3–1.360 Indian preference in employment, training, and subcontracting opportunities.

(a) *Statutory requirements.* Section 7(b) of the Indian Self-determination and Education Assistance Act, Pub. L. 93–638, 88 Stat. 2205; 25 U.S.C. 450e(b), requires:

Any contract, subcontract, grant, or subgrant pursuant to this Act, the Act of April 16, 1934 (48 Stat. 596), as amended, or any other Act authorizing Federal contracts with or grants to Indian organizations or for the benefit of Indians, shall require that to the greatest extent feasible:

(1) Preferences and opportunities for training and employment in connection with the administration of such contracts or grants shall be given to Indians; and

(2) Preference in the award of subcontracts and subgrants in connection with the administration of such contracts or grants shall be given to Indian organizations and to Indian-owned economic enterprises as defined in section 3 of the Indian Financing Act of 1974 (88 Stat. 77).

(b) *Applicability.* The Indian Preference clause set forth in § 3–7.5015 and the Indian Preference Program clause set forth in § 3–7.5016 have been developed to implement section 7(b) of Pub. L. 93–638 for all activities of the Department. The clauses shall be used by any affected departmental procuring activity as follows, except solicitations issued and contracts awarded pursuant to Title I of Pub. L. 93–638 (25 U.S.C. 450 et seq.) are exempted:

(1) The Indian Preference clause (§ 3–7.5015) shall be included in each solicitation and resultant contract, regardless of dollar amount:

(i) When the contract is to be awarded pursuant to an act specifically authorizing contracts with Indian organizations; or

(ii) Where the work to be performed under the contract is specifically for the benefit of Indians and is in addition to any incidental benefits which might otherwise accrue to the general public.

(2) The Indian Preference Program clause (§ 3–7.5016) shall be included in each solicitation and resultant contract when:

(i) The dollar amount of the procurement is expected to equal or exceed $50,000 for nonconstruction work or $100,000 for construction work;

(ii) The Indian Preference clause is to be included in the solicitation and resultant contract; and

(iii) The determination is made, prior to solicitation, that the work to be performed under the resultant contract will take place in whole or in substantial part on or near an Indian reservation(s). In addition, the Indian Preference Program clause may be included in any solicitation and resultant contract below the $50,000 or $100,000 level for nonconstruction or construction contracts, respectively, but which meet the requirements of paragraphs (ii) and (iii) of this section and, in the opinion of the procuring activity, offer substantial opportunities for Indian employment, training, and subcontracting.

(c) *Definitions.* For purposes of this § 3–1.360, the following definitions shall apply:

(1) "Indian" means a person who is a member of an Indian Tribe. If the contractor has reason to doubt that a person seeking employment preference is an Indian, the contractor shall grant the preference but shall require the individual to provide evidence within thirty (30) days from the Tribe concerned that the person is a member of that Tribe.

(2) "Indian Tribe" means an Indian Tribe, pueblo, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688; 43 U.S.C. 1601) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(3) "Indian organization" means the governing body of any Indian Tribe or entity established or recognized by such governing body in accordance with the Indian Financing Act of 1974 (88 Stat. 77; 25 U.S.C 1451).

(4) "Indian-owned economic enterprise" means any Indian-owned commercial, industrial, or business activity established or organized for the purpose of profit, provided that such Indian ownership shall constitute not less than 51 percent of the enterprise, and that ownership shall encompass active *operation* and *control*.

(5) "Indian reservation" includes Indian reservations, public domain Indian allotments, former Indian reservations in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act (85 Stat. 688; 43 U.S.C. 1601 et seq.).

(6) "On or near an Indian Reservation" means on a reservation or reservations or within that area surrounding an Indian reservation(s) where a person seeking employment could reasonably be expected to commute to and from in the course of a work day.

(d) *Compliance enforcement.* (1) The concerned procuring activity shall be responsible for conducting periodic reviews to insure contractor compliance with the requirements of the clauses set forth in §§ 3–7.5015 and 3–7.5016. These reviews may be conducted with the assistance of the Indian Tribe(s) concerned.

(2) Complaints of noncompliance with the requirements of the clauses set forth

in §§ 3–7.5015 and 3–7.5016 which are filed in writing with the procuring activity shall be promptly investigated and resolved by the contracting officer.

(e) *Tribal preference requirements.* (1) Where the work under a contract is to be performed on an Indian reservation, the procuring activity may supplement the clause set forth in § 3–7.5016 by adding specific Indian preference requirements of the Tribe on whose reservation the work is to be performed. The supplemental requirements shall be jointly developed for the contract by the procuring activity and the Tribe. Supplemental preference requirements must represent a further implementation of the requirements of section 7(b) of Public Law 93–638 and must be approved by the affected program director and approved for legal sufficiency by the Business and Administrative Law Division, OGC, or a regional attorney before being added to a solicitation and resultant contract. Any supplemental preference requirements to be added to the clause in § 3–7.5016 shall be included in the solicitation and clearly identified in order to ensure uniform understanding of the additional requirements by all prospective bidders or offerors.

(2) Nothing in these regulations shall be interpreted to preclude Tribes from independently developing and enforcing their own tribal preference requirements. Such independently developed tribal perference requirements shall not, except as provided in § 3–1.360(e)(1) above, become a requirement in contracts covered under this § 3–1.360 and must not conflict with any Federal statutory or regulatory requirement concerning the award and administration of contracts.

2. Under Part 3–7, *Contract Clauses*, Subpart 3–7.50, *Special Contract Clauses*, is amended to add §§ 3–7.5015, *Indian preference*, and 3–7.5016, *Indian preference program*. In addition the table of contents for Part 3–7 is amended to add the following:

PART 3–7—CONTRACT CLAUSES

* * * * *

Subpart 3–7.50—Special Contract Clauses

* * * * *

Sec.
3–7.5015 Indian preference.
3–7.5016 Indian preference program.
* * * * *

Subpart 3–7.50—Special Contract Clauses

§ 3–7.5015 Indian preference.

The following clause shall be used as prescribed in § 3–1.360(b)(1):

Indian Preference

(a) The Contractor agrees to give preference in employment opportunities under this contract to Indians who can perform required work, regardless of age (subject to existing laws and regulations), sex, religion, or tribal affiliation. To the extent feasible and consistent with the efficient performance of this contract, the Contractor further agrees to give preference in employment and training opportunities under this contract to Indians who are not fully qualified to perform regardless of age (subject to existing laws and regulations), sex, religion, or tribal affiliation. The Contractor also agrees to give preference to Indian organizations and Indian-owned economic enterprises in the awarding of any subcontracts to the extent feasible and consistent with the efficient performance of this contract. The Contractor shall maintain statistical records as are necessary to indicate compliance with this paragraph.

(b) In connection with the Indian employment preference requirements of this clause, the Contractor shall provide opportunities for training incident to such employment. Such training shall include on-the-job, classroom or apprenticeship training which is designed to increase the vocational effectiveness of an Indian employee.

(c) If the Contractor is unable to fill its employment and training opportunities after giving full consideration to Indians as required by this clause, those needs may be satisfied by selection of persons other than Indians in accordance with the clause of this contract entitled "Equal Opportunity."

(d) If no Indian organizations or Indian-owned economic enterprises are available under reasonable terms and conditions, including price, for awarding of subcontracts in connection with the work performed under this contract, the Contractor agrees to comply with the provisions of this contract involving utilization of small business concerns, small business concerns owned and controlled by socially and economically disadvantaged individuals, or labor surplus area concerns.

(e) As used in this clause:

(1) "Indian" means a person who is a member of an Indian Tribe. If the Contractor has reason to doubt that a person seeking employment preference is an Indian, the Contractor shall grant the preference but shall require the individual to provide evidence within thirty (30) days from the Tribe concerned that the person is a member of that Tribe.

(2) "Indian Tribe" means an Indian Tribe, pueblo, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688; 43 U.S.C. 1601) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(3) "Indian organization" means the governing body of any Indian Tribe or entity established or recognized by such governing body in accordance with the Indian Financing Act of 1974 (88 Stat. 77; 25 U.S.C. 1451); and

(4) "Indian-owned economic enterprise" means any Indian-owned commercial, industrial, or business activity established or organized for the purpose of profit, provided that such Indian ownership shall constitute not less than 51 percent of the enterprise, and that ownership shall encompass active *operation* and *control* of the enterprise.

(f) The Contractor agrees to include the provisions of this clause, including this paragraph (f), in each subcontract awarded at any tier under this contract.

(g) In the event of noncompliance with this clause, the Contracting Officer may terminate the contract in whole or in part or may impose any other sanctions authorized by law or by other provisions of the contract.

§ 3–7.5016 Indian preference program.

The following clause shall be used as prescribed in § 3–1.360(b)(2):

Indian Preference Program

(a) In addition to the requirements of the clause of this contract entitled "Indian Preference," the Contractor agrees to establish and conduct an Indian preference program which will expand opportunities for Indians to receive preference for employment and training in connection with the work to be performed under this contract, and which will expand the opportunities for Indian organizations and Indian-owned economic enterprises to receive a preference in the awarding of subcontracts. In this connection, the Contractor shall:

(1) Designate a liaison officer who will (i) Maintain liaison with the Government and the Tribe(s) on Indian preference matters; (ii) Supervise compliance with the provisions of this clause; and (iii) Administer the Contractor's Indian preference program.

(2) Advise its recruitment sources in writing and include a statement in all

advertisements for employment that Indian applicants will be given preference in employment and training incident to such employment.

(3) Not more than twenty (20) calendar days after award of the contract, post a written notice in the Tribal office of any reservations on which or near where the work under this contract is to be performed that sets forth the Contractor's employment needs and related training opportunities. The notice shall include the approximate numbers and types of employees needed; the approximate dates of employment; the experience or special skills required for employment, if any; training opportunities available; and other pertinent information necessary to advise prospective employees of any other employment requirements. The Contractor shall also request the Tribe(s) on or near whose reservation(s) the work is to be performed to provide assistance to the Contractor in filling its employment needs and training opportunities. The Contracting Officer will advise the Contractor of the name, location, and phone number of the Tribal officials to contact in regard to the posting of notices and requests for Tribal assistance.

(4) Establish and conduct a subcontracting program which gives preference to Indian organizations and Indian-owned economic enterprises as subcontractors and suppliers under this contract. The Contractor shall give public notice of existing subcontracting opportunities and, to the extent feasible and consistent with the efficient performance of this contract, shall solicit bids or proposals only from Indian organizations or Indian-owned economic enterprises. The Contractor shall request assistance and information on Indian firms qualified as suppliers or subcontractors from the Tribe(s) on or near whose reservation(s) the work under the contract is to be performed. The Contracting Officer will advise the Contractor of the name, location, and phone number of the Tribal officials to be contacted in regard to the request for assistance and information. Public notices and solicitations for existing subcontracting opportunities shall provide an equitable opportunity for Indian firms to submit bids or proposals by including: (i) A clear description of the supplies or services required, including quantities, specifications, and delivery schedules which facilitate the participation of Indian firms; (ii) A statement indicating that preference will be given to Indian organizations and Indian-owned economic enterprises in accordance with section 7(b) of the Pub. L. 93–638 (88 Stat. 2205; 25 U.S.C. 450e(b)); (iii) Definitions for the terms "Indian organization" and "Indian-owned economic enterprise" as prescribed under the "Indian Preference" clause of this contract; (iv) A representation to be completed by the bidder or offeror that it is an Indian organization or Indian-owned economic enterprise; and (v) A closing date for receipt of bids or proposals which provides sufficient time for preparation and submission of a bid or proposal. If after soliciting bids or proposals from Indian organizations and Indian-owned economic enterprises, no responsive bid or acceptable proposal is received, the Contractor shall comply with the requirements of paragraph (d) of the "Indian Preference" clause of this contract. If one or more responsive bids or acceptable proposals are received, award shall be made to the low responsible bidder or acceptable offeror if the price is determined to be reasonable. If the low responsive bid or acceptable proposal is determined to be unreasonable as to price, the Contractor shall attempt to negotiate a reasonable price and award a subcontract. If a reasonable price cannot be agreed upon, the Contractor shall comply with the requirements of paragraph (d) of the "Indian Preference" clause of this contract.

(5) Maintain written records under this contract which indicate: (i) The numbers of Indians seeking employment for each employment position available under this contract; (ii) The number and types of positions filled by Indians and non-Indians, and the total number of Indians employed under this contract; (iii) For those positions where there are both Indian and non-Indian applicants, and a non-Indian is selected for employment, the reason(s) why the Indian applicant was not selected; (iv) Actions taken to give preference to Indian organizations and Indian-owned economic enterprises for subcontracting opportunities which exist under this contract; (v) Reasons why preference was not given to Indian firms as subcontractors or suppliers for each requirement where it was determined by the Contractor that such preference would not be consistent with the efficient performance of the contract; and (vi) The number of Indian organizations and Indian-owned economic enterprises contacted, and the number receiving subcontract awards under this contract.

(6) Submit to the Contracting Officer for approval a quarterly report which summarizes the Contractor's Indian preference program and indicates the number and types of available positions filled by Indians and non-Indians, and the dollar amounts of all subcontracts awarded to Indian organizations and Indian-owned economic enterprises, and to all other firms.

(7) Maintain records pursuant to this clause and keep them available for review by the Government until expiration of one (1) year after final payment under this contract, or for such longer period as may be required by any other clause of this contract or by applicable law or regulation.

(b) For purposes of this clause, the following definitions of terms shall apply:

(1) The terms "Indian," "Indian Tribe," "Indian Organization," and "Indian-owned economic enterprise" are defined in the clause of this contract entitled "Indian Preference."

(2) "Indian reservation" includes Indian reservations, public domain Indian Allotments, former Indian reservations in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act (85 Stat. 688; 43 U.S.C. 1601 et seq.).

(3) "On or near an Indian Reservation" means on a reservation or reservations or within that area surrounding an Indian reservation(s) where a person seeking employment could reasonably be expected to commute to and from in the course of a work day.

(c) Nothing in the requirements of this clause shall be interpreted to preclude Indian Tribes from independently developing and enforcing their own Indian preference requirements. Such requirements must not conflict with any Federal statutory or regulatory requirement dealing with the award and administration of contracts.

(d) The Contractor agrees to include the provisions of this clause, including this paragraph (d), in each subcontract awarded at any tier under this contract and to notify the Contracting Officer of such subcontracts.

(e) In the event of noncompliance with this clause, the Contracting Officer may terminate the contract in whole or in part or may impose any other sanctions authorized by law or by other provisions of the contract.

BILLING CODE 4110–12–M

OFFICE OF PERSONNEL MANAGEMENT

41 CFR Part 16–4

Procurement Regulations

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: These regulations call for the simultaneous submission of Federal Employees Health Benefit (FEHB) carriers' benefit and rate proposals. The regulations will permit an assessment of the impact of benefit and rate proposals on both the Government and enrollees in a more timely and orderly fashion than is possible with the present FEHB contract negotiation cycle.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Mary Ann Mercer, 202–254–9574.

SUPPLEMENTARY INFORMATION: On February 22, 1983, the Office of Personnel Management published proposed rules in the **Federal Register** [48 FR 7460–7461, 48 FR 7478–7479] with a request for comments from interested parties before publication as final regulations. Respondents included 29 of the 132 carriers participating in the FEHB Program, one non-participating carrier, two Federal agencies, and one individual in the private sector. The responses were generally in favor of the simultaneous submission of benefit and rate proposals, but were mixed with regard to the due date of May 31. The comments focused on two primary concerns:

OPM's Discretion To Request Benefit and Rate Proposals

Several commentors felt that the Director of OPM should not be given discretion to request rate proposals because the Director's decision not to request rate proposals in a particular year could require rates that are too low or too high for the benefits, given fluctuations in inflation, utilization, and insured populations. Such concerns are unnecessary: The FEHB statute itself requires that rates "reasonably and equitably reflect the cost of the benefits provided." Any use of the discretion provided by these regulations will necessarily require preservation of the relationship between rates and benefits. Some community rated plans expressed concern that, since they meet their expenses through uniformly and equally applied community rates, the integrity of community rating could not be maintained if a plan were prevented from applying a necessary rate increase to the Federal group. Again, we would reassure the carriers that the statutory mandate that rates reflect the cost of the benefits provided will govern any use of OPM's discretion.

Date of Final Rate Submission

Carriers stated that the final rate submission date should not be moved forward from July 31 to May 31. They argue that under existing regulations carriers base rate estimates, in part, on paid claims and utilization experience from the beginning of the most recent contract year through June. Final rate proposals have been due July 31 and five or six months of experience were available to draw on for the rate estimates. Under the new regulations, approximately four months' experience (January through April) for the current contract year will be available prior to the May 31 filing date. This paid claims experience, however, would be based in part on claims for services that were incurred the previous year. Therefore, the data submitted from the previous contract year may not be representative of current utilization since it would not fully reflect the most current benefits and most recent open season enrollment changes. Due to this limited current experience, the carriers have suggested that they will be forced to build an additional margin into the proposed rates to account for unexpected increases in claims. This margin, according to the carriers, would result in higher premiums.

As we have already observed, there is a statutory relationship between premium levels and the cost of benefits provided. OPM will work within the statutory scheme. Our regulations are merely intended to enhance the fiscal integrity of the Program by providing sufficient time to analyze benefit and rate proposals to ensure that rates are adequate and acceptable to employees and the Government.

While we recognize that the claims and utilization experience cutoff date will occur two months earlier than it did under the previous regulations, the proposed rates will still be negotiated by OPM and the carrier, and the established premium rate will require OPM's consideration and final approval, as has been the procedure in the past. OPM will, as in the past, carefully evaluate proposals to ensure that the rates established are reasonable and equitable for the benefits offered, given inflation and utilization experience.

Miscellaneous Issues

One carrier recommended that an extension of the May 31 date for submission of benefit and rate proposals be applicable to all plans. It is not the intention of the regulations to extend the May 31 deadline for benefit and rate proposals on a plan-by-plan basis. In the event that the Director determines an extension for submission is in the interest of the Program, the extension would apply to all participating plans.

A concern expressed by one community rated carrier is that the change in date of submission of final rate proposals to May 31 will affect its other lines of business. Community rated plans gear some of their other contract negotiations to the FEHB Program negotiation process. Carriers that do so generally establish their per capita hospital and physician fees prior to FEHB Program negotiations and use the information in establishing their proposed rates for the FEHBP. Under the new regulations, some carriers will not have completed their negotiations with hospitals and doctors prior to May 31, so that their per capita hospital and physician fees will not be finally established. OPM recognizes that there may be conflicts experienced by some community rated carriers during this initial year of adjustment, and will take this into account in its 1984 negotiations.

One carrier commented that the term "comprehensive medical plans" was omitted from the Title 41 regulations and believed this omission results in a conflict with the regulatory provisions that currently admit only comprehensive medical plans into the Program. Since statutory provisions govern the types of plans which will be accepted into the FEHB Program at any given time, we do not agree that a conflict exists. Furthermore, omission of the term "comprehensive medical plans" from the regulations provides flexibility to OPM in the event the Program is opened to other types of plans through future legislation.

One carrier offered that issuance of the regulations would have a significant economic impact on health maintenance organizations because submission of final rate proposals on May 31 rather than July 31 "would increase the risk of rate decisions that resulted in adverse financial consequences." This assertion assumes rates submitted will be inaccurate because they are submitted earlier. While it is true that there will be less experience at the time the rates are proposed, OPM will make its evaluations and will negotiate based on all information available at the time of its decision. The new regulations begin the process at an earlier date, but they do not conclude it earlier. Consequently, there will be no impact on rates in the long run.

E.O. 12291, Federal Regulation

OMP has determined that this is not a major rule as defined under Section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that, within the scope of the Regulatory Flexibility Act, this regulation will not have a significant economic impact on a substantial number of small entities because the regulations simply rearrange the timeframe in which health benefit carriers must submit information.

List of Subjects in 41 CFR Part 16-4

Government employees, Government procurement, Health insurance.

Office of Personnel Management.

Donald J. Devine,

Director.

Accordingly, the Office of Personnel Management is amending Part 16-4 of Chapter 16, Title 41, Code of Federal Regulations, by revising §§ 16-4.152-3 and 16-4.152.4 to read as follows:

PART 16-4—SPECIAL TYPES AND METHODS OF PROCUREMENT

* * * * *

§ 16-4.152-3 Applications to participate in the FEHB program.

By regulation (5 CFR 890.203), applications from carriers seeking participation in the FEHBP shall be submitted not later than the last day of the tenth month preceding the contract period to which they refer. Benefit and rate proposals for new plans shall be sumitted not less than seven months before the expiration of the then current contract period, unless the Director of OPM determines that a later submission date is acceptable. In its solicitation for new plans, OPM shall request detailed information of each carrier expressing interest in participating in the FEHBP. The Office of the Assistant Director for Insurance Programs shall evaluate the information received as set out in 5 U.S.C. Chapter 89, 5 CFR Part 890, and this Chapter 16, and the contracting officer shall notify carriers meeting these requirements of their approval to participate in the FEHBP during the following contract period. Since each application is considered on its own merits, there is no competition between offerors as is the case in other types of procurements. OPM shall seek to complete all benefit and rate negotiations no later than three months preceding the contract year to which they apply.

§ 16-4.152-4 Proposals of existing FEHBP carriers.

Benefit and/or rate changes in health benefit plans will be considered at the discretion of OPM. If the Director of OPM determines that it is beneficial to enrollees and the FEHBP to consider health plan benefit and/or rate changes for a given contract period, a "call letter" shall be issued to the carrier approximately 9 months prior to the expiration of the current contract period. Any proposal for change shall be in writing, specifically describe the change proposed, and be signed by an authorized official of the carrier. OPM will review any requested proposal for change and will notify the carrier of its decision to accept or reject the change. OPM may make a counter-proposal or at any time propose changes on its own motion. Benefit changes and/or rate proposals, when invited by OPM, shall be submitted not less than 7 months before the expiration of the then current contract period unless the Director of OPM determines that a later date is acceptable. The negotiation period shall begin approximately 7 months before the expiration of the current contract period, and OPM shall seek to complete all benefit and rate negotiations no later then 3 months preceding the contract period to which they will apply.

BILLING CODE 6325-01-M

GENERAL SERVICES ADMINISTRATION

41 CFR Ch.101

[FPMR Temp. Reg. D-69]

Federal Employee Parking

AGENCY: General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This regulation revises GSA's policies and procedures concerning Federal employee parking. The regulation was developed as part of an effort to review and streamline GSA's property management regulations. The intended effect is to lessen the burdensome layering of constraints on Federal managers caused by excessive Government regulations.

DATES: Effective date: April 15, 1983. Expiration date: January 31, 1984. Comments due by: June 14, 1983.

ADDRESS: Comments should be addressed to General Services Administration (PR), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: John Quigley (202-566-1875).

SUPPLEMENTARY INFORMATION: GSA, in cooperation with an interagency committee, is reviewing the Federal Property Management Regulations in an attempt to make them less burdensome on agencies. Regulations that can be changed immediately, such as the regulations on parking, will be revised, and they wil be incorporated into the permanent regulations after the review is completed. GSA expects that, as a result of the review effort, Federal managers will be better able to control and implement the programs for which they are responsible because they will have more decisionmaking freedom as restrictive regulations are relaxed.

The General Services Administration has determined that this rule is not a major rule for the purposes of E.O. 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. Therefore, a Regulatory Impact Analysis has not been prepared. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Therefore, the following temporary regulation is added to the appendix at the end of Subchapter D in 41 CFR Chapter 101 to read as follows:

Federal Property Management Regulations Temporary Regulation D-69

March 28, 1983.

Federal Employee Parking

1. *Purpose.* This regulation provides revised procedures concerning Federal employee parking and supersedes the provisions of 41 CFR 101-20.111 and 101-20.117.

2. *Effective date.* The provisions of this temporary regulation are effective upon publication in the **Federal Register**.

3. *Expiration date.* This regulation expires on January 31, 1984.

4. *Applicability.* The provisions of this regulation apply to Government-owned and leased property under the control of the General Services Administration.

5. *Background.* The General Services Administration, in conjunction with an interagency advisory committee, is reviewing the Federal Property Management Regulations. The purpose of the review is to simplify, update, and streamline GSA's regulations. Areas selected for review include Part 101-20, Management of Buildings and Grounds. The regulations in that part concerning parking are being revised immediately to ensure adequate coverage.

GSA has attempted to resolve major concerns of agencies by involving the interagency group in the drafting process. Further improvements and suggestions can be incorporated prior to issuance of a permanent regulation.

6. *Parking facilities.*

a. Parking facilities shall be compatible with the character of neighborhoods and consistent with local planning requirements. They shall not adversely affect the use or appearance of property, and shall not create traffic hazards.

b. As necessary or upon agency request, GSA may provide for the regulation and policing of parking facilities. GSA will consult with primary occupant agencies prior to implementing procedural changes. Such regulation and policing may include:

(1) The issuance of traffic rules and regulations;

(2) The installation of signs and markings for traffic control. (Signs and markings shall be in conformance with the Manual on Uniform Traffic Control Devices published by the Department of Transportation.);

(3) The issuance of citations for parking violations; and

(4) The immobilization or removal of illegally parked vehicles.

c. When the use of parking space is controlled as in b above, all privately owned vehicles other than those authorized to use designated visitor or service areas must display a parking permit. This requirement may be waived in parking facilities where the number of available spaces regularly exceeds the demand for such spaces.

d. GSA may delegate the responsibility for management, regulation, and policing of parking facilities by agreement with occupant agencies or by contractual arrangements with lessors or parking management contractors. Where possible, existing contracts shall be amended or modified before renewal to conform with the policies of this regulation.

7. *Allocation and assignment of parking for official needs.* GSA has responsibility for ensuring the availability of parking spaces for official needs. GSA may, by mutual agreement, delegate allocation and assignment responsibilities to occupant agencies or boards, commissions, and similar groups. GSA and other agencies with assignment responsibilities shall determine the appropriate number of spaces at each facility for official purposes; such determinations will be based upon submissions of information from occupant agencies regarding their needs. Parking spaces in controlled facilities shall first be reserved for official needs, in the following order of priority:

a. At buildings containing U.S. Postal Service mailing operations, official postal vehicles.

b. Government-owned vehicles specially designed and used for criminal apprehension, firefighting, and other emergency functions.

c. Privately owned vehicles of Federal judges appointed under Article III of the Constitution and of Members of Congress. (This priority does not extend to members of their staffs.)

d. Other Government-owned and -leased vehicles, including motor pool vehicles and vehicles assigned for general use.

e. Service vehicles and vehicles of patrons and visitors. (Agencies are encouraged to provide accommodations for handicapped visitors. Accommodations for handicapped visitors shall be provided when necessitated by agency program requirements.)

8. *Allocation and assignment of employee parking spaces.*

a. Parking spaces not required for official needs may be used for employee parking.

b. GSA (or other agencies having assignment responsibilities) will determine the total number of spaces available for employee parking. Normally, a separate determination will be made for each parking facility. In major metropolitan areas, however, GSA and occupant agencies may ascertain that zonal allocations would achieve more efficient use of space or equality in the availability of parking.

c. Space available for employee parking will be allocated for occupant agency use on an equitable basis. Allocations may be made in proportion to each agency's share of building space, office space, or total employee population, as appropriate. In certain cases, GSA may allow a third party, such as a board composed of representatives of agencies sharing space, to determine proper reallocations among the agencies.

d. Agencies shall in turn assign spaces to their employees, using the following order of priority:

(1) Severely handicapped employees. Justifications based on medical opinion may be required.

(2) Executive personnel and persons who work unusual hours.

(3) Vanpool/carpool vehicles.

(4) Privately owned vehicles of occupant agency employees which are regularly used for Government business at least 12 days per month and which qualify for reimbursement of mileage and travel expenses under Government travel regulations.

(5) Other privately owned vehicles of employees, on a space-available basis. (In locations where parking allocations are made on a zonal basis, GSA and affected agencies may cooperate to issue additional rules, as appropriate.)

9. *Utilization of parking.*

a. Agencies shall develop, implement, and maintain employee carpooling/vanpooling programs and promote such programs. (Guidelines for the administration of carpooling/vanpooling programs are contained in FPMR Temporary Regulation A-21.)

b. GSA will take all feasible measures to improve the utilization of parking facilities. Such measures may include the conducting of surveys and studies, the periodic review of parking space allocations, the dissemination of parking information to agencies, the use of stack parking practices where appropriate, and the employment of parking management contractors and concessionaires.

10. *Guidelines for agency implementation.*

a. In most instances, the assignment of individual reserved spaces should be minimized; this allows the number of permits to be overallocated and results in increased efficiency.

b. In order to promote fuel conservation, reduce traffic congestion, reduce the demand for parking spaces, and reduce air pollution, agencies are encouraged to make available as many parking spaces as possible for the use of vanpools/carpools.

c. Agency procedures for the assignment of parking spaces should be maintained in writing. Provisions for reviewing assignments, enforcing compliance with regulations, and enforcing penalties for misrepresentation on applications are also recommended.

d. Occupant agencies should make every effort to schedule arrival and departure times for employees to facilitate carpooling and the use of mass transit.

e. Subject to the availability of satisfactory and secure space and facilities, agencies should reserve areas for the parking of bicycles and other two-wheeled vehicles.

f. Implementation of the provisions of this regulation may require negotiation, as appropriate, with recognized labor organizations.

11. *Definitions.*

a. "Vanpool/carpool" means a group of two or more people regularly using a motor vehicle for transportation to and from work. The number of persons in a vanpool/carpool will normally be the basis for priority of assignments.

b. "Executive" means a Government employee with management responsibilities which, in the judgment of the employing agency head or his/her designee, require preferential assignment of parking privileges.

c. "Handicapped employee" means an employee who has a severe, permanent impairment which for all practical purposes precludes the use of public transportation, or an employee who is unable to operate a car as a result of permanent impairment who is driven to work by another. Priority may require certification by an agency medical unit, including the Veterans Administration or the Public Health Service.

d. "Postal vehicle" means a Government-owned vehicle used for the transportation of mail, or a privately owned vehicle used under contract for the transportation of mail.

e. "Unusual hours" means work hours that are frequently required to be varied and do not coincide with any regular work schedule. This category includes individuals who regularly or frequently work significantly more than 8 hours per day. Unusual hours does not include shift workers, those on alternate work schedules, and those granted exceptions to the normal work schedule (e.g., flex-time).

f. "Zonal allocations" means the allocation of parking spaces on the basis of zones established by GSA in conjunction with occupant agencies. In metropolitan areas where this method is used, all agencies located in a designated zone will compete for available parking in accordance with instructions issued by GSA. In establishing this procedure, GSA will consult with all affected agencies.

12. *Effect on other directives.* The provisions of §§ 101–20.111 through 101–

20.111–3 and 101–20.117 through 101–20–117–4 are superseded by this temporary regulation.

Ray Kline,

Acting Administrator of General Services.

BILLING CODE 6820–23–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6507]

Suspension of Community Eligibility Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the flood plain management requirements of the program. If FEMA receives documentation that the community has adopted the required flood plain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register.**

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division, (202) 287–0270, 500 C Street Southwest, Donohoe Building—Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities are suspended on the effective date in the fourth column, so that as of that date flood insurance is no longer available in the community. However, those communities which, prior to the suspension date, adopt and submit documentation of legally enforceable flood plain management measures required by the program, will continue their eligibility for the sale of insurance. Where adequate documentation is received by FEMA, a notice withdrawing the suspension will be published in the **Federal Register.**

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that notice and public procedure under 5 U.S.C. 533(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6 month, 90 days, and 30 days notification addressed to the Chief Executive Officer that the community will be suspended unless the required flood plain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Associate Director of State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local flood plain management together with the availability of flood insurance decreases the economic impact of future looses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate flood plain management, thus placing itself in non-compliance of the Federal standards required for community participation.

In each entry, a completed chronology of effective dates appears for each listed community.

List of Subject in 44 CFR Part 64

Flood insurance, Flood plains.

PART 64—[AMENDED]

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of eligible communities.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of Flood Insurance in community	Special flood hazard area identified	Date [1]
Connecticut: New Haven	West Haven, city of	090092C	Oct. 6, 1971, emergency; Jan. 17, 1979, regular; Apr. 18, 1983, suspended.	May 31, 1974, Jan. 17, 1979	Apr. 18, 1983.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 97

[PR Docket No. 82-83; FCC 83-118; RM-3705; RM-3729; RM-3734; RM-3778; RM-3831; RM-3833; RM-3860]

Amateur Radio Service; Expansion of the Telephony Segments of the High Frequency Amateur Radio Service Bands

AGENCY: Federal Communications Commission.

ACTION: Final rule (Report and Order).

SUMMARY: The Commission is authorizing the use of additional frequencies for telephony operation in the 14 MHz Amateur Radio Service band. The frequencies currently authorized for such use are, at times, extremely congested. This rule amendment will provide more frequencies for this use and thus relieve some of the congestion.

EFFECTIVE DATE: May 22, 1983.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Steve Lett, Private Radio Bureau, (202) 632–4964.

Radio.

First Report and Order

In the matter of an Expansion of the Telephony Segments of the High Frequency Amateur Radio Service Bands; PR Docket No. 82–83, RM–3705, RM–3729, RM–3734, RM–3778, RM–3831, RM–3833, RM–3860.

Adopted: March 31, 1983.

Released: April 11, 1983.

By the Commission.

1. On February 11, 1982, the Commission adopted a Notice of Inquiry and Proposed Rule Making in the above-captioned matter.[1] That Notice was in response to seven petitions for rule making, each requesting that the Amateur Radio Service Rules (Part 97) be amended to provide for the use of telephony operation (emission types A3 and F3) on additional portions of the amateur high frequency (HF) bands—the bands between 3 and 30 MHz. In its Notice, the Commission specifically proposed to "* * * expand telephony privileges in the 14 MHz amateur band by adding the frequencies 14150–14200 kHz to those currently authorized for such use." The Commission did not propose to change any of the privileges accorded to the various operator license classes.

2. The Commission also initiated an inquiry in its Notice, seeking to gather additional information on alternative approaches to expanding frequencies for telephony use in the other HF bands and the desirability of expansion in each of the bands. The Commission stated, "* * * we are not proposing expansion of any of the other telephony subbands between 3.5 and 29.7 MHz because we feel the issues involved are too inadequately defined for us to commit ourselves to any particular course of action." Today, we are adopting a separate Further Notice of Proposed Rule Making to set forth our specific proposals for expansion in the bands other than the 14 MHz band in order to continue the dialogue on those issues.[2] The action we are taking in this First Report and Order is intended to dispose of the issues relating to expansion of the 14 MHz telephony "subband" by our promulgation of final rules for that band.

3. Several hundred comments were filed on the Commission's Notice. The vast majority of the comments received from U.S. amateur operators supported the proposal to expand the 14 MHz telephony subband and virtually all comments addressing the issue also favored deleting from General class operators the privileges between 14150 kHz and 14200 kHz, and instead substituting new privileges between 14225 kHz and 14275 kHz in order that their telephony privileges would be on contiguous frequencies. The comments were well divided, however, on the issue of whether to delete from Advanced class operators privileges on the frequencies between 14150 kHz and

[1] 47 FR 8798 (March 2, 1982).

[2] See Further Notice of Proposed Rule Making in PR Docket 82–83, FCC 83–119, 48 FR——(April ——, 1983).

14175 kHz. Many commenters stated that removing privileges from any license class would be unfair, while others pointed out that Advanced class operators, for all practical purposes, do not use these frequencies anyway. Proponents of deleting the privileges claimed that such a move would enhance the incentive licensing program since some of the new telephony frequencies would be reserved exclusively for Amateur Extra class licensees and that it would lessen the impact that expansion of the telephony subband would have on non-U.S. amateur operators.

4. The Commission also received several comments from individual amateur operators and groups of operators outside the U.S. Most of these comments came from Canada and were typified by those of the Brandon Amateur Radio Club of Manitoba. They stated, "* * * we know that here in Canada due to generally prevailing propagation conditions that the proposed expansion will render that portion of 14 MHz unusable due to the sheer numbers of American amateurs that will move into that portion of the 14 MHz band." Conversely, the comments of the Wireless Institute of Australia stated: "The Institute is persuaded that having regard to the capabilities of modern equipment, such band extension would most likely have minimal effect. The Institute therefore believes that no reason can be advanced at this time for an objection to be lodged." With respect to the potential impact of the Commission's proposal on non-U.S. amateur operators, the American Radio Relay League, Inc. (ARRL) [1] stated in its comments that the "* * * *de facto* worldwide allocation of telegraphy and telephony is in large part a result of the band plans established by the International Amateur Radio Union (IARU), the worldwide Union of national amateur radio societies * * *. The IARU band plan for the 14 MHz band, in effect in all three IARU regions, recommends use of 14.000–14.100 MHz for telegraphy only, and 14.100–14.350 MHz for telephony and telegraphy * * *. There will, after implementation of the proposed telephony subband expansion, be a 50 kHz buffer between domestic (and foreign) telegraphy operation and domestic telephony operation." The Commission is persuaded that the small potential impact of the proposed telephony subband expansion on non-U.S. operators is outweighed by the necessity to alleviate the extraordinary overcrowding that U.S. amateurs currently face in the 14 MHz band.

5. With regard to the issue of operator privileges, the ARRL in its comments proposed changes in the operator privileges such that the "* * * segment 14.150–14.175 MHz would be available for use only by Amateur Extra Class licensees, of which there were, as of May 28, 1982 only 30,121—approximately 7% of the U.S. amateur population." The segment 14.175–14.225 MHz "* * * would be available for use only by Extra and Advanced class licensees, constituting 30% of the U.S. amateur population, or 123,199 licensees." The ARRL also stated that "* * * the League agrees with the Commission that no significant detrimental impact on international operations should result from expansion of the 14 MHz telephony subband. However, the League's proposal was designed to minimize any *perceived* impact on foreign amateurs."

6. Although we are reluctant to remove privileges from any class of license, we are persuaded by the comments recommending this approach. We also believe that this approach will permit the greatest flexibility in the future after we have had an opportunity to assess the long-term impact of our immediate action. Although we are reluctant to establish a new "incentive" subband, we do not find this action to be unduly unfair to Advanced class licensees in view of the fact that they currently make little use of the frequencies in question.

7. Finally, we are in receipt of a Motion to Set Aside Comments of the American Radio Relay League, filed by Josef Schrabal. The Commission finds that the ARRL comments have been constructed to provide insight into this proceeding that might otherwise have been unobtainable. We, therefore, are denying the Motion.

8. In accordance with Section 605 of the Regulatory Flexibility Act of 1980 (5 U.S.C. 605), the Commission has certified, in the original Notice of this proceeding, that these rule amendments are not anticipated to have a significant economic impact on a substantial number of small entities since the Amateur Radio Service may not be used for commercial radio communication (see 47 CFR 97.3(b)) and because these rules would have no forseeable impact on manufacturers of Amateur Radio Service equipment.

9. Accordingly, it is ordered that effective at 0001 UTC on May 22, 1983, Part 97 of the Commission's Rules and Regulations, 47 CFR Part 97, is amended as set forth in the attached Appendix. It is further ordered that to the extent specified herein RM–3705, RM–3729, RM–3734, RM–3778, RM–3831, RM–3833, and RM–3860 are granted and in all other respects they are continued. It is further ordered that the Motion of Josef Schrabal is denied. It is further ordered that this proceeding is continued. This action is taken pursuant to authority contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended. Further information on this matter may be obtained by contacting: Steve Lett, (202) 632–4964, Private Radio Bureau, Federal Communications Commission, Washington, DC 20554.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 97—[AMENDED]

Part 97 of the Commission's Rules and Regulations, 47 CFR Part 97, is amended as follows:

1. In § 97.7, paragraph (a) is revised to read as follows:

§ 97.7 Privileges of operator licenses.

(a) Amateur Extra and Advanced Class. All authorized amateur privileges including exclusive frequency operating authority in accordance with the following table:

Frequencies	Class of license authorized
3500–3525 kHz	Amateur extra only.
3775–3800 kHz	Do.
7000–7025 kHz	Do.
14,000–14,025 kHz	Do.
14,150–14,175 kHz	Do.
21,000–21,025 kHz	Do.
21,250–21,270 kHz	Do.
3800–3890 kHz	Amateur extra and advanced.
7150–7225 kHz	Do.
14,175–14,225 kHz	Do.
21,270–21,350 kHz	Do.

* * * * *

§ 97.61 [Amended]

2. In § 97.61, in the table in paragraph (a), the row beginning with "14000–14200 (kHz)" is revised by beginning the row with "14000–14150 (kHz)" so that the entire row reads as follows:

14000–14150	F1

3. Also in § 97.61, in the table in paragraph (a), the row beginning with "14200–14350 (kHz)" is revised by

[1] The American Radio Relay League, Inc. is an association of amateur radio operators with over 100,000 members who are licensed by the Commission.

beginning the row with "14150–14350 (kHz)" so that the entire row reads as follows:

14150–14350	A3, A4, A5, F3, F4, F5

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1039

[Ex Parte No. 346 (Sub-No. 9A)]

Liquid Iron Chloride, Exemption

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Commission is exempting on a nationwide basis the rail transportation of liquid iron chloride from regulation pursuant to 49 U.S.C. 10505. This action gives rail carriers greater freedom to compete with motor carriers for this traffic.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245, or Mont Burrup, (202) 275–6447.

SUPPLEMENTARY INFORMATION: There are no substantive differences between the exemption proposed and the one adopted here (See Appendix). Comments were filed by three shippers and three railroads. A description of the comments and our reasons for concluding that the exemption should be approved are contained in a detailed decision in this proceeding.

Interested persons can purchase a copy of the full decision by contacting T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area), or toll free (800) 424–5403.

List of Subjects in 49 CFR Part 1039

Agricultural commodities, Intermodal transportation, Railroads.

(49 U.S.C. 10505, 5 U.S.C. 553)

Decided: April 7, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Appendix

PART 1039—[AMENDED]

Title 49 of the Code of Federal Regulations, § 1039.11, is amended by adding the following commodity to the list of miscellaneous commodities exempt from regulation:

§ 1039.11 Miscellaneous commodities exemption.

* * * * *

28	195	22–23	Iron chloride, liquid.

Proposed Rules

Federal Register
Vol. 48, No. 74
Friday, April 15, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection

7 CFR Part 68

United States Standards for Split Peas; Review of Standards

AGENCY: Federal Grain Inspection Service[1]

ACTION: Proposed rule.

SUMMARY: In compliance with the requirements for the periodic review of existing regulations, the Federal Grain Inspection Service (FGIS) has reviewed the U.S. Standards for Split Peas. FGIS proposes that no changes be made to the standards.

DATE: Comments must be submitted on or before June 14, 1983.

ADDRESS: Comments must be submitted in writing, in duplicate, to Lewis Lebakken, Jr., Regulations and Directives Unit, USDA, FGIS, Room 667 South Building, 1400 Independence Avenue, SW, Washington, D.C. 20250, telephone (202) 382–1738.

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., 202–382–1738.

SUPPLEMENTARY INFORMATION: The U.S. Standards for Split Peas were established under the authority of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 *et seq;* the Act). Pursuant to section 203(c) of the Act (7 U.S.C. 1622(c)), the Administrator is authorized to develop and improve standards for all assigned agricultural commodities.

Executive Order 12291

This proposed rule has been issued in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1. This action has been classified as nonmajor because it does not meet the criteria for a major regulation as established in the Order.

Regulatory Flexibility Act Certification

Kennety A. Gilles, Administrator, FGIS, has determined that the proposed rule will not have a significant economic impact on a substantial number of small entities because most users of split pea inspection services do not meet the requirements for small entities as defined in Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*)

Standards Review

The review of the U.S. Standards for Split Peas (7 CFR 68.501–68.510) included a determination of the continued need for the standards; a review of changes in marketing factors and functions affecting the standards; and a determination of the potential for improving the standards and their application through the incorporation of grading factors or tests which better indicate quality attributes. The objective of the review was to assure that the standards continue to serve the needs of the market to the greatest extent. Although no changes are being proposed at this time, FGIS will continue to study and evaluate the standards, as is appropriate, to meet the future needs of the industry.

In the course of reviewing the U.S. Standards for Split Peas, meetings were held with the dry pea industry that were attended by representatives of split pea processors, packagers, and domestic and export merchandisers. The purpose of these meetings was to discuss the current standards for split peas and to solicit opinions on improvement of the standards. It was the consensus of industry members attending these discussions that the current U.S. Standards for Split Peas are meeting the needs of the split pea industry and no changes in the standards are needed at this time.

Based upon all information available to FGIS, it has been determined that the standards presently meet the objectives and criteria which were used in the review of regulations.

List of Subjects in 7 CFR Part 68

Administrative practices and procedures—FGIS, Agricultural commodities, and Export.

Accordingly, FGIS proposes that no changes be made to the U.S. Standards for Split Peas which appear at 7 CFR 68.501–68.510.

(Sec. 203, 205, 60 Stat. 1087, 1090 as amended; 7 U.S.C. 1622, 1624)

Dated: April 4, 1983.

Kenneth A. Gilles,

Administrator.

[FR Doc. 83–10157 Filed 4–14–83; 8:45 am]

BILLING CODE 3410–EN–M

[1] Authority to exercise the functions of the Secretary of Agriculture contained in the Agricultural Marketing Act of 1946 as amended (7 U.S.C. 1621–1627) concerning inspection and standardization activities related to grain and similar commodities and products thereof, has been delegated to the Administrator, Federal Grain Inspection Service (7 U.S.C. 75a; 7 CFR 68.2 (e)).

Food and Nutrition Service

7 CFR Part 226

Child Care Food Program; Documentation and Verification of Eligibility

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule proposes to amend Part 226 to implement several provisions of section 803 of Public Law 97–35, the Omnibus Budget Reconciliation Act of 1981. Under this proposal: (1) Minimum standards are established for documentation of eligibility; and (2) procedures are set forth for the verification of the information on free and reduced-price applications submitted to institutions. This proposal is intended to prevent errors and abuse in the delivery of free and reduce-price meal benefits.

DATE: To be assured of consideration, comments must be postmarked on or before May 31, 1983.

ADDRESS: Comments should be sent to Jordan Benderly, Director, Child Care and Summer Programs Division, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. All written submissions will be available for public viewing in Room 416, 3101 Park Center Drive, Alexandria, Virginia 22302, during regular business hours (8:30 a.m. to 5:00 p.m.) Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Benderly or Ms. Beverly Walstrom at the address listed above, or call (703) 756–3888.

SUPPLEMENTARY INFORMATION:

Classification. This proposed action has been reviewed under Executive Order 12291 and has been classified not major because it will not have an annual

effect on the economy of $100 million, will not cause a major increase in cost or prices for program participants, individual industries, Federal agencies, State or local government agencies or geographic regions, and will not have a significant economic impact on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or foreign markets. The proposed rule is intended to ensure that free and reduced-price benefits are directed to only those children from families whose income falls within the Income Eligibility Guidelines set forth by the Department by household size.

This proposal has also been reviewed with regard to the requirements of Public Law 96–354, the Regulatory Flexibility Act. Pursuant to that review the Acting Administrator of the Food and Nutrition Service has certified that this proposed rule does not have a significant economic impact on a substantial number of small entities.

In accordance with the Paperwork Reduction Act of 1980, (44 U.S.C. 3507), the reporting and recordkeeping requirements that are included in this proposed rule will be submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained.

Background. Institution reimbursement for meals served to children enrolled in child care centers and outside-school-hours care centers is based on the eligibility of enrolled children for free, reduced-price, and paid meals. For this reason, eligibility information must be maintained by institutions, other than sponsoring organizations of day care homes. (Day care home sponsoring organizations must collect eligibility information only for provider's children which participate in the CCFP.) In the past, institution officials were directed to determine eligibility for free and reduced-price meals "solely on the basis of an affidavit executed in such form as the Secretary may prescribe by an adult member of such household." Until recently, this affidavit (application) was limited to the information necessary to determine eligibility, namely family size and income. In order to determine eligibility, institution officials were directed to compare the Income Eligibility Guidelines issued by the Secretary to the family size and income information furnished by the parent.

The National School Lunch Act (NSLA) also provided that institution officials "may for cause seek verification of the data in such application." The "for cause" provision limited verification to those situations where officials had actual cause to believe the information furnished on the application was erroneous.

Changes Due to Public Law 97–35. Section 803 of Public Law 97–35 made several changes to the NSLA which require the Secretary to use discretion in the rulemaking process. In addition to these discretionary provisions, section 803 made a number of nondiscretionary changes to the NSLA. The nondiscretionary provisions were effective upon the date of enactment, August 13, 1981. The following discussion highlights the nondiscretionary and discretionary changes.

Nondiscretionary Provisions. The Interim CCFP regulation, published November 27, 1981, at 46 FR 57980–58006, and finalized on August 20, 1982 (47 FR 36524–36551) contained a number of the nondiscretionary changes mandated by Public Law 97–35 regarding modifications in procedures and guidelines used in determining the eligibility of children enrolled in the Program for free and reduced-price meals. Provisions mandated by Section 803 and Section 810(c) of the statute and contained in the previously published rulemaking include:

(a) The use of the Secretary's, rather than the State's, guidelines for determining the eligibility of enrolled children for free and reduced-price meals;

(b) The requirement that institutions announce the Secretary's guidelines for free and reduced-price meals by including them in the annual news release;

(c) The requirement that applications for free and reduced-price meals be distributed to parents or guardians of enrolled children; and

(d) The requirement that the application and any other descriptive materials distributed to parents or guardians contain only the income standards for reduced-price meals and contain an explanation that indicates that households with incomes less than or equal to the reduced-price standards listed would be eligible for free-or reduced-price meals.

Although these requirements have been implemented in the CCFP and promulgated in Program regulations, these provisions appear in this proposal since the sections and paragraphs which contain them have been reorganized and revised. Commenters should understand that these requirements are not a part of this proposal that is open for comment since the provisions are nondiscretionary and the public has already been given the opportunity to comment on them by the publication of the CCFP interim rule on November 27, 1981.

Social Security Number Collection. This rule also serves to propose that, as a condition of eligibility for free and reduced-price meals, parents or guardians of enrolled children report the social security numbers of all adult members of the household on the application for those Program meals. This provision, originally included in the CCFP interim rule, published on November 27, 1981, at 46 FR 57980–58006, and in the CCFP final rule, published on August 20, 1982, at 47 FR 36524 was a nondiscretionary legislative change required by Section 803 of Public Law 97–35, the Omnibus Budget Reconciliation Act of 1981. However, at this time, the Department is involved in litigation concerning this provision of the regulations and is currently prohibited from collecting social security numbers because of a preliminary injunction which has been handed down in the case of *Alcarez* v. *Block*. The Alcarez litigation is ongoing at this time.

However, the Department believes it is essential to give effect to the express intent of Congress that social security numbers be collected in the Program. Therefore, in order to recommence the collection of social security numbers, the collection requirement is proposed in this regulation. We continue to believe that the Department's earlier implementation of the social security number collection requirement through the above cited regulations was in accordance with law.

Discretionary Provisions. Section 803 of Public Law 97–35 requires that households submit appropriate documentation, as prescribed by the Secretary, of the income of the household as a condition of eligibility for free and reduced-price meals. In addition, section 803 authorizes the Secretary, States, and local entities to seek verification of the data contained in the application for free and reduced-price meals. Section 9(b) of the NSLA, as amended, removes the restriction that information on the application may be verified solely "for cause." Further, the statute requires that the above-mentioned entities undertake verification procedures prescribed by the Secretary, and make appropriate changes in the eligibility determinations on the basis of such verfication. This proposed regulation, therefore, sets forth standards for the documentation necessary for determining the eligibility status of enrolled children and provides

procedures for the verification of eligibility in the CCFP.

Other Proposed Changes. In addition to the regulatory changes necessitated by Public Law 97–35, the Department is proposing to reorganize and expand § 226.23 to include a number of provisions which have been required in the operation of the CCFP, but which have not been specifically addressed in prior Program regulations. Proposed to be added to Program regulations are: (1) a specific requirement for institution distribution of letters to parents with the application for free and reduced-price meals (§ 226.23(e)(2)); (2) specification of information necessary for inclusion in the letter to parents (§ 226.23(e)(2)); (3) provision of instruction on activities associated with the determination of eligibility for free and reduced-price meals (§ 226.23(e)(4)) and (4) procedures which institutions may follow for providing affected parties the opportunity for appealing denied or terminated benefits (§ 226.23(e)(5)).

Departmental Response. This preamble is composed of three segments: (1) Documentation, (2) verification and (3) other changes. Each segment reiterates the authority for and summarizes each proposed action. Comments are requestes on all aspects of the proposed actions discussed below.

I. *Documentation.*

Section 803(b) of Public Law 97–35 amenmd section 9 of the NSLA to require the Secretary to prescribe the necessary components which constitue adequate documentation of eligibility for benefits. This proposed rule, therefore, includes a definition of documentation (§ 226.2) and a number of provisions which deal exclusively with documentation as it relates to the eligibility application. Section 226.23(e) outlines (1) the procedures for distributing eligibility applications, (2) the data which must be requested on the application, (3) the statements of information which must be included on the application, and (4) the documentation which must be submitted by the parents or guardians of enrolled children as a condition of eligibility for free and reduced-price meals.

The documentation portion of this proposed regulation closely parallels that of the interim rule on application procedures for the National School Lunch Program, published on July 23, 1982, at 47 FR 31848–31853. The Department feels that it is important that similar requirements be implemented in the different Special Nutrition Programs to ensure conformance and consistency, when appropriate. The Department feels that the documentation requirements included in this proposal will not pose any operational difficulties for child care institutions.

a. *Definition of Documentation.* The Department, given the statutory authority to prescribe adequate documentation of eligibility, proposes to define documentation as completion of the following information on the application for free and reduced-price meals:

(1) total current household income;

(2) names of all household members;

(3) social security numbers of all adult household members or an indication that a household member does not possess one; and

(4) the signature of an adult member of the household.

The approach is intended to maintain the existing self-certification process, thus limiting the burden on the applicant as well as on institution officials. However, it is felt that the submission of adequate information to provide for the possibility of verification should serve as a deterrent to understanding income, thus making this proposed action the most cost-effective method for reducing Program abuse. Commentors should be aware that the provision of information required on a free and reduced-price application would be considered a condition of eligibility, as required by Public Law 97–35. Applications which do not contain such documentation will be considered incompete and therefore insufficient to substantiate the receipt of Federal funds by the institution, or the determination of children as eligible for free and reduced-price meals.

b. *Application Data Requirements.* Section 226.23(e)(1)(ii) specifies the information which must be included on the eligibility application for free and reduced-price meals. Institutions must request the following household data on the eligibility application distributed to parents or guardians of enrolled children: (1) The names of all children for whom application is made; (2) the names of all other household members; (3) the social security number of all household members 21 years of age and older or an indication that a household member does not possess one; (4) the total current income of the household; and (5) the signature of an adult member of the household.

This proposal provides that, at the State agency's discretion, the eligibility application may also include a request for the household to indicate if it is participating in the food stamp program, so long as the applicant is informed that the provision of this information is not a condition of eligibility. State agencies are being given this option in order to assist in the verification of eligibility through the identification of the food stamp, as well as the non-food stamp, population. It is felt that this information may assist State agencies in ensuring that verification is performed on both non-food stamp households, as well as food stamp households, who have already undergone verification for the purpose of being determined eligible for the food stamp program.

This rule also includes a definition of "adult", so as to simplify the collection of social security numbers for Program purposes. Section 226.2 ("Adult") specifies that, for the purpose of the collection of social security numbers, an adult is any individual household member 21 years of age or older. Commentors should note that this definition is intended to affect the collection of social security numbers only and does *not* affect the requirement to indicate total household income on the eligibility application.

c. *Current Income.* In the past, institutions could consider either the family's current rate of income *or* the family's income during the past 12 months to determine eligibility for free and reduced-price meals. Section 9 of the NSLA, as amended by Public Law 97–35, states that "any child who is a member of a household whose income, at the time the application is submitted, is at an annual rate which does not exceed" the applicable family size income level is eligible to receive free or reduced-price meals. The Department is proposing to define "current income" as it is defined for the National School Lunch Program (NSLP) i.e., as income received during the month prior to application for free or reduced-price meals and multiplied by 12. If such income does not accurately reflect the household's income, then income shall be based on the projected annual household income. If the prior year's income provides an accurate reflection of the household's current annual income, the prior year may be used as a base for the projected annual income.

The definition has been developed to ensure compliance with the Congressional intent of Public Law 97–35. The Department believes that income received during the month prior to application, multiplied by 12, must serve as the basic standard for current income. The month prior to application was chosen because families will know how much income was received in that month and will not be forced to speculate. This approach does not address a number of situations such as seasonal workers or farmers who may have an unrepresentative income during

August or September when applications are filed. Consequently, the Department is proposing to allow the use of projected income for the current year in those cases where this approach would produce the most accurate reflection of a houshold's actual financial situation. In those situations where a projection of current annual income most accurately reflects a household's financial situation, the Department intends to allow the use of income information from the previous year as a base from which the current year's annual income can be estimated. In addition, a conforming change has been made in § 226.23(f) to refer to reporting eligibility of enrolled children to the administering agency based on current family size and income information.

d. *Application Information Requirements (§ 226.23(e)(1)(ii)).* In addition to the request for household data, § 226.23(e)(1)(ii) also requires that the following statements be included on the application: (1) a statement to the effect that "In certain cases, foster children are eligible for free and reduced-price meals regardless of household income. If such children are living with you and you wish to apply for such meals, please contact us."; and (2) a statement that "Sections 9 and 17 of the National School Lunch Act require that in order for your child to be eligible for free or reduced-price meals, you must provide the social security numbers of all adult members of your household. Provision of these social security numbers is not mandatory, but failure to provide the numbers will result in a denial of the application for free or reduced-price meals. This notice must be brought to the attention of all household members whose social security numbers are disclosed. The social security numbers may be used to identify household members in carrying out efforts to verify the correctness of information stated on the application. These verification efforts may be carried out through program reviews, audits, and investigations and may include contacting employers to determine income, contacting the State employment security office to determine the amount of benefits received and checking the documentation produced by household members to prove the amount of income received. These efforts may result in loss or reduction of benefits, administrative claims, or legal action if incorrect information is reported."

The purpose of the notice is to inform individuals whether disclosure of social security numbers is mandatory or voluntary, by what statutory or other authority such numbers are solicited, what uses will be made of the numbers and the consequences of not providing the account numbers. The regulatory wording in this proposal requires all State agencies and institutions to include the above wording on the application for benefits distributed to households.

Commenters should note that the statement included in § 226.23(e)(1)(ii) is slightly different from the statement included in § 226.23(e) of the final CCFP rule, published on August 20, 1982. The difference accounts for notification to the public of the verification methods that are proposed in this regulation.

The notice contained in this regulation is a prototype notice which the Department believes will cover most uses of the social security numbers. However, States may carry out verification efforts that the Department has not anticipated; or State laws may impose them. Therefore, State agencies must review the notice and ensure that their intended uses are included in the notice on all applications.

II. *Letter to Parents (§ 226.23(e)(2)).* This rulemaking also includes a proposed provision requiring institutions to distribute a notice or letter to parents. Although Program guidance and operational practice have included the distribution of a letter to parents or guardians, the requirement to do so has not been formalized in the CCFP regulations. Section 226.23(e)(2) specifies that the required letter shall accompany the eligibility application distributed to parents or guardians of enrolled children and provides an itemized listing of the information which must be included in the letter. Most notably, this proposal requires that parents or guardians be informed that they must notify appropriate institution officials during the year of any decreases in household size or increases in income which exceed $50 per month or $600 per year.

Section 9 of the NSLA requires that only children whose household income falls within the income eligibility criteria receive Program benefits. An increase in a household's annual income may render the children of that household ineligible for benefits or eligible only for reduced-price meals. Without a requirement to report changes in income, households may receive benefits throughout the year despite the fact that their income no longer falls within the applicable income eligibility guideline. The Department believes it would be fiscally irresponsible to allow ineligible persons to continue to receive benefits. For this reason, the Department has included this regulatory provision based on its statutory obligation to provide benefits only to children from households whose annual income falls within the applicable gudelines.

III. *Verification.* Section 803 of Public Law 97–35 amends section 9(b) of the NSLA to allow the Secretary, State agencies, and local entities to seek verification of the information provided on applications for free and reduced-price meals. The Act also requires Program participants to comply with the regulations prescribed by the Secretary concerning verification of information and to make appropriate changes in eligibility determinations on the basis of such verification. The Department believes that standards of verification should be established so that all administering agencies make efforts to eliminate fraud and abuse in the Program. The Department realizes that State and local officials do not have unlimited resources available to perform verification and believes this proposal will provide for a viable system without over-burdening State and local officials.

Because of the nature of the CCFP, it is proposed that this rulemaking be modified from the recently published NSLP regulation on verification. Although income eligibility for the CCFP is based upon the same criteria as that used in the NSLP (the Secretary's Income Eligibility Guidelines), the utilization of that information differs between the Programs. In the NSLP, eligibility is not only used to determine Program payments to the school food authority, but also has an effect on the individual student in that the student's payment for meals is dependent on the determination of eligibility for free, reduced-price or paid meals.

In the CCFP, there are two types of systems, both of which involve the Program's free and reduced-price meal policy. They are "pricing" and "nonpricing" programs. Pricing programs are those in which a separate charge is made for the meal to make up the difference between the CCFP reimbursement for meals and the actual cost of serving meals to enrolled children.

Nonpricing programs are those in which no separate charge is made for the meals served to children. An overwhelming majority of institutions that participate in the CCFP participate as nonpricing programs. In a nonpricing program, if a payment is required for the child, it is made in the form of a general tuition charge that covers all areas of child care services provided by the institution. There are no payments specifically earmarked for food service.

Therefore, there is no separate charge for the meals, nor is money exchanged at the mealtime.

In nonpricing programs, income eligibility information is necessary solely to determine the institution's rates of Program reimbursement. All enrolled children receive the same meals, at no separate charge. Eligibility determinations, therefore, do not affect the parents or guardians of enrolled children in that the family does not directly benefit from the determination for free or reduced-price eligibility. Rather, the institution benefits in the form of rate determinations. Therefore, in the overwhelming majority of cases, since most participating CCFP institutions are nonpricing, the benefit is derived by the institution, not the parents of enrolled children. This is and of itself lessens the possibility that parents would misstate income and family size.

Moreover, with regard to problems with eligibility determinations in the CCFP it is more likely that institution misrepresent the eligibility status of enrollees to the administering agency or miscalculate in making the basic eligibility determination for free, reduced-price or paid meals by not applying the Secretary's family size and income guidelines correctly. For these reasons, this proposed rule establishes a two-tiered verification procedure to be undertaken by Program administering agencies. Section 226.23(h) specifies the procedures which must be conducted annually by State administering agencies in order to verify the eligibility of children enrolled in pricing and nonpricing programs.

a. *Definition of Verification (§ 226.2).* This rulemaking includes a proposed definition of verification for the purposes of the CCFP, and also proposes to add definitions of both pricing and nonpricing programs to § 226.2.

A "Nonpricing program" is defined in this proposal as an institution in which there is no separate charge made for meals served to enrolled children. "Pricing program" means an institution in which a separate charge is made for meals served to enrolled children. The definition of "Verification," which is also proposed to be included in §226.2, means (a) a review of the information reported by institutions to the State agency regarding the eligibility of enrolled children for free and reduced-price meals; and (b) in addition, for a pricing program, confirmation of eligibility for benefits under the Program. At a minimum, verification shall include confirmation of income eligibility and, at State agency discretion, verification may also include confirmation of household size.

This proposal requires that administering agencies annually conduct verification of eligibility for both pricing and nonpricing programs particiating in the CCFP in the State. It is proposed that the verification process be conducted for institutions on a schedule similar to that of the conduct of Program administrative reviews and, at administering agency discretion, the verification process may be incorporated into the administrative review procedure. If the opportunity arises, an administering agency may also wish to perform verification during the conduct of an audit of an institution. However, the performance of verification for individual institutions shall occur no less frequently than once every four years. In addition, this rule requires that if the verification process discloses any problems regarding the determination of eligibility and/or application procedures, the State agency shall conduct a follow-up review within one year for the purpose of determining that corrective action has been taken by the institution.

b. *Verification procedures for nonpricing programs.* It is proposed that administering agency verification procedures for nonpricing programs shall consist of a review of the eligibility applications on file for each enrolled child so as to ensure that (a) the application has been correctly and completely executed by parents or guardians; (b) the institution has correctly determined and classified the eligibility of enrolled children for free or reduced-price meals, or has determined that enrolled children are not eligible for free or reduced-price meals, based on the information included on the application submitted by the parents or guardians; and (c) the institution has accurately reported to the State agency the number of enrolled children meeting the criteria for free and reduced-price meal eligibility and the number of enrolled children that do not meet the eligiblity criteria for those meals.

In certain instances, a State agency may wish to pursue further verification directed at confirming the information submitted by parents or guardians of enrolled children on the application for Program meals. If the State agency wishes to pursue this type of effort, it shall be required to conduct further verification in nonpricing programs in accordance with the verification procedures for pricing programs described below.

c. *Verification procedures for pricing programs.* For pricing programs, it is proposed that, in addition to the verification procedures described above, State agencies must also conduct verification of the income information provided by parents or guardians on the applications for free or reduced-price meals and, at State agency discretion, may also include confirmation of household size. State agencies shall perform verification on a representative sample of no less than 3 percent of the applications submitted by families of children enrolled in an institution which is a pricing program. It is proposed that written evidence be used as the primary source of verification. Written evidence includes written confirmation of a household's circumstances. Whenever written evidence is insufficient to establish eligibility, the State agency may require collateral contacts.

For households with employed members, written confirmation of income information includes but is not limited to: paycheck stubs, pay envelopes stating earnings or a letter from the employer stating wages paid. For self-employed persons, income information may include: FICA (social security) payment statements or the last quarterly estimate of taxes. Households with unemployed members may provide written confirmation of income through benefit letters from public assistance programs, unemployment benefit notices, or the most recent unemployment check, court decrees or most recent check for alimony or child support, disability or workman's compensation notices, or Veteran Administration benefit letters. Households currently participating in the Food Stamp Program must be allowed to submit a current notice of eligibility in lieu of any other income information.

The use of written confirmation of eligibility information is the most universally applicable, places the burden of responsibility on the household. Prior to the conduct of the verification process, the parent should receive clearly worded notification that the household has been selected for review and must submit the requested verification to maintain eligibility for free or reduced-price benefits. The notice to parents should clearly describe the types of verification documents that are acceptable to the State, e.g., wage stubs, award letters from social security, benefit statements for unemployment compensation, court orders specifying alimony or child support, etc. Further, the notice should give the name and telephone number of the official who can answer questions and assist the household in acquiring the necessary

verification. Households must also be informed that if they are currently receiving food stamp benefits, they may submit proof of current eligibility for food stamp benefits in lieu of the requested information. The notice must also advise the household that failure to cooperate with verification efforts will result in termination of benefits.

The initiation of collateral contacts can be used in those situations where the household is unable to acquire written verification or the written verification does not confirm income eligibility for benefits. Collateral (third party) contact is verbal confirmation of a household's circumstances by a person outside of the household. The collateral contact may be made in person or over the phone and must be authorized by the household. The verifying official may select a collateral contact if the household fails to designate one or designates one which is unacceptable to the verifying official. Examples of acceptable collateral contacts may include, but not be limited to, employers, social service agencies, or migrant service agencies who can be expected to provide accurate third party verification. If the verifying official designates a collateral contact, the contact may not be made without providing prior written or oral notice to the household. At the time of this notice the household must be informed that it may consent to the contact or provide acceptable verification in another form. If the household refuses to choose one of these options, its eligibility must be terminated in accordance with the normal procedures for failing to cooperate with verification efforts.

Systems of records, to which the State agency can legally obtain routine access, are not considered collateral contacts and need not be designated by the household.

It is important to point out that the manner in which each source of verfication is implemented is subject to scrutiny in light of individual rights of privacy. The Department urges State agencies to obtain approval of verification methods by their legal counsel to ensure conformity with applicable Federal, State and local laws.

Verification for recipients of food stamp benefits that choose to provide evidence of food stamp participation in lieu of income information shall be limited to a review to determine that the period of eligibility for food stamp benefits is current. If the household chooses to provide income information or the food stamp certification period is found to have expired, the household shall be subject to routine verification of eligibility.

The Department believes an abbreviated verification procedure will suffice for households which identify themselves as food stamp households. These households undergo extensive verification in order to receive food stamp benefits. A State agency must allow the applicant to demonstrate current eligibility for food stamp benefits by providing "notice of eligibility" or other evidence of benefits. An abbreviated verification procedure for food stamp households will minimize the administrative burden and cost of verification efforts since many free meal recipients are also eligible for food stamp benefits.

The State agency may work with the institution to acquire the information necessary to verify the documentation submitted by the household on the application; however, the responsibility to complete the verification process may not be delegated to the institution.

State agencies would be required, under this proposal, to apply the verification efforts uniformly without regard to race, color, national origin, sex, or handicap. Since State and local laws differ widely, each State agency should contact its legal counsel to ensure compliance with applicable laws.

d. *Notification Requirements (§ 226.23(h)).* The administering agency must require institutions to terminate or reduce household benefits when (a) the household refuses to cooperate with verification efforts, or (b) the verification effort indicates the household is ineligible to receive benefits or is eligible to receive fewer benefits. Institutions which operate pricing programs must immediately notify the household in writing of a termination of benefits and allow 10 days before such termination or reduction takes place. The notice must advise the household of the change, the reasons for the change, the right to appeal the action within the 10 day advance notice period, and provide instructions on how to appeal. The reasons for ineligibility or reduction of benefits must be properly documented and retained on file at the institution.

e. *Continuation of Benefits (§ 226.23(h)).* This proposal stipulates that households with children enrolled in pricing programs who have been approved for benefits and who are subject to a reduction or termination of benefits later in the same year will continue to receive benefits subject to the hearing official's decision, if they appeal the adverse action within the 10-day advance notice period. Households which are denied benefits upon application shall not receive benefits pending an appeal of the decision.

f. *Administrative Action (§ 226.23(h)(3) and (4)).* This proposed rule requires that when verification results indicate that (a) an institution has inaccurately classified or reported the number of enrolled children eligible for free, reduced-price or paid meals and/or (b) a household has not reported accurate documentation on the application which would support continued eligibility for free or reduced-price benefits, the administering agency shall appropriately adjust institution rates of reimbursement. Administering agencies shall inform institution officials of the results of the verification effort and the action which will be taken in reponse to the verification findings. This notification shall be made in accordance with the procedures outlined in § 226.6(j) of current Program regulations.

g. *Reporting (§ 226.23(h)).* The Department proposes to require that State agencies maintain records demonstrating compliance with these minimum documentation and verification requirements, and proposes to monitor for compliance during the management evalaution process.

IV. *Other Proposed Changes.* In addition to the proposed Program amendments previously discussed, a number of minor and conforming revisions have been made to the regulations as follows:

(a) the addition of a provision which authorizes administering agencies to conduct verification of eligibility (§ 226.6(e)(8));

(b) the addition of definitions of "family" and "household" to § 226.2;

(c) the addition of the requirement that pricing programs must provide written notification to parents or guardians of enrolled children of the action taken with regard to the eligibility application submitted to the institution (§ 226.23(e)(4)); and

(d) the addition of a provision allowing the household to request a conference to provide all affected parties the opportunity to discuss the denial of eligibility prior to initiating a request for a formal hearing (§ 226.23(e)(5)).

List of Subjects in 7 CFR Part 226

Day care, Food assistance programs, Grant programs, Health, Infants and children.

PART 226—CHILD CARE FOOD PROGRAM

Accordingly, Part 226 is proposed to be amended as follows:

(1) In § 226.2, the definition of "Adult" is inserted between that of "Administrative costs" and "Advanced

payments"; the definition of "Current income" is inserted between that of "Claiming percentage" and "Day care home"; the definition of "Documentation" is inserted between that of "Department" and "Enrolled child"; the definition of "Family" is inserted between that of "Enrolled child" and "Fiscal year"; the definition of "Household" is inserted between that of "Free meal" and "Income standards"; the definition of "Nonpricing program" is inserted between that of "Nonexpendable personal property" and "Nonresidential"; the definition of "Pricing program" is inserted between that of "Personal property" and "Program"; and the definition of "Verification" is added following that of "Title XX".

§ 226.2 Definitions.

* * * * *

"Adult" means, for the purposes of the collection of social security numbers as a condition of eligibility for free or reduced-price meals, any individual 21 years of age or older.

* * * * *

"Current income" means income received during the month prior to application for free or reduced-price meals and multiplied by 12. If such income does not accurately reflect the household's annual income, income shall be based on the projected annual household income. If the prior year's income provides an accurate reflection of the household's current annual income, the prior year may be used as a base for the projected annual income.

* * * * *

"Documentation" means the completion of the following information on a free and reduced-price application: (a) Total current household income; (b) names of all household members; (c) social security numbers of all adult household members or an indication that a household member does not possess one; and (d) signature of an adult member of the household.

* * * * *

"Family" means a group of related or nonrelated individuals, who are not residents of an institution or boarding house, but who are living as one economic unit.

* * * * *

"Household" means "family," as defined in § 226.2 ("Family").

* * * * *

"Nonpricing program" means an institution in which there is no separate charge made for meals served to enrolled children.

* * * * *

"Pricing program" means an institution in which a separate charge is made for meals served to enrolled children.

* * * * *

"Verification" means (a) a review of the information reported by institutions to the State agency regarding the eligibility of enrolled children for free or reduced-price meals; and (b) in addition, for a pricing program, confirmation of eligibility for benefits under the program. At a minimum, verification shall include confirmation of income eligibility and, at State discretion, verification may also include confirmation of household size.

(2) In § 226.6, a new paragraph (e)(8) is added to read as follows:

§ 226.6 State agency administrative responsibilities.

* * * * *

(e) *Annual requirements.* * * *

(8) Perform verification of the eligibility of enrolled children for free and reduced-price meals in participating institutions in accordance with the procedures outlined in § 226.23(h). State agencies verifying the information on free and reduced-price applications shall ensure that verification activities are applied without regard to race, color, national origin, sex, or handicap.

(3) Section 226.23 is amended by revising paragraphs (e) and (f); and adding a new paragraph (h) to read as follows:

§ 226.23 Free and reduced-price meals.

* * * * *

(e)(1) Application for free and reduced-price meals. (i) For the purpose of determining eligibility for free and reduced-price meals, institutions other than sponsoring organizations of day care homes shall distribute applications for free and reduced-price meals to parents or guardians of children enrolled in the institution. Sponsoring organizations of day care homes shall distribute applications for free and reduced-price meals to day care home providers who wish to enroll their eligible children in the program. The application, and any other descriptive material distributed to such persons, shall contain only the family-size income levels for reduced-price meal eligibility with an explanation that households with incomes less than or equal to these levels are eligible for free or reduced-price meals. Such forms and descriptive materials may not contain the income standards for free meals.

(ii) The application shall contain a request for the following information: (A) The names of all children for whom application is made; (B) the names of all other household members; (C) the social security number of all household members 21 years of age or older or an indication that a household member does not possess one; (D) the total current income of the household; (E) a statement to the effect that "In certain cases, foster children are eligible for free and reduced-price meals regardless of household income. If such children are living with you and you wish to apply for such meals, please contact us."; (F) a statement that "Sections 9 and 17 of the National School Lunch Act require that in order for your child to be eligible for free or reduced-price meals, you must provide the social security numbers of all adult members of your household. Provision of these social security numbers is not mandatory, but failure to provide the numbers will result in a denial of the application for free or reduced-price meals. This notice must be brought to the attention of all household members whose social security numbers are disclosed. The social security numbers may be used to identify household members in carrying out efforts to verify the correctness of information stated on the application. These verification efforts may be carried out through program reviews, audits, and investigations, and may include contacting employers to determine income, contacting the State employment security office to determine the amount of benefits received and checking the documentation produced by household members to prove the amount of income received. These efforts may result in loss or reduction of benefits, administrative claims, or legal action if incorrect information is reported." State agencies and institutions shall ensure that the notice complies with section 7 of Pub. L. 93–579. If a State or local agency plans to use the social security numbers in a manner not described by this notice, the notice shall be altered to include a description of those uses; and (G) the signature of an adult member of the household.

(iii) At the State agency's discretion, the application may enable the applicant to indicate whether the household is participating in the Food Stamp Program, *Provided* that applicants are informed that the provision of this information is not a condition of eligibility.

(2) *Letter to Parents.* Institutions shall distribute a letter to parents or guardians of enrolled children in order to inform them of the procedures regarding eligibility for free and reduced-price meals. The letter shall

accompany the application required under § 226.23(e)(1) and shall contain:

(i) The income standards for reduced-price meals, with an explanation that households with incomes less than or equal to the reduced-price standards would be eligible for free or reduced-price meals (the income standards for free meals shall not be included in letters or notices to such applicants);

(ii) How a household may make application for free or reduced-price meals for its children;

(iii) An explanation that in order to be considered eligible for free or reduced-price meals, an application must contain complete documentation of eligibility information including the total current household income, names of all household members, social security numbers of all adult household members or an indication that a household member does not possess one, and the signature of an adult household member;

(iv) The statement: "In the operation of child feeding programs, no child will be discriminated against because of race, color, national origin, sex, or handicap;

(v) A statement to the effect that children having parents or guardians who become unemployed are eligible for free or reduced-price meals during the period of unemployment, provided that the loss of income causes the family income during the period of unemployment to be within the eligibility standards for those meals;

(vi) A statement to the effect that in certain cases foster children are eligible for free or reduced-price meals regardless of the income of the household with whom they reside and that households wishing to apply for such benefits for foster children should contact the institution; and

(vii) An explanation that recipients of free and reduced-price meals must notify appropriate institution officials during the year of any decreases in household size or increases income which exceed $50 per month or $600 per year.

(3) In addition to the information listed in § 226.23(e)(2), pricing institutions must include in their letter to parents an explanation that indicates that (i) the information in the application may be verified at any time during the year; and (ii) how a family may appeal a decision of the institution to deny, reduce, or terminate benefits as described under the hearing procedure set forth in § 226.23(c)(4).

(4) *Determination of eligibility.* When a completed application furnished by a family indicates that the family meets the eligibility criteria for free or reduced-price meals, the children from that family shall be determined eligible for free or reduced-price meals. Institutions that are pricing programs shall provide written notice to each family informing them of the results of the eligibility determination. When the information furnished by the family is not complete or does not meet the eligibility criteria for free or reduced-price meals, institution officials must consider the children from that family as not eligible for free or reduced-price meals and must consider the children as eligible for "paid" meals. When information furnished by a family of children enrolled in a pricing program does not meet the eligibility criteria for free or reduced-price meals, pricing program officials shall provide written notice to each family denied free or reduced-price benefits. At a minimum, this notice shall include: (i) The reason for the denial of benefits, e.g. income in excess of allowable limits or incomplete application; (ii) notification of the right to appeal; (iii) instructions on how to appeal; and (iv) a statement reminding parents that they may reapply for free or reduced-price benefits at any time during the year. The reasons for ineligibility shall be properly documented and retained on file at the institution, as appropriate.

(5) *Appeals of denied benefits.* A family that wishes to appeal the denial of an application in a pricing program shall do so under the hearing procedures established under § 226.23(c)(4). However, prior to initiating the hearing procedures, the parent or guardian may request a conference to provide all affected parties the opportunity to discuss the situation, present information and obtain an explanation of the data submitted on the application or the decision rendered. The request for a conference shall not in any way prejudice or diminish the right to a fair hearing. The institution shall promptly schedule a fair hearing, if requested.

(f) Free, reduced-price and paid meal eligibility figures must be reported by institutions to State agencies at least once each year and shall be based on current family-size and income information of enrolled children.

* * * * *

(h) *Verification of eligibility.* State agencies shall annually conduct verification of eligibility for free and reduced-price meals, in accordance with the verification procedures outlined in § 226.23(h) (1) and (2). Verification may be conducted in accordance with the Program assistance requirements of § 226.6(k), however, the performance of verification for individual institutions shall occur no less frequently than once every four years. If the verification process discloses any problems with the determination of eligibility and/or application procedures, State agencies shall conduct follow-up reviews for the purpose of determining that corrective action has been taken by the institution. These reviews shall be conducted within one year of the date upon which the verification process was completed. The verification effort shall be applied without regard to race, color, national origin, sex, or handicap. State agencies shall maintain on file for review a description of the annual verification to be accomplished in order to demonstrate compliance with § 226.23(h)(1) and (2).

(1) *Verification procedures for nonpricing programs.* State agency verification procedures for nonpricing programs shall consist of a review of the eligibility applications on file for each enrolled child so as to ensure that (i) the application has been correctly and completely executed by parents or guardians; (ii) the institution has correctly determined and classified the eligibility of enrolled children for free or reduced-price meals, or has determined that enrolled children are not eligible for free or reduced-price meals, based on the information included on the application submitted by the parents or guardians; and (iii) the institution has accurately reported to the State agency the number of enrolled children meeting the criteria for free and reduced-price meal eligibility and the number of enrolled children that do not meet the eligibility criteria for those meals. In addition, the State agency may conduct verification of the information provided by parents or guardians on the application for Program meal eligibility. If this effort is undertaken, the State agency shall conduct this verification in accordance with the procedures described in § 226.23(h)(2).

(2) *Verification procedures for pricing programs.* For pricing programs, in addition to the verification procedures described in § 226.23(h)(1), State agencies shall also conduct verification of the income information provided by parents or guardians on the application for free or reduced-price meals, and at State agency discretion, may also include confirmation of household size. State agencies shall perform verification on a representative sample of no less than 3 percent of the applications submitted by families of children enrolled in an institution which is a pricing program. Households shall be informed that they have been selected for verification and that they are required to submit the request

verification information to confirm eligibility for free or reduced price benefits. Those households shall be informed of the type or types of information and/or documents acceptable to the State agency and the name and phone number of an official who can answer questions and assist the household in the verification effort. Selected households shall also be informed that if they are currently participating in the food stamp program, they may submit proof of current eligibility for food stamp benefits in lieu of income information. All households selected for verification shall be advised that failure to cooperate with verification efforts will result in a termination of benefits. Sources of verification may include written evidence, collateral contacts, institution conferences, and systems of records. Written evidence shall be used as the primary source of verification. Written evidence includes written confirmation of a household's circumstances, such as wage stubs, award letters, and letters from employers. Wherever written evidence is insufficent to confirm income information on the application or current eligibility, the State agency may require collateral contacts or institution conferences. Collateral contact is a verbal confirmation of a household's circumstances by a person outside of the household. The collateral contact may be made in person or by phone and shall be authorized by the household. The verifying official may select a collateral contact if the household failes to designate one or designates one which is unacceptable to the verifying official. If the verifying official designates a collateral contact, the contact shall not be made without providing written or oral notice to the household. At the time of this notice, the household shall be informed that it may consent to the contact or provide acceptable verification in another form. If the household refuses to choose one of these options, its eligibility shall be terminated in accordance with § 226.23(h)(2)(i). Collateral contacts could include employers, social service agencies, and migrant agencies. The adult member(s) of the household may be asked to visit the institution for a discussion of the information on the application. Households shall be provided sufficient opportunity to schedule the conference. Systems of records to which the State agency may have routine access are not considered collateral contacts. Information concerning income or family size maintained by other government agencies to which the State agency can legally gain access may be used to confirm a household's income and family size. One possible source could be wage and benefit information maintained by the State unemployment agency, if that information is available. The use of any information derived from other agencies must be used with the applicable safeguards concerning disclosure. Verification for recipients of food stamp benefits that choose to provide evidence of food stamp particiaption in lieu of income information shall be limited to a review to determine that the period of eligibility for food stamp benefits is current. If the household chooses to provide income information of the food stamp certification period is found to have expired, the household shall be subject to routine verification of eligibility. The State agency may work with the institution to acquire the information necessary to verify the documentation submitted by the household on the application; however, the responsibility to complete the verification process may not be delegated to the institution.

(i) If a household refuses to cooperate with efforts to verify, or the verification effort indicates that the household is ineligible to receive benefits or is eligible to receive reduced benefits, the State agency shall require the pricing program institution to terminate or adjust eligibility in accordance with the following procedures:

(A) Institution officials shall immediately notify families of the denial of benefits in accordance with § 226.23(e)(4) and § 226.23(e)(5). Advance notification shall be provided to families which receive a reduction or termination of benefits 10 calendar days prior to the actual reduction or termination. The 10-day period shall begin the day the notice is transmitted to the family. The notice shall advise the household of (*1*) the change; (*2*) the reasons for the change; (*3*) notification of the right to appeal the action and the date by which the appeal must be requested in order to avoid a reduction or termination of benefits; (*4*) instructions on how to appeal and (*5*) the right to reapply at any time during the year. The reasons for ineligibility shall be properly documented and retained on file at the institution.

(B) When a household disagrees with an adverse action which affects its benefits and request a fair hearing, benefits shall be continued as follows while the household awaits the hearing:

(*1*) Households which have been approved for benefits and which are subject to a reduction or termination of benefits later in the same year, shall receive continued benefits if they appeal the adverse action within the 10 day advance notice period; and

(*2*) Households which are denied benefits upon application shall not receive benefits.

(3) State agencies shall inform institution officials of the results of the verification effort and the action which will be taken in response to the verification findings. This notification shall be made in accordance with the procedures outlined in § 226.6(j).

(4) State agencies shall adjust institution rates of reimbursement if, during the verification process, it is found that (i) an institution has inaccurately classified or reported the number of enrolled children eligible for free, reduced-price or paid meals and/or (ii) that verification results indicate that a household has not reported accurate documentation on the application which would support continued eligibility for free or reduced-price benefits.

BILLING CODE 3410-30-M

Agricultural Marketing Service

7 CFR Part 1126

[Docket No. AO–231–A49]

Milk in Texas Marketing Area; Decision on Proposed Amendment to Marketing Agreement and to Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This emergency decision provides for a temporary reduction of 40 cents per hundredweight in the price for producer milk used to produce butter, nonfat dry milk and cheddar cheese. The reduced price would apply as soon as this amendatory action can be completed (sometime in April) and would continue through June 1983. The adopted change, which is based on industry proposals considered at a public hearing in February 1983, is necessary to reflect current marketing conditions and to assure orderly marketing in the Texas area. Because of the limited time to complete the rulemaking procedures, a recommended decision and the opportunity to file

exceptions thereto have been omitted. Cooperative associations will be polled to determine whether producers favor the issuance of the proposed amended order.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington D.C. 20250, (202) 447–4824.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant adverse economic impact on a substantial number of small entities. The amendment will promote orderly marketing of milk by producers and regulated handlers.

Prior documents in this proceeding:

Notice of Hearing: Issued December 27, 1982; published January 3, 1983 (48 FR 28).

Notice of Rescheduled Hearing: Issued January 14, 1983; published January 19 1983 (48 FR 2337).

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the Texas marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice (7 CFR Part 900), at Dallas, Texas, on February 1 and 2, 1983. Notice of such hearing was issued on December 27, 1982, and published on January 3, 1983 (48 FR 28). Notice of the rescheduled hearing was issued on January 14, 1983 and published on January 19, 1983 (48 FR 2337).

Interested parties were given until March 14, 1983, to file post-hearing briefs on proposals 1, 2 and 3 as published in the hearing notice and on whether the proposals should be considered on an expedited basis.

The material issues on the record of the hearing relate to:

1. The Class III price level for producer milk used in butter, nonfat dry milk and cheddar cheese.

2. Whether an emergency exists to warrant the omission of a recommended decision and the opportunity to file written exceptions thereto with respect to issue No. 1.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *The Class III price level for producer milk used in butter, nonfat dry milk and cheddar cheese.* A temporary price reduction of 40 cents per hundredweight should be accorded handlers for producer milk utilized in the production of butter, nonfat dry milk and cheddar cheese. The credit should apply as soon as the amendatory procedures involving this proceeding can be completed (sometime in April) and should continue through June 30, 1983.

Presently, the price for all producer milk in Class III uses, including butter, nonfat dry milk and cheddar cheese, is the basic formula price for the month. It represents the average of prices paid during the month for manufacturing grade milk in Minnesota and Wisconsin.

Associated Milk Producers, Inc. (AMPI), a cooperative association that represents dairy farmers who furnish approximately two-thirds of the producer milk marketed under the Texas order, requested that a permanent reduction of 40 cents per hundredweight apply during the months of March, April, May, June and December to all producer milk utilized in the manufacture of butter, nonfat dry milk and cheddar cheese. The cooperative indicated that it is handling from 80 percent to 90 percent of the market's surplus milk and is incurring losses on a per hundredweight basis that averaged 51 cents in 1981 and 37 cents during January—November 1982 in the manufacturing of such milk. AMPI contended that these losses occur in the operation of its manufacturing plants because of inefficiencies that result from balancing the fluid milk needs of the Texas market. It argued that because the cooperative is doing most of the balancing for the market, its members are bearing a disproportionate share of the costs related to this necessary market function. AMPI claimed that the proposed price reduction would result in all producers on the market sharing more equitably in this balancing cost.

Proponent cooperative operates two balancing plants and one pool supply plant under the Texas order. The two balancing plants are located at Muenster and Sulphur Springs, Texas, and the pool supply plant is located at Hillsboro, Kansas. The two balancing plants handle the majority of the market's reserve milk supplies. During the months of flush production, the two balancing plants often operate at full capacity. During such time the volume of producer milk exceeds the Class I and Class II needs of proprietary handlers and a large portion of the market's reserve milk supply is processed at the two plants. During the months of short production, all or nearly all of the market's reserve milk is needed to meet the Class I and Class II demand for fluid milk. As a consequence, on some days little, if any, milk is processed at the balancing plants. The cooperative pointed out that in 1981 one of its balancing plants was shut down for nearly 3 months due to the limited volume of milk in excess of the Class I and Class II needs of handlers in the months of short production.

Kraft, Inc., supported AMPI's proposed reduction in the Class III price for producer milk used to produce butter, nonfat dry milk and cheddar cheese. The company operates a manufacturing plant at Bentonville, Arkansas, and producer milk under the Texas order is moved periodically to such plant for surplus disposition. Kraft's witness testified that the company experiences greater costs in the operation of its manufacturing plants in the southern markets relative to the costs the company incurs in the operation of such plants located in the north central United States. The higher costs in the southern plants were attributed to the greater seasonal fluctuation in supplies, the smaller-scale plant operations, and lower yields of finished product from producer milk due to lower solids content of the milk. Kraft's witness estimated that the difference in the cost of processing milk between its southern and northern plants averaged about 48 cents per hundredweight each month.

Kraft's witness pointed out, too, that the current Federal order minimum price for milk used in the manufacture of butter, nonfat dry milk and cheddar cheese in the southwest is greater than the competitive price in that area for manufacturing grade milk not subject to minimum Federal order prices. Furthermore, he noted that during 1981 the pay price for manufacturing grade milk at Kraft's southwestern plants was 48 cents lower than its pay price for such milk at its north central plants. The difference in 1982 was 46 cents.

A representative of four cooperative associations with members located primarily in Minnesota and Wisconsin spoke in opposition to the adoption of AMPI's proposal. He contended that it would be inappropriate to consider a change in Texas without considering a similar change in all orders. The witness testified that the Texas marketing

situation was not unique in that seasonal and daily variations in milk intake exist for all manufacturing plants throughout the United States. Primarily, he opposed a lower Class III price for the Texas market on the basis that the markets for manufacturing milk and for manufactured dairy products are national in scope.

Another argument advanced by the opponent of any reduction in the Class III price was that because the variation in supply at manufacturing plants results from variations in the fluid demand of distributing plants, the cost should be borne by distributors rather than producers. The witness indicated also that the Class III price, being based on the Minnesota-Wisconsin price series, already reflects some of the costs of manufacturing operations that are due to the seasonal fluctuations in milk production. He further suggested that a lower Class III price might encourage manufacturing plants to become associated with the Texas market to secure a cheap supply of milk.

A witness on behalf of the Wisconsin Federation of Cooperatives also opposed the AMPI proposal. He contended that the market prices for butter, nonfat dry milk and cheddar cheese are set in a national market, and also that the dairy price support program is in effect setting a national floor for prices for such hard products. Thus, he claimed all Federal order surplus prices should be set at the same level. The witness contended, too, that the cost of balancing the fluid milk needs of handlers should not be a determinant of the Class III price.

A witness on behalf of a milk marketing cooperative whose members are located primarily in the north central Unites States opposed any deviation from the Minnesota-Wisconsin price series in pricing Class III milk. He argued that it would lead to similar proposals in other markets, a step which he felt would result in an unwarranted reduction in returns to dairy farmers. Another reason advanced by opponent was that the efficiencies of Class III manufacturers vary substantially and that order prices should not be set at the lowest level that will assure profitability for all manufacturers. He contended also that with the Minnesota-Wisconsin price running from 18 cents to 38 cents per hundredweight below the support price, the Class III price is low enough relative to the Government's purchase prices for hard products to permit a profit in the manufacture of butter, nonfat dry milk and cheddar cheese.

A witness for the Wisconsin Cheese Makers and a witness for the Trade Association of Proprietary Plants, both of which are processor organizations in the north central United States, submitted a joint statement at the hearing. They questioned whether it is the role of Federal milk orders to assure the profitability of handlers in disposing of surplus milk. The opponents stressed that the price support program is designed to establish a price for milk in surplus uses. It was their view that the market for butter, nonfat dry milk and cheddar cheese is a national market. They commented also that a reduction in the Class III price for the Texas area would limit the sale of butter, nonfat dry milk and cheddar cheese in such area from processors outside the market who have to pay the Class III price in all months for milk used in such products.

As indicated earlier, current marketing conditions warrant a temporary reduction in the present Class III price for producer milk used in the manufacturre of butter, nonfat dry milk and cheddar cheese. The adoption of the lower price will result in a more equitable sharing among all producers on the market of the cost of disposing of milk that is in excess of the fluid milk requirements of regulated handlers.

Currently, AMPI bears a disproportionate share of the cost of handling the surplus-milk supplies in the Texas market. The members of AMPI produce about two-thirds of the milk supplies that are associated with the market. Yet, through the balancing functions that it is carrying out, the cooperative is handling between 80 percent and 90 percent of the Class III producer milk on the market. AMPI is balancing to varying degrees the milk supplies of all pool distributing plants in the Texas market. In many cases, AMPI is the sole supplier of a distributing plant. In other cases, the cooperative furnishes supplemental milk supplies to a distributing plant during only the fall months when the group of independent producers or the members of a cooperative from whom the handler receives milk on a regular basis throughout the year are unable to fully supply the handler's fluid milk needs. During the spring months when milk production increases seasonally, the handler cuts back on his supplemental purchases of milk from AMPI. In this situation, the producers who are the regular suppliers do not share in the costs of balancing the handler's fluid needs. Instead, these costs fall solely on the producer-members of AMPI.

It is expected that the cost problem for AMPI members will be even more severe this year because of the current heavy supply situation. It is likely that there will not be sufficient manufacturing capacity at the Muenster and Sulphur Springs plants during April and May of this year to process the milk supplies that have been associated with these plants in prior year. During April and May of 1982, producer receipts at the two plants amounted to 49 million pounds monthly. Such monthly receipts exceeded the combined manufacturing capacity of the two plants by about 1 million pounds. With milk production in the State of Texas during October-December 1982 running 4 percent ahead of last year's production, receipts at the two plants during April and May of this year will be considerably in excess of those of a year ago. Under such circumstances, it will be necessary for the two plants to forego the drying of buttermilk and whey and to dump such products in order to have sufficient manufacturing capacity to process surplus milk supplies into nonfat dry milk. In the event the dumping of such products does not free up sufficient manufacturing facilities, it will be necessary for AMPI to ship the surplus milk to more distant markets for manufacturing. The nearest alternative outlets for such milk would be manufacturing plants in Missouri and Kansas and the costs of shipping such milk would amount to $1.50–$2.00 per hundredweight. The transportation costs in such instance would greatly exceed the losses that the cooperative would incur in manufacturing the milk in its Texas plants.

The primary impact of the 40-cent lower Class III price on certain products would be on those producers who have not been bearing any of the costs of operating manufacturing facilities or of diverting or transferring milk to nonpool plants for manufacturing use. Such producers would now bear some of the costs of disposing of the market's reserve milk supplies through a reduction in the blend price. These producers who are on the Texas market offered no oppostion testimony to AMPI's proposal.

Several of the briefs indicated that some confusion exists regarding how the balancing oosts would be distributed among producers under a lower Class III price. This shifting of costs among producers can best be illustrated through the following example: Assume that the Class III price had been lowered 40 cents per hundredweight for the period of April 16 through June 30, 1982. The lower price would have applied to 173.5 million pounds of producer milk used to produce butter, nonfat dry milk and cheddar cheese during that period. On this basis, the pool proceeds would have been decreased $694,000. Assuming that its member producers

supplied two-thirds of the market's fluid milk, AMPI would have received $462,667 less money from the pool proceeds while all other producers would have received $231,333 less from the pool proceeds.

AMPI's net gain through the shifting of some of the balancing cost to others depends on the volume of Class III milk that the cooperative processes. Assuming that AMPI processed 80 percent of the producer milk used to produce butter, nonfat dry milk and cheddar cheese during the April 16–June 30, 1982, period and that its losses averaged 40 cents per hundredweight, the cooperative's losses (or reduction in payments to member producers) would have amounted to $555,200. The implementation of a price decrease of 40 cents per hundredweight, however, would have eliminated AMPI's manufacturing loss of $555,200. On the other hand, it would have resulted in a reduction in pool proceeds amounting to $462,667 that otherwise would have accrued to AMPI. Thus, the net gain to AMPI through the lower Class III price in this example would have been $92,533 ($555,200–$462,667).

Although AMPI proposed that a 40-cent price reduction be adopted on a permanent basis, a lower price should apply only for a limited period. As indicated earlier, the price reduction should apply as soon as this amendatory proceeding can be completed and should continue through June 30, 1983. As proposed by AMPI, the price reduction would have applied during March, April, May, June, and December of each year.

A permanent price reduction of a fixed amount would not be reflective on a continuing basis of the costs associated with the handling of surplus milk. Operating losses at AMPI's manufacturing plants in the Texas market, for example, averaged 51 cents per hundredweight in 1981 and 37 cents during the first 11 months of 1982. Data for other years are not available in the record. However, it is apparent that operating costs vary from year to year. This may be due to any number of factors that are subject to change, including milk volumes handled, interest costs, and various plant costs such as labor, utilities, and equipment. Under these circumstances, there is little likelihood that a fixed price reduction would be commensurate from year to year with actual operating costs.

Another concern with AMPI's proposal is the lack of any direct relationship of the 40-cent reduction with the actual costs of providing milk supply balancing services in the market. The seasonal balancing burden pertains to the handling of the increased volume of milk that needs to be processed into storable Class III products during the period when milk production is at its season high level. A major cost in handling such milk supplies is the need to maintain plant capacity to process the seasonally higher volume of Class III milk. The record contains no indication of AMPI's cost of maintaining plant processing capacity. Additionally the 40-cent reduction in price on the total volume of milk used to produce butter, nonfat dry milk and cheddar cheese does not differentiate between handlers who are performing seasonal balancing and handlers who may be processing a relatively uniform volume of Class III milk on a year-round basis.

Providing for some means of having all producers share more equitably in the cost of disposing of the market's reserve milk supplies is not unreasonable under current marketing conditions. However, the manner in which this should be carried out under the order is less certain. Because of the concerns just expressed, it is concluded that the price reduction proposed by AMPI should apply only for a limited time. The initial thrust of AMPI's proposal was to deal with the handling of surplus milk during the current flush period of March through June. As provided herein, the adopted price reduction would apply only through that period.

Opposition testimony to making any changes in the level of the Texas Class III price came primarily from dairy farmer organizations in Minnesota and Wisconsin. Their opposition stemmed from concerns that lowering the Texas Class III price as AMPI proposed would tend to result in a lowering of the finished product prices in the national market. Also, they argued that a lower Class III price under the Texas order would place handlers outside the market at a competitive disadvantage in competing for hard product sales in the Texas market.

There is no basis for concluding that the limited price reduction adopted herein would result in the lowering of the market prices for butter, nonfat dry milk, or cheddar cheese, either in the national market or locally. At most, the price reduction would apply for no more than two and one-half months. Although the record does not provide monthly data on AMPI's operating losses, it is not likely that this limited price relief would offset the cooperative's operating losses to the point that AMPI could afford to lower its sales on the hard products that it manufactures. Moreover, there would be little incentive now for AMPI to lower its product prices below the current national market levels. Such levels are now floored in effect at the levels established under the dairy price support program, and such products may be offered to the Government at these price levels at any time. Furthermore, even if AMPI were to sell products at prices below the national levels, the impact on the national market would be minimal. This is because the volume of milk in the Texas market that is used in butter, nonfat dry milk, and cheddar cheese is very small relative to the quantity of milk used nationally in such products.

Another reason advanced by opponents for not taking any action is that marketing conditions have not changed materially since 1975 when six orders were merged into the present Texas order. Opponents pointed out that AMPI's share of the market's milk supply and of the market's processing of Class III milk have not changed during such period of time.

Although AMPI's share of the market has changed little, this does not negate the fact that AMPI is bearing a disproportionate share of the balancing costs of the market. Furthermore, balancing activities are made more difficult this year by the heavy milk supplies in the market. There will be considerable milk in excess of the fluid milk requirements of handlers during the current year's flush production months. This is the result of producer receipts increasing at a faster rate than Class I sales. From 1980 to 1982, producer receipts increased by 17 percent while Class I sales increased by 5.2 percent. As a consequence, the utilization of producer milk in Class III uses increased from 11.8 percent in 1980 to 14.3 percent in 1981 and to 19.3 percent in 1982.

Opponents of a reduction in the Class III price also held that AMPI is not obligated to balance the fluid milk needs of handlers in this market. They contended that AMPI voluntarily assumed these responsibilities and, therefore, should bear the consequences of such action.

How the current balancing arrangements came about has little relevance to the issue at hand. The fact is that AMPI is providing the major balancing function for the Texas market. Other cooperatives, nonmember producers, and handlers are operating under these balancing arrangements and are benefiting from the balancing activities of AMPI without bearing any of the attendant costs. It is not unreasonable for such costs to be shared more equally by all producers in the market.

A further argument advanced by opponents is that the balancing costs

should be borne by the distributing plant operators. To some degree, the costs of balancing the market supplies with demand are now being assessed to distributing plant operators by means of over-order charges imposed by cooperatives on milk sold to the distributors. Proponent cooperative indicated, however, that the over-order charges are not sufficient to cover all losses incurred in its manufacturing operations. The cooperative contends that the over-order changes are sufficient to cover only the cost of moving milk within the Texas market from areas of surplus production to deficit areas. Under these cricumstances, a temporary price reduction on surplus milk is appropriate.

As provided herein, the price reduction of 40 cents per hundredweight on producer milk utilized in the manufacture of butter, nonfat dry milk and cheddar cheese would be implemented by providing for a 40-cent credit in § 1126.60 of the order, which deals with a handler's value of milk for computing the uniform price. In the event that a pool plant or nonpool plant utilizes producer milk as well as milk receipts from other sources in the manufacture of butter, nonfat dry milk and cheddar cheese, the amount of producer milk eligible for a 40-cent lower price would be determined by assigning the quantity of skim milk and butterfat utilized in the production of such products pro rata to the pounds of producer milk and the pounds of milk receipts from all other sources at such plant.

2. *Omission of a recommended decision and the opportunity to file exceptions thereto.* The omission of a recommended decision was proposed at the hearing by the proponent of proposals 1, 2 and 3.

Proponent cooperative indicated that its cost of operating balancing plants will increase substantially beginning in March 1983. For this reason, the cooperative requested that the Department adopt its proposals on an emergency basis to insure that all producers share as soon as possible in the anticipated high costs of marketing the surplus milk supplies under the Texas order.

Opponents of the proposed price reduction contended that no emergency conditions exist. It is their position that the conditions for which relief was requested have been in existence since 1975. Opponents point out, too, that although the losses incurred by the cooperative in its balancing functions were higher in 1981 than 1982, the cooperative did not request any relief until this year.

As indicated earlier, the order changes adopted herein are necessary to reflect current marketing conditions and to insure that all producers share to a greater extent in the costs of handling greater than usual milk supplies during the current flush production months. Emergency action is necessary if any substantive relief is to be afforded those handling the surplus milk supplies this spring. If the normal procedure of issuing a recommended decision and providing time to file exceptions thereto were followed, a reduction in price could not be made effective on a timely basis.

It is therefore found that due and timely execution of the Secretary's function in this proceeding imperatively and unavoidably requires omission of the recommended decision and the opportunity for filing exceptions thereto.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Marketing Agreement and Order

Annexed hereto and made a part hereof is an ORDER amending the order regulating the handling of milk in the Texas marketing area which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the **Federal Register**. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which is published with this decision.

Determination of Producer Approval and Representative Period

January 1983 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Texas marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing area.

List of Subjects in 7 CFR Part 1126

Milk marketing orders, Milk, Dairy products.

Signed at Washington, D.C., on April 11, 1983.

John Ford,

Deputy Assistant Secretary, Marketing and Inspection Services.

Order [1] Amending the Order, Regulating the Handling of Milk in the Texas Marketing Area

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of

and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Texas marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Texas marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

PART 1126—MILK IN THE TEXAS MARKETING AREA

In § 1126.60, a new paragraph (h) is added to read as follows:

practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

§ 1126.60 Handler's value of milk for computing uniform price.

* * * * *

(h) From the effective date of this amendatory action through June 30, 1983, subtract an amount determined by multiplying the pounds of producer milk used to make butter, nonfat dry milk and cheddar cheese by 40 cents per hundredweight.

BILLING CODE 3410-02-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 33

Options on Futures; Margins; Extension of Comment Period

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice and request for comment; extension of comment period.

SUMMARY: On March 15, 1983, the Commission published in the **Federal Register** notice that the Commission is reviewing certain requirements it has imposed regarding the margining of futures option contracts in connection with the domestic exchange-traded commodity option pilot program and requested public comment thereon, in particular, on a list of specific issues relating thereto. 48 FR 10857 (March 15, 1983). The comment period is due to expire on April 14, 1983.

The Commission has received several requests for an extension of the comment period. Because it wishes to ensure that all interested persons have an opportunity to prepare and submit informative comments, the Commission has determined to extend the comment period for an additional forty-five days.

DATE: The comment period has been extended through May 29, 1983.

ADDRESS: Comments should be sent to the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581.

FOR FURTHER INFORMATION CONTACT: Karen Matteson, Attorney Advisor, Division of Trading and Markets at the above address. Telephone: (202) 254-8955.

[Docket No. 82N-0179]

Proposed Reclassification of Daily Wear Optically Spherical Hydrogel (Soft) Contact Lenses; Reopening of Comment Period; Advance Notice of Public Hearing

AGENCY: Food and Drug Administration.

ACTION: Proposed rule; reopening of comment period; advance notice of public hearing.

SUMMARY: The Food and Drug Administration (FDA) is reopening the comment period in the rulemaking on the proposed reclassification of certain daily wear optically spherical hydrogel (soft) contact lenses from class III (premarket approval) into class I (general controls). FDA is reopening the comment period for the limited purpose of receiving additional information on certain specified issues. FDA also intends to hold a public hearing on this matter at a time and place to be announced in a future issue of the **Federal Register**.

DATE: Comments by May 16, 1983.

ADDRESS: Written comments may be submitted to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Albert Van De Griek, National Center for Devices and Radiological Health (HFK-402), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-8162.

SUPPLEMENTARY INFORMATION:

In the **Federal Register** of November 26, 1982 (47 FR 53411), FDA published a proposed rule to reclassify certain marketed daily wear optically spherical hydrogel (soft) contact lenses from class III (premarket approval) into class I (general controls), under section 513(e) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c(e)), based on new information respecting these devices. The proposal gave interested persons until December 27, 1982, to submit written comments. In the **Federal**

Register of December 10, 1982 (47 FR 55497), FDA extended the comment period until January 28, 1983.

FDA has completed a preliminary review of the comments received during the comment period on the proposed rule. The comments submitted present contrasting views on some complex issues relevant to the proposed reclassification, but do not always provide the evidence necessary to support these views. FDA believes that resolution of the issues raised by the proposal and the comments would be facilitated by reopening the comment period for the limited purpose of receiving additional information on the specific issues discussed below in this document. FDA emphasizes that it is particularly interested in receiving clinical data, reports of relevant invitro and nonclinical laboratory safety data, copies of articles from referred journals, and other valid scientific evidence within the meaning of § 860.7(c) of FDA's regulations governing classification of medical devices (21 CFR 860.7(c)), in support of any comments. All comments, data, and other evidence submitted in response to this document will be included in the docket file in this matter and will be available for public disclosure.

FDA recognizes that to reclassify the contact lenses at issue in this rulemaking from class III into class I, it must have new, publicly available, valid scientific evidence of safety and effectiveness demonstrating why the lenses should not remain in class III and why the "general controls" authorized by the act will provide reasonable assurance of the safety and effectiveness of the lenses. See section 513(e) of the act and § 860.123 of the regulations governing reclassification of medical devices (21 CFR 860.123). Although this notice requests specific evidence showing why the lenses should not be reclassified, as well as evidence showing why they should be reclassified, FDA has not shifted the burden of proof to those opposing reclassification. FDA has concluded that additional evidence, both favorable and unfavorable to reclassification, is desirable to reach a sound decision on the complex issues involved in the rulemaking.

1. Many comments in support of reclassification of a specific lens identified in the proposal claimed that there are sufficient data to show that class I would provide reasonable assurance of the safety and effectiveness of the lens, but did not include any data in support of their positions. To support or refute the claims that reclassification of any specific lens is appropriate, valid scientific evidence, within the meaning of § 860.7(c), particularly clinical data, should be submitted.

2. Many comments suggest that even if there is valid scientific evidence of the safety and effectiveness of the currently marketed lenses identified in the proposal, reclassification into class I is inappropriate for these lenses because the data necessary to determine whether a new hydrogel (soft) contact lens is substantially equivalent to a reclassified lens will be of the type required to show safety and effectiveness in a premarket approval application. These comments claim that clinical trials will be necessary to demonstrate the safety and effectiveness of any new hydrogel (soft) contact lens, even if the lens is made of materials specified in any final classification regulation and its measured and labeled specifications are similar to those of a reclassified lens.

For example, one comment claims that there is factual evidence showing poor correlation between the clinical performance of a contact lens and the measured or labeled parameters of that contact lens. However, the factual evidence to support this claim is not provided. Some comments claim that minor variations in lens formulation, geometry, or manufacturing process can alter the characteristics of a lens, including lens fit and tear lubricating and pumping action, resulting in a change in safety or effectiveness that cannot be predicted by laboratory or animal testing. However, the comments do not include evidence in support of this claim.

To support or refute the claim that clinical trials are always necessary to establish the safety and effectiveness of a hydrogel (soft) contact lens, valid scentific evidence within the meaning of § 860.7(c), including published studies, data from research and development programs, data on toxicity and biocompatability, or other specific information, should be submitted. FDA is particularly interested in receiving evidence that (a) demonstrates which, if any, changes in lens formulation, geometry, or in manufacturing process require clinical testing to provide reasonable assurance of the safety and effectiveness of the resulting lens, and which changes do not require clinical testing; and (b) defines the necessary scope of any clinical testing that is required.

3. One comment stated that there have been very few product liability actions based on injuries resulting from the use of contact lenses. To support or refute this comment, evidence, e.g., insurance records or data on the incidence of adverse effects from the use of the hydrogel (soft) contact lenses identified in the proposal, should be submitted.

4. In the notice proposing reclassification, FDA stated that any final rule reclassifying the lenses would not exempt tinted contact lenses from the color additive provisions in section 706 of the act (21 U.S.C. 376), because regardless of the class the lenses are in, if a color additive in such a lens comes in direct contact with the body for a significant period of time, the color additive is subject to regulation under section 706. On the basis of its experience, FDA believes that as most tinted contact lenses are fabricated, the color added to the lenses comes in direct contact with the human eye. Because such lenses are intended for daily wear for the lifetime of the lens, FDA believes that the contact is for a signficant period of time. FDA has received several comments on the regulation of tints in contact lenses. The comments argue on various grounds that colors added to contact lenses are not subject to section 706. Evidence that the color added to any lens proposed for reclassification does not come in direct contact with the human eye should be submitted.

FDA believes that reopening the comment period to receive information on the issues specified in this notice will not delay final action on the proposed reclassification, but will expedite resolution of the complex issues involved in the rulemaking.

FDA has received two requests for a public hearing on the proposal to reclassify daily wear optically spherical hydrogel (soft) contact lenses and on other matters related to contact lenses. FDA is granting these requests insofar as they relate to reclassification. FDA will hold a public hearing before the Commissioner on the proposed reclassification under Part 15 of FDA's administrative practices and procedures regulations (21 CFR Part 15). FDA will announce the time and place of the hearing, the issues to be considered, and other details in a notice published in a future issue of the **Federal Register**.

Interested persons may, on or before May 16, 1983, submit to the Dockets Management Branch (address above) written comments on this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the name of the device and the docket number found in brackets in the heading of this

document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 13, 1983.

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

21 CFR Part 886

[Docket No. 82N-0180]

Proposed Reclassification of Daily Wear Spherical Contact Lenses Consisting of Rigid Gas Permeable Plastic Materials; Reopening of Comment Period; Advance Notice of Public Hearing

AGENCY: Food and Drug Administration.

ACTION: Proposed rule; reopening of comment period; advance notice of public hearing.

SUMMARY: The Food and Drug Administration (FDA) is reopening the comment period in the rulemaking on the proposed reclassification of daily wear spherical contact lenses consisting of certain rigid gas permeable plastic materials from class III (premarket approval) into class I (general controls). FDA is reopening the comment period for the limited purpose of receiving additional information on certain specified issues. FDA also intends to hold a public hearing on this matter at a time and place to be announced in a future issue of the **Federal Register**.

DATE: Comments by May 16, 1983.

ADDRESS: Written comments may be submitted to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Albert Van De Griek, National Center for Devices and Radiological Health (HFK-402), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-8162.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 26, 1982 (47 FR 53402), FDA published a proposed rule to reclassify marketed daily wear spherical contact lenses consisting of certain rigid gas permeable plastic materials from class III (premarket approval) into class I (general controls), under section 513(e) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c(e)), based on new information respecting the devices. The proposal gave interested persons until December 27, 1982, to submit written comments. In the **Federal Register** of December 10, 1982 (47 FR 55497), FDA extended the comment period until January 26, 1983.

FDA has completed a preliminary review of the comments received during the comment period on the proposed rule. The comments submitted present contrasting views on some complex issues relevant to the proposed reclassification, but do not always provide the evidence necessary to support these views. FDA believes that resolution of the issues raised by the proposal and the comments would be facilitated by reopening the comment period for the limited purpose of receiving additional information on the specific issues discussed below in this document. FDA emphasizes that it is particularly interested in receiving clinical data, reports of relevant in vitro and non-clinical laboratory safety data, copies of articles from refered journals, and other valid scientific evidence within the meaning of § 860.7(c) of FDA's regulations governing classification of medical devices (21 CFR 860.7(c)), in support of any comments. All comments, data, and other evidence submitted in response to this document will be included in the docket file in this matter and will be available for public disclosure.

FDA recognizes that to reclassify the contact lenses at issue in this rulemaking from class III into class I, it must have new, publicly available, valid scientific evidence of safety and effectiveness demonstrating why the lenses should not remain in class III and why the "general controls" authorized by the act will provide reasonable assurance of the safety and effectiveness of the lenses. See section 513(e) of the act and § 860.123 of the regulations governing reclassification of medical devices (21 CFR 860.123). Although this notice requests specific evidence showing why the lenses should not be reclassified, as well as evidence showing why they should be reclassified, FDA has not shifted the burden of proof to those opposing reclassification. FDA has concluded that additional evidence, both favorable and unfavorable to reclassification, is desirable to reach a sound decision on the complex issues involved in the rulemaking.

1. Some comments support the reclassification of a specific lens, or lenses composed of a specific family of materials, e.g., polyacrylate-silicone, stating that there are sufficient data to show that class I would provide reasonable assurance of the safety and effectiveness of the lenses, but do not include any data in support of their positions. Two comments include summaries of clinical studies, but do not provide complete data on the studies. To support or refute such comments, valid scientific evidence, within the meaning of § 860.7(c), particularly clinical data, should be submitted.

2. Many comments suggest that even if there is valid scientific evidence of the safety and effectiveness of the currently marketed lenses identified in the proposal, reclassification into class I is inappropriate because the data necessary to determine whether a new rigid gas permeable contact lens is substantially equivalent to a reclassified lens will be of the type required to show safety and effectiveness in a premarket approval application. These comments claim that clinical trials will be necessary to demonstrate the safety and effectiveness of any new rigid gas permeable contact lens, even if the lens is made of materials specified in any final classification regulation and the specifications of the new lens are similar to those of a reclassified lens.

For example, some comments argue that small changes in polymers other than polymethyl-methacrylate (PMMA) or in the ratio of polymer constituents could change characteristics affecting the safety and effectiveness of the lens, including oxygen and glucose flux, friability, surface characteristics, and resulting vision, which, in the absence of clinical data, would not be detected. The comments also argue that lenses in which changes have been made in other ingredients, such as cross-linking agents, wetting agents, and colors, or changes in the manufacturing process, must be clinically tested to provide reasonable assurance of the lenses' safety and effectiveness. Other comments argue that clinical trials of new lenses are necessary to provide reasonable assurance of safety and effectiveness, because small changes in lens material or lens geometry may result in unpredictable lens fit or in poor tear lubricating, and pumping action.

To support or refute the claim that clinical trials are always necessary to establish the safety and effectiveness of a gas permeable contact lens, valid scientific evidence within the meaning of § 860.7(c), including published studies, data from research and development programs, data on toxicity and biocompatability, or other specific information, should be submitted. FDA is particularly interested in receiving evidence that (a) demonstrates which, if any, changes in lens formulation, geometry, or in manufacturing process require clinical testing to provide reasonable assurance of the safety and effectiveness of the resulting lens and which changes do not require clinical

testing; and (b) defines the necessary scope of any clinical testing that is required.

3. One comment stated that acrylate-silicone copolymers are nontoxic, stable, and gas permeable, and suitable for making contact lenses, if they are made from organosilicone monomers consisting of the "bone structure of acryloxy or methacryloxy connecting through the alkyl group to the silicone (siloxanyl groups)" with hydrogen, methyl groups, ethyl groups, phenyl groups, or cyclic groups attached to the silicone. If such monomers are copolymerized with a hardening monomer such as methyl acrylate, methyl methacrylate, ethyl acrylate, ethyl methacrylate, cyclohexyl methacrylate, phenyl methacrylate, or *N*-vinyl pyrrolidinone, this comment argued, the copolymer can be sufficiently cross-linked to achieve the desired stability to produce a material suitable for making safe and effective gas permeable contact lenses, by incorporating various available cross-linking monomers on the market. To support or refute this claim, valid scientific evidence, within the meaning of § 860.7(c), should be submitted.

4. One comment stated that there have been very few product liability actions based on injuries resulting from the use of contact lenses. To support or refute this comment, evidence, e.g., insurance records, or data on the incidence of adverse effects from the use of the rigid gas permeable contact lenses identified in the proposal, should be submitted.

5. In the notice proposing reclassification, FDA stated that any final rule reclassifying the lenses would not exempt tinted contact lenses from the color additive provisions in section 706 of the act (21 U.S.C. 376), because regardless of the class the lenses are in, if a color additive in such a lens comes in direct contact with the body for a significant period of time, the color additive is subject to regulation under section 706. On the basis of its experience, FDA believes that as most tinted contact lenses are fabricated, the color added to the lenses comes in direct contact with the human eye. Because such lenses are intended for daily wear for the lifetime of the lens, FDA believes that the contact is for a significant period of time. FDA has received several comments on the regulation of tints in contact lenses. These comments argue on various grounds that colors added to contact lenses are not subject to section 706. Evidence that the color added to any lens proposed for reclassification does not come in direct contact with the human eye should be submitted.

FDA believes that reopening the comment period to receive information on the issues specified in this notice will not delay final action on the proposed reclassification, but will expedite resolution of the complex issues involved in the rulemaking.

FDA has received two requests for a public hearing on the proposal to reclassify daily wear spherical contact lenses consisiting of rigid gas permeable plastic materials and on other matters related to contact lenses. FDA is granting these requests insofar as they relate to reclassification. FDA will hold a public hearing before the Commissioner on the proposed reclassification under Part 15 of FDA's administrative practices and procedures regulations (21 CFR Part 15). FDA will announce the time and place of the hearing, the issues to be considered, and other details in a notice published in a future issue of the **Federal Register**.

Interested persons may, on or before May 16, 1983, submit to the Dockets Management Branch (address above) written comments on this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the name of the device and the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 13, 1983.

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 939

Permanent State Regulatory Program of Pennsylvania

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is considering modifying the deadline for Pennsylvania to meet certain conditions of its approved State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). These conditions relate to archeological information in permit applications, historic land use information in permit applications for anthracite mining operations, preparation of the general plan for impoundments, maps for anthracite and bituminous underground mining operations, existing non-conforming structures, impoundment requirements, variances to approximate original contour in non-steep slope areas, vegetative cover for underground mining operations, abatement times in excess of 90 days, and review of permits for patterns of violation.

DATE: Comments must be received by May 2, 1983, at the address below, no later than 4:00 p.m.

ADDRESS: Written comments must be mailed or hand-delivered to: Robert Biggi, Director, Pennsylvania Field Office, Office of Surface Mining, 101 South 2nd Street, Suite L-4, Harrisburg, Pennsylvania 17104.

FOR FURTHER INFORMATION CONTACT: Robert Biggi, Director, Pennsylvania Field Office, Office of Surface Mining, 101 South 2nd Street, Suite L-4, Harrisburg, Pennsylvania 17101, (717-782-4036).

SUPPLEMENTARY INFORMATION: Under 30 CFR 732.13(i), the Secretary may conditionally approve a State permanent regulatory program which contains minor deficiencies where the deficiences are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with steps to correct the deficiencies, and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval. The curing of each deficiency is a condition of the approval. Steps to terminate the conditional approval must be taken if the conditions are not met according to the schedule. The dates are established in consultation with the State, based on the regulatory and administrative needs of the State's permanent program and SMCRA and the time required for changes to be adopted under State procedures or legislative schedules.

On February 29, 1980, the Secretary of the Interior received a proposed regulatory program from the State of Pennsylvania. On October 22, 1980, following a review of that proposed program as outlined in 30 CFR Part 732, the Secretary of the Interior disapproved the Program. The State resubmitted its program on January 25, 1982, and, subsequently the Secretary approved the program conditioned on the correction of minor deficiencies. Information pertinent to the general

background of the permanent program submission, as well as the Secretary's findings, the disposition of comments and explanations of the conditions of approval of the Pennsylvania program can be found in the July 30, 1982 **Federal Register** (47 FR 33050).

On March 24, 1983, OSM received a letter from the Commonwealth of Pennsylvania, requesting an additional 6 months to satisfy conditions (a), (b), (c), (e), (f), (g), (h) and (j). By the terms of the conditional approval, these conditions are to be met by May 1, 1983. The State explains that because of the recently passed Regulatory Review Act, which took effect on March 1, 1983, proposed regulations must be submitted to both houses of the Pennsylvania General Assembly and an Independent Regulatory Review Commission prior to adoption. Proposed regulations can be disapproved by either the General Assembly or the Commission. Since portions of these conditions may require regulatory changes, and such revisions must be submitted to the General Assembly and the Commission, Pennsylvania claims it is highly unlikely that the State will be able to meet the May 1, 1983, deadline for these conditions.

Therefore, the Secretary proposes to allow the State until November 1, 1983, to meet the following conditions: (a) On archeological information in permit applications, and historic land use information in permit applications for anthracite mining operations; (b) on preparation of the general plan for impoundments; (c) on maps for anthracite and bituminous underground mining operations; (e) on existing non-conforming structures; (f) on impoundment requirements; (g) on variances to approximate original contour in non-steep slope areas; (h) on vegetative cover for underground mining operations; and (j) on abatement times in excess of 90 days, and review of permits for patterns of violation.

The Secretary is continuing to review with the State all of the outstanding program conditions. A final rule implementing this proposed extension may, in response to public comment, be different than the one proposed in this notice.

Additional Information

Paperwork Reduction Act. This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

National Environmental Policy Act. The Secretary has determined that pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no Environmental Impact Statement need be prepared on this rulemaking.

Executive Order 12291 and the Regulatory Flexibility Act. On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

List of Subjects in 30 CFR Part 938

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: April 11, 1983.

J. R. Harris,

Director, Office of Surface Mining.

The following are proposed amendments to 30 CFR, Chapter VII, Subchapter T, Part 938:

PART 938—PENNSYLVANIA

§ 938.11 [Amended]

30 CFR 938.11 (a), (b), (c), (e), (f), (g), (h) and (j) are proposed to be amended by substituting "November 1, 1983", for May 1, 1983, each time it appears.

30 CFR Part 950

Public Comment and Opportunity for Public Hearing on Modified Portions of the Wyoming Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for the public comment period and for a public hearing on the substantive adequacy of certain program amendments submitted by the State of Wyoming as modifications to the Wyoming Permanent Regulatory program (hereinafter referred to as the Wyoming program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). These amendments are submitted (1) to satisfy one condition imposed by the Secretary of the Interior in the approval of the Wyoming program, relating to the judicial grant of temporary relief, and (2) as further modifications to definitions, permit application review procedures and bonding provisions contained in the Wyoming program.

This notice sets forth the times and locations that the Wyoming program and proposed amendments are available for public inspection, the comment period during which interested persons may submit written comments on the proposed program elements, and the procedures that will be followed at the public hearing.

DATES: Written comments must be received on or before 4:00 p.m., May 16, 1983, to be considered.

A public hearing on the proposed modifications will be held on request only, on April 25, 1983, from 10:00 a.m. to 1:00 p.m., or until all comments have been heard.

Any person interested in making an oral or written presentation at the hearing should contact William Thomas at the address and phone number listed below by the close of business *four working days* before the date of the hearing. If no one has contacted Mr. Thomas to express an interest in participating in the hearing by that date, the hearing will not be held. If only one person has so contacted Mr. Thomas, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

ADDRESSES: Written comments should be mailed or hand delivered to: William Thomas, Director, Wyoming Field Office, Office of Surface Mining, P.O. Box 1420, Freeden Building, Mills, Wyoming 82644.

The public hearing, if held, will be at the Bureau of Reclamation Office, Room W-11, 650 Pendell Boulevard, Mills, Wyoming.

Copies of the Wyoming program, the proposed modifications to the program, a listing of any scheduled public meetings and all written comments received in response to this notice will be available for review at the OSM Wyoming Field Office and the Office of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays.

Wyoming Field Office, Office of Surface Mining, 935 Pendell Boulevard, Freeden Building, Mills, Wyoming 82644.

Wyoming Department of Environmental Quality, Land Quality Division, 401 West 19th Street, Cheyenne, Wyoming 82002.

FOR FURTHER INFORMATION CONTACT: William Thomas, Director, Wyoming Field Office, P.O. Box 1420, Freeden Building, Mills, Wyoming 82644, Telephone: (307) 328–5830.

SUPPLEMENTARY INFORMATION: On August 15, 1979, OSM received a proposed regulatory program from the State of Wyoming. Following a review of that proposed program as outlined in 30 CFR Part 732, the Secretary determined that certain parts of the Wyoming program met the minimum requirements of SMCRA and the Federal permanent regulations and that others did not. Accordingly, the Secretary approved the Wyoming program in part on February 15, 1980. The State of Wyoming resubmitted its program for approval on May 30, 1980. Following a review of the resubmitted program, the Secretary approved the program subject to the correction of seven minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the November 26, 1980 **Federal Register** (45 FR 78637–78684).

Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission as well as the Secretary's findings, the disposition of comments and explanation of the conditions of approval of the Wyoming program can be found in the November 26, 1980 **Federal Register.**

In accepting the Secretary's conditional approval, Wyoming agreed to correct the seven deficiencies by March 26, 1981. On October 30, 1981, the Secretary extended the date by which Wyoming was required to satisfy conditions "b" and "c" to May 26, 1982 (46 FR 54070–54071). On February 18, 1982, the Secretary published notification (47 FR 7218) approving modifications to the Wyoming program, satisfying conditions "a", "d", "e" and "f" and extending the date by which the State is required to satisfy condition "g" until May 20, 1983.

Deficiency (g) of the Wyoming program for which the Secretary required correction as a condition of approval was as follows:

(g) Wyoming had not demonstrated that its law and practice are in accordance with Section 526(c) of SMCRA with respect to its judicial grant of temporary relief.

Submission of Material To Satisfy Condition and Additional Program Amendments

Wyoming has agreed to correct deficiency (g) by submitting to the Secretary by May 20, 1983, legislation which is consistent with SMCRA Section 526(c). By letter dated March 3, 1983, Wyoming submitted the following amendment to W.S. 35–11–1001(c) to satisfy this deficiency.

(c) In a proceeding to review any order or decision of the department providing for regulation of surface coal mining and reclamation operations in accordance with P.L. 95–87, the court may under conditions it prescribes grant temporary relief pending final determination of the review proceeding if:

(i) All parties to the proceedings were notified and given opportunity for hearing on the request for temporary relief;

(ii) The party requesting relief shows there is a substantial likelihood he will prevail on the final determination of the proceeding; and

(iii) The relief will not adversely affect the public health and safety or cause significant environmental harm to land, air or water resources.

The Secretary seeks public comment on whether the legislation submitted satisfies this condition. If this program amendment is approved, condition (g) in 30 CFR 950.11 will be eliminated.

By letters dated March 3, 8, and 21, 1983, OSM received from the State of Wyoming, pursuant to the 30 CFR 732.17 procedures, the following proposed revisions to the State program:

1. Revisions to W.S. 35–11–103(e)(xxii) and (xxiii), modifying the definition of "complete application" and creating definitions of "deficiency" in a permit and "interim mine stabilization".

2. Revisions to W.S. 35–11–406(h), clarifying the action to be taken if a permit application is found to be deficient.

3. A revision to W.S. 35–11–401, creating a new subsection (n), directing the administrator and director to consider interim mine stabilization in promulgating regulations.

4. Revisions to Chapter I, Section 2; Chaper XIII, Section 2; and Chapter XVI of the Wyoming surface mining regulations to establish a dual bonding system for surface coal mining operations. Under the proposal, both an area bond and an incremental bond would be required. The area bond would cover rough backfilling work required to render the affected land in a condition so that the reclaimed land surface generally resembles the approved postmining reclamation contours. The incremental bond would cover all the remaining reclamation requirements such as topsoil replacement, revegetation and sediment control measures. Both bonds would be required to be renewed each year with public participation provided. The area bond would cover primarily the work to be done within the next annual bonding period. The incremental bond would cover both past and present work unless bond release occurs pursuant to Chapter XVI of the Wyoming Environmental Quality Act. Neither bond can be reduced outside the bond release procedures unless the operator demonstrates that costs are less than what were originally proposed, based on a change in method of operation or a decrease in the number of acres projected to be disturbed.

OSM seeks public comment on these proposed amendments to the Wyoming program. If these amendments are approved, they will become part of the Wyoming program.

Additional Determinations

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need the prepared on this rulemaking.

2. *Compliance with the Regulatory Flexibility Act* The Secretary hereby determines that this proposed rule would not have a significant economic effect on small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

3. *Compliance with Executive Order No. 12291.* Regulations concerning satisfaction of conditions of approval of State regulatory programs under SMCRA have been granted a categorical exemption from the requirement to prepare a Regulatory Impact Analysis.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 65

[A-3-FRL 2347-1]

State and Federal Administrative Orders Permitting a Delay in Compliance With State Implementation Plan Requirements; Proposed Approval of an Administrative Order Issued by the Pennsylvania Department of Environmental Resources to York Division, Borg-Warner Corporation

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking; invitation for public comment.

SUMMARY: EPA has proposed to approve an administrative order issued by the Pennsylvania Department of Environmental Resources to York Division, Borg-Warner Corporation. The order requires the company to bring air emissions from its refrigeration equipment manufacturing facility in Spring Garden Township, Pennsylvania into compliance with certain regulations contained in the federally approved Pennsylvania State Implementation Plan (SIP) by April 21, 1984. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order pursuant to the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before May 16, 1983.

ADDRESS: Comments should be submitted to Director, Air & Waste Management Division, EPA Region III, Sixth & Walnut Streets, Philadelphia, Pennsylvania 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Joseph S. Arena, Environmental Scientist, Air Enforcement Section, Air and Waste Management Division, U.S. EPA Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, Telephone: (215) 597-4561.

SUPPLEMENTARY INFORMATION: York Division, Borg-Warner Corporation operates a refrigeration equipment manufacturing facility at Spring Garden Township Pennsylvania. The order under consideration addresses emissions from its surface coating processes, which are subject to § 129.52 of Title 25 of the Pennsylvania Code. The regulation limits the emissions of volatile organic compounds (VOC), and is part of the federally approved Pennsylvania State Implementation Plan. The order requires final compliance with the regulation by April 21, 1984 through the use of low solvent coatings.

Because this order has been issued to a major source of VOC emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA has reviewed the order and has found that the order does satisfy the requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Pennsylvania SIP. However, source compliance with the order will not preclude assessment of any non-compliance penalties under Section 120 of the Act, unless the source is otherwise entitled to an exemption under Section 120(a)(2) (B) or (C).

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the **Federal Register** the Agency's final action on the order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601)

Dated: April 4, 1983.

Stanley L. Laskowski,

Acting Regional Administrator, Region III.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 0, 1 and 97

[PR Docket No. 83-27; RM-4229]

Use of Volunteers To Prepare and Administer Operator Examinations in the Amateur Radio Service; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment/reply comment period.

SUMMARY: This document extends the time for filing comments and reply comments to the *Notice of Proposed Rule Making* in this proceeding which concerns the use of volunteers to prepare and administer operator examinations. This action was taken to afford major representative Amateur Radio Operator organizations an adequate opportunity to fully comment upon the matters in the proceeding.

DATE: Comments are now due by April 25, 1983 and replies by May 19, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: John J. Borkowski, Private Radio Bureau, Special Services Division, (202) 632-4964.

Order

In the matter of an amendment of Parts 0, 1 and 97 of the Commission's Rules to allow the use of volunteers to prepare and administer operator examinations in the Amateur Radio Service; PR Docket No. 83-27, RM-4229.

Adopted: April 8, 1983.

Released: April 8, 1983.

By the Chief, Private Radio Bureau.

The Quarter-Century Wireless Association (QCWA) has filed a motion for extension of time for filing comments and reply comments in this proceeding. The *Notice of Proposed Rule Making* in this proceeding, 48 FR 8090 (February 25, 1983), specified that comments were to be filed on or before April 8, 1983, and that reply comments were to be filed on or before May 9, 1983. QCWA has requested that the comment and reply comment dates be extended to April 25, 1983, and May 19, 1983, respectively.

QCWA has stated its reasons for seeking this extension as the illness of its Vice-President, who has primary responsibilty for preparing comments in this matter, and the meeting of its Board of Directors scheduled for April 8, 1983, to discuss this proceeding. QCWA has

represented that the American Radio Relay League (the League) supports this request for extension of time because it intends to hold a Board of Directors meeting on April 21 and 22, 1983, to resolve final details of its position on this Docket.

QCWA is an international association of Amateur Radio operators whose members, numbering approximately 10,000, were each licensed more than 25 years ago. The League has the largest membership of any Amateur Radio organization in the United States. The views of these two organizations and their members are important in making the public interest determinations required in this proceeding.

Accordingly, for good cause shown, and because it will best conduce to the proper dispatch of business and to the ends of justice, the Motion for Extension of Time for Filing Comments in this proceeding made by the Quarter-Century Wireless Associaton (QCWA) is hereby granted. Interested persons may now file comments in this proceeding on or before April 25, 1983, and reply comments on or before May 19, 1983.

Authority for this action is contained in Sections 4(i) and (j) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and (j) and 303(r), and in §§ 0.131 and 0.331 of the Commission's Rules, 47 CFR 0.131 and 0.331.

For further information contact John J. Borkowski, (202) 632–4964.

Federal Communications Commission.

James C. McKinney,

Chief, Private Radio Bureau.

47 CFR Part 15

[Gen. Docket No. 83–325; RM–4062; RM–4075; FCC 83–112]

Interim Provisions for Cordless Telephones

AGENCY: Federal Communications Commission.

ACTION: Proposed rules.

SUMMARY: The Commission proposes to establish a new section under Part 15 which will provide 10 duplex channels (20 frequencies) for the operation of cordless telephones. This group of frequencies will include 10 from the Government's 46.6–47.0 MHz band and 10 from the Government's 49.6–50.0 MHz band. The technical standards proposed are very similar to the present standards for the operation of a low power communications device on the present 5 frequencies in the 49.6–50.0 MHz band. Manufacturing and importing of cordless telephones under this new provision will be limited to five years from the date the rules becomes effective. Marketing will cease one year after manufacturing and importation ceases. This action is necessary to accommodate the rapid growth of cordless telephones. The effect of this proposal will be to provide additional channels for use by cordless telephones while the Commission finds a more suitable long-term location for these devices.

DATES: Comments are due on or before May 19, 1983. Reply comments are due on or before June 3, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Julius Knapp, Office of Science and Technology, 2025 "M" Street NW., Washington, D.C. 20554, (202) 653–8247.

List of Subjects in 47 CFR Part 15

Cordless telephone, Communications equipment.

In the matter of amendment of Part 15 to add new interim provisions for cordless telephones (General Docket No. 83–325; RM–4062; RM–4075; FCC 83–112).

Adopted: March 31, 1983.
Released: April 12, 1983.

By the Commission.

1. Notice is hereby given of the Commission's intention to amend Part 15 of its Rules to provide additional interim frequencies and technical standards for the operation of cordless telephones. If this proposal is adopted, cordless telephones operating on frequencies in the low VHF band would be made available to consumers, while the Commission considers a permanent frequency allocation for these devices.

2. A cordless telephone is a two-way low power communication system designed to eliminate the connecting handset cord of the standard telephone, thus allowing the user the freedom of movement without being confined by a connecting wire. It operates in a full duplex mode, i.e., it is capable of simultaneously transmitting and receiving radio signals, allowing a continuous conversation between both parties of the conversation. This method of operation requires the use of two frequencies of each cordless telephone system. The system includes a base station low power transmitter and receiver connected to the telephone network and a portable handset that also incorporates a low power transmitter and receiver.

3. Most of the cordless telephones marketed today operate in the duplex mode on no more than five channels at 49 MHz for the handset transmitter and 1.7 MHz for the base station transmitter, the latter using carrier current techniques. Under the present Commission Rules, both base station and portable transmitter may be operated without an individual license, provided each transmitter complies with the technical and administrative requirements contained in Part 15 of the Commission's Rules. The 49 MHz transmitter and receiver are subject to the technical and certification requirements in Subparts C and D of Part 15, respectively. Absent a waiver from the Commission the transmitter portion of the base station is subject to § 15.7 of the Rules, which limits the level of RF energy radiated from any part of the system.[1] The rules effectively limit the range of cordless telephones to less than 500 feet.

4. In early 1982, the Commission received two petitions requesting the allocation of frequencies to provide twenty-five to thirty channels for cordless telephones and requesting adoption of rules for these devices. The Mura Corporation (Mura) asked the Commission to permit the operation of cordless telephones in the frequency band 46.6–47.0 MHz and 49.6–50.0 MHz and proposed technical specifications essentially the same as those in Part 15 of the Commission's Rules for low power communications devices operating at 49 MHz.[2] The Personal Communications Section of the Communication Division of the Electronics Industries Association (EIA) requested use of the same frequency bands and also requested the bands 74.6–74.8 MHz and 75.2–75.4 MHz for cordless telephones.[3] The petitioners gave three overriding reasons to justify their requests. First, there has been an enormous escalation of consumer demand for cordless telephones. This growth is expected to continue. An industry survey estimates ten million cordless telephones will be on the market by 1987. Because of this expected growth, the small number of

---

[1] A more complete description of the operation of cordless telephones and the present rules under which they operate is given in the *ORDER GRANTING CONDITIONAL WAIVER*, Adopted September 29, 1982, released October 4, 1982, 48 FR 4788. The *Order* was in response to Petitions filed by the American Telecommunications Corporation and the Electronics Industries Association concerning the application of § 15.7 of FCC Rules to cordless telephones.

[2] Petition filed by the Mura Corporation on February 26, 1982, designated RM–4062, requesting amendment of Part 15 re use of 46.6–47.0 MHz and 49.6–50.0 MHz bands for cordless telephones.

[3] Petition filed by the Personal Communications Section of the Communication Division of the Electronics Industry Association (EIA) on March 10, 1982, designated RM–4075, requesting the allocation of new frequencies for cordless telephones.

channels permitted under the present rules are considered to be inadequate to avoid overcongestion and mutual interference, which the petitioners claim is already beginning to occur. Second, the contemplated reallocation to broadcasting of the band 1.6–1.7 MHz now used for base station operation will render existing cordless telephone frequencies inadequate and obsolete.[4] Third, the 1.7 MHz band is technically not the best band for cordless telephones.

5. The following parties filed comments supporting the request for additional frequencies: Uniden Corporation of America; Mura Corporation; The Personal Communications Section of the Communications Division of the Electronics Industries Association; GTE Service Corporation; American Radio Relay League, Inc., American Telephone and Telegraph Company; and the Electra Company.

6. Various parties, however, took exceptions to parts of the petitions filed by Mura and EIA. GTE, for example, recommended 30 kHz channel spacing instead of the 15 kHz spacing recommended by Mura. GTE also recommended the adoption of a requirement for security coding to reduce the possibility of network harm and to avoid unauthorized use. The Association of Maximum Service Telecasters (MST), representing 250 television broadcast stations, opposed that portion of EIA's petition proposing use of the two 75 MHz bands for cordless telephones on the grounds that such an allocation would disrupt the reception of TV channels 4 and 5. Mura also raised the same concern.

7. The Commission agrees with the petitioners that additional frequencies are necessary to accommodate the anticipated growth of the cordless telephones. In General Docket 83–26, the Commission has proposed creation of an additional personal radio service at 900 MHz which could accommodate cordless telephones as well as other personal communications devices or systems.[5] However, cordless telephone manufacturers have indicated that they will need five to ten years to develop viable affordable equipment for the 900 MHz band. Thus, even if the Commission concludes in General Docket 83–26 that 900 MHz is the appropriate location for cordless telephones on a permanent basis, interim relief is necessary to accommodate the growing demand now.

8. We are proposing to amend Part 15 of our Rules and Regulations to allow manufacturing or importing of cordless telephone for 5 years using ten duplex channels in the bands 43.6–47.0 MHz and 49.6–50.0 MHz. We are further proposing to allow marketing of cordless telephones for an additional year after manufacturing and importing ceases.[6] These devices would be subject to technical requirements like those contained in Subpart D of Part 15 of our Rules and Regulations for low-power communications devices operating at 40 MHz.[7] The out-of-band emission requirements are modified as suggested by Mura. These devices would be required to employ some minimal means to protect against the telephone line being engaged unintentionally. One possibility would be to employ coding schemes similar to those used by garage door opener controls. This would minimize the risk that the cordless phone base unit might be engaged by an outside party for illicit billing of calls. At the same time it reduces the chance that the cordless phone will respond to spurious signals by going off hook and tying up telephone company equipment. The text of the proposed rules is set forth in the Appendix to this Notice.

9. Our decision to propose frequencies in the 46 and 49 MHz bands has been coordinated with and is concurred in by the National Telecommunications and Information Administration (NTIA), United States Department of Commerce, the organization responsible for managing United States Government use of the spectrum. This coordination was necessary because the radio frequency bands requested by the petitioners either are allocated for exclusive Government use or are shared by Government and private users. The NTIA, through the IRAC, set up an Ad Hoc Group (Ad Hoc 184), to study the cordless telephone allocation issue. Through Ad Hoc 184, IRAC analyzed the Government bands 43.6–47.0 MHz and 49.6–50.0 MHz, the shared bands 74.6–74.8 MHz, 75.2–75.4 MHz and 216–220 MHz, and the non-Government bands 30–50 MHz and 806–947 MHz.[8] This analysis included calculating the number of transmitters on each channel,[9] identifying those channels with the lowest number of assignments, and, for channels in the Government bands, identifying those with a minimum of air-ground communications, fire control, or emergency functions. On the basis of this analysis, NTIA has agreed to allow use of the 46 and 49 MHz band frequencies we are proposing provided that manufacturing or importing of equipment using these frequencies is terminated after five years and marketing after six years from the date any interim Commission rules become effective.[10]

10. We are proposing separate termination dates for manufacturing/importing and for marketing of cordless telephones using the interim frequencies to make clear the need for cordless telephone manufacturers and importers to plan for the conversion to new frequencies in a few years. The Government frequencies proposed in this Notice will not be available indefinitely for cordless telephone use.

11. Finally, while IRAC has identified some lightly loaded channels in the non-government portion of the 30–50 MHz band,[11] we are not proposing their use for cordless telephones. Most frequencies in the band are heavily used for long range land mobile systems, and we anticipate demand for the remaining frequencies will increase. We also note that the lighter loaded frequencies are spread throughout this band, which we believe may create problems for cordless telephone manufacturers. However, we would like comments on

---

[4] At the World Administrative Radio Conference in 1979, the band 1.605–1.705 MHz was reallocated internationally for broadcasting after 1988. Transmissions from high power broadcasting in the reallocated portion of the AM broadcast band are likely to cause interference to cordless telephones operating in the same band.

[5] Notice of Proposed Rulemaking, General Docket 83–26, FCC 83–19 (Released March 4, 1983), at paragraph 76. It is also noted that the European Conference of Postal and Telecommunication Administrations (CEPT) is considering a proposal for the operation of cordless telephones in the bands 914–915 Mhz and 959–960 MHz subject to certain technical specifications.

[6] Consumers could continue to use cordless telephones they may have purchased beyond the interim period we are proposing for manfacturing, importing and marketing. Government users of the spectrum have acknowledged that cordless phones will be operating in these bands after marketing ceases.

[7] Under § 15.3 of the Commission's Rules these devices may not cause harmful interference to authorized radio services and must accept any interference received. Proposed § 15.234 contains a labelling and identification requirement to this effect.

[8] The Commission actively participated in Ad Hoc 184's work.

[9] This analysis included both transmitters centered tuned on the channel and transmitters center tuned on other channels whose emissions overlapped the channel being studied.

[10] A detailed discussion of the committee's analysis, conclusions and recommendations is given in the "Report of Ad Hoc 184", which was approved by IRAC on March 8, 1983. A copy of this Report has been placed into the official file of this proceeding and is available through the Downtown Copy Center, 1114 21st Street, N.W., Washington, D.C. 20037, Telephone (202) 452–1422.

[11] Report of Ad Hoc 184, *Supra*, at pp. 11–12. The frequencies (in MHz) identified as having fewer than 100 transmitters are: 31.68, 31.10, 31.12, 31.18, 31.50, 31.58, 31.62, 31.70, 31.74, 31.78, 31.86, 31.94, 31.98, 35.62, 35.68, 37.60, 42.06, 42.86, 42.90, 42.92, 43.68, 43.74, 43.80, 43.84, 44.32, 44.38, 44.50, 44.52, 44.56, 44.60 MHz.

the feasibility of using non-Government frequencies in the 30–50 MHz band on either an interim or a permanent basis. In addition, we solicit comments on the selection of the proposed interim frequencies at 46 MHz with respect to the potential interference ot the 45 MHz IF of TV receivers.

Procedural Matters

12. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. Section 601 *et seq.* the Commission issues the following initial regulatory flexibility analysis:

I. *Reason for action*—This proceeding is in response to two petitions for rulemaking requesting frequencies for the operation of cordless telephones.

II. *The objective*—The Commission is proposing to allow manufacturing and and importing of cordless telephones to operate in the bands 46.6–47.0 MHz and 49..6–50.0 MHz for a period of time not to exceed five years and to further allow marketing of such devices for an additional period of one year.

III. *Legal basis*—The action proposed is in furtherance of Sections 4(i), 302(a), 303(g) and 303(r) of the Communications Act of 1934, as amended, which permit the Commission to make reasonable regulations governing the interference potential of RF equipment and to promote the larger and more effective use of radio in the public interest.

IV. *Entities affected; nature of economic impact; significant alternatives*—The proposal expands Part 15 of the FCC rules by providing for interim operation of cordless telephones on new frequencies. All manufacturers can benefit from this expansion. The alternative to this action is to continue with the existing provisions for cordless telephones at 1.7 MHz and 49 MHz until a permanent new home can be located.

V. *Recording, record-keeping and other compliance requirements*—We are proposing the equipment authorization procedure of certification for cordless telephones operating in the bands 46.6–47.0 MHz and 49.6–50.0 MHz. Since certification is currently required for all other low power communications devices under Part 15, no new requirements would be imposed if proposed rule changes are adopted.

13. For the purposes of this non-restricted notice and comment rule making proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a Notice of Proposed Rule Making until the time that a Public Notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final Order disposing of the matter is issued by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits an oral *ex parte* presentation, addressing matters not fully covered in any previously filed written comments for the proceeding must prepare a written summary of that presentation. On the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served and must also state by docket number the proceeding to which it relates. See § 1.1231 of the Commission's rules, 47 CFR 1.1231.

14. As required by Section 603 of the Regulatory Flexibility Act, the FCC has prepared an initial regulatory flexibility analysis of the expected impact of these proposed policies and rules on small entities. The initial analysis is set forth in paragraph 12. Written public comments are requested on the initial analysis. These comments must be filed in accordance with the same filing deadlines as comments on the rest of the *Notice*, but they must have a separate and distinct heading designating them as responses to the regulatory flexibility analysis. The Secretary shall cause a copy of this Notice, including the initial regulatory flexibility analysis, to be sent to the Chief Counsel for Advocacy of the Small Business Administration in accordance with Section 603(a) of the Regulatory Flexibility Act (P.L. 96–345, 94 Stat. 1164, 5 U.S.C. Section 601, et seq.).

15. Authority for issuance of this Notice is contained in Sections 4(i), 302, 303(g) and 303(r) of the Communications Act of 1934, as amended. In accordance with the applicable procedures set forth in Section 1.415 of the regulations, interested persons may file Comments on or before May 19, 1983 and Reply Comments on or before June 3, 1983. All relevant and timely comments will be considered. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order. A summary of these Commission procedures governing *ex parte* presentations in informal rule making is available for the Commission's Consumer Assistance Office, Washington, D.C. 20554.

16. In accordance with the provisions of Section 1.419 of the regulations, an original and five copies of all comments, reply comments, briefs and other documents shall be furnished the Commission. To obtain the widest possible response in this proceeding, informal comments (without extra copies) will be accepted, but these comments should make specific reference to this proceeding. Responses will be available for public inspection during regular working hours in the Commission's Public Reference Room located at its headquarters at 1919 M Street, N.W., Washington, D.C. 20554. For further information regarding this proceeding, contact Julius P. Knapp at (202) 653–8247 or Kenneth Nichols at (202) 632–7075.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303).

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 15—[AMENDED]

It is proposed that Part 15 of the FCC Rules be amended by adding a new undersigned heading immediately following § 15.228 followed by new §§ 15230 through 15.235 to read as follows:

Cordless Telephones

§ 15–230 Interim provisions for a cordless telephone.

A cordless telephone which complies with the provisions of §§ 15–231 through 15–235, inclusive, may be manufactured or imported until (5 years after effective date of the Rules) and marketed until (6 years after effective date of the Rules).

§ 15.231 Interim frequencies for cordless telephones.

A cordless telephone may be operated on one or more of the following frequencies, provided it complies with the provisions in §§15–230 through 15–235, inclusive.

46.610 MHz	49.830 MHz
46.630 MHz	49.845 MHz
46.670 MHz	49.860 MHz
46.710 MHz	49.875 MHz
46.730 MHz	49.890 MHz
46.770 MHz	49.670 MHz
46.830 MHz	49.770 MHz
46.870 MHz	49.930 MHz
46.930 MHz	49.970 MHz
46.970 MHz	49.990 MHz

§ 15.232 Technical specifications for cordless telephones.

A cordless telephone must comply with all the technical specifications in this section.

(a) Frequency tolerance of carrier: ±0.01%. The tolerance shall be maintained for a temperature variation of −20°C to +50°C a normal supply voltage, and for variation in the primary voltage from 85% to 115% of the rated supply voltage at a temperature of 20°C.

(b) Emission shall be confined within a 20 kHz band centered on the carrier frequency.

(c) The field strength of the carrier frequency shall not exceed 10,000 uV/m at 3 meters.

(d) The out-of-band emissions, including harmonics, on any frequency more than 10 kHz removed from the carrier shall not exceed the field strength limitations in the following table:

Frequency (MHz)	Field strength (uV/m at 3m)
25 to 85	100
85 to 216	150
216 to 1000	200

The spectrum shall be scanned from 25 to 1000 MHz and all signals exceeding 20 uV/m at 3 meters shall be reported.

(e) The cordless telephone shall be completely self-contained with the antenna permanently attached to the enclosure containing the phone.

(f) A cordless telephone which receives electrical power from the public utility power lines shall limit the radio frequency energy coupled back into the power lines to less than 100 uV on any frequency below 30 MHz.

(g) A cordless telephone system shall provide some minimum means of preventing the base station from either being engaged by an outside party or unintentionally going off-hook and seizing local telephone network loops.

§ 15.233 Certification requirement.

Both the base station and portable handset of a cordless telephone shall be certificated by the Commission pursuant to the procedures in Subpart B of this part. The transmitter portion of a cordless telephone shall be certificated to show compliance with the requirements in §§ 15.230 through 15.235, inclusive. The receiver portion shall be certificated to show compliance with the requirements in Subpart C of this part. A signle application for certification (*FCC Form 731)* may be filed for a cordless telephone provided it clearly identifies all parts of the device and provides adequate data to show compliance with the appropriate rule parts.

Note.—A cordless telephone, which is intended to be connected to a public telephone network shall also comply with regulations in Part 68 of this chapter.

§ 15.234 Labeling and identification requirements for a cordless telephone.

Both the base station and portable handset of a cordless telephone system shall be identified and labelled pursuant to §§ 2.925, 2.926 and 2.1045 of Part 2 of this chapter. In addition, the label attached to the handset portion shall contain the following statement:

"This cordless phone is a low power communications device operating pursuant to the provisions of Part 15 of FCC Rules. Privacy of communications may not be ensured when using this phone. Operation is subject to two conditions: (1) It may not cause harmful interference; and, (2) it must accept any interference received, including that which may cause undesirable operation.

§ 15.235 Non-interference requirement.

Notwithstanding compliance with the technical specifications herein, a cordless telephone is subject to general conditions of § 15.3 of this part. The operator of a cordless telephone may be required to stop operating his device upon a finding that the device is causing harmful interference and it is in the public interest to stop operation until the interference problem has been corrected.

47 CFR Parts 21 and 22

[CC Docket No. 83-371; FCC 83-140]

Common Carrier and Satellite Licensing Procedures Pursuant to the Communications Act of 1982

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The proposal proposes to revise certain sections of Parts 21, 22 and 23 of the Commission's Rules relating to common carrier licensing and certain rules relating to fixed satellite licensing. These changes are being proposed to reflect certain changes to the Communications Act made by Pub. L. 97-259. The proposal proposes generally to grant common carrier and fixed satellite licenses for ten years and to grant temporary authorizations for 180 days with the possibility of unlimited renewals.

DATES: Comments must be received on or before May 13, 1982; Reply Comments must be received on or before May 20, 1983.

ADDRESS: Office of the Secretary, Room 222, Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT: Emily Williams at (202) 634-1869.

List of Subjects in 47 CFR Parts 21, 22 and 23

Communication, Common carriers.

Proposed Rulemaking

In the matter of common carrier and satellite licensing procedures pursuant to the Communications Amendments Act of 1982; CC Docket No. 83-371.

Adopted: April 7, 1983.

Released: April 13, 1983.

By the Commission: Commissioner Fogarty absent.

I. Introduction

1. The Communications Amendments Act of 1982, Pub. L. No. 97-259, became law on September 13, 1982. Among other things, this law revised Section 307(c) of the Communications Act, 47 U.S.C. 307(c), to allow the Commission to grant licenses for non-broadcasting stations for a maximum of ten years rather than five years. In addition, under Section 309(f), 47 U.S.C. 309(f), the Commission now may authorize temporary operation of unlicensed stations for an unlimited number of 180-day periods. Previously, the Commission could authorize such unlicensed operation only for a maximum of two 90-day periods.[1]

2. The purpose of this Notice of Proposed Rulemaking is to propose changes in the Commission's Rules and procedures to reflect amended Sections 307(c) and 309(f) of the Communications Act with respect to common carrier and satellite stations and to invite public comment with respect to these proposed changes.[2]

---

[1] Public Law 97-259 also amended Section 319(d) of the Communications Act. Former Section 319 required a construction permit to establish a non-broadcasting station unless the Commission waived this requirement for public interest reasons. Amended Section 319(d) provides that a construction permit is no longer required for common carrier stations unless the Commission makes an affirmative finding that the public interest, convenience and necessity is served by requiring such a permit. We shall address this amendment in the near future. Until that proceeding is completed, we shall require carriers to obtain a construction permit prior to establishing a common carrier station or an earth station or space station. *See* Public Notice 740 (released Nov. 10, 1982).

[2] In a separate proceeding, the Commission, in PR Docket No. 83-27, amended §§ 1.925, 1.962, 94.27 and 94.43 of the rules to reflect the Communications Act Amendments. (*See also* proposed changes to Section 81.41 in the Notice of Proposed Rulemaking in Amendment of Parts 81 and 83 of the Rules, PR Docket No. 82-796).

II. Discussion

A. License Terms

3. Amended Section 307(c) provides in relevant part: "[n]o license * * * for [non-broadcasting stations] shall be for a longer term than ten years, and * * * a renewal of such license may be granted from time to time for a term * * * not to exceed ten years * * *." Under the prior law and our current rules,[3] all common carrier licenses and renewals can be granted for a period not to exceed five years. The general practice has been to grant licenses for the maximum statutory period unless there exists good cause to grant a license for a shorter term.

4. The primary purpose of Congress in initially imposing a license term was to ensure that the government retains some control over the valuable privilege that a license represents.[4] With a limit on the terms of licenses, the Commission is afforded the opportunity periodically to review a licensee's qualifications to ensure that the license is being used in the public interest. Thus, the question to be answered in light of the new legislation is what is the amount of time that, as a general rule, the Commission should allow before automatic review of licenses.

5. We tentatively conclude that the general rule should be that common carrier and fixed satellite licenses be granted for 10 years and we propose to amend §§ 21.45(a), 22.45(a) and 23.29 accordingly.[5] Our conclusion is based primarily on the fact that in most of these services the Commission receives relatively few complaints about licensees or the operation of their stations.[6] Renewal applications in most of the services are rarely, if ever, mutually exclusive with that of a competing application. Objections to renewals are seldom filed and most are granted relatively routinely. Therefore, as a general matter, the longer license terms appear justified.[7]

6. Two of the services licensed under Parts 21 and 22 of the rules are new services with which we have no operational experience. These are the Digital Electronic Message Service (DEMS) and the Cellular Telecommunications Service. We tentatively conclude that there is no reason to differentiate these services from the other services. Initial applications are closely reviewed and we have no reason to expect licensees in the DEMS or Cellular Service to require significantly closer scrutiny than other services. With respect to the Cellular Service, we note that the Commission has adopted stringent and detailed requirements as to financial, technical and other qualifications, which should help to ensure that there are not unforeseen problems with the service. *See Cellular Communications Systems,* 86 FCC 2d 469 (1981), *modified,* 89 FCC 2d 58 (1982). During the initial operating years of licensees in these new services, the staff will deal with complaints received relating to specific instances of alleged non-compliance with the rules. We believe it is more desirable to take this narrower approach to resolving problems that may arise in particular cases than to rely on a shorter license term for all licensees of these services.

7. In proposing to extend these license terms, we wish to emphasize that we are proposing a general rule. Thus, the Commission would continue to have the right to grant or renew station licenses in these services for a shorter period of time than that generally prescribed.[8] In any instance in which there is a question of whether a particular licensee should be granted a license for the full term the Commission has the option of granting the license for a shorter term. In addition, in proposing to extend the license terms for these services, we do not seek to avoid the Commission's obligation to review licensee's qualifications. The renewal process is but one of the Commission's enforcement mechanisms for meeting its statutory duties. The proposed rule changes do not, for example, affect our statutory authority to revoke any station license,[9] and the proposed ten year term does not in any sense guarantee that a licensee who is not using his license properly would be able to retain that license for ten years. Rather, the proposal would encourage individual proceedings designed to address particular problems rather than a burdensome and unnecessary general review requirement. We will continue to rely on the complaint process and the Commission's field inspection and minotoring capabilities to ensure that licensees are upholding their statutory duties.

8. The longer license terms for common carrier services would result in a significant savings of Common Carrier Bureau and licensee resources by requiring the processing of license renewal applications only once every ten years instead of every five. This savings by carriers and the Commission was one of the reasons for adoption of the amendments.[10] For example, in the Point-to-Point Microwave Service, the staff estimates that actions on all renewal applications total approximately 1,500 work hours. Thus, extending the license terms in that service alone will save that many work hours every ten years. When all the other services are considered, the savings would be substantial. Although we have no estimate of the resource savings that an extension of the license term would entail for carriers, we assume that it would not be insignificant. We invite commenters to submit information regarding costs that might be avoided by longer license terms so that these savings might be weighed in reaching a final decision in this matter.

9. In order to effectuate the new license terms as quickly as possible and in order to minimize the administrative burdens on the Commission and the licensees, we also propose to extend the terms of all current licensed (except developmental licenses) to ten years. All current licenses would then expire ten years after the beginning of the license term specified in the outstanding authorization. By doing this we would obviate the need to file and process one entire round of renewal applications.[11]

---

[3] *See* 47 CFR 21.45, 22.45 and 23.29.

[4] *See* S. Rept. No. 772, 69th Cong., 1st Sess. 2–3 (1926); *see also* S. Rept. No. 781, 73rd Cong., 2d Sess. 6 (1934).

[5] Part 25 of our Rules relating to the licensing of satellite facilities does not contain any rule limiting the term of licenses for those facilities. Our practice generally has been to issue licenses for the maximum term permitted by statute unless the applicant requests a shorter term or unless operation of the station is scheduled to be concluded well before the statutory license term. We see no reason to grant earth station licenses for less than ten years. We propose doing so unless comments submitted convince us to do otherwise. With respect to space stations, we propose to issue licenses for the nomimal lifetime of the satellite, but not for a period longer than 10 years.

[6] Although one service, the Multipoint Distribution Service (MDS), has presented a relatively large number of licensing and operational problems for the staff, we tentatively conclude that the ten year license term should also apply to it. As discussed below, the Commission retains the right to issue a particular license for a shorter period and/or revoke a license, which we believe are more appropraite remedial solutions to problems than denying extended license terms to all MDS licensees.

[7] We propose to maintain the present one-year term for all developmental licenses issued in the Domestic Public Fixed, Mobile, and Satellite Services. These licenses are granted to enable the applicant to conduct research or development and one year normally is sufficient time for such purposes.

[8] Sections 21.45 and 22.45 contain express provisions that the Commission has the right to grant licenses for a shorter term than generally prescribed. Section 23.29 does not now contain such an express provision. To make Part 23 consistent with Parts 21 and 22, we propose to add language to that effect to § 23.29.

[9] 47 U.S.C. 312.

[10] *See* Conf. Rept. 97–765, 97th Cong., 2d Sess. 35 (1982); 128 Cong. Rec. 76653 (daily ed. Aug. 19, 1982).

[11] This extension would not apply to existing wireline telephone services in the 35 MHz band. In

We believe that we have sufficient authority to take this action. The Commission's authority to modify the provisions of existing licenses by reulemaking has been upheld on several occasions. *See, e.g., National Broadcasting Co. v. United States,* 319 U.S. 190 (1943); *California Citizens Band Association v. United States,* 375 F.2d 43 (9th Cir.), *cert. denied,* 389 U.S. 844 (1967); *see also American Airlines, Inc. v. CAB,* 359 F.2d 624 (D.C. Cir.), *cert. denied,* 385 U.S. 943 (1966).

10. Both Parts 21 and 22 specify a staggered schedule of months, on a service, by service basis, on which licenses for the different services will expire. For example in the mobile services, radio common carrier licenses expire on April 1, and wireline common carrier licenses expire July 1. The staff also staggers the year of renewal on a service-by-service basis. Thus, radio common carrier licenses expire in April of 1984, and wireline common carrier licenses expire in July of 1983.[13] Our proposal to extend existing licenses would result in radio common carrier licenses expiring in April of 1989 and wireline common carrier licenses expiring in July of 1988.[13]

11. With respect to the wireline common carrier licenses that are currently scheduled to expire on July 1 of this year, we note that § 22.11(c) of our Rules requires renewal applicants to file between 30 and 60 days prior to the license expiration date. Under this rule, wireline licensees would be expected to file for renewal of their licenses between May 1, 1983 and June 1, 1983. Pending the outcome of this rulemaking proceeding, we hereby waive the requirements of § 22.11(c) and instruct wireline licensees not to file renewal applications in May 1983.[14] Renewal applications filed during this period will be returned. Wireline carriers will not risk expiration of their licenses by not submitting their renewal applications in May. If, by June 15, 1983, the Commission has not released an Order extending the license term, renewal applications must be filed between that date and June 30, 1983. We do not anticipate that any such filing will be necessary, but we make this provision so that wireline licensees may be assured that their authorizations are not placed at risk by failure to file in May 1983. In order to accomplish these rule changes in time to avoid the wireline renewal filings, we specify an expedited comment period as set forth below. If we cannot complete the entire proceeding by June 15, we will consider issuing a separate order addressing only the license extension proposal.

12. Finally, we note that licenses for satellite earth and space stations granted pursuant to Part 25 of the rules do not expire on a set schedule of staggered dates as in the mobile and domestic fixed services. Rather they expire individually, generally five years after the day the license was granted. Therefore, in order to continue the effectiveness of licenses in the Part 25 services that would expire during the pendency of this rulemaking, licensees still will be required to submit renewal applications.[15] However, we do not intend to process any of these applications during the pendency of this proceeding until we resolve the issue of whether to extend the license terms of these stations.

B. Special Temporary Authority (STA)

13. Section 309(f) of the Communications Act provides an exception to the general rule that applications for construction permits or radio licenses shall not be granted earlier than thirty days following the issuance of a public notice of the acceptance for filing of the application. Until passage of the recent amendments, the Commission could grant special temporary authority without issuing a public notice upon finding that there were "extraordinary circumstances requiring emergency operations in the public interest and that delay in the institution of such emergency operations would seriously prejudice the public interest." The Commission had authority to grant a maximum of two 90-day temporary license authorizations. New Section 309(f) deletes the reference to emergency operations in the granting of temporary authorizations pursuant to that section,[16] extends the maximum period of temporary operation from 90 to 180 days, and allows an unlimited number of 180-day authorizations.

14. We propose to amend §§ 21.25, 22.25 and 23.28 to reflect the changes in the statute and to apply the same principles to satellite facilities.[17] Thus, carriers would be able to apply for an STA for a period of 180 days and would be able to apply for an unlimited number of extensions.[18] The longer period, of course, would reduce the applicants' and the Commission's administrative burden.

15. Additional work could be caused, however, by persons requesting numerous 180-day authorizations. Congress apparently was aware of this potential problem and the possiblity of the creation of *de facto* station licenses when it provided for an unlimited number of extensions. In the Conference Report, the Committee stated that "an applicant for STA renewal bears a heavy burden of showing, consistent with the test in Section 309(f), that a renewal should be granted." Conf. Rept. 97–765, 97th Cong., 2d Sess. 37 (1982). To ensure that the Congressional intent is satisfied and that the process is not abused, we also propose to add language to the rule that reflects this legislative intention.

III. Regulatory Flexibility Act Analysis—Certification

16. We conclude that the proposed rule changes contained herein will have no significant economic impact on a substantial number of small entities, within the meaning of Section 605(b) of the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b) (1982). We are issuing this Notice of Proposed Rulemaking to receive public comment on a number of changes to common carrier and fixed

---

CC Docket No. 80–189, the Commission decided to terminate all such services in June, 1988. *See* 47 FR 34561 (August 10, 1982). In addition, this action is without prejudice to any decision the Commission may make in, or as a result of the proceedings in, CC Docket 80–112, 45 FR 29323 (1980).

[12] The year of expiration is not codified in the rule, since this would require lengthy lists of recurring five-years periods. Instead, the year is specified on the license itself.

[13] Other existing Part 21 and Part 22 licenses would expire as follows:

1. Point-to-Point Microwave, Feb. 1, 1990.
2. Local Television Transmission, Feb. 1, 1990.
3. Multipoint Distribution Service, May 1, 1991.
4. Offshore Telephone, Aug. 1, 1991.
5. Public Land Mobile (air ground base stations), Sept. 1, 1989.
6. Rural Radio, Nov. 1, 1988.

[14] This waiver is on a one-time basis and applies only to the wireline licensees who would otherwise be required to file renewal applications in May of 1983. A waiver is not needed for any other carriers since their authorizations expire subsequent to 1983 and, therefore, after this proceeding should be completed.

[15] Submission of the renewal application in a timely manner continues the effectiveness of the license. 5 U.S.C. 558; 47 CFR 1.62.

[16] Temporary authorizations may also be granted pursuant to Section 309(c)(2)(G) of the Communications Act. 47 U.S.C. 309(c)(2)(G).

[17] Part 25 contains no rules relating to applications for STAs. Processing of such applications has been handled pursuant to the guidelines specified in Processing Procedures for Domestic Earth Station Applications, FCC 75–932, released Aug. 8, 1975. Except with respect to the period of an STA, the number of renewals, and the test for obtaining a renewal of an STA (for which we propose to follow the guidelines used by the domestic fixed and mobile services), we propose to continue using the procedures set out in that public notice.

[18] We also propose to delete the reference to "emergency" operations in § 21.25(b)(4) of the rules to reflect the new law. We do not see this as significantly altering the test for temporary authorization pursuant to Section 309(f) of the Act, however, since such authorization continues to require a showing of "extraordinary circumstances."

satellite licensing allowed by the Communications Amendments Act of 1982. Our objective is to compile a sufficient record to implement these rules, if warranted. The legal basis for this proposal is contained in paragraph 30 below.

17. The Commission proposes to relax regulatory requirements of various aspects of the licensing process for common carrier and fixed satellite stations. This relaxation will apply equally to all applicants and licensees, whether they be small business entities, single individuals or large corporations and should aid all applicants by eliminating costs and delay in the licensing process. Specifically, with the exception of developmental licenses we propose to extend the license period for all common carrier and domestic fixed satellite radio facilities so as to require applicants generally to file license renewal applications once every ten years, instead of every five years. Our proposal to extend the period allowed for special temporary operation of a station and to permit an unlimited number of 180-day extensions will have a relatively small economic impact upon small business entities but what impact there will be will be beneficial in requiring only one application instead of two in order to operate for a 180-day period. In general, the alternatives that the Commission could consider would be more burdensome than those proposed.

IV. Ordering Clauses

18. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comment/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission Secretary for inclusion in the public files. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comment for the proceeding must prepare a written summary of that presentation. On the day of the oral presentation, the written summary must be served on the Commission's Secretrary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. *See generally* § 1.1231 of the Rules, 47 CFR 1.1231.

19. Accordingly, it is ordered, That pursuant to Sections 1, 4(i), 303(f), 303(r), 307(c), 309(f) and 403, of the Communications Act of 1934, 47 U.S.C. 151, 154(i), 303(f), 303(r), 307(c), 309(f) and 403, and Section 553 of the Administrative Procedure Act, 5 U.S.C. 553, there IS ISSUED A NOTICE OF PROPOSED RULEMAKING.

20. It is further ordered, pursuant to § 1.415 of the Commission's Rules, that all interested persons may file comments on the matters discussed in this Notice and the proposed rule changes contained in the attached Appendix on or before May 13, 1983, and reply comments on or before May 20, 1983. This proceeding is being expedited in order that the Commission may take action on the proposal to extend current license terms to ten years as soon as possible so as to relieve carriers of the burden of filing renewal applications. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken with respect to the proposals contained in the Appendix. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

21. It is further ordered, That pursuant to §§ 1.51 and 1.419 of the Rules, an original and five copies of all comments, replies, pleadings, briefs or other documents shall be filed with the Commission. Copies of all filings will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

22. It is further ordered, That the Chief, Common Carrier Bureau, is delegated authority to require the submission of additional information, make further inquiries, and modify the dates and procedures if necessary to provide for a fuller record and more efficient proceeding.

23. It is further ordered, That the Secretary shall cause this Notice of Proposed Rulemaking to be published in the **Federal Register.**

(Secs. 2, 3, 4, 5, 301, 303, 307, 308, 309, 315, 317, 48 Stat., as amended, 1064, 1065, 1066, 1068, 1081, 1082, 1083, 1084, 1085, 1088, 1089; 47 U.S.C. 152, 153, 154, 155, 301, 303, 307, 308, 309, 315, 317)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

Parts 21, 22 and 23 of Chapter I of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

PART 21—DOMESTIC PUBLIC FIXED RADIO SERVICE

1. Section 21.25 is amended by revising paragraphs (b)(4) and (c) as follows:

§ 21.25 Application for temporary authorizations.

* * * * *

(b) Special temporary authorizations may be granted without regard to the 30-day public notice requirements of § 21.27(b) when:

(4) The authorization is made upon a finding that there are extraordinary circumstances requiring operation in the public interest and that delay in the institution of such service would seriously prejudice the public interest.

(c) Temporary authorization of operations not to exceed 180 days may be granted under the standards of Section 309(f) of the Communications Act where extraordinary circumstances so require. Extensions of the temporary authorization for a period of 180 days each may also be granted but the renewal applicant bears a heavy burden to show that extraordinary circumstances warrant such an extension.

* * * * *

§ 21.45 [Amended]

2. Section 21.45(a) is amended by removing the term "5 years" and inserting in lieu thereof "10 years".

PART 22—[AMENDED]

3. Section 22.25 is amended by revising paragraph (b)(4) and (c) as follows:

§ 22.25 Application for temporary authorizations.

* * * * *

(b) Special temporary authorizations may be granted without regard to the 30-day public notice requirements of § 22.27(b) when:

(4) The authorization is made upon a finding that there are extraordinary circumstances requiring operation in the public interest and that delay in the institution of such service would seriously prejudice the public interest.

(c) Temporary authorizations of operation not to exceed 180 days may be granted under the standards of Section 309(f) of the Communications Act where extraordinary circumstances so require. Extensions of the temporary authorization for a period of 180 days each may also be granted, but the renewal applicant bears a heavy burden to show that extraordinary circumstances warrant such an extension.

* * * * *

4. Section 22.45 is amended as follows:

§ 22.45 License period.

(a) Licenses will be granted for 10 years. When a date is specified in paragraph (b) of this section, the license will be valid until that date in the tenth year of the license. Developmental licenses shall be granted for one year. When the Commission determines the public interest, convenience and necessity would be served by a shorter license period, the license will be granted for such period.

(b) *License Termination.* Station licenses will expire on the dates listed below, on the last year of the license:

Public Land Mobile (radio common carriers), Apr. 1
Public Land Mobile (wireline common carriers), July 1
Offshore Telephone
Public Land Mobile (air-ground base stations), Sept. 1
Rural Radio, Nov. 1
Cellular Radio, Dec. 31

* * * * *

PART 23—[AMENDED]

5. Section 23.28 is revised to read as follows:

§ 23.28 Special temporary authorization.

(a) Requests for special temporary authority must be accompanied by a showing that interference will not be caused to the fixed public or fixed public press service for which the station is primarily licensed; and, in addition, such requests must be accompanied by the following:

(1) A statement of the call signs, location, and frequencies of the transmitting station; the call signs, location, and frequencies of the receiver station; and the type or types of emission to be employed by both stations.

(2) A statement as to whether the frequencies are to be used for contact control purposes only.

(3) A statement of the period for which the temporary authority is desired.

(4) A statement describing the service which is to be rendered.

(b) Temporary authorizations of operation not to exceed 180 days may be granted under the standards of Section 309(f) of the Communications Act where extraordinary circumstances so require. Extensions of the temporary authorizations for a period of 180 days may also be granted, but the renewal applicant bears a heavy burden to show that extraordinary circumstances warrant such an extension.

6. Section 23.29 is revised by designating the first paragraph as paragraph (a), removing "5 years" and inserting in lieu thereof "10 years", and by adding a new paragraph (b) as follows:

§ 23.29 License period and expiration time.

(a) * * *

(b) The Commission reserves the right to grant or renew station licenses in these services for a shorter period of time than that generally prescribed for such stations if, in its judgment, the public interest, convenience or necessity would be served by such action.

Expansion of the Telephony Segments of the High Frequency Amateur Radio Service Bands; and Petition for Rulemaking To Authorize Telephony Operation on Certain Frequencies in Hawaii

AGENCY: Federal Communications Commission.

ACTION: Further notice of proposed rule making.

SUMMARY: The Commission is proposing to authorize the use of additional frequencies for telephony operation in the Amateur Radio Service high frequency (HF) bands. The frequencies currently authorized for such use are, at times, extremely congested. The proposed rule amendments would provide more frequencies for this use and thus relieve some of the congestion.

DATES: Comments are due by July 1, 1983 and replies by August 1, 1983.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

Further Notice of Proposed Rule Making

In the matter of an Expansion of the Telphony Segments of the High Frequency Amateur Radio Service Bands. Petition for Rule Making to Authorize Telephony Operation on the Frequencies 7075-7100 KHz in the State of Hawaii; PR Docket No. 82-83, RM-3705, RM-3729, RM-3734, RM-3778, RM-3831, RM-3833, RM-3860, RM-4228.

Adopted: March 31, 1983.
Released: April 11, 1983.

By the Commission.

1. On February 11, 1982, the Commission adopted a Notice of Inquiry and Proposed Rule Making in the above-captioned matter.[1] That Notice was in response to seven petitions for rule making, each requesting that the Amateur Radio Service Rules (Part 97) be amended to provide for the use of telephony operation (emission types A3 and F3) on additional portions of the amateur high frequency (HF) bands—the bands between 3 and 30 MHz. In its Notice, the Commission initiated an inquiry, seeking to gather additional information on alternative approaches to expanding frequencies for telephony use in the HF bands other than the 14 MHz band. The Commission also specifically proposed to "* * * expand telephony privileges in the 14 MHz amateur band by adding the frequencies 14150-14200 kHz to those currently authorized for such use. Today, we are adopting a separate First Report and Order to set forth our findings on the issues of expansion of the telephony "subband" in the 14 MHz band.[2] This Notice will set forth our specific proposals for expansion of the other HF telephony subbands.

2. Several hundred comments were filed on the Commission's Notice.[3] The

[1] 47 FR 8798 (March 2, 1982).

[2] See First Report and Order in PR Docket 82-83, FCC 83-118, 48 FR ——April ——, 1983).

[3] A Motion to Set Aside Comments of the American Radio Relay League was also filed by Josef Schrabal. That Motion is discussed and disposed of in our First Report and Order in this proceeding.

vast majority of the comments received supported the concept of expanding many or all of the HF Telephony subbands. Expansion of two of the subbands in question—those of the 3.5 and 21 MHz bands—had uniform support in the comments. Virtually all of the commenters agreed that the telephony subbands for these two bands should start at 3750 kHz and 21200 kHz, respectively. Many of the commenters also agreed that the operator privileges for these telephony subbands should be changed to the following: 3750–3775 kHz, Amateur Extra only; 3775–3850 kHz, Amateur Extra and Advanced; 3850–4000 kHz, Amateur Extra, Advanced and General; 21200–21225 kHz, Amateur Extra only; 21225–21300 kHz, Amateur Extra and Advanced; 21300–21450 kHz, Amateur Extra, Advanced and General. While most commenters indicated that privileges conveyed by this general scheme would be most appropriate, there were some comments which suggested that more frequencies should be reserved for the higher class licensees. However, we believe that it would be unwise to limit the relief we hope to provide to operators by reserving unnecessarily large portions of the proposed expanded telephony subbands to higher class licensees. We believe that the privileges set forth above would be most fair to all license classes and therefore we are proposing these as the changes to be made in the authorizations for these bands.

3. Regarding the 28 MHz band, commenters suggested authorizing telephony operations down to frequencies as low as 28200 kHz. Authorization of such operations on frequencies as low as 28300 kHz was a common recommendation. While we are proposing to authorize telephony operations on all frequencies from 28300 to 29700 kHz, we request comments on whether such an expansion is truly warranted in light of the sliver of spectrum that will remain for modes of operation using the international Morse code and digital communication (radio-teleprinting). For example, we may be inclined to continue to allow both of these modes on the frequencies 28300–28500 kHz even if we do expand the 28 MHz telephony subband. In any event, Morse code operation would continue to be permitted on all frequencies as it is now, even though we recognize that such operation is normally not conducted on frequencies adjacent to wider-bandwidth telephony emissions.

4. There was no consensus in the comments as to the best course of action for us to take regarding the 7 MHz telephony subband. Some comments suggested that the Novice subband be moved downward in frequency in order to permit telephony operation from 7100 kHz through 7300 kHz, while others recommended the establishment of a new telephony subband between 7050 and 7100 kHz with privileges in the new subband limited to holders of Advanced or Amateur Extra class operator licenses. Many comments suggested no change in the mode authorizations for the 7 MHz band. Except as discussed below, we have decided to make no proposal for changes in this band at this time since there seems to be no consensus as to the actual need or the best approach. However we invite comments as to whether some future action may be warranted and what approach would be most beneficial.

5. Finally, we are in receipt of a petition for rule making, RM–4228, filed on October 22, 1982 by Randall F. Sobol. That petition requests that the Commission's rules be amended by adding to § 97.61(b)(11) the phrase "* * * with the exception of those stations located west of 150 degrees West longitude and south of 30 degrees North latitude." The effect of such a change would be to authorize the frequencies 7075–7100 kHz for telephony operation in the State of Hawaii and similarly situated geographic areas. The petitioner claims that, "A few hundred miles to the south of the Hawaiian Islands, we would be in Region 3, thusly able to operate A3 on those frequencies * * * (while the) Hawaiian Islands are almost 2500 miles from the nearest possible point on the U.S. Mainland." The petitioner goes on to point out that, "The geographic proximity to Region 3 renders extremely strong Asian broadcast interference. This is noticable prior to sundown in the Hawaiian Islands and lasts several hours after sunrise the following day." The Commission is persuaded that the petitioner's request merits further consideration and we are including the requested rule change in our proposals in this Notice.

6. Accordingly, notice is hereby given that it is proposed to amend 47 CFR Part 97 in accordance with the proposal set forth in the attached Appendix.

7. Authority for issuance of this Notice is contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303. Pursuant to applicable procedures set forth in § 1.415 of the Commission's Rules, interested persons may file comments on or before July 1, 1983, and reply comments on or before August 1, 1983. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

8. In accordance with § 1.419 of the Commission's Rules, 47 CFR 1.419, formal participants must file an original and five copies of their comments and other materials. Participants who wish each Commissioner to have a personnal copy of their comments should file an original and eleven copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. Each set of comments must state on its face the proceeding to which it relates (PR Docket Number) and should be submitted to: The Secretary, Federal Communications Commission, Washington, DC 20554. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

9. For purposes of this non-restricted notice and comment rule making proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a Notice of Proposed Rule Making until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must

be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's rules, 47 CFR 1.1231. A summary of the Commission's procedures governing *ex parte* contacts in informal rule making is available from the Commission's Consumer Assistance Office, FCC Washington, DC 20554, (202) 632–7000.

10. In accordance with Section 605 of the Regulatory Flexibility Act of 1980 (5 US.C. 605), the Commission certifies that these rules would not, if promulgated, have a significant economic impact on a substantial number of small entities since the Amateur Radio Service may not be used for commercial radio communication (see 47 CFR 97.3(b)) and because these rules would have no forseeable impact on manufacturers of Amateur Radio Service equipment.

11. It is ordered that the Secretary shall cause a copy of this Notice to be served upon the Chief Counsel for Advocacy of the Small Business Administration and that the Secretary shall cause a copy of this Notice to be published in the **Federal Register.**

12. For further information on this proceeding, contact Steve Lett, Federal Communications Commission, Private Radio Bureau, Washington, D.C. 20554, (202) 632–4964.

(Secs. 4, 303 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 97—[AMENDED]

It is proposed that Part 97 of the Commissions Rules and Regulations, 47 CFR Part 97, be amended as follows:

1. In § 97.7, paragraph (a) would be revised to read as follows:

§ 97.7 Privileges of operator licenses.

(a) Amateur Extra and Advanced Class. All authorized amateur privileges including exclusive frequency operating authority in accordance with the following table:

Frequencies	Class of license authorized
3500–3525 kHz	Amateur Extra only.
3750–3775 kHz	Do.
7000–7025 kHz	Do.
14,000–14,025 kHz	Do.
14,150–14.175 kHz	Do.
21,000–21,025 kHz	Do.
21,200–21,225 kHz	Do.
3775–3850 kHz	Amateur Extra and Advanced.
7150–7225 kHz	Do.
14,175–14,225 kHz	Do.
21,225–21,300 kHz	Do.

* * * * *

§ 97.61 [Amended]

2. In § 97.61, in the table in paragraph (a), the rows between (and including) the row beginning with the entry "3500–3775 (kHz)" and the row beginning with "28500–29700 (kHz)" would be revised to read as follows:

(a) * * *

Frequency band	Emissions	Limitations (see paragraph (b))
kHz:		
3500–3750	F1	
3750–4000	A3,A4,A5,F3,F4,F5	4
4383.8	A3A,A3J	13
7000–7300	A1	3,4
7000–7150	F1	3,4
7075–7100	A3,F3	11
7150–7300	A3,A4,A5,F3,F4,F5	3,4
14000–14350	A1	
14000–14150	F1	
14150–14350	A3,A4,A5,F3,F4,F5	
21000–21450	A1	
21000–21200	F1	
21200–21450	A3,A4,A5,F3,F4,F5	
28000–29700	A1	
28300–29700	A3,A4,A5,F3,F4,F5	

3. Also in § 97.61, paragraph (b)11) would be revised to read as follows:

(b) * * *

(11) The use of A3 and F3 in this band is limited to amateur radio stations located outside Region 2 and amateur radio stations located within Region 2 which are west of 150 degrees West longitude and south of 30 degrees North latitude.

* * * * *

[FR Doc. 83–9971 Filed 4–14–83; 8:45 am]

BILLING CODE 6712–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1039

[Ex Parte No. 346 (Sub-No. 16)]

Iron Sulphate Exemption

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rules (Exemption).

SUMMARY: The Commission is proposing to exercise its authority under 49 U.S.C. 10505 to exempt from regulation railroad transportation of iron sulphate (liquid and dry). Since the transportation of iron sulphate appears to meet statutory criteria for exemption, and since the Commission encourages exemption requests, the Commission is pursuing a suggestion for this exemption made by Tennessee Chemical Company.

DATE: Comments are due on May 16, 1983.

ADDRESS: Send an original and, if possible, 15 copies of comments to: Ex Parte No. 346 (Sub-No. 16), Room 5344, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245,

or

Mont L. Burrup, (202) 275–6447.

SUPPLEMENTARY INFORMATION: In an earlier proceeding in which the Commission exempted rail transportation of liquid iron chloride from regulation, Tennessee Chemical Company filed comments requesting that iron sulphate (liquid and dry) also be exempt under 49 U.S.C. 10505.

PART 1039—[AMENDED]

§ 1039.11 [Amended]

This proposed rule would pursue TCC's suggestion by amending § 1039.11 by adding: "28 195 27–30, 68–69 Iron sulphate" to the list of miscellaneous exempt commodities.

Additional information is contained in the Commission's decision. To obtain a copy of the full decision, write to Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423, or call 202–275–7428.

List of Subjects in 49 CFR Part 1039

Administrative practice and procedure, Agricultural commodities, Intermodal transportation, Railroads.

(49 U.S.C. 10505; 5 U.S.C. 553)

This action does not significantly affect the quality of the human environment or the conservation of energy resources. We also certify that the proposed exemption will not significantly affect a substantial number of small entities.

Dated: April 7, 1983

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradision.

Agatha L. Mergenovich

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 675

Foreign Fishing, Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of an amendment to a fishery management plan and request for comments.

SUMMARY: NOAA issues this notice that the North Pacific Management Fishery Management Council has submitted an amendment (Amendment 7) to the Fishery Management Plan for the Groundfish Fishery in the Bering Sea and Aleutian Islands Area for Secretarial review and is requesting comments from the public. Copies of the amendment may be obtained from the address below.

DATE: Comments on the plan should be submitted on or before June 24, 1983.

ADDRESS: All comments should be sent to Robert W. McVey, Director, Alaska Region, NMFS, P.O. Box 1668, Juneau, Alaska 99802.

Copies of the amendment are available upon request from the North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510.

FOR FURTHER INFORMATION CONTACT: Susan J. Salveson, Regional Plan Coordinator, Telephone: 970–586–7229.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conversation and Management Act (16 U.S.C. 1801 *et seq.*) requires that each regional fishery management council submit any fishery management plan or plan amendment it prepares to the Secretary of Commerce (Secretary) for review and approval or disapproval. This act also requires that the Secretary, upon reviewing the plan or amendment, must immediately publish a notice that the plan or amendment is available for public review and comment. The Secretary will consider the public comments in determing whether to approve the plan or plan amendment.

Amendment 7 proposes measures for managing the foreign longline fishery for groundfish in the Bering Sea and Aleutian Islands area. Regulations proposed by the Council and based on this amendment are scheduled to be published within 30 days. (16 U.S.C. 1801 et seq.)

Dated: April 12, 1983.

Joe P. Clem,

Acting Chief, Plan Review Division, National Marine Fisheries Service.

Notices

Federal Register
Vol. 48, No. 74
Friday, April 15, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Privacy Act of 1974; Systems of Records; Annual Publication

Pursuant to 5 U.S.C. 552a(e)(4), the Department of Agriculture hereby republishes its annual notice of the existence and character of the systems of records currently maintained pursuant to the Privacy Act of 1974. The last annual publication for the Department of Agriculture can be found at 47 FR 5276 (February 4, 1982). That publication updated the earlier publication found at 44 FR 69694 (December 4, 1979) as well as the complete publication found at 43 FR 51268 (November 2, 1978). In addition, the systems of records published by this Department as of December 31, 1981, may be viewed in Volume 1, Privacy Act Issuances, 1981 Compilation of the Federal Register, in depository libraries and Federal Information Centers nationwide.

Subsequent to the last annual publication, the following system of records and amendments to existing systems of records have been published:

47 FR 63 (1/4/82)—Amendment to FS–4—Certification of Engineering Personnel, USDA/FS.

47 FR 5024 (2/3/82)—Amendment to FS–47—Forest Service Placement Availability System, USDA/FS.

47 FR 9037 (3/3/82)—Amendment to OP–1—Personnel and Payroll System for USDA Employees, USDA/OP.

47 FR 12649 (3/24/82)—AMS–10—Poultry Grading Inspection Monitoring System, USDA/AMS.

47 FR 28680 (6/21/82)—Amendment to AMS–8—Court cases brought by the Government pursuant to the following Acts: Agricultural Marketing Act of 1946, Egg Products Inspection Act, USDA/AMS; Amendment to USDA/FGIS–3—Subsidiary Personnel and Pay Records, USDA/FGIS; Amendment to USDA/FGIS–5—Occupational injury/illness and motor vehicle accident case files for U.S. Department of Agriculture, Federal Grain Inspection Service employees, USDA/FGIS; Amendment to USDA/P&SA–1—Packers and Stockyards Administration administrative records, USDA/P&SA; Amendment to USDA/P&SA–2—Persons engaged in business as livestock market agencies and dealers under the provisions of the Packers and Stockyards Act, USDA/P&SA.

The above-cited new system publication is printed in full below.

Dated: April 11, 1983.

John R. Block,
Secretary.

USDA/AMS—10

SYSTEM NAME:

Poultry Grading/Inspection Monitoring system.

SYSTEM LOCATION:

USDA, Washington Computer Center, Washington, DC 20250.

CATEGORY OF INDIVIDUALS COVERED BY THE SYSTEM:

Poultry Grading Branch and State employees licensed to grade and/or inspect poultry and/or poultry products.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information on the condition of the plant and comparative grading and examinations peformed by the grader/inspector and the supervisor. The information is taken from Poultry Division forms, Employee's Performance Record, Daily Report of Egg Drying Activities, and Daily Report of Plant Operations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Agricultural Marketing Act of 1946 (60 Stat. 1037, as amended; 7 U.S.C., Section 1621 et seq.), and the Egg Products Inspection Act of 1970 (84 Stat. 1620 et seq., 21 U.S.C., Sections 1031–1056).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The use of records will be limited to Poultry Division employees involved in the management of the grading/inspection programs. This includes the Branch Chief and Assistant to the Director, and the National Technical Supervisors. Selected reports will be sent to regional directors. The system will be used to identify problem areas in the grading/inspection of products. This will include employee/supervisory/plant performance on an area, regional, and national level. The system will also be used to develop percentages and statistics relating to grade standard tolerances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders; computer disk; computer paper printouts.

RETRIEVABILITY:

Records are indexed and accessed by social security number or a selected number for a particular individual and region.

SAFEGUARDS:

Each regional office has a separate logo identification and password to the computer for input. Reports are run by the national office. Paper records and printouts will be maintained in locked file cabinets or locked offices.

RETENTION AND DISPOSAL:

Automated records will be deleted after 2 years. Printouts will be destroyed after 2 years. Daily Report of Plant Operation and Reports of Egg Drying Operations will be destroyed after 1 year. Employee's Performance Record will be destroyed after 3 years.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Poultry Grading Branch, Poultry Division, USDA, AMS, Washington, DC 20250.

NOTIFICATION PROCEDURE:

Individuals may request information concerning their records by contacting the system manager.

RECORD ACCESS PROCEDURE:

Any individual may obtain information as to the procedure for gaining access to a record in the system that pertains to him/her from the system manager.

CONTESTING RECORD PROCEDURES:

Any individual may obtain information as to the procedure for contesting a record in the system that

pertains to him/her from the system manager.

RECORD SOURCE CATEGORIES:

Information contained in the system is obtained from Federal Grading Branch employees, licensed State employees, and their Federal supervisors.

BILLING CODE 3410-01-M

Soil Conservation Service

McArthur Group Irrigation RC&D Measure, Georgia

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines, (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the McArthur Group Irrigation Measure, Montgomery County, Georgia.

The enviromental assessment of this Federal action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Dwight M. Treadway, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of a 15-acre reservoir with a storage capacity for 60 acre-feet of supplemental irrigation water. The planned project as described in the Finding of No Significant Impact involves the construction of an earth dam with a vegetated emergency spillway. All disturbed areas will be revegetated to protect them from erosion.

The Notice of a Finding of No Significant Impact has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Dwight M. Treadway, State Conservationist, Soil Conservation Service, 355 East Hancock Avenue (P.O. Box 832), Athens, Georgia 30613, telephone 404-546-2273. An Environmental Assessment and Finding of No Significant Impact have been prepared and sent to various Federal, State, and local agencies, and interested parties. A limited number of copies of the Finding of No Significant Impact are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until 30 days after the date of this publication.

FOR FURTHER INFORMATION CONTACT: Mr. Dwight M. Treadway, State Conservationist, Soil Conservation Service, Robert G. Stephens, Federal Building, 355 East Hancock Avenue, Athens, Georgia 30613, telephone 404-546-2273.

(Catalog of Federal Domestic Assistance Program No. 10.901 Resource Conservation and Development Program—Pub. L. 87-703, 16 U.S.C. 590 a-f,q.)

Dated: April 7, 1983.

Donald K. Stewart,

Assistant State Conservationist for Water Resources.

BILLING CODE 3412-16-M

DEPARTMENT OF COMMERCE

International Trade Administration

Applications; for Duty-Free Entry of Scientific Instruments

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States. Comments must be filed in accordance with § 301.5(a) (3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register.**

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, Room 1523, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 83-161. Applicant: National Bureau of Standards, Bldg. 233, Room B266, Washington, DC 20234. Instrument: Electron Microscope, EM 430T with Accessories. Manufacturer: N.V. Philips' Gloeilampenfabrieken, The Netherlands. Intended Use of instrument: The instrument will be used to study microstructural characteristics of metals and non-metals including oxides, glasses and ceramics. It will be used extensively in a program designed to develop advanced metallurgical processing techniques. A critical part of that program is concerned with the correlation between processing variables and microstructure. Additional studies will be concerned with developing an understanding of the relationships that exist between mode of deformation, crystal structure, composition, second phase constituent type and morphology, mechanical behavior (wear, fracture, fatique, creep), chemical behavior (corrosion, oxidation) and physical properties (electrical, magnetic, elastic). Application Received by Commissioner of Customs: March 28, 1983.

Docket No. 83-163. Applicant: Yale University, 333 Cedar St., New Haven, CT 06510. Instrument: Penning Sputter Coater for Electron Microscope. Manufacturer: Zentrum für Electronen-microscopie, Austria. Intended Use of Instrument: The instrument is intended to be used in the field of experimental pathology for electron microscopic preparation of tissues, cells, subcellular isolated components, isolate macromolecules of extracellular matrix and blood vessels, and for medical diagnosis and teaching. The experiments to be performed deal with the analysis of macromolecules isolated from human and animal tissues and their interactions to form structures such as basement membranes. In addition the instrument will be used for training of graduate students in the experimental pathology training program as part of the course on "Modern Methods in Histopathology." Application Received by Commissioner of Customs: March 28, 1983.

Docket No. 83-164. Applicant: Robert B. Brigham Hospital, A Division of Brigham & Women's Hospital, Sealy Mudd Bldg., Room 504, 250 Longwood Ave., Boston, MA 02115. Instrument: LKB 14800-3 Cryokit for Ultramicrotome complete with Accessories. Manufacturer: LKB Instruments, Inc., Sweden. Intended Use of Instrument: The instrument is intended to be used for the investigation of a variety of human and animal tissues and cells as well as human parasites such as schistosomes, malaria and leishmania. The major use of the instrument will be to localize molecules or antigens in the material under study by frozen thin section immunocytochemistry. Graduate

students and postdoctoral fellows will also train on the instrument as part of their experience in the laboratory. Application Received by Commissioner of Customs: March 28, 1983.

Docket No. 83–165. Applicant: University of Iowa, College of Dentistry, Dental Research, Iowa City, IA 52242. Instrument: Electron Microscope EM 10CA and Accesories. Manufacturer: Carl Zeiss, West Germany. Intended Use of Instrument: The instrument is intended to be used for research to be undertaken which involves all aspects of the structure and function or oral and dental tissues in health and disease such as:

(1) The nature of the permeability barrier in oral epithelium,

(2) Growth, surgical and speech aspects of cleft palate—the maxillofacial growth project,

(3) Age changes in skin and oral mucosa of mice,

(4) Stem cells in oral mucosa,

(5) Anti-caries mechanisms of fluoride complexes *in vitro*,

(6) Root caries—an *in vitro* model,

(7) Therapeutic applications of fluorinate chelating agents, and

(8) Factors determining variation in adult oral mucosa.

Application received by Commissioner of Customs: March 28, 1983.

Docket No. 83–167. Applicant: Case Western Reserve University, Department of Macromolecular Science, 10900 Euclid Avenue, Cleveland, OH 44106. Instrument: Electron Microscope, Model #JEM–100SX and Accessories. Manufacturer: JEOL Ltd., Japan. Intended Use of Instrument: The instrument is intended to be used for studies of synthetic and naturally occurring macromolecular solids. The properties of the materials or phenomena to be investigated consists of the crystal structure, crystal morphology, and average crystal size of polymers. Any stress-induced structure amorphous materials is of also importance, as are the domain sizes and shapes in polyblends and block copolymers. The objectives pursued in the course of the investigation consist of understanding the relationship between the polymer morphologies and structures and the bulk mechanical, electrical, and optical properties of the macromolecule. The instrument will be used in both an undergraduate and graduate laboratory course which intends to familiarize all students within the department (Macromolecular Science) with the operation and techniques associated with its instrumentation. Application Received by Commissioner of Customs: March 30, 1983.

Docket No. 83–168. Applicant: University of Washington, School of Medicine, Seattle, WA 98195. Instrument: Electron Microscope Model #EM 420T and Accessories. Manufacturer: Philips Electronic Instrucments, Inc., The Netherlands. Intended Use of Instrument: The instrument is intended to be used for studies of (a) cell surface events in gamete formation and function (b) analytical morphology of hepatocytes and pulmonary parenchyma, and (c) biology of human adult and fetal skin. The phenomena being studied will include developmental processes, the features of normal diseased cells and tissues, the characteristics of cell surfaces and cytoplasmic components and the quantitative parameters of cell, tissue and organ structure. Application Received by Commissioner of Customs: March 30, 1983.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Richard M. Seppa,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-25-M

Subcommittee on Export Administration of the President's Export Council; Open Meeting

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Subcommittee on Export Administration of the President's Export Council will be held on Friday, April 29, 1983. The meeting is open to the public.

The Subcommittee on Export Administration was initially established on June 1, 1976. Executive Order 12399 of December 31, 1982, continued the Subcommittee until September 30, 1984.

The Subcommittee provides advice on matters pertinent to those portions of the Export Administration Act of 1979 that deal with United States policies of encouraging trade with all countries with which the United States had diplomatic or trading relations, and of controlling trade for national security and foreign policy reasons.

Time and Place: The meeting will take place from 1:00 p.m. to 3:30 p.m., April 29, 1983, at the Main Commerce Building, Room 6802, 14th Street and Constitution Avenue, NW., Washington, D.C.

Agenda:

1:00 Opening Comments; David C. Scott
1:10 Update on OEA Automation; Robert C. Dancy
1:20 Status Report: Foreign Availability; James A. Dukowitz
1:30 Status Report: Export Administration Act; John B. Copeland
2:00 Future Decentralized Licensing; David C. Scott
2:45 Export Documentation and Regulatory Burdens; David C. Scott
3:25 Closing Comments; David C. Scott

SUPPLEMENTARY INFORMATION: For further information contact: Mrs. Debbie Kappler, Office of the Assistant Secretary for Trade Administration, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–1455) or Ms. Elisabeth Vermilye, President's Export Council (202–377–1125).

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

[FR Doc. 83–10098 Filed 4–14–83; 8:45 am]

BILLING CODE 3510-25-M

Office of the Secretary

President's Private Sector Survey on Cost Control

AGENCY: Office of the Secretary, Commerce.

ACTION: Notice of open meeting of the Subcommittee of the President's Private Sector Survey on Cost Control (PPSSCC).

SUMMARY: The Subcommittee was established by the Executive Committee of the PPSSCC to: (i) Review the recommendations submitted, including task force reports and public comments, and (ii) determine which recommendations should be made to the President and the Departments and Agencies.

Time and Place: May 2, 1983, beginning at 10 a.m. The meeting will be held at the U.S. Department of Commerce Auditorium, First Floor, Herbert C. Hoover Building, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230.

Agenda:

1. Draft reports from the following Task Forces of the Survey will be discussed by Subcommittee members:

A. Department of Transportation

B. Department of Health and Human Services—Health

C. Financial Asset Management

D. Department of Housing and Urban Development

E. Department of the Interior

2. Comments and recommendations received from public and other interested parties will be discussed by Subcommittee members.

Copies of the draft reports will be available on April 18 at the Department's Central Reference and Records Inspection Facility, Room 6628 Hoover Building, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Please call Ms. Geraldine P. LeBoo on (202) 377–3271 for information concerning fees and procedures for obtaining copies by mail.

SUPPLEMENTARY INFORMATION: The Subcommittee will hold additional public meeting in May and June, 1983. Exact dates will be noticed in the **Federal Register**. Copies of all materials, including Task Force reports, to be considered at these meetings will be available approximately two weeks prior to each meeting at the Department's Central Reference and Records Inspection Facility, address above.

Public Participation: The May 2 meeting will be open to the public. Seating will be on a first-come, first-served basis, up to the safe capacity of the meeting room. Media representatives are encouraged to call Mr. Malcolm Barr, Director, News Relations, Department of Commerce, 377–4901 to arrange for coverage of the meeting.

The public may file written statements for consideration by the Subcommittee any time before, at, or after the meeting. It is strongly recommended that statements concerning the matters to be considered at each meeting be filed before such meeting to ensure that they are considered by the Subcommittee before adoption of a report. The statements should be filed at the Department of Commerce's Central Reference and Records Inspection Facility, address and phone number as above. Because of the number of recommendations to be discussed, the meeting agenda will not include time for oral statements from public attendees. All public statements received will be available for public review.

FOR FURTHER INFORMATION CONTACT: Ms. Janet Colson, Committee Control Officer for the Executive Committee of the President's Private Sector Survey on Cost Control, telephone (202) 466–4665.

Dated: April 13, 1983.

Marilyn S. McLennan,

Chief, Information Policy and Management Division, Office of the Secretary.

[FR Doc. 83-10193 Filed 4-14-83; 8:45 am]

BILLING CODE 3510-CW-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Request for Public Comment on Bilateral Textile Consultations With Government of Socialist Republic of Romania To Review Trade in Category 604

April 12, 1983.

On February 24, 1983 the Government of the United States requested consultations with the Government of the Socialist Republic of Romania with respect to Category 604 (other man-made fiber yarn, wholly of non-continuous filament). This request was made on the basis of Paragraph 8 of the Agreement between the United States of America and the Socialist Republic of Romania relating to Trade in Wool and Man-Made Fiber Textiles and Textile Products of November 3, 1980, as amended. Paragraph 8 provides for consultations when the orderly development of trade between the two countries may be impeded by imports due to market disruption or the threat thereof.

The purpose of this notice is to advise the public that if no solution is agreed upon in consultations between the two governments within 90 days of the request for consultations, CITA, pursuant to paragraph 8 of the Agreement, may establish a specific limit of 2,446,418 pounds for the entry and withdrawal from warehouse for consumption of man-made fiber textile products in Category 604, produced or manufactured in the Socialist Republic of Romania and exported to the United States during the twelve-month period beginning on January 1, 1983 and extending through December 31, 1983.

The Government of the United States reserves the right under the Agreement to invoke import controls on this category during the 90-day consultation period (February 25, 1983–May 24, 1983) at a level of 713,539 pounds and during the twelve-month period beginning January 1, 1983 at a level of 2,446,418 pounds.

Any party wishing to comment or provide data or information regarding the treatment of Category 604 under the Bilateral Wool and Man-Made Fiber Textile Agreement with the Government of the Socialist Republic of Romania, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in Category 604, is invited to submit such comments or information in ten copies to Walter C. Lenahan, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Since the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83-10069 Filed 4-14-83; 8:45 am]

BILLING CODE 3510-25-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1983; Proposed Additions and Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to and deletions from procurement list.

SUMMARY: The Committee has received proposals to add to and delete from Procurement List 1983 commodities and services provided by workshops for the blind and other severely handicapped.

Comments must be received on or before: May 18, 1983.

ADDRESS: Committee for purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following services to Procurement List 1983, November 18, 1982 (47 FR 52101):

SIC 7349

Janitorial/Custodial Services, Lewisville Lake Park, Lewisville, Texas.

SIC 7369

Commissary Shelf Stocking and Custodial Service, Homestead Air Force Base, Florida.

Deletions

It is proposed to delete the following commodities and a service from Procurement List 1983, November 18, 1982 (47 FR 52101):

Class 7510

Portfolio
7510-00-616-7241
7510-00-551-9813
7510-00-616-7239
7510-00-558-1571
7510-00-995-4857
7510-00-995-4854
7510-00-995-4853
7510-00-995-4850

SIC 7399

Assembly, Food Packet, Isolated Site (8 Menus).

C. W. Fletcher,
Executive Director.

BILLING CODE 6820-33-M

Agency Submission to the Office of Management and Budget for Clearance

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Notice of information collection request; extension.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Committee for Purchase from the Blind and Other Severely Handicapped (Committee) hereby gives notice that it has submitted to the Office of Management and Budget (OMB) an SF-83, "Request for OMB Review" to extend the authority to continue the recordkeeping requirements contained in 41 CFR 51-4.3(c).

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On May 15, 1981, OMB approved an information collection proposal submitted by the Committee and assigned it control number 3037-0005. That authority expires May 31, 1983.

It is proposed to extend the recordkeeping requirements of 41 CFR 51-4.3. The files required by that section are necessary to ensure that workshops participating in the Committee's program employ persons who are blind or other severely handicapped in the production of commodities and the provision of services for at least 75% of the hours of direct labor performed in the workshop in each fiscal year as required by 41 U.S.C. 48b (3) and (4).

C. W. Fletcher,
Executive Director.

[FR Doc. 83-10138 Filed 4-14-83; 8:45 am]
BILLING CODE 6820-33-M

Procurement List 1983; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1983 commodities to be produced by and services to be provided by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: April 15, 1983.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145

SUPPLEMENTARY INFORMATION: On November 12, 1982, December 23, 1982, January 7, 1983 and January 21, 1983, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (47 FR 51180, 47 FR 57324, 48 FR 859 and 48 FR 2816) of proposed additions to Procurement List 1983, November 18, 1982 (47 FR 52101):

After consideration of the relevant matter presented, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities and services listed.

c. The actions will result in authorizing small entities to produce or provide commodities and services procured by the Government.

Accordingly, the following commodities and services are hereby added to Procurement List 1983:

Class 7510

Binder, Looseleaf (Presentation Style)
7510-00-582-5398
7510-00-582-5399
7510-00-582-5400

BILLING CODE 3820-33-M

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

April 7, 1983.

The USAF Scientific Advisory Board ad hoc committee of the Advanced Tactical Fighter (ATF) Technology will meet at Wright-Patterson AFB, OH, on May 19, 1983. The purpose of the meeting will be to review Aeronautical Systems Division's technology efforts for possible application to the ATF. The meeting will convene at 9:00 a.m. and adjorn at 5:00 p.m.

The meeting concerns matters listed in Section 552b (c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 697-4648.

Winnibel F. Holmes,

Air Force Federal Register Liaison Officer

[FR Doc. 83-10037 Filed 4-14-83; 8:45 am]

BILLING CODE 3910-01-M

USAF Scientific Advisory Board; Meeting

April 7, 1983.

The USAF Scientific Advisory Board Aircraft Panel on the Advanced Tactical Fighter (ATF) Technology Study will meet at The Pentagon, Washington, DC, on May 13, 1983. The purpose of the meeting will be to review related NASA technology efforts for possible application to the ATF. The meeting will convene at 9:00 a.m. and adjourn at 5:00 p.m.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 697-4648.

Winnibel F. Holmes,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

USAF Scientific Advisory Board; Meeting

April 7, 1983.

The USAF Scientific Advisory Board ad hoc committee on Software will meet at Headquarters Space Division, Los Angeles, CA, on May 12-13, 1983. The purpose of the meeting will be to review industry approaches to some of the identified USAF software problems and to review Logistics Command practices in supporting operational system software. The meeting will convene at 8:30 a.m. and adjourn at 4:30 p.m. each day.

The meeting will be open to the public; however, any person seeking presentation time on the agenda should submit the topic, academic and/or industrial credentials associated with the topic, and a letter of justification to the Secretariat below.

For further information, contact the Scientific Advisory Board Secretariat at 697-4648.

Winnibel F. Holmes,

Air Force Federal Register Liaison Officer.

Office of the Secretary

Reestablishment of the Board of the Advisors to the Superintendent, Naval Postgraduate School

Under the provisions of Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given that the Board of Advisors to the superintendent, Naval Postgraduate School has been found to be in the public interest in connection with the performance of duties imposed on the Department of Defense by law.

The board provides advice and recommendations concerning curricula, instruction, physical equipment, and adminstration, to the Superintendent, Naval Postgraduate School.

Membership on the committee will be balanced in terms of the functions to be performed by utilizing a cross-section of individuals with expertise in the fields of education, business, and science.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

April 8, 1983.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Proposed Marketing Rate for Hanford Extension Energy, Public Hearings, and Opportunities for Public Review and Comment

AGENCY: Bonneville Power Administration, DOE.

ACTION: Notice of Proposed Continuation of Marketing Rate for Hanford Extension Energy, Public Hearings, and Opportunities for Public Review and Comment.

BPA File Number: HR-83.

SUMMARY: Bonneville Power Administration (BPA) is proposing to continue its present marketing rate for Hanford extension energy through the 1983-1993 contract period. Rates for transmission of Hanford extension energy will be addressed separately. The marketing rate is specified in a May 8, 1974, letter agreement between BPA, the Washington Public Power Supply System (Supply System), and the five investor owned utility (IOU) project participants. The rate is also provided in the "Utility Agreement," Contract No. 79120, which was approved by the Energy Regulatory Administration (ERA) on September 26, 1978. The Utility Agreement will expire on June 30, 1983. BPA is proposing to seek from the Federal Energy Regulatory Commission (FERC) an extension of the marketing rate contained in the Utility Agreement for the period July 1, 1983, through October 31, 1983. A new contract will be implemented for the November 1, 1983, through June 30, 1993, period. The present marketing rate is a cost-based rate based only on the costs of the Hanford Project. The extension will be based on new costs and will result in a higher cost per kilowatthour.

Opportunities will be available for interested persons to review the proposed marketing rate, to participate in hearings, and to submit written comments. These opportunities and procedures will be provided during the hearings for development of BPA's proposed 1983 wholesale power and transmission rates. A detailed discussion and description of these opportunities and procedures was presented in the **Federal Register** on March 28, 1983, in BPA's "Notice of Proposed Wholesale Power Rate Adjustment, Public Hearings, and Opportunities for Public Review and Comment" (48 FR 12777). During the development of the final marketing rate proposal, BPA will evaluate all written and oral comments received during this process.

DATE: Persons wishing to become a formal "party" to the proceedings must notify BPA in writing of their intention to do so by April 22, 1983. Parties to BPA's 1983 wholesale power and transmission rate hearings (as admitted by the Hearing Officer at the April 11, 1983, prehearing conference) need not file an additional petition to intervene.

ADDRESSES: Petitions ot intervene should be addressed to Honorable Seymour Wenner, Hearing Officer, P.O. Box 12999, Portland, Oregon 97212. Hearing dates for the formal hearing process are available from the Public Involvement Office at the address below.

FOR FURTHER INFORMATION CONTACT: Kathleen S. Johnson, Public Involvement Office, P.O. Box 12999, Portland, Oregon, 503-230-3478. Oregon callers may use the toll-free number 800-452-8429; callers in California, Idaho, Montana, Nevada, Utah, Wyoming, and Washington may use 800-547-6048.

I. Procedures Governing Rate Adjustments and Public Participation

A description of BPA's Procedures Governing Rate Adjustments and Public Participation was presented in the **Federal Register** on March 28, 1983, in BPA's "Notice of Proposed Wholesale Power Rate Adjustment, Public Hearings, and Opportunities for Public Review and Comment" (48 FR 12777).

II. Proposed Marketing Rate for Hanford Extension Energy

The proposed marketing rate for Hanford extension energy is specified in the May 8, 1974, letter agreement between BPA, the Supply System, and the five IOU project participants. The manner in which the rate is to be implemented is set forth in two contracts. The 1983-1993 Continued Operation Agreement, executed by BPA and the Supply System on July 9, 1982, addresses the process by which the Supply System is reimbursed by BPA for the investor owned utility portion of the Hanford Generating Project costs. The proposed marketing agreement specifies the procedures by which BPA recovers these costs from the participating IOU's The language of both contracts is consistent with the May 8, 1974, letter agreement.

Under the terms of the May 8, 1974, letter agreement, each IOU participant agreed to pay one-tenth of the costs of producing energy from the Hanford Generating Project (HGP) in return for one-tenth of the project output. Paragraph one of the agreement reads as follows: "Each company shall have the option to purchase up to one-tenth of the net energy output available due to continued operation of the Hanford Project after October 31, 1977. As payment for such energy the company shall pay one-tenth of the Supply System's annual budget for the project during the period of operation less one-tenth of the amounts specified in section 11(b) of the Exchange Agreement for the related periods ending June 30, 1980, and less one-tenth of any debt service on the Hanford Project for each contract year thereafter. The amounts to be paid for lesser amounts of energy would be ratably reduced. The company may assign all or a portion of its share to the remaining companies subject to the same terms and conditions."

The costs described in the May 8, 1974, letter agreement are determined by the Supply System. The IOU participants are to put an amount of

money into the BPA Trust Fund equal to their share of the net sum of: (1) The Supply System's estimated steam expense for the month as specified in the Hanford Steam Energy Agreement and as designated in the Supply System's monthly invoice, (2) one-twelfth of the Supply System's total annual operating expenses as included in the HGP Operating Budget, and (3) the Supply System's net adjustment between actual steam expenses and payments for steam made from the Trust Deposit in the prior month of the Operating Year. (No net adjustment would be made in the first month of the Operating Year.)

BPA will prepare an appropriate National Environmental Policy Act (NEPA) environmental review under the NEPA guidelines before implementation of the proposal.

Additional information regarding the Hanford Generating Project was presented in the *Federal Register* on February 10, 1983, in BPA's "Notice of Intent to Revise Hanford Extension Energy Rate to Become Effective November 1, 1983, Request for Recommendations and Suggestions" (48 FR 7001).

Issued in Portland, Oregon, April 8, 1983.

George A. Tupper,

Acting Administrator.

[FR Doc. 83-10081 Filed 4-14-83; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[Case Nos. 94OV00195, 93OT00281]

Petrolane-Lomita Gasoline Co. and Petrolane Inc.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces that it has adopted a Consent Order with Petrolane-Lomita Gasoline Company and Petrolane Incorporated as a final order of the Department.

EFFECTIVE DATE: March 29, 1983.

FOR FURTHER INFORMATION CONTACT: Herbert F. Buchanan, Deputy Director, Houston Office, Economic Regulatory Administration, One Allen Center, 500 Dallas Avenue, Suite 660, Houston, Texas 77002. (713) 229-3700.

SUPPLEMENTARY INFORMATION: On February 1, 1983, Vol. 48 FR page 4525, the ERA published a notice in the **Federal Register** that it had executed a proposed Consent Order with Petrolane-Limita Gasoline Company and its parent, Petrolane Incorporated (Petrolane/Petrolane-Lomita) which would not become effective sooner than 30 days after publication of the notice. Pursuant to 10 CFR 205.199J(c), interested persons were invited to submit comments concerning the terms and conditions of the proposed Consent Order.

The Consent Order resolves Petrolane/Petrolane-Lomita's potential civil liability arising out of the mandatory Petroleum Allocation and Price Regulations in connection with the firm's transactions involving natural gas liquids, natural gas liquid products, propane, butane, and natural gasoline during the period of federal price controls. The Consent Order requires Petrolane/Petrolane-Lomita to remit $3,000,000.00 to DOE, which includes interest accrued through the effective date of the Consent Order, to be paid in eight quarterly installments commencing 60 days after the effective date of the Consent Order. The Consent Order also requires Petrolane/Petrolane-Lomita to pay $60,000 in compromise of civil penalties relating to the matters covered by the Consent Order, within 30 days of the effective date of the Consent Order.

Two comments were received. These comments did not contest the validity of the proposed Consent Order, but addressed the question of the ultimate disposition of the funds to be paid by Petrolane/Petrolane-Lomita. These comments, both from states, proposed that the funds be distributed to the states for transportation improvement projects, energy conservation, energy research and development or other energy-related projects.

Since the comments addressed only the disposition of the funds, the ERA has decided to make the proposed Consent Order final without modification. The ultimate disposition of the funds will depend on several factors, such as the type of alleged violations underlying the Consent Order and the ability of ERA to identify the person who ultimately bore the burden of the alleged violations. The commenters' suggestions regarding the distribution of the funds will be considered in determining the appropriate ultimate disposition.

The proposed Consent Order with Petrolane-Lomita Gasoline Company and petrolane Incorporated, therefore, was made final and effective on March 29, 1983.

Issued in Dallas, Texas, on the 29th day of March 1983.

Herbert F. Buchanan,

Deputy Director, Houston Office, Economic Regulatory Administration.

[FR Doc. 83-10080 Filed 4-14-83; 8:45 am]

BILLING CODE 6450-01-M

[Case No. 65OX00304]

Tauber Oil Co.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces that it has adopted a Consent Order with Tauber Oil Company as a final order of the Department.

EFFECTIVE DATE: March 28, 1983.

FOR FURTHER INFORMATION CONTACT: Herbert F. Buchanan, Deputy Director, Houston Office, Economic Regulatory Administration, One Allen Center, 500 Dallas Avenue, Suite 660, Houston, Texas 77002. (713) 229-3700.

SUPPLEMENTARY INFORMATION: On February 1, 1983, Vol. 48 FR page 4526, the ERA published a notice in the **Federal Register** that it had executed a proposed Consent Order with Tauber Oil Company which would not become effective sooner than 30 days after publication of the notice. Pursuant to 10 CFR 205.199J(c), interested persons were invited to submit comments concerning the terms and conditions of the proposed Consent Order.

The Consent Order resolves Tauber Oil Company's potential civil liability arising out of the Mandatory Petroleum Allocation and Price Regulations in connection with the firm's transactions involving crude oil during the period of federal price controls. The Consent Order requires Tauber Oil Company to remit $575,000 to DOE within 15 days of the effective date of the Consent Order and specifies that DOE will determine the ultimate disposition of the funds.

One comment from a state was received. This comment did not contest the validity of the proposed Consent Order, but addressed the question of the ultimate disposition of the funds to be paid by Tauber Oil Company. This commenter, for example, proposed that the funds be distributed to the states for energy conservation, energy research and development or other energy-related projects.

Since this comment addressed only the disposition of the funds, the ERA has decided to make the proposed Consent Order final without modification. The ultimate disposition of the funds will depend on several factors, such as the type of alleged violations underlying the Consent Order and the ability of ERA to identify the persons who ultimately bore the burden of the alleged violations. The commenter's suggestions regarding the distribution of the funds will be considered in determining the appropriate ultimate disposition.

The proposed Consent Order with Tauber Oil Company, therefore, was made final and effective on March 28, 1983.

Issued in Dallas, Texas, on the 28th day of March 1983.

Herbert F. Buchanan,

Deputy Director, Houston Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. ER83-442-000]

Arkansas Power and Light Co.; Filing

April 11, 1983.

The filing Company submits the following:

Take notice that on April 1, 1983, Arkansas Power and Light Company (AP&L) submitted for filing the Sixth Amendment to the Power Coordination, Interchange and Transmission Service Agreement between AP&L and Arkansas Electric Cooperative Corporation (AECC). The Amendment provides for the abandonment of two points of delivery and the increase in maximum capacity of eight points of delivery.

AP&L requests that the Commission waive any requirements with which AP&L has not already complied.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Section 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such petitions or protests should be filed on or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9981 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EL83-14-000]

Connecticut Municipal Electric Energy Cooperative v. Northeast Utilities and its Subsidiaries, the Connecticut Light and Power Company, Northeast Utilities Service Company, and Northeast Nuclear Energy Company; Filing

April 11, 1983.

The filing party submits the following:

Take notice that the Connecticut Municipal Electric Energy Cooperative ("CMEEC"), on March 31, 1983, filed a Complaint against Northeast Utilities ("NU") and its subsidiaries, the Connecticut Light and Power Company ("CL & P"), Northeast Utilities Service Company, and Northeast Nuclear Energy Company. The complaint concerns the terms and conditions and charges for service rendered under the following electric service rate schedules:

Unit Contract—Norwalk Harbor, Units Nos. 1, 2, and 3
Unit Contract—Montville, Units Nos. 5, 6, 10, and 11
Unit Contract—Devon, Units Nos. 7, 8, and 9
Unit Contract—Millstone Point, Units Nos. 1 and 2
Unit Contract—Northfield Mountain, Units Nos. 1, 2, 3, and 4
Unit Contract—Tunnel, Units Nos. 1 and 2
Unit Contract—Bulls Bridge, Units Nos. 1, 2, 3, 4, 5, and 6
Unit Contract—Shepaug, Unit No. 1
Unit Contract—Middletown, Units Nos. 1, 2, 3, 4, and 10

The Complaint includes a request for hearing and expedited consideration. CMEEC submitted a proposed procedural schedule under which hearings in this proceeding would begin on July 6, 1983.

Each of the unit contracts is a cost-of-service arrangement which provides that either party can petition the Commission pursuant to Section 206 of the Federal Power Act to establish just and reasonable terms and conditions. CMEEC request the Commission to adjust the return on common equity and the percentage for A&G expenses allowed under the unit contracts.

In addition to requesting adjustments in the terms of the unit contracts, CMEEC alleges that CL&P has acted in contravention of the contracts on file with the Commission. CMEEC requests the Commission to require CL&P to exclude its investment in the Yankee Atomic units from the common equity portion of its capital structure and to provide information reasonably requested by CMEEC under the contracts.

CMEEC states that the reduction in the rate of return on equity and adjustments to capital structure will reduce annual charges payable by CMEEC under the life-of-unit contracts by approximately $1,678,117 to $1,800,232 based on estimated expenses and revenues for the 12-month period ending December 31, 1983. CMEEC states that the proposed reduction in the percentage allowance for A&G expenses will reduce annual charges payable by CMEEC under the life-of-unit contracts by an estimated $399,335 for the 12-month period ending December 31, 1983.

CMEEC states that a copy of the filing was served on Northeast Utilities and its subsidiaries, which are the only utilities providing service under the nine unit contracts.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 13, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9982 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-436-000]

Consumers Power Co.; Notice of Filing

April 11, 1983.

The filing Company submits the following:

Take notice that Consumers Power Company (Consumers) on March 31, 1983, tendered for filing Consumers' Amendment No. 1 to the Electric Coordination Agreement with Detroit Edison Company (Detroit Edison) dated as of January 5, 1976. This is Consumer's Rate Schedule FPC No. 41.

Consumers states that Amendment No. 1 increases the demand charge for Short Term Capacity from 45¢ to 80¢ per kilowatt per week. The capacity charge

based on hourly deficiencies in Operating Reserve is increased in the same proportion.

Consumer states that the extent and use of short term capacity during the twelve months beginning April 1, 1983 is not possible to predict at this time, since the services will only be scheduled from time to time as load and capacity conditions of the parties dictate.

Consumers requests an effective date of April 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served on Detroit Edison and the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-220-000]

Houston Pipe Line Co.; Notice of Application

April 11, 1983.

Take notice that on March 4, 1983, Houston Pipe Line Company (Applicant), P.O. Box 1188, Houston, Texas 77001, filed in Docket No. CP83-220-000 an application pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 and § 284.127 of the Commission's Regulations for authority to transport natural gas for United Gas Pipe Line Company (United), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is currently engaged in the transportation of natural gas on behalf of United pursuant to a transportation agreement dated June 1, 1979. It is stated that service under the 1979 agreement commenced June 6, 1979, for an intitial term of two years under the self-implementing provisions of § 284.122(a) of the Commission's Regulations and was extended for a period of two years commencing June 6, 1981, pursuant to § 284.125 of the Commission's Regulations. In order that the transportation service might be continued on an uninterrupted bases, Applicant requests Commission authorization pursuant to § 284.127(b) of the Regulations to continue the transportation arrangement for a period of two years commencing June 6, 1983, and ending June 5, 1985.

Applicant proposes to transport up to 30,000 Mcf of gas per day for United. Applicant would transport United's volumes from points located on applicant's pipeline facilities in Nueces and Goliad Counties, Texas, to either or both (i) The interconnection of Applicant's and United's pipeline facilities near Bayside, Refugio County, Texas, and (ii) a point or points located on United's pipeline facilities in Newton, Sabine and San Patricio Counties, Texas. It is stated that service would continue to be conducted under the terms and conditions of an amendment to the 1979 agreement dated February 24, 1983. Applicant states that the other intrastate pipline needed to aid it in effectuating the basic transaction between Applicant and United is Channel Industries Gas Company (Channel).

Applicant states that effective June 6, 1983, United would pay Applicant 6.0 cents per million Btu for the transportation service it performs exclusive of the volumes redelivered to United in Newton, Sabine and San Patricio Counties, Texas. It is further indicated that a portion of the revenues dervied from the 6.0-cent per million Btu rate would be paid by Applicant to Channel.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 29, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-445-000]

Idaho Power Co.; Notice of Filing

April 11, 1983.

The filing Company submits the following:

Take notice that on April 4, 1983, the Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during February, 1983, along with cost justification for the rate charged. This filing includes the following supplements:

Utah Power & Light Company: Supplement 16
Montana Power Company: Supplement 14
Sierra Pacific Power Company: Supplement 14

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-444-000]

Maine Public Service Co. Filing

April 11, 1983.

The filing Company submits the following:

Take notice that on April 1, 1983, Maine Public Service Company ("the Company") tendered for filing an application to revise the method for calculating its Fuel and Purchase Energy Adjustment Clause to permit

Synchronization of fuel and purchased energy revenues and costs on a monthly basis. The Company requests that the new method of calculation be permitted to become effective on June 1, 1983. The Company States that the revised method would result in its collecting approximately $56,000 less revenue if the revised method had been in effect for calendar year 1983.

The affected customers are the Houlton Water Company, the Van Buren Light and Water District and the Maine Electric Cooperative, Inc., which the Company states have agreed to the revised method.

The Company states that copies of its filing have been served on the affected wholesale customers and the Maine Public Utilities Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-243-000]

Michigan Consolidated Gas Co.; Application and Petition

April 11, 1983.

Take notice that on March 18, 1983, Michigan Consolidated Gas Company (Michigan Consolidated), 500 Griswold Street, Detroit, Michigan 48226, filed in Docket No. CP83-243-000, a petition pursuant to § 385.207 of the Commission's Rules of Practice and Procedure (18 CFR 385.207) for an order declaring that Commission authorization is unnecessary to engage in certain transactions, or, in the alternative, an application pursuant to Section 7(c) of the Natural Gas Act (NGA) for a restricted limited-term certificate of public convenience and necessity authorizing Michigan Consolidated to engage in transactions incident to the direct sale of surplus natural gas supplies to Indiana Glass Company (Indiana Glass), all as more fully set forth in the application on file with the Commission and open to public inspection.

The application indicates that pursuant to an agreement dated February 24, 1983, Michigan Consolidated has agreed to sell to Indiana Glass up to 4,000 dt equivalent of natural gas per day and 1,500,000 dt equivalent of natural gas per year, subject to interruption to the extent the gas supplies are required by Michigan Consolidated to provide adequate service to its distribution customers. It is stated that the term of the agreement is for an initial period of two years commencing from the date of first deliveries and is automatically extendable for successive two-year periods unless cancelled by either party by notification within 30 days of the end of the current two-year term. The proposed rate to be charged by Michigan Consolidated would be the sum of : (1) The gas-cost component of the commodity rate of Michigan Wisconsin Pipe Line Company's (Mich Wisc) Rate Schedule MC-1 under which Michigan Consolidated purchases gas from Misc Wisc, (2) the gas-cost component of the commodity portion of any applicable purchased gas adjustment charges by Mich Wisc for such rate, plus (3) five cents. Michigan Consolidated states that this rate represents its incremental cost of gas plus Mich Wisc's charge for transportation, plus three cents, and that this total rate is currently $3.45 per dt equivalent. Mich Wisc proposes in Docket No. CP83-212-000 to transport the above sales volumes, by displacement, from its existing point of interconnection with Michigan Consolidated at Willow Run Station in Ypsilanti Township, Washtenaw County, Michigan, to its existing point of interconnection with Indiana Gas Company (Indiana Gas) near the City of Muncie in Delaware County, Indiana, for subsequent redelivery by Indiana Gas to Indiana Glass.

Michigan Consolidated indicates that the gas sold to Indiana Glass is a less expensive source of supply than Indiana Glass' traditional supplier, Indiana Gas, and that the proposed sale would result in annual fuel cost savings for Indiana Glass of approximately $1,200,000 and would likely prevent permanent extensive lay-offs of employees. Michigan Consolidated further states that upon authorization of the requested service, Indiana Glass would be able to recall approximately 425 employees currently laid off.

In its application, Michigan Consolidated petitions the Commission to issue a declaratory order stating that no Commission authorization is necessary to engage in the proposed transactions since: (1) The contemplated sale of gas to Indiana Glass is a direct sale to an end-user and not a sale for resale and is exempt from Commission jurisdiction under Section 1(b) of the NGA, and (2) the transportation of natural gas in interstate commerce necessary for this sale will be accomplished solely by Mich Wisc and Michigan Consolidated will, therefore, not transport the gas in interstate commerce. Michigan Consolidated requests that the declaratory order specifically state that Michigan Consolidated requires no Commission authorization to undertake the proposed transactions and that none of Michigan Consolidated's facilities are or will be subject to the Commission's jurisdiction by virtue of engaging in these transactions.

Michigan Consolidated avers that if the Commission should determine that it is necessary for Michigan Consolidated to obtain authorization under Section 7(c) of the NGA, it is in the present and future public convenience and necessity for such authorization to be granted for a limited term, with pregranted abandonment authorization upon the termination of the underlying sales agreement by either party and be expressly conditioned so as not to effect any change in the non-jurisdictional status of any sales, operations, or facilities of Michigan Consolidated other than those which are the subject of such limited authorization. Michigan Consolidated submits that the Commission should state in any order granting such authorization that acceptance of the certificate will not impair the continued validity of the exclusion from the Commission's jurisdiction previously granted to Michigan Consolidated pursuant to Section 1(c) of the NGA except to the extent necessary to enforce the terms and conditions of such certificate. Michigan Consolidated further requests that any such order expressly waive any and all accounting and reporting requirements except those expressly applicable to the authorized transaction.

Any person desiring to be heard or to make any protest with reference to said petition and application should on or before April 29, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and

Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the NGA and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Michigan Consolidated to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-441-000]

New England Power Co.; Notice of Filing

April 11, 1983.

The filing Company submits the following:

Take notice that on April 1, 1983, the New England Power Company (NEP) tendered for filing a Power Contract between NEP and Boston Edison Company that provides for the sale of a 100,000 kilowatt entitlement in NEP's Bear Swamp Project.

NEP requests an effective date of February 7, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D. C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-446-000]

Niagara Mohawk Power Corp.; Notice of Filing

April 11, 1983.

The filing Company submits the following:

Take notice that Niagara Mohawk Power Corporation (Niagara), on April 4, 1983, tendered for filing as a supplement to an existing rate schedule, an agreement between Niagara, The Connecticut Light and Power Company (CL&P) and Western Massachusetts Electric Company (WMECO) dated July 19, 1982.

Niagara presently had on file an agreement with CL&P and WMECO dated January 19, 1981, and amended July 28, 1982. This agreement is designated as Niagara Mohawk Power Corporation Rate Schedule F.E.R.C. No. 115. This new agreement is being transmitted as a supplement to the existing agreement.

Niagara states that this supplement revises the transmission rate as provided for in terms of the original agreement.

Niagara requests an effective date of September 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served upon the Connecticut Light and Power Company, Western Massachusetts Electric Company and the Public Service Commission of the State of New York.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-218-000]

Northern Natural Gas Company, Division of InterNorth, Inc.; Notice of Application

April 11, 1983.

Take notice that on March 4, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-218-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of 137,500 Mcf of natural gas per day on behalf of Natural Gas Pipeline Company of America (Natural), Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), Transcontinental Gas Pipe Line Corporation (Transco), and Michigan Wisconsin Pipe Line Company (Mich-Wis) and the construction and operation of facilities necessary therefor, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that the shippers would purchase synthetic gas produced at the Great Plains Coal Gasification Plant near Beulah, North Dakota, now scheduled to begin service on or about November 1, 1984. It is stated that the synthetic gas volumes would be delivered from the plant to Northern Border Pipline Company (Northern Border) in North Dakota. Northern Border, it is asserted, would transport the synthetic volumes commingled with natural gas and redeliver equivalent volumes to Applicant at an existing interconnection at Ventura, Iowa.

Applicant further states that it would transport and deliver these volumes to the shippers at the rates, quantities and destinations shown below:

Volumes transported for the account of	Delivery point (existing)	Individual contract quantity (Mcf per day)	Monthly demand charge	Overrun commodity rate (per Mcf) (cents)
Natural	Glenwood, Iowa	27,500	74,070	8.86
Tennessee	Janesville, Wisconsin	41,250	548,869	43.61
Transco	Janesville, Wisconsin	34,375	455,725	43.61
Mich-Wis	Janesville, Wisconsin	34,375	455,725	43.61

Applicant states that it would transport these volumes on a firm basis and additional unspecified volumes on a best-efforts basis under the terms contained in the contracts for a 25-year term.

Applicant proposes to construct and operate approximately 59.3 miles of 26-inch outside diameter loopline, 11,500 horsepower of compression facilities and appurtenant facilities in Wisconsin, Illinois and Iowa at an estimated cost of $68,400,000. Applicant asserts that it would finance the proposed construction with general corporate funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 29, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-447-000]

Puget Sound Power & Light Co.; Notice of Filing

April 11, 1983.

The filing Company submits the following:

Take notice that Puget Sound Power & Light Company (Puget) on April 4, 1983, tendered for filing, as an initial rate schedule, an Agreement dated November 22, 1982, between Puget and the City of Seattle, City Light Department (Seattle).

Puget states that the agreement requires Puget to make available to Seattle 50 megawatts of capacity during the months of December 1982 and January, February 1983. Seattle is required to pay Puget $1.50 for each kilowatt-month of capacity made available and an additional $1.50 for each kilowatt of the maximum demand that Seattle either needs or schedules. The Agreement generally provides for the return of all energy associated with capacity scheduled by Seattle. If the energy is supplied from Puget's gas or oil-fixed generating resources or power purchases, Puget may elect to sell such energy to Seattle at the actual incremental cost of generating or purchasing such energy.

Puget requests an effective date of December 1, 1982, and therefore requests waiver of the Commission's notice requirements.

A copy of the filing was served upon Seattle.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP82-261-004]

Trunkline Gas Co.; Change in Tariff

April 11, 1983.

Take notice that Trunkline Gas Co. (Trunkline) on March 25, 1983, tendered for filing Third Revised Sheet No. 3341 to its FERC Gas Tariff, Original Volume No. 2.

Trunkline states that such change is made to reflect an increased charge that it incurs in the performance of a transportation service for Panhandle Eastern Pipe Line Company (Panhandle) pursuant to its Rate Schedule T-31. Trunkline utilizes a portion of its capacity in the system of Tennessee Gas Pipeline Company (Tennessee) to perform this service for Panhandle. On January 21, 1983, in Docket No. RP82-125, Tennessee filed revised rates, pursuant to the Commission's order of August 27, 1982, to be effective February 1, 1983. Trunkline requests an effective date of February 1, 1983.

A copy of this filing has been served on Panhandle.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP82-262-003]

Trunkline Gas Co.; Change in Tariff

April 11, 1983.

Take notice that Trunkline Gas Company (Trunkline) on March 25, 1983, tendered for filing No. 3295 to its FERC Gas Tariff, Original Volume No. 2.

Trunkline states that such change is made to reflect an increased charge that it incurs in the performance of a transportation service for Panhandle Eastern Pipe Line Company (Panhandle) pursuant to its Rate Schedule T-76. Trunkline utilizes a portion of its capacity in the system of Tennessee Gas Pipeline Company (Tennessee) to perform this service for Panhandle. On January 21, 1983, in Docket No. RP82-125, Tennessee filed revised rates, pursuant to the Commission's order of August 27, 1982, to be effective February 1, 1983. Trunkline requests an effective date of February 1, 1983.

A copy of this filing has been served on Panhandle.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure. BILLING CODE 6717-01-M

[Docket No. CP83-241-000]

United Gas Pipe Line Co.; Notice of Application

April 11, 1983.

Take notice that on March 18, 1983, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP83-241-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon the Crockett compressor station which is located in Houston County, Texas, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Applicant states that the Crockett compressor station consists of one 150 horsepower reciprocating compressor installed in 1957 and one 165 horsepower reciprocating compressor installed in 1959. It is asserted that the compressor facilities at the Crockett station were originally installed to compress gas south to Huntsville, Texas, and accommodate peak day demand. Applicant states that in recent years the demand for gas in the Huntsville area has diminished to the extent that the aforementioned compression facilities are no longer needed on this portion of Applicant's system. Furthermore, Applicant states that it does not foresee any condidtion warranting a future use of the facilities in this area. Therefore, Applicant proposes the abandonment of such facilities. Applicant states that the proposed abandonment would have no impact on Applicant's existing customers and would not adversely affect its system.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 29, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

United Gas Pipe Line Co.; Notice of Application

April 11, 1983.

Take notice that on March 17, 1983, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP 83-237-000 an application pursuant to Section 7(b) of the Natural Gas Act, for permission and approval to abandon the Florenville compressor station located in St. Tammany Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that the Florenville compressor station consists of two 7,500 horsepower compressors located on its Southeast-to-Mobile pipeline in St. Tammany Parish, Louisiana. Applicant submits that the Florenville station has not been required for daily operations in recent years due to decline of demand in the area. Applicant states that it does not foresee any need for the Florenville station in the future and states that the abandonment of the station would cause no change in the gas flow of Applicant's system and the proposed abandonment would have no impact on its customers since this station is not now used.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 29, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believe that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9999 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-443-000]

Washington Water Power Co.; Notice of Filing

April 11, 1983.

The filing Company submits the following:

Take notice that on April 1, 1983, the Washington Water Power Company (Washington) tendered for filing a copy of the service schedule applicable to what Washington refers to as a "Letter Agreement" dated January 25, 1983, between Washington and the Western Area Power Administration (WAPA) which applies to the sale of energy which is surplus from Washington's portion of the Centralia coal-fired steam plant and other resources or firm purchases which Washington is willing to make available to WAPA.

Washington requests an effective date of December 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Any person disiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9997 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-439-000]

Connecticut Light & Power Co.; Notice of Filing

April 12, 1983.

The filing Company submits the following:

Take notice that on April 1, 1983, the Connecticut Light and Power Company (CL&P) tendered for filing a proposed rate schedule with respect to a Transmission Agreement dated November 1, 1982 between (1) CL&P, Western Massachusetts Electric Company (WMECO) and Holyoke Water Power Company (HWP, and together with CL&P and WMECO, the NU Companies) and (2) City of Holyoke, Massachusetts Gas and Electric Department (HG&E).

CL&P states that the Transmission Agreement provides for transmission services to HG&E for the wheeling of their purchase from the Massachusetts Municipal Wholesale Electric Company (MMWEC) of a portion of MMWEC's entitlement obtained from Salem Harbor Units No. 1, 2 and 3 during the period from November 1, 1982 to April 30, 1983.

CL&P further states that the transmission charge rate is a monthly rate equal to one-twelfth of the estimated annual average cost of transmission service on the electric transmission system of the NU Companies determined in accordance with Appendix A and Exhibits I, II and III thereto, of the Transmission Agreement. The monthly transmission charge is determined by the product of (i) the transmission charge rate ($/kW-month), and (ii) the number of kilowatts HG&E is entitled to receive during such month. The monthly transmission charge is reduced by up to 50% to give due recognition for payments made by HG&E to other utility systems also providing transmission service.

CL&P requests an effective date of November 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been served upon WMECO, HWP, and HG&E.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to

the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10115 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-242-000

El Paso Natural Gas Co.; Notice of Application

April 12, 1983.

Take notice that on March 18, 1983, El Paso Natural Gas Company (Applicant), P. O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP83-242-000 an application pursuant to Section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing delivery of relinquished volumes of Docket No. RP76-38 Refund Gas to Southern California Gas Company (SoCal) for the Department of Water and Power, City of Los Angeles' (DWP) account at existing points of interconnection between the pipeline systems of Applicant and SoCal in Mohave and Yuma Counties, Arizona, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that by order issued March 26, 1981, in Docket No. RP72-6, *et al.*, the Commission approved the stipulation and agreement submitted by Applicant on December 29, 1980. The stipulation and agreement, it is asserted, embodied a comprehensive negotiated settlement of numerous interrelated Commission proceedings and court cases including the complaint proceeding then pending before the Commission in *Arizona Electric Power Cooperative, Inc., and the City of Willcox, Arizona* v. *El Paso Natural Gas Co.*, Docket No. RP76-38. The specific terms and conditions upon which the complaint proceeding at Docket No. RP76-38 was settled are set forth as ARTICLE XI of the stipulation and agreement, it is explained, and, it is further explained that basically ARTICLE XI establishes the entitlement of each of certain named persons (Recipients) to a certain volume of Refund Gas. It is stated that each Recipient is given the discretion either to itself receive Refund Gas volumes to which it is entitled or, alternatively, in accordance with Section 11.9 of ARTICLE XI to relinquish the right to receive such volumes to Applicant. Under Section 11.9, Applicant asserts that it offers on a direct sale basis to those persons named in subsection 11.9(b) (Direct Purchasers of Relinquished Volumes) at a price established in accordance with subsection 11.9(d) such volumes of "relinquished" Refund Gas as are available through the elections made by the individual Recipients. Applicant states that it then rebates the net proceeds of any such sale to those Recipients which elected to relinquish.

The application states further that on April 28, 1982, Applicant filed its Submittal of Proposed Amendment II of Stipulation and Agreement in Docket No. RP72-6-035 wherein Applicant requested approval of a modification of subsection 11.9(b) of ARTICLE XI to remove, in effect, the prohibition from proposing arrangements for the direct sale by Applicant of relinquished volumes of Refund Gas to persons which were not among the limited group of Direct Purchasers of Relinquished Volumes identified in that subsection. Under the modified subsection 11.9(b), Applicant states that it is required to interrupt any such sale on any day when it is itself purchasing "best efforts" gas (other than in a "first sale" within the meaning of the Natural Gas Policy Act of 1978 on an "emergency" or other short-term basis and it is not otherwise able to satisfy fully the requirements of its existing customers, including SoCal, and of those Direct Purchasers of Relinquished Volumes which are specifically named in said subsection). It is stated that the Commission issued an order approving this amendment of the stipulation and agreement on August 31, 1982. Accordingly, Applicant states that it is seeking authorization to deliver relinquished volumes of Docket No. RP76-38 Refund Gas to SoCal for DWP's account at existing points of interconnection between the pipeline systems of Applicant and SoCal in Mohave and Yuma Counties, Arizona, to permit the direct sale of such gas by Applicant to DWP.

Applicant further states that DWP's electric facilities, which are comprised of four electric generating power plants, generate electricity for use in the City of Los Angeles and its environs. It also states that these plants are presently capable of burning fuel oil and natural gas; however, with the exception of minimal purchases in November 1982 and March 1983 DWP has not purchased any quantities of natural gas from SoCal since May 1982. This situation according to Applicant has resulted primarily because DWP has been able to operate at a lower cost by burning low sulfur fuel oil in lieu of natural gas purchased from SoCal. Applicant states that it has available for direct sale certain quantities of relinquished Refund Gas at a price that is below the price DWP is currently paying for low sulfur fuel oil. Moreover, it is asserted that DWP is desirous of purchasing such quantities from Applicant and Applicant is desirous of selling, on a direct sale basis, quantities of relinquished Refund Gas for use as fuel in the operation of DWP's electric generating power plants. It is submitted that in order to effectuate the direct sale arrangement, Applicant and DWP have entered into a gas sales agreement dated March 17, 1983, which governs the direct sale of relinquished Refund Gas for DWP's requirements at its power plants.

Pursuant to the terms and conditions of the agreement, Applicant asserts that it would cause to be delivered to SoCal for DWP's account such relinquished volumes of Docket No. RP76-38 Refund Gas, if any, as Applicant would from time to time determine to be available to DWP in accordance with paragraph 1.2 of Article I ARTICLE I of the agreement. It is stated that the agreement provides that the availability of relinquished Refund Gas to DWP is subject to the conditions established in the modified subsection 11.9(b) of Applicant's stipulation and agreement and is subject, further, to the availability of capacity in Applicant's pipeline system to deliver such gas to SoCal for DWP's account. It is stated that said quantities of relinquished Refund Gas would be delivered by Applicant to SoCal, for DWP's account, at existing points of interconnection between the pipeline systems in Mohave and Yuma Counties, Arizona, at delivery pressures not to exceed 615 psig and 600 psig, respectively. It is explained that SoCal would concurrently transport and deliver such quantities to DWP's power plant through utilization of its existing intrastate system facilities. It is stated that the rate be paid by DWP for the quantities of natural gas delivered by Applicant in any month is the price per Mcf which Applicant has established as the value "X" in accordance with subsection 11.9(d) of ARTICLE XI of the stipulation and agreement.[1] The term of the subject Agreement would become effective upon the date of the Agreement and performance would commence on the date of initial delivery subject to certain conditions contained in the Agreement and would continue thereafter in full force and effect for a primary term of twelve months and from

[1] Such rate for the month of March 1983 has been determined to be $4.52 per Mcf, which equates to $4.30 per million Btu.

month to month thereafter, it is explained.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10116 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-246-000]

El Paso Natural Gas Co. and Tenneco Oil Co.; Notice of Application

April 12, 1983.

Take notice that on March 21, 1983, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, and Tenneco Oil Company (Tenneco), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP83-246-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas, all as more fully set forth in the application which is on file with the Commission and open public inspection.

Applicants state that El Paso as part of its gas acquisition program has contracted for the right to purchase up to 30,000,000 Mcf of Tenneco's uncommitted interest in the reserves underlying Block 60, South Marsh Island area, offshore Louisiana, and for 100 percent of the interest of C&K Petroleum Inc., *et al.*, in reserves underlying Block 237, East Cameron area, offshore Louisiana. It is further stated that Tenneco in its ongoing oil and gas production efforts has acquired ownership or control over certain natural gas reserves located in San Juan and Rio Arriba Counties, New Mexico. Applicants assert that the gas supplies attributable to El Paso's interest in the natural gas reserves underlying Blocks 60 and 237 are not located in close proximity to El Paso's existing interstate pipeline system and that the natural gas supplies owned or otherwise controlled by Tenneco in San Juan and Rio Arriba Counties are not located near the interstate pipeline system of Tenneco's affiliate.

Accordingly, it is stated, El Paso and Tenneco have entered into a November 24, 1980, gas exchange agreement whereby said supplies of natural gas can be made available in El Paso's case to augment its general system supply and in Tenneco's case for use in certain plant and refinery operations and for direct sale.

Applicants state that pursuant to the terms and conditions of the exchange agreement, El Paso has agreed to receive for the account of Tenneco for a period continuing until July 1, 1990, up to 25,000 Mcf of natural gas per day or such lesser quantity as Tenneco may cause to be tendered to El Paso. It is stated that in exchange therefor El Paso has agreed to cause concurrently to be delivered to Tenneco and Tenneco has agreed to receive from El Paso an equivalent quantity of natural gas on a gas-for-gas basis, after giving effect to a 10 percent reduction for fuel, shrinkage and other losses, at two existing delivery points located in Terrebone Parish, Louisiana, and Waller County, Texas (Cocodrie and Katy delivery points). Applicants state that El Paso would deliver the natural gas for exchange primarily at the Cocodrie delivery point with use of the Katy delivery point limited to only that portion of the total quantity of natural gas to be exchanged that cannot otherwise be accommodated for any reason at the Cocodrie delivery point.

Applicants state that they do not anticipate that Tenneco would have quantities of natural gas available to it in excess of those quantities expected to be available to El Paso for exchange, but if such a situation should arise, El Paso and Tenneco would promptly meet to determine the method by which such imbalance would be eliminated. It is stated that to the extent El Paso would have available at the Cocodrie and Katy delivery points a quantity of natural gas in excess of the quantity Tenneco has tendered for exchange such excess natural gas would be made available to El Paso's interstate pipeline system pursuant to existing and/or future arrangements with third parties.

Applicants assert that no new or additional facilities are required to be constructed or operated by Tenneco in order to effectuate the receipt of gas by El Paso. It is stated that El Paso has existing transportation agreements with Tennessee Gas Pipeline Company, a Division of Tenneco Inc., Houston Pipe Line Company and Oasis Pipe Line Company that provide for the transportation of El Paso's gas from Blocks 60 and 237 to onshore delivery points.

Applicants state that the exchange agreement provides for Tenneco to compensate El Paso as required by payment of the rate in effect and reflected from time to time as the Production Area Charge as set forth in El Paso's FERC Gas Tariff, Third Revised Volume No. 2, or superseding tariff. In addition, it is asserted that the exchange agreement provides that Tenneco would compensate El Paso as required in the amount of 3.49 cents per Mcf for any processing performed by El Paso on Tenneco's behalf. It is stated that the charges would apply to the quantity of gas remaining after giving effect to a 10 percent reduction in gas for fuel, shrinkage and other losses.

Applicants further request authorization to permit the exchange of natural gas from additional receipt and/or delivery points as may be mutually agreed to from time to time when additional natural gas supplies become available to either El Paso or Tenneco so long as the quantities of natural gas exchanged under the arrangement do not exceed the aggregate total of 25,000 Mcf daily. Moreover, Applicants request blanket authorization for the deletion by mutual consent of receipt and/or delivery points from the exchange arrangement. Further, Applicants state that in the event that additional facilities are required to be installed by El Paso, El Paso would install the new facilities under its blanket certificate authorization in Docket No. CP82-435-000.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10117 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-233-000]

Kansas-Nebraska Natural Gas Co., Inc.; Application

April 12, 1983.

Take notice than on March 16, 1983, Kansas-Nebraska Natural Gas Company, Inc. (K-N), P.O. Box 15265, Lakewood, Colorado 80215, filed in Docket No. CP83-233-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued exchange of natural gas with Panhandle Eastern Pipe Line Company (Panhandle) pursuant to the terms of an amended gas exchange agreement providing for an additional delivery point from K-N to Panhandle, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that K-N and Panhandle entered into a March 27, 1970, gas exchange agreement, as amended December 31, 1974, which provides for Panhandle to deliver volumes of K-N's gas from Texas to K-N at a point near Douglas, Wyoming, and for K-N to deliver volumes of Panhandle's gas from Wyoming to Panhandle at a point near Panhandle's Aledo Plant in Oklahoma. Further, it is stated that this exchange also provides for Panhandle to sell certain volumes of its gas to K-N. This exchange agreement, as amended, is on file with the Commission as Rate Schedule TSTE-1 of Panhandle's FERC Gas Tariff and as Rate Schedule T-1 of K-N's FERC Gas Tariff, it is averred.

K-N proposes herein to add a second delivery point to Panhandle near Baker, Oklahoma, pursuant to the terms of a February 7, 1983, amendment to the exchange agreement. The Baker delivery point is required to assure maintenance of adequate service to K-N's customers served by the Douglas delivery point, it is asserted. K-N does not have sufficient volumes of gas available for delivery to Panhandle at the Aledo delivery point and, as a result, a large exchange imbalance has developed, it is averred. It is further stated that the addition of the Baker delivery point would enable K-N to alleviate the exchange imbalance and deliver the necessary gas volumes to Panhandle to help offset those being received from Panhandle at the Douglas delivery point. No new facilities are required by K-N to use the proposed new delivery point, it is asserted.

Any person desiring to be heard or to make any protest with reference to said application should on or before

May 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for K-N to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL83-16-000]

Louisiana Power & Light Co.; Notice of Filing

April 12, 1983.

Take notice that on March 29, 1983, Louisiana Power & Light Company (LP&L) filed a document which, in effect, seeks declaratory relief from the Commission regarding LP&L's proposed method of refunding to its firm wholesale customers monies received as a result of a settlement between LP&L and Texaco, Inc., a supplier of natural gas to LP&L.

LP&L proposes that the customers receiving firm wholesale service from LP&L during the period covered by the refunds (1977-1982) will receive refunds calculated in the identical manner prescribed for retail customers by a Louisiana Public Service Commission order of March 21, 1983. The affected wholesale customers are Cajun Electric Power Cooperative, and the Towns of Winnfield, Vidalia, Jonesville, and Minden.

LP&L requests Commission approval of the proposed method of making refunds.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with rules 211

and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before April 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10119 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-252-000]

Natural Gas Pipeline Co. of America; Notice of Application

April 12, 1983.

Take notice that on March 28, 1983, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP83-252-000 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon certain pipeline storage facilities located in Kankakee County, Illinois, and for a certificate of public convenience and necessity authorizing the construction and operation of replacement facilities for the pipeline to be abandoned and in part as a new pipeline system situated within the Herscher Mt. Simon storage field, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

It is stated that in late 1982 Applicant hydrostatically tested its Herscher Mt. Simon storage system. Applicant states that a total of 16 test failures resulted throughout the system. It is asserted that internal inspection of one segment of pipe revealed corrosion damage which Applicant asserts can reasonably be expected to exist as well in other sections of the system. As a result of this testing, Applicant believes that a significant problem exists that should be remedied as soon as possible.

Applicant proposes to remove or retire in place approximately 14.5 miles of 4.5-inch through 24-inch pipeline. applicant states it would construct 12.3 miles of 4.5-inch through 24-inch pipeline sized to meet the peak withdrawal volumes from individual wells. It is stated that the new pipeline system of internally coated pipe would include facilities for pigging and corrosion inhibitor injection as well as permitting the introduction of internal inspection tools to check for corrosion. Applicant estimates that the cost of retirement and construction of new jurisdictional facilities will be $6,854,000 which cost would initially be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10120 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-236-000]

Panhandle Eastern Pipe Line Co.; Notice of Application

April 12, 1983.

Take notice that on March 17, 1983, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP83-236-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities required to make direct sales of natural gas for irrigation purposes to three right-of-way grantors, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the construction and operation of taps to make direct sales of natural gas to Clifford L. Jackson, Hansford County, Texas, Donald B. Hart, Hansford County, Texas, and Everett J. Starkey, Conservatorship, Pratt County, Kansas.

Applicant estimates that the cost of the proposed facilities would be $15,900 which would be financed from cash on hand.

Applicant has further stated it does not propose to increase its authorized level of sales by this proposal.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 29426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10121 Filed 4-14-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-247-000]

Valero Interstate Transmission Co.; Notice of Application

April 12, 1983.

Take notice that on March 22, 1983, Valero Interstate Transmission Company (Applicant), P.O. Box 1569, San Antonio, Texas 78296, filed in Docket No. CP83-247-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon approximately 61 miles of transmission pipeline in Brooks, Hidalgo, Jim Hogg, and Starr Counties, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the abandonment of 47.1 miles of 18-inch pipeline and 14 miles of 14-inch pipeline because it is more economical to abandon the line and transport the small amount of gas currently flowing through the line pursuant to a transportation arrangement with Valero Transmission Company (VTC) than it is to maintain the line as a jurisdictional facility. Applicant states that it would sell the line to VTC.

Applicant states that there would be no diminution of service because service to Applicant's customers before and after abandonment would be equivalent.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Objection to Proposed Remedial Orders Filed; Week of February 14 Through February 18, 1983

During the week of February 14 through February 18, 1983, the notices of objection to proposed remedial orders listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial orders described in the Appendix to this Notice must file a request to participate pursuant to 10 C.F.R. 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in these proceedings should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

George B. Breznay,

Director, Office of Hearings and Appeals.

April 7, 1983.

Dane Energy Company Houston, Texas; Petroleum Products HRO-0124

On February 17, 1983, Dane Energy Company of Houston, Texas, filed a Notice of Objection to a Proposed Remedial Order that the DOE Office of Special Counsel of the Economic Regulatory Administration issued to the firm on January 7, 1983. The State of California also filed a Notice of Objection to the PRO on February 14, 1983.

In the PRO, the Office of Special Counsel found that during the period November 1978 through December 1980, the firm violated the pricing regulations at 10 CFR Parts 205, 210 and 212, Subparts I and L, in its resales of crude oil.

According to the PRO, the Dane Energy violation resulted in $42,562,990.27 of overcharges.

Highway Oil, Inc., Topeka, Kansas; Motor gasoline HRO-0123

On February 14, 1983, Highway Oil, Inc., Topeka, Kansas filed a Notice of Objection to a Proposed Remedial Order which the DOE Kansas City Office of the Economic Regulatory Administration (ERA) issued to the firm on January 3, 1983.

In the PRO, the ERA found that during the period November 1, 1973 through April 30, 1974, Highway Oil, Inc. overcharged its customers for motor gasoline.

According to the PRO, the pricing violation resulted in $1,335,810.66 of overcharges.

MacMillan Oil Company, Inc., Des Moines, Iowa; Propane, No. 2 Fuel Oil, and Nos. 5 and 6 Residual Fuel Oil HRO-0128

On February 17, 1983, MacMillan Oil Company, Inc. of Des Moines, Iowa, filed a Notice of Objection to a Proposed Remedial Order (PRO) that the Economic Regulatory Administration (ERA) of the DOE issued to the firm on February 1, 1983.

In the PRO, the ERA determined that during the period November 1, 1973 through April 30, 1974, MacMillan improperly applied the DOE pricing regulations in its sales of propane, No. 2 fuel oil, and Nos. 5 and 6 residual fuel oil.

According to the PRO, the MacMillan violation resulted in $383,268.33 of overcharges.

Resources Extraction & Processing Co., Houston, Texas; Natural Gas Liquids HRO-0121

On February 16, 1983, Resources Extraction & Processing Co. (REAPCO), of Houston, Texas, filed a Notice of Objection to a Proposed Remedial Order (PRO) which the DOE Kansas City, Missouri District Office of Enforcement issued to the firm on January 21, 1983.

In the PRO, the Kansas City District found that during the period October 1978 through December 1980 REAPCO committed pricing violations in sales of natural gas liquids and natural gas liquid products.

According to the PRO, the REAPCO violation resulted in $1,180,330.56 of overcharges.

Tommy Oil Company, Topeka, Kansas; Motor Gasoline HRO-0120

On February 14, 1983, Tommy Oil Company, First National Bank Tower, Suite 1410, 534 Kansas Avenue, Topeka, Kansas, filed a Notice of Objection to a Proposed

Remedial Order which the DOE Kansas City Office of Enforcement issued to the firm on January 3, 1983.

In the PRO, the Kansas City Office found that during the period November 1, 1973 through April 30, 1974, Tommy overcharged its customers in the sale of motor gasoline.

According to the PRO, the Tommy Oil Company violation resulted in $146,527.52 of overcharges.

Gordon K. Walz and Revere Petroleum Corporation, Houston, Texas; Petroleum Products HRO–0125

On February 14, 1983, and February 17, 1983, Mr. Gordon K. Walz and Revere Petroleum Corporation, both of 13101 N.W. Freeway, Houston, Texas, filed a Notice of Objection to a Proposed Remedial Order (PRO) which the DOE Office of Special Counsel, Economic Regulatory Administration, issued to Mr. Walz and the firm on January 13, 1983.

In the PRO, the Office of Special Counsel found that during the period April 1979 through February 1980, Revere Petroleum and Mr. Walz committed certain violations of the Mandatory Petroleum Price Regulations, 10 CFR Part 212.

According to the PRO, the pricing violations resulted in over $50 million of overcharges.

BILLING CODE 6450–01–M

Office of the Secretary

Public Hearings on the Summary of the Results of the Evaluation of the Waste Isolation Pilot Plant (WIPP) Site and Preliminary Design Validation Program

AGENCY: Department of Energy.

ACTION: Notice of a public hearing on the summary of the evaluation of the WIPP Site and Preliminary Design Validation (SPDV) program.

SUMMARY: The Department of Energy (DOE) announces a public hearing on a report entitled "Summary of the Results of the Evaluation of the WIPP Site and Pre.iminary Design Validation Program," WIPP–DOE–161 (March 1983). A notice of the availability of WIPP–DOE–161 was published on March 31, 1983 (48 FR 13486). This report discusses the suitability of a WIPP site in southeastern New Mexico based on the evaluation of the results of the SPDV program. The construction and operation of the WIPP is for the purpose of demonstrating the safe permanent disposal of radioactive transuranic nuclear wastes and for research and development on various high level waste forms in mined repository, as authorized by Pub. L. 96–164. A public hearing will be held at the Convention Center in Albuquerque, New Mexico on May 16, 1983.

DATE: The hearing will be held May 16, 1983, from 9:00 a.m. to 10:00 p.m. with recesses from 11:30 a.m. to 1:00 p.m. and 5:00 to 7:00 p.m.

ADDRESS: Send written comments and requests to speak to: U.S. Department of Energy, WIPP Project Office, P.O. Box 5400, Albuquerque, New Mexico, 87115.

Hearing Location: The hearing will be held at the Convention Center in Albuquerque, New Mexico.

FOR FURTHER INFORMATION CONTACT:

1. Mr. Joseph M. McGough, Project Manager, WIPP Project Office, Department of Energy, P.O. Box 5400, Albuquerque, New Mexico 87115, 505/766–3884.

2. Mr. Lawrence H. Harmon, WIPP Program Manager, Office of Defense Waste and Byproducts Management, Department of Energy, MS B–107, Washington, D.C. 20545, 301/353–5505.

SUPPLEMENTARY INFORMATION:

I. Background of the Project

The Department of Energy has completed the Site and Preliminary Design Validation (SPDV) phase of the Waste Isolation Pilot Plant (WIPP) project at the Los Medanos site in the Delaware Basin of southeast New Mexico. The WIPP project was defined and authorized by Public Law 96–164, the Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1980, and was the subject of a Record of Decision published at 46 FR 9162, January 28, 1981. The WIPP project, which is set forth as Alternative 2 in the Final Environmental Impact Statement (EIS), DOE/EIS–0026, October 1980, is described as ". . . a defense activity of the Department of Energy administered by the Assistant Secretary of Energy for Defense Programs, for the express purpose of providing a research and development facility to demonstrate the safe disposal of radioactive waste resulting from the defense activities and programs of the United States. . . ."

Following completion of the SPDV phase, the Department of Energy announced the availability of WIPP–DOE–161 on March 31, 1983 (48 FR 13486). The notice of availability provided general information on solicitation of public comments.

II. Comment Procedures

A. Availability of WIPP–DOE–161

A copy of the WIPP–DOE–161 and supporting documentation have been furnished to the State of New Mexico and placed in the following libraries or reading rooms:

DOE Public Reading Room, National Atomic Museum, Building 10358, Kirtland Air Force Base (East), Albuquerque, New Mexico 87115.

Carlsbad Public Library, 101 South Nalagueno Street, Carlsbad, New Mexico 88220.

New Mexico State Library, 325 Don Gaspar, Santa Fe, New Mexico 87503.

Martin Speare Memorial Library, New Mexico Tech, Campus Station, Socorro, New Mexico 87801.

Hobbs Public Library, 509 N. Shipp, Hobbs, New Mexico 88240.

Roswell Public Library, 301 N. Pennsylvania Street, Roswell, New Mexico 87801.

Zimmerman Library, Government Publications Department, University of New Mexico, Albuquerque, New Mexico, 87138.

Thomas Brannigan Library, 106 W. Hadley, Las Cruces, New Mexico 88001.

B. Written Comments

Written comments should be submitted to the WIPP Project Office at the Albuquerque, New Mexico address listed above, on or before May 31, 1983.

III. Public Hearings

A. Conduct of Hearing

The purpose of the hearing is to afford an opportunity for public comment regarding WIPP–DOE–161.

DOE will make a presentation summarizing the project background and the substantive areas of concern raised in written comments received prior to the hearing. The hearing will be informal, conducted by a hearing officer selected by DOE.

DOE reserves the right to arrange the schedule of presentation to be heard and to establish the procedures governing the conduct of the hearing. The length of each presentation will be limited, based on the number of persons requesting to be heard.

Questions may be asked only by the person conducting the hearing. Cross examination of persons presenting statements will not be permitted. Any participant who wishes to ask a question at the hearing may submit the question in writing to the hearing officer. The hearing officer will determine whether the question is relevant and whether the time limitations permit it to be presented for answer. Any further procedural rules needed for the proper conduct of the hearing will be announced by the hearing officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by DOE. It will be available for inspection at the DOE Public Reading Room, National Atomic Museum,

Kirtland Air Force Base (East), Albuquerque, New Mexico, between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday.

Additional copies of the complete transcript will also be available at the public document centers noted above. Any person may purchase a copy of the transcript from the reporter.

After the close of the public comment period on WIPP–DOE–161, DOE will prepare a report responding to significant issues raised during the period of public comment, including this hearing. The public comments will be used by DOE to assist it in reaching a decision on construction of the WIPP.

B. Full Participation

Any individual may make a written or oral request to DOE for an opportunity to be scheduled to make an oral presentation at the hearing. Requests to participate in the hearing should be received by the WIPP Project Office, Department of Energy, P.O. Box 5400, Albuquerque, New Mexico 87115, 505/766–3884 no later than 4:30 p.m., May 9, 1983. Requesters are encouraged, to the extent practical, to furnish DOE a summary of the proposed oral presentation with the written request to participate in order for DOE to arrange grouping of participants speaking on similar topics. Participants should contact the WIPP Project Office by telephone on May 12 and 13, 1983, between the hours of 8:00 a.m. and 4:30 p.m. to learn the time scheduled for presentation and the amount of time available. This information will also be available on May 16, 1983 at the hearing. Scheduled speakers are encouraged to provide a written text of their presentation to assist the hearing reporter.

C. Limited Participation

Individuals who do not make an advance request to speak or who were otherwise not scheduled to speak may register at the hearing for an opportunity to speak. An opportunity to speak will be provided to these individuals after scheduled speakers have presented their views. Time for each participant will be limited depending on time available and the number of requests received.

Issued in Washington, D.C., on April 13, 1983.

Troy E. Wade, II

Acting Assistant Secretary for Defense Programs.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–59123; TSH–FRL 2347–4]

Certain Chemicals; Premanufacture Exemption Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's revised statement of interim policy published in the **Federal Register** of November 7, 1980 (45 FR 74378). This notice, issued under section 5(h)(6) of TSCA, announces receipt of four applications for exemptions, provides a summary, and requests comments on the appropriateness of granting each of the exemptions.

DATE: Written comments by May 2, 1983.

ADDRESS: Written comments, identified by the document control number "(OPTS–59123)" and the specific TME Number should be sent to: Document Control Officer (TS–793), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Management Support Division, Environmental Protection Agency, Rm. E–401, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TX–794), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M Street, SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Reading Room E–107.

TME 83–43

Close of Review Period. May 15, 1983.

Manufacturer. Confidential.

Chemical. (G) Mixed poly alkoxy alkyl siloxanes and silsesquioxanes.

Use/Production. (G) Functional fluid additive. Prod. range: Confidential.

Toxicity Data. No data on the TME substance submitted.

Exposure. Manufacture: dermal, inhalation and ocular, a total of 12 workers, up to 2 hrs/da, up to 8 da/yr; Processing: dermal, inhalation and ocular, a total of 6 workers, up to 6 hrs/da, up to 3 da/yr.

Environmental Release/Disposal. No release. Disposal by incineration.

TIME 83–44

Close of Review Period. May 20, 1983.

Manufacture. Morton Thiokol, Incorporated.

Chemical. (G) Polyalkyl polyurethane, acrylate capped.

Use/Production. (S) Coating for photographic film. Prod. range: Test Marketing Period—min. 25,000 kg, max. 50,000 kg.

Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >2 g/kg; Irritation: Skin—Not a primary irritant, Eye—Not a primary irritant.

Exposure. Manufacture: dermal, a total of 5 workers, up to 8 hrs/da, up to 10 da/yr; Processing: dermal, a maximum of 6 workers, up to 8 hrs/da, up to 5 da/yr; Disposal: dermal, a maximum of 2 workers, up to 2 hrs/da, up to 1 da/yr.

Environmental Release/Disposal. Between 10–1,000 kg/yr released to land. Disposal by deep well injection, incineration, and approved landfill.

TME 83–45

Close of Review Period. May 21, 1983.

Manufacturer. Georgia Pacific Corporation.

Chemical. (G) Liqnosulfonate, reaction product with a phenolic monomer and an oxidant.

Use/Production. Confidential. Prod. range: Max of 60,000 gallons/yr.

Toxicity Data. No data on the TME sustance submitted.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

TME 83–46

Close of Review Period. May 21, 1983.

Importer. The Warfield Company, Inc.

Chemical. (G) Polyamine adduct.

Use/Importer. Confidential. Import range: Confidential.

Toxicity Data. No data on the TME substance submitted.

Exposure. No data submitted.

Environmental Release/Disposal. No release.

Dated: April 8, 1983.

Linda A. Travers,

Acting Director, Management Support Division.

[OPOTS-51462; TSH-FRL 2347-5]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency. (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notice are discussed in EPA statements of interim policy published in **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of nineteen PMNs and provides a summary of each.

DATE: Close of Review Period:

PMN 83-608 and 83-609: July 29, 1983;
PMN 83-610, 83-611 and 83-612 July 2, 1983;
PMN 83-613, 83-614 and 83-615: July 3, 1983;
PMN 83-616 and 83-617: July 4, 1983;
PMN 83-618, 83-619, 83-620, 83-621, 83-622, 83-623, 83-624, 83-625, and 83-626: July 5, 1983.

Written comments by:

PMN 83-608 and 83-609; April 30, 1983;
PMN 83-610, 83-611 and 83-612: June 2, 1983;
PMN 83-613, 83-614 and 83-615: June 3, 1983;
PMN 83-616 and 83-617: June 4, 1983;
PMN 83-618, 83-619, 83-620, 83-621, 83-622, 83-623, 83-624, 83-625 and 83-626: June 5, 1983.

ADDRESS: Written comments, identified by the document control number "(OPTS-51462)" and the specific PMN number should be sent to: Document Control Officer (TS-793), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M St., SW., Washington, DC 20460; (202-382-3532).

FOR FURTHER INFORMATION CONTACT: Theodore Jones, acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M St., SW., Washington, DC 20460; (202-383-3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107.

PMN 83-608

Importer. Confidential.

Chemical. (G) Substituted bis substituted benzeneaminium, dichloride.

Use/Import. (S) Industrial colorant for paper. Import range: Confidential.

Toxicity Data. Acute oral: 3.7 ml/kg; Irritation: Skin—Non-irritant, Eye—Severe; IC_{50} (waste water bacteria)—100 mg/l; Zebra fish—Not toxic @ 5.0 mg/l.

Exposure. Negligible.

Environmental Release/Disposal. No release. Disposal by biological treatment system.

PMN 83-609

Importer. Confidential.

Chemical. (G) Substituted benzenesulfonic acid, sodium salt and substituted benzenesulfonic acid.

Use/Import. (S) Industrial colorant for textiles. Import range: Confidential.

(*Toxicity Data.* Acute oral: > ,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant, IC_{50} (waste water bacteria)—100 mg/l; Golden orfe—Note toxic @ 200 mg/l.

Exposure. Negligible.

Environmental Release/Disposal. No release. Disposal by publicly owned treatment works (POTW).

PMN 83-610

Manufacturer. Confidential.

Chemical. (G) Disubstituted glycine complex.

Use/Production. (G) Dilute solution used primarily by the submitter and by commercial customers. Prod. range: 600,000-700,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: dermal, a total of 30 workers, up to 2 hrs/da, up to 100 da/yr.

Environmental Release/Disposal. No release. Disposal by POTW and biological treatment system.

PMN 83-611

Manufacturer. Confidential.

Chemical. (G) Disubstituted glycine.

Use/Production. (G) Site-limited or company-limited intermediate. Prod. range: 550,000-650,000 kg/yr.

Toxicity Data. Acute oral: 1,600-2,200 mg/kg; Acute dermal: > 1,000 mg/kg; Irritation: Skin—Slight, Eye—Moderate; Ames Test: Negative; Skin sensitization: Low.

Exposure. Manufacture: dermal and inhalation a total of 50 workers, up to 2 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. No release. Disposal by POTW, biological treatment system and incineration.

PMN 83-612

Manufacturer. Diamond Shamrock Corporation.

Chemical. (G) Polymer of alkyl and heteromonocyclic amines and an alkanedioic acid.

Use/Production. (S) Epoxy hardener for site limited, industrial, commercial and consumer use. Prod. range: 0-100,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: dermal and inhalation, a total of 55 workers, up to 24 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air, 10-100 kg/yr to water and 10-1,000 kg/yr to land. Disposal by POTW and biological treatment system.

PMN 83-613

Importer. Confidential.

Chemical. (S) 1,3 benzenedimethanamine polymer with (chloromethyl) oxirane.

Use/Importer. (G) Raw material for a final product. Import range: Confidential.

Toxicity Data. Acute oral: >646 mg/kg; Irritation: Skin—Corrosive, Ames Test: Non-mutagenic.

Exposure. No data submitted.

Environmental Release/Disposal. Less than 10 kg/yr released to land. Disposal by incineration and approved landfill.

PMN 83-614

Manufacturer. Minnesota Mining and Manufacturing Company (3M).

Chemical. (G) Modified fluoroaliphatic adduct.

Use/Production. (S) Industrial carpet fiber treatment. Prod. range: Confidential.

Toxicity Data. Acute oral: 5 g/kg; Irritation: Skin—Minimal, Eye—Extreme.

Exposure. Manufacture and processing: dermal, a total of 4 workers, up to 12 hrs/da, up to 150 da/yr.

Environmental Release/Disposal. Confidential. Disposal by incineration.

PMN 83-615

Manufacturer. Minnesota Mining and Manufacturing Company (3M).

Chemical. (G) Perfluoroaliphatic isocyanate adduct.

Use/Production. (S) Industrial isolated intermediate for carpet fiber treatment. Prod. range: Confidential.

Toxicity Data. Acute oral: 5 g/kg; Irritation: Skin—Minimal, Eye—Mild.

Exposure. Manufacture and processing: dermal, a total of 3 workers, up to 8 hrs/da, up to 150 da/yr.

Environmental Release/Disposal. 10–100 kg/yr released to land. Disposal by incineration.

PMN 83–616

Manufacturer. Carus Chemical Company.

Chemical. (S) Cesium permanganate.

Use/Production. (G) Open use. Prod. range: Confidential.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Manufacture: dermal and inhalation.

Environmental Release/Disposal. Less than 10 kg/yr released to air. Disposal by biological treatment system.

PMN 83–617

Manufacturer. Carus Chemical Company.

Chemical. (S) Cesium aluminum sulfate.

Use/Production. (S) Intermediate for making cesium salts. Prod. range: Confidential.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Manufacture: dermal and inhalation.

Environmental Release/Disposal. Less than 10 kg/yr released to air. Disposal by biological treatment system.

BILLING CODE 6560-50-M

[A-1-FRL 2347-3]

Delegation of Authority to the State of Connecticut for Certain Portions of the Federal Prevention of Significant Deterioration of Air Quality Program (PSD)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Informational notice.

SUMMARY: EPA Region I has delegated authority for the implementation and enforcement of certain portions of the Federal Prevention of Significant Deterioration of Air Quality (PSD) program to the Connecticut Department of Environmental Protection (DEP) under 40 CFR 52.21. The effect of this action will be that the State will be reviewing major new sources or modifications to

existing major sources located in attainment areas for compliance with Federal PSD requirements.

EFFECTIVE DATE: September 29, 1982.

ADDRESS: Copies of DEP's request for delegation and the DEP–EPA Agreement for delegation of authority for portions of the PSD program are available for public inspection at the State Air Programs Branch, Environmental Protection Agency, Region I, JFK Federal Building, Boston, Massachusetts 02203, (617) 223–5130.

FOR FURTHER INFORMATION CONTACT: Susan S. Hager, State Air Programs Branch, Environmental Protection Agency, Region I, JFK Federal Building, Boston, Massachusetts 02203, (617) 223–5130.

SUPPLEMENTARY INFORMATION: On July 14, 1982, the Commissioner of the Connecticut DEP submitted to EPA Region I a request for EPA to delegate to DEP the authority to implement portions of the Federal PSD program. After a thorough review of this request, the Regional Administrator determined that the Connecticut DEP's procedures for carrying out the portions of the PSD program for which it will have responsibility are adequate and effective.

Thus, on September 29, 1982 the Regional Administrator delegated authority for the implementation of portions of the Federal PSD program to the State of Connecticut. In brief, the State of Connecticut will be responsible for receiving and processing all State permit applications for which PSD review is required. DEP will make a determination of the best available control technology to be required by the source (called a "BACT determination"), and prepare a modeling analysis of the source's ambient impacts. The state will either issue a permit which incorporates all conditions necessary to meet P SD requirements, enter into a consent order with the source which includes the necessary conditions, or request EPA to issue the PSD permit. EPA will retain authority for making a determination that a particular applicant is subject to PSD requirements, and for the increment consumption and tracking provisions of the PSD program. The conditions of the delegation are delineated in "Attachment A", "Conditions and Specifications to PSD Delegation to Connecticut", of the Regional Administrator's letter to the State dated September 29, 1982.

Effective immediately, all applications and other information pursuant to 40 CFR 52.21 for sources locating in the State of Connecticut should be sent directly to DEP at the following address: Department of Environmental Protection, Air Compliance Unit, State Office Building, 165 Capitol Avenue, Hartford, Connecticut 06106.

Dated: April 1, 1983.

Lester A. Sutton, P.E.,

Regional Administrator, Region I.

[A-10-FRL 2347-8]

PSD Applicability Determination; American Potato Co.

Notice is hereby given that the Environmental Protection Agency has determined that the American Potato Company's proposed boiler at Blackfoot, Idaho, is not subject to PSD review. The August 7, 1980 PSD regulations required that the construction or modification of a major stationary source was subject to PSD review if the resulting increase in potential emissions was greater than the significant levels. Using the August 1980 definition of potential to emit, EPA has reviewed the projected emissions from the subject facility and has concluded that potential emission increases are less than the PSD applicability threshold amounts.

The applicant was notified of this determination on January 21, 1983.

Under Section 307(b)(1) of the Clean Air Act, judicial review of the PSD permit is available *only* by the filing of a petition for review in the Ninth Circuit Court of Appeals within 60 days of today. Under section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Copies of the permit are available for public inspection upon request at the following location: EPA, Region 10, 1200 Sixth Avenue, Room 11D, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Kristine A. Flint (206) 442-7154.

Dated: April 1, 1983.

FEDERAL COMMUNICATIONS COMMISSION

[MM Docket No. 83-326, File No. BP-811001 AG, et al.]

Star Valley Broadcasting Co. et al.; Hearing Designation Order

Adopted: March 30, 1983.
Released: April 7, 1983.

In re applications of Star Valley Broadcasting Co., Afton, Wyoming, Req: 1210 kHz, 250 W, 5 kW-LS, U, MM Docket No. *83-326*, File No. BP-811001AG; Mini-Cassia Broadcasting, Inc., KBAR, Burley, Idaho, Has: 1230 kHz, 250 W, 1 kW-LS, U, Req: 1210 kHz, 500 W, 5 kW-LS, U, MM Docket No. 83-327, File No. BP-811117AK; Western Wyoming Radio, Inc., Afton, Wyoming, Req: 1210 kHz, 250 W, 5 kW-LS, U, MM Docket No. 83-328, File No. BP-811229AG; Beardslee Broadcasting, Inc., Meridian, Idaho, Req: 1210 kHz, 500 W, 5 kW-LS, U, MM Docket No. 83-329, File No. BP-811229AI; for construction permit.

By the Chief, Mass Media Bureau:

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications for new AM broadcast stations and for changes in the facilities of one (1) AM station.

2. *Local Public Notice:* Applicants for new broadcast stations and for major changes in the facilities of existing stations are required to give local notice of the filing of their applications in accordance with Section 73.3580 of the Commission's Rules. They must then file proof of such notice or certify that they have or will comply with the public notice requirement. We have no evidence, however, that Mini-Cassia Broadcasting, Inc., Beardslee Broadcasting, Inc., and Western Wyoming radio have complied with the Rule; therefore, if they have not already done so, they must comply with § 73.3580 and file the required certification with the administrative Law Judge within 30 days of the release of this Order.

3. Section 73.24(g) of the Commission's Rules requires that the population within an applicant's proposed 1 V/m contour not exceed one percent (1%) of the population within the proposed 25 mV/m contour except in cases where the population within the 1 V/m contour is 300 or less. No information was submitted to show whether Beardslee's proposal comports with the Rule. Beardslee must file sufficient information to demonstrate its proposal complies with the Rule within 30 days of the release of this Order.

4. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed.[1] However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding. Although most of the applications are for different communities, they would serve substantial areas in common. Therefore, in addition to an issue to determine pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will be specified.

5. Accordingly, it is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the areas and populations which would receive primary service for each proposal, and the availability of other primary aural services to such areas and populations.

2. To determine, in light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient, and equitable distribution of radio service.

3. To determine, in the event it is concluded that a choice among the applicants should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications, if any, should be granted.

6. It is further ordered, That Mini-Cassia Broadcasting, Inc., Beardslee

[1] Operation with the facilities specified herein is subject to modification, suspension or termination without right to hearing, if found by the Commission to be necessary in order to conform to the Final Acts of the ITU Administrative Conference on Medium Frequency Broadcasting in Region 2, Rio de Janeiro 1981, and to bilateral and other multilateral agreements between the United States and other countries.

Broadcasting, Inc., and Western Wyoming Radio shall, within thirty (30) days of the release of this Order, certify to the Administrative Law Judge as to compliance with the local notice requirements of § 73.3580 of the Commission's Rules.

7. It is further ordered, That Beardslee Broadcasting, Inc., shall file, within thirty (30) days of the release of this Order, sufficient information to demonstrate its proposal complies with § 73.24(g) of the Commission's Rules.

8. It is further ordered, That to avail themselves of the opportunity to be heard and pursuant to § 1.221(c) of the Commission's Rules, the applicants shall within 20 days of the mailing of this Order, in person or by attorney, file with the Commission, in triplicate, written appearances stating an intention to appear on the dates fixed for the hearing and to present evidence on the issues specified in this Order.

9. It is further ordered, That pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, the applicants shall give notice of the hearing as prescribed by the rules, and shall advise the Commission of the publication of the notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Audio Services Division, Mass Media Bureau.

Appendix

The Commission has not yet received Federal Aviation Administration clearance for the antenna tower(s) proposed by the below listed applicant(s). Accordingly, it is further ordered, That the following issue is specified: To determine whether there is a reasonable possibility that a hazard to air navigation would occur as a result of the tower height(s) and location(s) proposed by Western Wyoming Radio.

It is further ordered, That the Federal Aviation Administration is made a party to the proceeding.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Form Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for approval in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: Preliminary Plan.

Title: Disaster Assistance Registration Form.

Abstract: Form is proposed to be tested, and if successful, will replace four forms currently in use with substantial decrease in burden hours. Information gathered is required to provide disaster assistance to respondents.

Type of Respondents: Individuals.

Number of Respondents: 2000.

Burden Hours: 1500.

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 287-9906, 500 C Street, SW, Washington, DC 20472.

Comments should be directed to Ken Allen, Desk Officer for FEMA, Office of Information and Regulatory Affairs, OMB, Room 3225 New Executive Office Building, Washington, DC 20503.

Dated: April 11, 1983.

Walter A. Girstantas,

Director, Office of Administrative Support.

BILLING CODE 6820-26-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meeting is announced:

Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and Dental Devices Panel

Date, time, and place. May 19 and 20, 9 a.m., Auditorium, 200 Independence Ave. SW., Washington, DC.

Type of meeting and executive secretary. Open public hearing, May 19, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 1 p.m.; closed committee deliberations, 2 p.m. to 5 p.m.; open public hearing, May 20, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 1 p.m.; closed committee deliberations, 2 p.m. to 3 p.m; open committee discussion, 3 p.m. to 5 p.m.; George C. Murray, National Center for Devices and Radiological Health (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7940.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation. The committee also reviews data on new devices and makes recommendations regarding their safety and effectiveness and their suitability for marketing.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committeee. Those desiring to make formal presentations should notify the executive secretary before May 5, and submit a brief statement of the general

nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On May 19 the committee will discuss general issues relating to approvals of premarket approval applications (PMA's) for intraocular lenses (IOL's) and specific PMA's for IOL's. The committee will also discuss general issues relating to iris fixation IOL's. If discussion of all pertinent IOL issues is not completed, discussion will be continued the following day. On May 20 the committee may discuss PMA's or general issues relating to contact lenses or other ophthalmic products, including final review of the contact lens and contact lens care product guidelines.

Closed committee deliberations. On May 19 and 20 the committee will conduct reviews of PMA's for IOL applications. On May 20 the committee may also discuss trade secret or confidential commercial information relevant to PMA's for contact lens products. These portions of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and items reserved for the separate portions of each committeee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this Federal Register notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94–409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

Dated: April 6, 1983.

Mark Novitch,

Acting Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

National Institutes of Health

Biometry and Epidemiology Contract Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Biometry and Epidemiology Contract Review Committee, National Cancer Institute, National Institutes of Health, May 5–6, 1983, Building 31C, Conference Room 10, Bethesda, Maryland 20205. This meeting will be open to the public on May 5, from 9 a.m to 9:30 a.m., to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on May 5, from 9:30 a.m. to recess; and on May 6, from 8:30 a.m. to adjournment, for the review, discussion and evaluation of individual contract proposals. These proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committeee Management Officer, National Cancer Institute, Buiding 31,

Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. Wilna A. Woods, Executive Secretary, Biometry and Epidemiology Contract Review Committee, National Cancer Institute, Westwood Building, Room 822, National Institutes of Health, Bethesda, Maryland 20205 (301/496–7153) will furnish substantive program information.

Dated: April 7, 1983.

Betty J. Beveridge,

Committee Management Officer, National Institutes of Health.

[FR Doc. 83–10052 Filed 4–14–83; 8:45 am]

BILLING CODE 4140–01–M

Board of Scientific Counselors, Division of Cancer Cause and Prevention; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Cancer Cause and Prevention, National Cancer Institute, June 6–7, 1983, National Institutes of Health, Building 31, C Wing, Conference Room 10, Bethesda, Maryland 20205. The meeting will be open to the public from 11:00 a.m. to recess on June 6, and from 9:00 a.m. to adjournment on June 7, for a discussion and update of the Division budget and review of concepts for grants and contracts. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 6, from 9:00 a.m. to approximately 11:00 a.m., for the review, discussion and evaluation of individual programs and projects conducted by the Division of Cancer Cause and Prevention. These discussions could reveal personal information concerning individuals associated with the programs and projects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. David McB. Howell, Executive Secretary, Board of Scientific Counselors, DCCP, National Cancer Institute, Building 31, Room 11A04, National Institutes of Health, Bethesda, Maryland 20205 (301/496–6927) will furnish substantive program information.

Dated: April 7, 1983.

Betty J. Beveridge,

Committee Management Officer, National Institutes of Health.

BILLING CODE 4140–01–M

Board of Scientific Counselors; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases (NIADDK), May 5, 6, and 7, 1983. National Institutes of Health, Building 2, Room 102, Bethesda, Maryland 20205.

This meeting will be open to the public from 8:00 p.m. to 9:30 p.m. on May 5, from 9:00 a.m. to 12:05 p.m. and from 2:00 p.m. to 4:15 p.m. on May 6, from 9:00 a.m. to 11:30 a.m. on May 7. The open portion of the meeting will be devoted to scientific presentations by various laboratories of the NIADDK Intramural Research Program. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 7:30 p.m. to 8:00 p.m. and 9:30 p.m. to 10:00 p.m. on May 5, from 12:05 p.m. to 2:00 p.m. and 4:15 p.m. to adjournment on May 6, and from 11:30 a.m. to adjournment on May 7, for the review, discussion and evaluation of individual intramural programs and projects conducted by the NIADDK, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Summaries of the meeting and rosters of the members will be provided by the Committee Management Office, National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases, Building 31, Room 9A46, Bethesda, Maryland 20205. Further information concerning the meeting may be obtained by contacting the office of Dr. Elizabeth Neufeld, Acting Executive Secretary, Board of Scientific Counselors, National Institutes of Health, Building 10, Room 9N–222, Bethesda, Maryland 20205, (301) 496–4128.

Dated: April 7, 1983.

BILLING CODE 4140–01–M

National Advisory Child Health and Human Development Council; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Child Health and Human Development Council, May 16–17, 1983, in Building 31, Conference Room 10, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on May 16 from 9:00 a.m. until 5:00 p.m. The agenda includes a report by the NICHD Director, Council subcommittee reports, and a panel presentation on Contraceptive Development and Evaluation. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on May 17 from 9:00 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications. The applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs Majorie Neff, Council Secretary, NICHD, Landow Building, Room 6C08, National Institutes of Health, Bethesda, Maryland 20205, Area Code 301, 496–1485, will provide a summary of the meeting and a roster of Council members as well as substantive program information.

BILLING CODE 4140–01–M

National Advisory Environmental Health Sciences Council; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Environmental

Health Sciences Council, May 23–24, in Building 31C, Conference Room 7, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on May 23, from 9 a.m. to approximately 12 noon, for the report of the Director, NIEHS, and for discussion of the NIEHS budget, program policies and issues, recent legislation, and other items of interest. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on May 23, from approximately 1:00 p.m. to adjournment on May 24, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Winona Herrell, Committee Management Officer, NIEHS, Bldg. 31, Rm. 2B55, NIH, Bethesda, Md. 20205, (301) 496–3511, will provide summaries of the meeting and rosters of council members.

Dr. Wilford L. Nusser, Associate Director for Extramural Program, NIEHS, P.O. Box 12233, Research Triangle Park, North Carolina 27709, (919) 541–7723, FTS 629–7723, will furnish substantive program information.

BILLING CODE 4140–01–M

National Library of Medicine; Meetings of the Board of Regents, the Extramural Programs Subcommittee, the Lister Hill Center Subcommittee, and the Subcommittee on Pricing of NLM Services

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Regents of the National Library of Medicine on May 26–27, 1983, in the NMAC Classroom, Lister Hill Center Building of the National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland. In connection with this meeting, the three subcommittees of the Board will meet on the preceding day, May 25, in the Lister Hill Center Building, as follows:

—Subcommittee on Pricing of NLM Services: 1:00–2:30 p.m., 7th-floor Conference Room
—Extramural Programs Subcommittee: 2:00–4:00 p.m., 5th-floor Conference Room
—Lister Hill Center Subcommittee: 2:30–5:00 p.m., 7th-floor Conference Room

The meeting of the Board will be open to the public from 9:00 a.m. to 5:00 p.m. on May 26 and from approximately 10:00 a.m. to adjournment on May 27 for administrative reports and program discussions. The entire meeting of the Lister Hill Center Subcommittee will be open to the public for discussions of program directions of the Lister Hill National Center for Biomedical Communications, and the entire meeting of the Subcommittee on Pricing will be open for a review of NLM pricing policies. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4), 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the entire meeting of the Extramural Programs Subcommittee on May 25 will be closed to the public, and the regular Board meeting on May 27 will be closed from 9:00 to 10:00 a.m. for the review, discussion, and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property, such as patentable material and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Robert B. Mehnert, Chief, Office of Inquiries and Publications Management, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20209, Telephone Number: 301–496–6308, will furnish a summary of the meeting, rosters of Board members, and other information pertaining to the meeting.

BILLING CODE 4140–01–M

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on April 8.

Health Care Financing Administration

Subject: Supplementary Information for the Determination of the Target Amount Under the Medicare Prospective Payment System (HCFA 1008)—New
Respondends: Hospitals participating in Medicare and subject to prospective payment
OMB Desk Officer: Fay S. Iudicello

Office of Human Development Services

Subject: Referral for WIN Registration (IM–3) (0980–0111)—Extension/No Change
Respondents: Local WIN projects
Subject: WIN 117–A, 117–B, SAV–4 and IM–9—New
Respondents: State and project WIN income maintenance agencies, SAU agencies
OMB Desk Officer: Milo Sunderhauf

Social Security Administration

Subject: Reporting Requirements for Targeted Assistance Grants for Services for Refugees in Local Areas of High Need—New
Respondents: State agencies responsible for the Refugee Resettlement Program
Subject: Social Security Administration Certificate of Support (SSA–760–F4 (5–83))—Revision
Respondents: Individuals or households
OMB Desk Officer: Milo Sunderhauf

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to both the HHS Reports Clearance Officer and the appropriate OMB Desk Officer designated above at the following addresses:

Joseph F. Costa, Acting HHS Reports Clearance Officer, Hubert H. Humphrey Building, Room 524–F, Washington, D.C. 20201

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503. ATTN: (name of OMB Desk Officer).

Dated: April 11, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4150–04–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Cheyenne-Arapaho Tribes; Plan for the Use and Distribution of the Cheyenne-Arapaho Tribes of Oklahoma Judgment Funds in Dockets 342–70 and 343–70 Before the United States Court of Claims

April 6, 1983.

This notice is published in excerise of authority delegated by the Secretary of the Interior to the Assistant Secretary for Indian Affairs by 209 DM 8.

The Act of October 19, 1973 (Pub. L. 93–134, 87 Stat. 466), as amended, requires that a plan be prepared and submitted to Congress for the use or distribution of funds appropriated to pay a judgment of the Indian Claims Commission or Court of Claims to any Indian tribe. Funds were appropriated on December 4, 1981, in satisfaction of the award granted to the Cheyenne-Arapaho Tirbes of Oklahoma in United States Court of Claims Dockets 342–70 and 343–70. The plan for the use and distribution of the funds was submitted to the Congress with a letter dated August 18, 1982, and was received (as recorded in the Congressional Record) by the House of Representatives on September 8, 1982, and by the Senate on September 9, 1982. The plan became effective on February 17, 1983, as provided by Section 5 of the 1973 Act since Congress did not adopt a resolution disapproving it.

The plan reads as follows:

"The funds appropriated on December 4, 1981, in satisfaction of an award granted by the United States Court of Claims in Dockets 342–70 and 343–70 to the Cheyenne-Arapaho Tribes of Oklahoma, including all interest and investment income accrued, less attorney fees and expenses, shall be distributed as herein provided.

The funds shall be utilized by the Business Committee of the Cheyenne-Arapaho Tribes of Oklahoma to fund, subject to the approval of the Secretary, a burial program for the benefit of tribal members.

None of the funds held in trust under the provisions of this Act shall be subject to Federal or State income taxes, and shall not be considered as income or resources when determining the extent of eligibility for assistance under the Social Security Act."

Kenneth Smith,

Assistant Secretary—Indian Affairs.

Containing 2,614.17 acres.

Harwood Investment Company, P.O. Box 609, Willits, California 95490, has applied to acquire the above described lands in exchange for the following described privately owned lands.

Mount Diablo Meridian

Tract One

Parcel One

T. 23 N., R. 16 W.,
Sec. 29, SE¼NW¼.

Parcel Two

T. 23 N., R. 16 W.,
Sec. 19, lot 13.

Excepting therefrom that portion conveyed in the deed executed by Harwood Investment Co. to C. J. Fairhurst, Jr., dated June 7, 1976, recorded June 10, 1976 in Volume 1043 of Official Records, page 412, Mendocino County Records.

Parcel Three

T. 23 N., R. 16 W.,
Sec. 32, lots 6 and 7, NE¼SW¼, NW¼SE¼;

Parcel Four

T. 23 N., R. 16 W.,
Sec. 19, lots 9 and 14, S½NE¼, SE¼;
Sec. 20, W½SW¼.

Excepting therefrom the following:

1st: A strip of land of the uniform width of 200 feet lying along the West side of and being the Westerly 200 feet of Lot 9 of Section 19, Township 23 North, Range 16 West, Mount Diablo Meridian.

2nd: That portion of the Southwest quarter of Southwest quarter of Section 20, Township 23 North, Range 16 West, Mount Diablo Meridian, conveyed by Evelyn R. Schell to A. A. Wilson, by deed dated November 12, 1926, recorded in Volume 16 of Official Records, page 17, Mendocino County Records.

3rd: The right of way of the State Highway of the State of California.

4th: That portion conveyed by deed executed by Stanley J. Fairhurst et ux to State of California, dated August 24, 1967, recorded April 11, 1969 in Volume 789 of Official Records, page 124, and by Quit Claim deed executed by C. J. Fairhurst, Jr. et ux to State of California, dated August 28, 1967, recorded April 11, 1969 in Volume 789 of Official Records, page 127, Mendocino County Records.

5th: That portion conveyed by deed executed by C. J. Fairhurst, Jr. et ux to State of California, dated June 26, 1970, recorded August 20, 1970 in Volume 824 of Official Records, page 689, and by Quit Claim deed executed by California

Eastern Company, a limited partnership to State of California, dated June 26, 1970, recorded August 20, 1970 in Volume 824 of Official Records, page 692, Mendocino County Records.

6th: That portion conveyed in the deed executed by Harwood Investment Co. to C. J. Fairhurst, Jr., dated June 7, 1976, recorded June 10, 1976 in Volume 1043 of Official Records, page 412, Mendocino County Records.

Parcel Five

T. 22 N., R. 16 W.,
Sec. 5, lot 3, S½NW¼, NE¼SW¼;
Sec. 8, N½NE¼, E½W½, S½SE¼;
Sec. 9, lot 4.
T. 23 N., R. 16 W.,
Sec. 20, lot 7;
Sec. 29, lots 1, 2, 3, and 4, W½E½, E½SW¼, NW¼SW¼, W½NW¼; That portion of the NE¼NW¼ that lies East of the East line of the Eel River, excepting therefrom the East half of the NW¼NW¼;
Sec. 30, lots 1, 2, 4, 5, 6, 7, 8, 9, 10 and 12, W½E½, E½NE¼, NE¼SE¼;
Sec. 31, lots 1, 3 and 4, NW¼NE¼.

Parcel Six

Starting from the Southeast corner of the Southwest quarter of Southwest quarter of Section 20, Township 23 North, Range 16 West, Mount Diablo Meridian, according to the official plat of the survey of said land on file in the Bureau of Land Management; and running thence North on the line between the Southwest quarter of Southwest quarter and the Southeast quarter of the Southwest quarter of said Section 20, a distance of 244.60 feet to the point of beginning; thence North 56°13′ West 300 feet; thence North 0°25′ West 100 feet; thence South 56°13′ East 300 feet to the line between said subdivisions; thence South on said last mentioned line 100 feet, more or less, to the point of beginning.

Parcel Seven

T. 22 N., R. 16 W.,
Sec. 5, lots 1 and 2, SW¼NE¼, NW¼SE¼.

Parcel Eight

T. 23 N., R. 16 W.,
Sec. 28, SW¼SW¼;
Sec. 33, NW¼NW¼.

Parcel Nine

T. 23 N., R. 16 W.,
Sec. 32, lots 1, 2 and 3, E½NW¼, SW¼NW¼, NW¼SW¼.

Parcel Ten

An Easement as reserved in the Gift Deed executed by Harwood Investment Co., the general partnership whose statement of partnership was recorded August 29, 1972 in Book 898, Official Records, page 190, Mendocino County Records to Roman Catholic Bishop of Santa Rosa, a corporation sole, dated June 7, 1976, recorded June 10, 1976 in Book 1043, Official Records, page 409, described as follows:

"Reserving unto the grantor, however, non-exclusive easements for the purpose of travel and transportation of all sorts consisting of a 70 foot wide right of way along the route of an existing road, the portions of which are within the West half of the Northeast quarter of the Northwest quarter and the East half of the Northwest quarter of the Northwest quarter, Section 29, Township 23 North, Range 16 West, Mount Diablo Meridian, Mendocino County, California, 35 feet on either side of the following described centerline:

Beginning at a point of the centerline of the South Fork of the Eel River, said point being South 08° 21′ 12″ West, 3097.90 feet from the point of the centerline of State Highway 101 defined as mile Station 85.9 and B.C. 437 + 19.03, also defined by the California State Grid Coordinates of North 791,933.50 feet and East 1,536,293.06 feet, Zone 2, from said point of beginning South 07°12′ West, 25.00 feet; South 46°04′ East, 482.59 feet; South 70°24′ West, 89.78 feet; North 63°41′ West, 313.29 feet; North 50°41′ West, 255.19 feet; North 66°46′ West, 186.07 feet; North 45°38′ West, 134.33 feet; North 59°04′ West, 222.16 feet; South 78°24′ West, 149.78 feet; South 44°19′ East, 341.26 feet; South 49°23′ East 229.39 feet; South 27°04′ East, 149.54 feet; South 00°31′ East, 156.34 feet; South 54°36′ East, 220.35 feet, South 50°40′ East, 392.46 feet; South 31°14′ East, 270.95 feet; South 09°08′ West, 400.0 feet, more or less, to the South boundary of the West half of the Northeast quarter of the Northwest quarter, Section 29. (Bearings are in terms of the California State Grid, Zone 2).

Also the right to make minor adjustments in roadway alignment due to damage by natural causes or for the practical location within the approximate present location. The above conditions shall exist even though the adjustments or improvements will affect areas outside the above described right of way. It is understood that the intent is to maintain the road in its present location."

Parcel Eleven

An Easement as reserved in the deed executed by Harwood Investment Co., a general partnership to C.J. Fairhurst Jr., a single man dated June 7, 1976, recorded June 10, 1976 in Book 1043, Official Records, page 412, mendocino County Records, described as follows:

"A non-exclusive easement for the purposes of travel and transportation of all sorts consisting of a 70 foot wide right of way along the route of an existing road in Sections 19 and 20, Township 23 North, Range 16 West, Mount Diablo Base and Meridian, Mendocino County, California, 35 feet on either side of the following described centerline:

Beginning at a point on the Southerly boundary of the traveled portion of State Route 271, also called former Highway 101, said point being South 30°55′19″ West 786.59 feet from a point on the centerline of State Highway 101 defined as mile station 85.9 and B.C. 437 + 19.03, also defined by the California State Grid Coordinates of North 791,933.50 feet and East 1,536,293.06 feet, Zone 2, from said point of beginning South 50°38′ West 346.08 feet; South 87°50′ West 456.95 feet; North 87°24′ West 361.87 feet; North 61°52′ West 122.09 feet; South 59°56′ West 158.34 feet; South 32°37′ East 114.90 feet; South 50°20′ East 336.27 feet; South 40°45′ East 313.04 feet; South 68°42′ East 123.49 feet; South 46°46′ East 142.31 feet; South 88°10′ East 241.66 feet; South 35°56′ East 152.27 feet; South 35°44′ West 303.96 feet; South 07°53′ West 254.64 feet; South 15°00′ East 194.00 feet; South 40°15′29″ West 112.05 feet; South 45°08′ East 414.68 feet; South 38°39′ East 248.49 feet; South 07°12′ West 130.0 feet, more or less, to the centerline of the South Fork of the Eel River. Bearings are in terms of the California State Grid, Zone 2.

Also the right to make minor adjustments in roadway alignment due to damage by natural causes or for the practical location within the approximate present location. The above conditions shall exist even though the adjustments or improvements will affect areas outside the above described right of way. It is understood that the intent is to maintain the road in its present location.

Tract Two

T. 23 N., R. 16 W.,
Sec. 20, lot 6, E½SW¼, NW¼SE¼.

Tract Three

T. 21, N., R. 15 W.,
Sec. 6, W½SE¼, SE¼SE¼;
Sec. 7, NE¼NE¼.

A mineral evaluation has been requested on the public land. If any minerals are identified, a reservation of identified minerals will be made to the United States. If no minerals are identified, the mineral estate of the public lands will be conveyed with the surface. The mineral estate of the privately owned lands will be conveyed with the surface, unless previously reserved.

The publication of this notice in the Federal Register shall segregate the

applied for public lands from all other forms of appropriation under the public land laws, including the mining laws, for a period of two years. The exchange is expected to be consummated before the end of that period.

The value of the lands to be exchanged is approximately equal and money will be used to equalize the values upon completion of the final appraisal of the lands.

There will be reserved to the United States in the applied for lands, a right-of-way thereon for ditches and canals constructed by the authority of the United States (43 U.S.C. 945).

The purpose of the exchange is to acquire non-Federal lands to consolidate public land ownership for more effective management in the Red Mountain and Scattered Blocks Planning Units. The exchange is in conformance with Bureau planning, and in the public interest.

Detailed information concerning the exchange, including the environmental analysis and the record of non-Federal participation, is available for review at the Eureka Area Office, BLM, 1585 J Street, P.O. Box II, Arcata, California 95521.

For a period of 45 days from the first publication of this notice interested parties may submit comments to the California State Director, Bureau of Land Management, E–2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825. Any adverse comments will be evaluated by the California State Director, who may vacate or modify this realty action and issue a final determination. In the absence of a vacation or modification, this realty action will become the final determination of the Bureau.

Van W. Manning,

District Manager.

April 5, 1983.

BILLING CODE 4310–84–M

[I–18580]

Issuance of Land Exchange Conveyance Document; Exchange of Public and Private Lands; Fremont County, Idaho

April 6, 1983.

The United States has issued an exchange conveyance document to the Richard A. Egbert Limited Partnership, Tetonia, Idaho 83452, for the following—described lands under Section 206 of the Federal Land Policy and Management Act of 1976:

Boise Meridian, Idaho

T. 8 N., R. 37 E.
Sec. 25, SW¼SW¼;
Sec. 28, NE¼NE¼, SE¼.
Comprising 240.00 acres of public land.

In exchange for these lands, the United States acquired the following—described lands:

Boise Meridian, Idaho

T. 10 N., R. 41 E.
Sec. 8, SE¼SE¼;
Sec. 17, NE¼NE¼, S½NE¼.
Comprising 160.00 acres of private land.

The purpose of this exchange was to acquire the non-Federal land which will provide critical wildlife habitat for a rapidly growing elk herd which uses the land for spring and fall forage areas. The public interest was well served through completion of the exchange.

Louis B. Bellesi,

Deputy State Director for Operations.

BILLING CODE 4310–84–M

[I–19390]

Idaho; Offer of Lands

1. Pursuant to the provisions of the Act of May 31, 1962 (76 Stat. 89), the following lands, found upon survey to be omitted lands of the United States, will be offered for sale:

Boise Meridian, Idaho

T. 4 S., R. 33 E.,
Sec. 1, lot 10, 7.76 acres;
Sec. 11, lot 2, 12.86 acres;
Sec. 12, lot 8, 12.65 acres;
Lot 9, 24.75 acres;
Lot 10, 10.20 acres;
Lot 11, 39.95 acres;
Lot 14 (portion), 16.00 acres (approx.) (cultivated portion on high ground atop lava ridge);
NE¼SW¼ (portion), 24.00 acres (approx.) (cultivated portion on high ground atop lava ridge);
Sec. 14, lot 9, 19.75 acres;
Lot 10 (portion), 18.00 acres (approx.) (cultivated portion on high ground atop lava ridge);
Lot 11 (2 portions), 18.00 acres (approx.) (cultivated portion on high ground atop lava ridge);
Lot 12 (portions), (cultivated portion on high ground atop lava ridge);
Sec. 27, lot 10 (portion), 15.00 acres (approx.) (portion lying west of slought).

These areas aggregate 240.92 acres, more or less.

2. The plat of survey was filed in the public land records in Boise, Idaho at 10 a.m. on August 3, 1981.

3. Persons claiming a preference right in accordance with the provisions of the Act, must file with the Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401, before June 30, 1983, a notice of their intention to apply to purchase all or part of the lands as qualified preference right claimants.

4. The Act grants a preference right to purchase the above lands to any citizens of the United States (including corporations, partnerships, firms, or other legal entity having authority to hold title to lands in the State of Idaho) who, in good faith, under color of title or claiming as a riparian owner has, prior to March 30, 1961, placed valuable improvements upon, reduced to cultivation, or occupied any of the lands so offered for sale, or whose ancestors or predecessors in interest have taken such action.

5. The lands are determined to be suitable for sale and will be sold at their fair market value subject to:

(a) Qualified preference right claims.

(b) A reservation to the United States of all the coal, oil, gas, oil shale, phosphate, potash, sodium, native asphalt, solid and semisolid bitumen and bituminous rock, including oil-impregnated rock or sands from which oil is recoverable only by special treatment after the deposit is mined or quarried, together with the right to prospect for, mine, and remove the same.

(c) A reservation to the United States of a 100-foot strip of land along and parallel to the banks of the Snake River for use of the public for access and recreation.

(d) All valid existing rights for ditches, canals, and powerlines.

The following lands, presently encumbered by placer mining claims, may be offered for sale at a later date should the mining claims be relinquished or invalidated:

Boise Meridian, Idaho

T. 4 S., R. 33 E.,
Sec. 22, lot 6 (portion), lot 7 (portion), lot 9 (portion);
Sec. 27, lot 9 (portions).

Louis B. Bellesi,

Deputy State Director for Operations.

Realty Action—Sale of Public Land in Yakima County, Washington

This Notice amends the original Notice of Realty Action published January 6, 1983 (48 FR 743), and the Notice published March 3, 1983 (48 FR 9075).

The sale will be held on May 4, 1983, in Room 232 at the Yakima County Courthouse, North 1st and B Streets, Yakima, Washington. Registration of

bidders will begin at 9:00 a.m. and the sale will start at 10:00 a.m.

Sealed bids will be accepted until 4:00 p.m. on April 29, 1983, at the Bureau of Land Management, Spokane District Office, East 4217 Main Avenue, Spokane, WA 99202. Sealed bid envelopes must be marked in the lower left-hand corner as follows: "Public Sale Bid Parcel No. ——, Serial No. OR 24850. Sale held on May 4, 1983."

If any of the parcels are not sold on May 4, 1983, they will remain available for sale, at the Bureau of Land Management, Spokane District Office, on a continuing basis until removed from market.

Information about the sale is available at the BLM, Spokane District Office, at the above address.

Date of Issuance: April 5, 1983.

Roger W. Burwell

District Manager.

BILLING CODE 4310-84-M

[ES 32295, Survey Group 129]

Minnesota; Notice of Filing of Plat of Survey

1. On November 30, 1980, the plat representing the survey of two islands in Lake Johanna and one island in Kittleson Lake, which were omitted from the original survey in T. 123 N., R. 36 W., Fifth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on May 31, 1983.

The islands listed below describe the lands omitted from the original survey.

Fifth Principal Meridian, Minnesota

T. 123 N., R. 36 W.,
Tract Nos. 37, 38, and 39.

2. The elevations of the islands described above rise from 2 to 11 feet above the ordinary high water marks of the lakes in which they are located. Forest vegetation consists of ash, elm, basswood, birch, poplars, and willow. Large trees were found on the islands which have been determined to be over 80 years old by ring count. The undergrowth consists of currant, willow brush, grasses, choke cherry, and briars.

3. The geologic composition and elevation of the islands being similar to the geologic composition and elevation of the surveyed lands along the shores of Lake Johanna and Kittleson Lake, attests to the fact that these islands existed on February 28, 1858, the date of the original survey and on May 11, 1858, when Minnesota entered the Union.

4. The areas described above were found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). They are, therefore, held to be public land.

5. All inquiries relating to these lands should be sent to the Deputy State Director for Lands and Minerals Operation, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304 on or before May 31, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

BILLING CODE 4310-84-M

[ES 32054, Survey Group 146]

Minnesota; Filing of Plat of Survey

1. On October 5, 1982, the plat representing the survey of one island in T. 115 N., R. 29 W., Fifth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on May 31, 1983.

The island listed below describes the land omitted from the original survey.

Fifth Principal Meridian, Minnesota

T. 115 N., R. 29 W.,
Tract No. 37.

2. Tract No. 37 rises about 20 feet above the ordinary high water mark of Lake Addie, and is composed of glacial till and granite boulders. Its character is similar in all respects to that of the adjacent surveyed lands. Timber on this Tract consists of oak, elm, ash, willow, cottonwood, and maple. The ground cover consists mainly of willow. An oak tree measuring 20 inches in diameter was found to be approximately 100 years old. Tree stumps were found on this Tract.

3. The elevation of Tract No. 37, similarity of timber succession on the island and mainland, age of timber present, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

4. The area described above is more than 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). It is therefore held to be public land.

5. All inquiries relating to this land should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304 on or before May 31, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

[FR Doc. 83-10006 Filed 4-14-83; 8:45 am]

BILLING CODE 4310-84-M

[ES 24622A, Survey Group 114]

Minnesota; Notice of Filing of Plat of Survey

1. On December 5, 1979, the plat representing the dependent resurvey of the boundaries of Secs. 23 and 24, designed to restore the corners in their true original locations, and the reestablishment of a portion of the record meander lines of Secs. 23 and 24, to include lands erroneously omitted from the original survey in T. 62 N., R. 11 W., Fourth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on May 31, 1983.

The areas listed below describe the lands omitted form the original survey.

Fourth Principal Meridian, Minnesota

T. 62 N., R. 11 W.,
Sec. 23, Lots 11 and 12; and
Sec. 24, Lots 10, 11 and 12.

2. Distinct vegetative types are related to topographic position. Most of the upland area is forested with red and sugar maple, paper and yellow birch, ash, white spruce, black and white pine, balsam fir, aspen basswood and scattered Eastern hemlock. In the understory, mountain maple, raspberry briars, native grasses and sedges are found. Black spruce and tamarack become common in pure stands as the sites become boggier. Black ash are found scattered in these swamp areas; marsh grasses, alder, sedges and sphagnum moss are found in the understory. Unforested lowland bogs support dense alder growth and mounds of marsh grasses, sedges and moss. Numerous decayed stumps are mute evidence that the omitted uplands were once covered with a fine stand of old growth of Eastern white pine. The two remaining old growth Eastern white pine, located in the omitted upland area of Section 24, give a ring count as follows: a white pine measuring 52 inches in diameter was aged at approximately 97 years old. A white pine 36 inches in diameter was aged at 147 years old.

3. Lot 11 Sec. 23 and Lots 10, 11 and 12 Sec. 24, were found to be over 50 percent swamp and overflowed in character within the purview of the Swamp Lands

Act of September 28, 1850 (9 Stat. 519). These lands will only be open for selection by the State under the Act.

Lot 12 Sec. 23 was determined to be over 50 percent upland within the purview of the Act referenced above. Therefore, this lot is held to be public land.

4. All inquiries relating to these lands should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304, on or before May 31, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

BILLING CODE 4310-84-M

[ES 32053, Survey Group 133]

Minnesota; Notice of Filing of Plat of Survey

1. On October 6, 1982, the plat representing the survey of seven islands in T. 118 N., R. 30 W., Fifth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on May 31, 1983.

The islands listed below describe the lands omitted from the original survey

Fifth Principal Meridian, Minnesota

T. 118 N., R. 30 W.,

Tract Nos. 37, 38, 39, 40, 41, 42, and 43.

2. Tract No. 37 rises about 10 feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till and granite boulders measuring up to 3 feet in diameter. Timber consists of oak, elm, ash, and basswood.

The island dTract No. 38 rises about 8 feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till with scattered granite boulders. Timber consists of oak, elm, ash, basswood, and willow. The ground cover consists of dense growth dogwood, box elder, and sumac. Tree stumps were found on the island ranging up to 24 inches in diameter. An oak tree measuring 20 inches in diameter was determined to be 80 years of age by ring count.

Tract No. 39 rises about 18 feet in elevation above the ordinary high water mark of Cedar Lake, and is composed of glacial till with scattered granite boulders. This island has been cleared of all timber and replanted with pine and spruce trees. Tree stumps were found on the island.

The island Tract No. 40 rises about 6 feet above the ordinary high water mark of Cedar Lake and is composed of glacial till. The timber on the island consists of basswood, ash, elm, box elder, and oak. The ground cover consists of dense growth willow, sumac, and snowberry. A basswood tree measuring 24 inches in diameter was estimated at approximately 70 years old. Tree stumps were found on the island. Dead Snags up to 36 inches in diameter are present and were approximately 105 years of age at time of death.

Tract No. 41 rises about 8 feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till and outcrops of granite. Timber consists of ash, box elder, and hackberry. The ground cover consists of willow and sumac. Tree stumps were found on this tract.

The island Tract No. 42 rises about 20 feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till and outcrops of granite. Timber consists of elm, oak, cottonwood, ash, basswood, willow, aspen, hackberry, and cedar. The ground cover on the west side of the island consists of snowberry and sumac, while the east side of the island is fairly open. An elm tree measuring 24 inches in diameter was estimated at approximately 80 years of age. Tree stumps were found on the island ranging up to 30 inches in diameter.

Tract No. 43 rises about 20 feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till and large granite boulders ranging up to 6 feet in diameter. Timber consists of oak, elm, basswood, ash, hackberry, willow, and cedar. An oak tree measuring 20 inches in diameter was found to be approximately 80 years old. Tree stumps were found on the island measuring up to 25 inches in diameter.

3. The elevations of the islands, presence of old stumps, similarity of timber succession on the island and mainland, composition of the soil and character of the channel, show conclusively that these tracts existed as islands in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

4. The areas described above were found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1950 (9 stat. 519). They are, therefore, held to be public land.

5. All inquiries relating to these islands should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandia, Virginia 22304, on or before May 31, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

BILLING CODE 4310-84-M

Montana; Environmental Impact Statement; Resource Management Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of draft resource management plan/environmental impact statement and public hearings.

SUMMARY: Pursuant to Section 202(f) of the Federal Land Policy and Management Act of 1976 and Section 102(c) of the National Environmental Policy Act of 1969, a Draft Resource Management Plan/Environmental Impact Statement (RMP/EIS) has been prepared for the Billings Resource Area. The Billings Resource Area, Lewistown District, contains approximately 425,000 acres of public land located in South Central Montana, including Big Horn, Carbon, Golden Valley, Musselshell, Stillwater, Sweetgrass, Wheatland and Yellowstone Counties. The Draft RMP/EIS examines four management plan alternatives: (1) Continuation of existing management (no action); (2) Low level or resource production; (3) High level or environmental protection; and (4) Preferred management.

Public Participation: Copies of the Draft RMP/EIS are available from the Billings Resource Area Office, 810 E. Main, Billings, Montana 59105, phone (406) 657-6262. Public reading copies will be available for review at the following locations:

Office of Public Affairs, Location Building, 18th and C Streets NW., Washington, D.C. 20240;

BLM Montana State Office, Public Affairs Office, 222 N. 32nd Street, Billings, Montana 59107.

Written comments on the Draft RMP/EIS should be submitted between April 15 and July 15 (90-day comment period) to: Project Manager, Bureau of Land Management, 810 E. Main, Billings, Montana 59105. Oral or written comments will be received at formal public hearings to be held Tuesday, May 31 from 7 p.m. to 10 p.m. at the National Park Service Visitor Center, Lovell, Wyoming and June 1 from 7 p.m. to 10 p.m. at the Ramada Inn, Mullowney Land and I-90, Billings, Montana. Oral

or written comments concerning the adequacy of the Draft RMP/EIS will be considered in the preparation of the final RMP/EIS for the Billings Resource Area.

FOR FURTHER INFORMATION CONTACT: Project Manager, (406) 657–6262.

Michael J. Penfold,

State Director.

BILLING CODE 4310-84-M

Minerals Management Service

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Alaska Outer Continental Shelf (OCS)

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability of environmental documents prepared for OCS mineral pre-lease and exploration proposals on the Alaska OCS.

SUMMARY: the Minerals Management Service (MMS), in accordance with Federal regulations (40 CFR 1501.4 and 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related environmental assessments (EAs) and findings of no significant impact (FONSIs) prepared by the MMS for the following oil and gas pre-lease and exploration activities proposed on the Alaska OCS. This listing includes all proposals for which environmental documents were prepared by the Alaska OCS Region in the 3-month period preceding this notice.

Activity/Operator

Exploration Drilling Program for Lower Cook Inlet; Chevron U.S Inc., as operator for itself.

Location

The proposed wells will be located within the boundaries of OCS Lease Y–0243, situated about 25 miles due west of Anchor Point. After drilling of the first well, the decision to drill subsequent wells will depend upon the results and interpretation of well data obtained in the preceding wells. The location of each well is described as follows:

Lease and well No.	Location	Latitude/longitude
OCS Y–0243 No.1	7025' FNL 5225' FEL	59°46'45" N. 152°36'00" W.
OCS Y–0243 No.2	3100' FLS 5000' FEL	59°45'50" N. 152°35'57" W.
OCS Y–0243 No. 3	17009' FNL 8400' FEL	59°47'37" N. 152°36'23" W.

Environmental Assessment

No. AK–83–01

FONSI Date

March 18, 1983.

SUPPLEMENTARY INFORMATION: The MMS prepares EAs and FONSIs for proposals which relate to exploration for oil and gas resources on the Alaska OCS.

The EAs examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. EAs are used as a basis for determining whether or not approval of the proposal constitutes major Federal actions that significantly affect the quality of the human environment in the sense of NEPA section 102(2)(C). A FONSI is prepared in those instances where the MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

The FONSI and associated EA for the activity listed above are available for public inspection between the hours of 8 a.m. and 4 p.m., Monday through Friday (excluding lunch hour, 11:30 a.m. to 12:30 p.m.) at: Minerals Management Service, Alaska OCS Region, Office of the Regional Supervisor, Offshore Field Operations, 800 A Street, Suite 205, Anchorage, Alaska 99501, Phone: (907) 271–4303.

Persons interested in reviewing specific environmental documents or obtaining information about EAs and FONSIs prepared for activities on the Alaska OCS are encouraged to contact the above listed MMS office.

This notice constitutes the public notice of availability of environmental documents required under the NEPA regulations.

Alan D. Powers,

Regional Manager, Alaska OSC Region, Minerals Management Service.

BILLING CODE 4310-MR-M

Advisory Committee on Minerals Accountability; Meeting

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of monthly meeting.

SUMMARY: The purpose of the Advisory Committee on Minerals Accountability is to develop over a 1-year period an expended policy of cooperation with States and Indian tribes in the royalty management area and to develop a detailed plan for carrying out Federal/State/Indian cooperation on a comprehensive basis. The purpose of the Advisory Committee meeting will be to hold a panel discussion on the results to date of the eight joint cooperative Federal/State audit efforts of royalty payments to the States.

The meeting will be open to the public. However, facilities and space to accommodate attendees are limited and persons will be acommodated on a first-come, first-serve basis. Any member of the public may file with the Advisory Committee a written statement concerning the matters to be discussed.

Notice of the next monthly meeting will be published 15 days before the meeting is to take place.

DATE: Wednesday, April 27, 1983, 9:00 a.m.

ADDRESS: Sheraton Inn-Tulsa, 2201 North 77th East Avenue, Tulsa, Oklahoma.

FOR FURTHER INFORMATION CONTACT: John Sullivan, Department of the Interior, 18th & C Streets, N.W., Room 4216, Washington, D.C. 20240, telephone: (202) 343–3526.

SUPPLEMENTARY INFORMATION: The Advisory Committee was created by the Secretary of the Interior on November 15, 1982 (Order No. 3071).

The Committee will have one or more Executive Sessions at this meeting.

Dated: April 12, 1983.

Harold E. Doley, Jr.,

Director, Minerals Management Service.

BILLING CODE 4310-MR-M

Establishment of Procedures for a Voluntary Winnings Limit for Outer Continental Shelf Oil and Gas Leasing

AGENCY: Minerals Management Service, Interior.

ACTION: Extension of comment period.

SUMMARY: On March 16, 1983 (48 FR 11176), the Minerals Management Service (MMS) published in the **Federal Register** a Request for Comments. In that Request the MMS stated that the Department of the Interior was studying the possible use of procedures for receiving sealed bids in Outer Continental Shelf (OCS) oil and gas lease sales that would allow each bidder to establish a dollar limit on the

total of the high bids it wishes to have considered for acceptance. The objective of such a procedure would be to reduce unnecessary restraint in bidding by reducing the risk that bidders may overspend or underspend their budgets. That solicitation was intended to obtain comments and recommendations on whether there is a need for procedures to voluntarily limit winnings, and, if so, what procedures should be employed. The comment period was scheduled to expire on April 15, 1983. The comment period is extended to close of business, May 16, 1983.

DATE: Comments should be received by May 16, 1983.

ADDRESS: Director, Minerals Management Service, U.S. Department of Interior, 18th and C Streets, N.W., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Ms. Mary Vavrina, Minerals Management Service, MS 643, 12203 Sunrise Valley Drive, Reston, Virginia 22091, telephone (703) 860–7567.

Dated: April 11, 1983.

Robert L. Rioux,

Associate Director for Offshore Minerals Management.

BILLING CODE 4310–MR–M

National Park Service

National Park System Advisory Board; History Areas Committee; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the History Areas Committee of the Natioinal Park System Advisory Board will be held on Sunday, May 1, 1983, commencing at 8 p.m. in the Cotton Exchange Room, Holiday Inn Mills House Hotel, Meeting and Queen Streets, Charleston, South Carolina.

The purpose of the Advisory Board is to advise the Secretary of the Interior on matters relating to the National Park System and the administration of the Historic Sites Act of 1935. At this meeting the History Areas Committee of the National Park System Advisory Board will meet to consider potential National Historic Landmarks as follows:

1. Cape Canaveral Air Force Station, Cape Canaveral, Florida.
2. Joseph Reynolds House, Bristol, Rhode Island.
3. John Neville House (Woodville), vic., Heidelburg, Pennsylvania.
4. David Bradford House, Washington, Pennsylvania.
5. David Espy House, Bedford, Pennsylvania.
6. H. L. Mencken House, Baltimore, Maryland.

The Committee will also consider a report on the proposed land protection plan for the Palo Alto Battlefield National Historic Site, Texas; and hear a report on the status and direction of the National Historic Landmarks Program and History program of the National Park Service.

The formal recommendations of the committee will be made to the National Park System Advisory Board at its meeting on May 2 and 3 at the Holiday Inn Mills House Hotel, Charleston, South Carolina. No formal action of the Secretary of the Interior will be sought until after the Advisory Board has considered the recommendations of the Committee and acted thereon.

The meeting will be open to the public. However, facilities and space to accommodate members of the public are limited and persons will be accommodated on a first-come, first-served basis. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning the meeting, or who wish to submit written statements, may contact Mr. Benjamin Levy, History Division, National Park Service, Washington, D.C. at (202) 343–8164. Summary minutes of the meeting will be available for public inspection 4 to 6 weeks after the meeting in room 4209, 1100 L Street NW, Washington, D.C.

Dated: April 11, 1983.

Jean C. Henderer,

Chief, Cooperative Activities Division, National Park Service.

[FR Doc. 83–10076 Filed 4–14–83; 8:45 am]

BILLING CODE 4310–70–M

Urban Park and Recreation Recovery Program

AGENCY: National Park Service, Interior.

ACTION: Notice of UPARR Grant Round FY 1983—Rehabilitation Grants.

SUMMARY: This notice explains the intent of the Urban Park and Recreation Recovery Program (UPARR) and Public Law 98–8, emergency jobs legislation, regarding the availability of grant funds and types of grant proposals to be submitted by eligible jurisdictions for the UPARR FY 1983 grant round.

FOR FURTHER INFORMATION CONTACT: Mr. Sam L. Hall, Recreation Grants Division, National Park Service, Department of the Interior, Washington, D.C. 20240, (202) 343–3700.

SUPPLEMENTARY INFORMATION: The next UPARR grant round is tentatively scheduled for announcement in June. Forty (40) million dollars is available for Rehabilitation grants in this FY 83 competitive grant round. These grants will be utilizing funds appropriated under Public Law 98–8, Title I, to meet urgent national needs and result in productive jobs. The tentative target date for the submission of preapplications to NPS Regional offices is May 16, 1983.

Eligible Jurisdictions: Only those jurisdictions eligible for UPARR grants which have an approved Recovery Action Program (RAP) on file with an NPS Regional Office, will be eligible to compete for Rehabilitation grants under this grant round. All projects will be in accord with priorities outlined in the approved RAPs.

Special Provisions of Public Law 98–8: Any UPARR eligible jurisdiction (as defined under "Eligible Jurisdictions" above) may apply for a Rehabilitation grant under this supplemental appropriation. Final selection of grants will, however, take into account the provisions of Section 101(a) of Public Law 98–8 which require that "75 per centum of the funds appropriated * * * shall be made available for projects and activities in civil jurisdictions with high unemployment * * *." For purposes of this legislation, a list of civil jurisdictions meeting the unemployment, labor surplus, pocket of poverty, or other targeting provisions of the Act will be published and maintained by the Department of Labor, and will be used in the competitive selection of UPARR Rehabilitation grants. Criteria outlined in P.L. 98–8, Title I, Section 101(a) will be used by the Department of Labor to determine that list of civil jurisdictions.

Grant Implementation and Timing: To assure rapid implementation of work to be accomplished under these grants, grantees are advised that funds appropriated under Public Law 98–8 "shall be available only for grants for which: (1) Obligations are entered into before October 1, 1983, (2) work will be in progress before January 1, 1984, and (3) all Federal funds will be outlayed before September 30, 1984." Failure to meet these time frames will be grounds for withdrawal of grant offers or termination of grants. Grantees are also required to comply with all applicable federal laws and regulations for the UPARR program, which includes completion of a final grant agreement within 120 days of the grant offer.

To increase the benefits of the funds available under this appropriation, it is the intent of the legislation to maximize the impact of grants on the grantee's

high rate of unemployment, and to assure rapid implementation of work to be accomplished under the grants. To facilitate rapid implementation and completion of grants, the Service may determine, in accord with UPARR regulation 36 CFR Part 72, §§ 72.44(a) and 72.53(d)(6) [as incorporated with 45 CFR 58339, September 3, 1980] that an emergency exists, and thereby allow particular UPARR applicant jurisdictions "to begin the project and incur costs following the tentative grant offer. Such incurred costs will only be reimbursed if the grant is approved by NPS." This means that grant applicants may be allowed to begin certain work on a selected proposal on a reimbursable basis at the time of the grant offer public announcement date. However, actual fund reimbursement will be contingent upon satisfactory completion of the final grant.

Preapplication Requirements: Chief Executives applying for UPARR grants will be required to certify, in the preapplication, that the grantee has matching funds available, and will comply with the time frame legislative requirements for fund outlay and work in progress on the grant. This preapplication requirement may necessitate emergency meetings of grantee funding bodies (city councils/county boards) to assure that matching funds are available at the time of grant certification. Matching fund levels, activities eligible for Rehabilitation grants, and other standard requirements and provisions of the UPARR regulations (45 FR 71714), as amended) will remain unchanged from earlier grant rounds.

These requirements must be met to assure rapid implementation of work under the grants, which will maximize the impact of the appropriating legislation to meet urgent national needs and result in productive jobs. It is the intent of Congress that Public Law 98–8 be promptly carried out, and that the severity of the economic situation demands immediate action. Interested applicants should consult their National Park Service Regional offices for further information and grant round schedule dates.

National Park System Advisory Board; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that meetings of the National Park System Advisory Board will be held on May 2, 3 and 4, 1983, in Charleston, South Carolina.

The purpose of the Advisory Board is to advise the Secretary of the Interior on matters relating to the National Park System and the Administration of the Historic Sites Act of 1935.

Commencing at 9 a.m. on May 2 and 3 at the Holiday Inn Mills House Hotel, Meeting and Queen Streets, Charleston, the Advisory Board will be meeting in general business sessions to consider administrative matters pertaining to the Board; receive and discuss several task force reports; consider and make recommendations on proposed national historic landmark designations; and review and discuss policy and management issues affecting the National Park System. On May 4, from 9 a.m. to 11:30 a.m., the Board will visit Fort Moultrie and the park headquarters.

The meetings on May 2 and 3 will be open to the public. However, space and facilities to accommodate members of the public are limited and persons will be accommodated on a first-come-first-served basis. Any member of the public may file with the Advisory Board a written statement concerning matters to be discussed. Persons wishing further information concerning this meeting or who wish to submit written statements may contact Shirley Luikens, Advisory Boards and Commissions, National Park Service, Washington, D.C. 20240 (202–343–2012).

Summary minutes of the meeting will be available for public inspection 10 to 12 weeks after the meeting in Room 3328, Interior Building, Washington, D.C.

Dated: April 11, 1983.

Jean C. Henderer,

Chief, Cooperative Activities Division, National Park Service.

BILLING CODE 4310–70–M

Office of the Secretary

Decision on the Status of Kuwait Under the Mineral Leasing Act of 1920

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of Decision on the Status of Kuwait under the Mineral Leasing Act of 1920.

SUMMARY: In a notice published in the **Federal Register** of July 8, 1982 (47 FR 29720), the Department of the Interior requested that the public, by August 9, 1982, submit written comments with information that would be used in determining whether Kuwait had been denying privileges to citizens or corporations of this country, within the meaning of section 1 of the Mineral Leasing Act of 1920 (30 U.S.C. 181). The comment period was later extended to October 8, 1982 (47 FR 35559; August 16, 1982). On March 10, 1983, the Secretary of the Interior announced his decision—that the laws, customs and regulations of Kuwait deny similar or like privileges to citizens and corporations of the United States. Therefore, citizens of Kuwait generally may not, through stock ownership, stock holding or stock control, own interests in petroleum leases or permits issued under the provisions of that Act.

EFFECTIVE DATE: The decision concerning the status of Kuwait was issued on March 10, 1983.

ADDRESS: Any inquiries or comments should be addressed to Director (130), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20204.

FOR FURTHER INFORMATION CONTACT: Mark A. Alexander (202) 343–2091, or Harmon Kallman (202) 343–3171.

SUPPLEMENTARY INFORMATION: A copy of decision concerning Kuwait may be

obtained by writing the Director (130), Bureau of Land Management at the adress listed above. The Secretary stated that he would reassess his decision on Kuwait if and when that country takes positive steps to correct its discriminatory practices and can demonstrate that the problem no longer exists. Meanwhile, the decision means that citizens and corporations of Kuwait generally may not own interests in any onshore Federal oil and gas lease, combined hydrocarbon lease, gilsonite lease or permit, or oil or gas pipeline right-of-way permit, issued under the Mineral Leasing Act of 1920. As a result of this determination, Kuwait now is placed on the "non-reciprocal" list specified in the Department's Secretarial Decision Paper of May 7, 1982.

Dated: April 11, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

BILLING CODE 4310-10-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 328]

Investigation of Tank Car Allowance System

Second Supplemental Notice to the Parties

By an Order served March 1, 1983, the parties hereto were required to designate representatives for membership on the joint negotiating committee (the JNC) to be formed in this proceeding for the purpose of conducting negotiations in amendment or revision of the private tank car mileage allowance agreement adopted by the Commission on June 15, 1979, for tank car compensation. Various parties, in compliance with that Order, have designated representatives on the JNC and have so notified the Administrative Law Judge. The Appendix to this Notice shows the names of the individuals designated.

Several parties have also notified the Judge, in compliance with that Order, that all parties present at a meeting held on March 18, 1983, have agreed to designate three individuals as co-chairmen of the JNC, namely:

Mr. Edward D. Olmo, Manager, Land Transportation, Shell Oil Company, 2 Shell Plaza, P.O. Box 2099, Houston, TX 77001;

Mr. James Goff, President, General American Transportation Corporation, 120 S. Riverside Drive, Chicago, IL 60606; and

Mr. Walter P. Barrett, Vice President, Traffic, Union Pacific Railroad, Omaha, NE 68179.

The parties are advised, accordingly, that the JNC is deemed to be constituted as above described, subject to such additions and changes as may be required from time to time.

In the latter regard at least one party hereto, The Fertilizer Institute (TFI), and likely others as well, have not designated representatives to the JNC. Counsel for TFI has notified the Judge that TFI is precluded from designating representatives to the JNC and from participating in compensation negotiations for the reason that, in the opinion of counsel, TFI has not been granted the necessary immunity from the antitrust laws. The Judge regards it as highly desirable that TFI and other interested parties shall participate in the negotiating process, and that their full participation should commence promptly at such a time as they are advised by counsel that such participation is lawful. As noted in the prior Order, there are pending before the Commission certain requests for clarification in the matter of antitrust immunity in connection with this proceeding. The Commission's decision in that matter is expected to issue shortly.

By the Commission, Paul J. Clerman, Administrative Law Judge, on March 30, 1983.

Agatha L. Mergenovich,

Secretary.

Motor Carriers; Applications, Alternate Route Deviations, and Intrastate Applications

Motor Carrier Intrastate Application(s)

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to section 10931 (formerly Section 206(a)(6)) of the Interstate Commerce Act. These applications are governed by 49 CFR Part 1161 of the Commission's Rules of Practice which provide, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

By the Commission.

Agatha L. Mergenovich,

Secretary.

New York Docket No. T-381, filed March 22, 1983. Applicant: DELMOT MOTOR EXPRESS, INC., 1024 Lackawanna Ave., Elmira, NY 14901. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *General commodities:* Between the Counties of Chemung, Steuben, Tioga, Broome, Monroe, Chenango, Cortland, Tompkins, Schuyler and Livingston on the one hand, and, on the other, all points in the state. Intrastate, interstate and foreign commerce authority sought. Hearing: date, time and place not yet fixed. Request for procedural

information should be addressed to the New York State Department of Transportation, 1220 Washington Avenue, State Campus, Albany, NY 12232, and should not be directed to the Interstate Commerce Commission.

New York Docket No. T-21, filed March 29, 1983. Applicant: REDDICK AUTO EXPRESS, INC., Post Office Box 47, North Syracuse, NY 13201. Representative: Herbert M. Canter, Esq. and Benjamin D. Levine, Esq., 305 Montgomery St., Syracuse, NY 13202. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows; Transportation of: General commodities, as defined in section 800.1 of Title 17 of the Official Compilation of Codes, Rules and Regulations of the State of New York: Between all points in Madison, Oneida, Onodago and Oswego Counties, NY, on the one hand, and on the other, all points in the State of New York. Intrastate, interstate and foreign commerce authority sought. Hearing: date, time and place not yet fixed. Request for procedural information should be addressed to the New York State Department of Transportation, 1220 Washington Avenue, State Campus, Albany, NY 12232, and should not be directed to the Interstate Commerce Commission.

New York Docket No. T-10171, filed March 22, 1983. Applicant: OMINI MOVING & STORAGE, INC., 402 So. First Street, Lindenhurst, NY 11757. Representative: John L. Alfano, Esq., 550 Mamaroneck Ave., Harrison, NY 10528. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows; Transportation of: *Household goods:* Between New York City, Nassau and Suffolk Counties. Intrastate, interstate and foreign commerce authority sought. Hearing: date, time and place not yet fixed. Request for procedural information should be addressed to the New York Department of Transportation, 1220 Washington Avenue, State Campus, Albany, NY 12232, and should not be directed to the Intersate Commerce Commission.

BILLING CODE 7035-01

[OP1-135]

Motor Carriers; Finance Applications; Decision-Notice

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the commission's policy of simplifying grants of operating authority.

We Find

With the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the poposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with conditions set forth in the grant or grants or authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: April 4, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce and Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 1, (202) 275-7992.

MC-F-15200, filed March 15, 1983. HERTZ PENSKE TRUCK LEASING, INC. (600 Parsippany Road, Parsippany, NJ 07054), Control, GOLDSTON TRANSFER, INC. and ELECTRIC TRANSPORT, INC. (both of Highway No. 135, Eden, NC 27288). Representative: Robert L. Kendall, Jr., 1719 Parkard Building, Philadelphia, PA 19102. Hertz Penske, a non-carrier, seeks authority to acquire control of Goldston and Electric through the purchase by Hertz of all of the issued and outstanding capital stock of Goldston and Electric. The Hertz Corporation, the sole common stockholder of Hertz Penske and, in turn, RCA Corporation, which owns all of the outstanding stock of the Hertz Corporation, seek authority to acquire control of Goldston and Electric through the transaction. Goldston holds Certificates No. MC-146659 and subnumbers thereunder, authorizing the transportation of general commodities (with exceptions) and specified commodities such as textile products, malt beverages, rubber and plastic products, pulp, paper, and related products, and shipping devices, between points in Nevada, California, and the East, Midwest, and South. Electric holds Permits and Certificates in No. MC-143061 and subnumbers thereunder, authorizing the transportation of: (1) General Commodities (with exceptions) and specified commodities, including, but not limited to, commodities as are dealt in by a manufacturer of electrical products and automotive products, food and related products, pulp, paper, and

related products, and textile mill products, between points in the United States under contracts with various named shippers; and (2) general commodities (with exceptions) and specified commodities, including, but not limited to, such commodities as are dealt in or used by manufacturers of electronic equipment, air conditioning equipment, furnaces and parts, rubber and plastic products, pulp, paper and related products, containers, and textile mill products, between various points throughout the United States. Hertz Penske holds no authority from the Commission. Condition: The Hertz Corporation is a wholly-owned subsidiary of RCA Corporation. Therefore, RCA Corporation will, through the transaction, acquire control of Goldston and Electric, and is, thus, a necessary party to the transaction. Thus, as a condition to our approval, RCA Corporation must join in the application in the same manner as did The Hertz Corporation. Such joinder may be accomplished by properly executed affidavit or letter from the appropriate RCA official.

Note.—An application for temporary authority has been filed.

Motor Carriers; Finance Application; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C 10924, 10926, 10931 and 10932.

We find

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; and interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 47 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

IT IS ORDERED:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

Agatha L. Mergenovich,

Secretary

Please direct status inquiries to Team 5, (202) 275-7289.

MC-FC-81346. By decision of April 7, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 approved the transfer to TRANSCORD LEASING INC., of Louisville, KY, of Permit No. MC-153509 Sub 2 issued August 4, 1981 and Certificate No. MC-153509 Sub 4 issued October 2, 1981 to KENTUCKY DISPATCH, INC., of Louisville, KY authorizing the transportation of (1) *general commodities* (except classes A and B explosives), between points in Jefferson County, KY, on the one hand, and, on the other, points in the U.S. (except AK and HI), (2) *food and related products,* between points in the U.S. under continuing contract(s) with (a) Ralston Purina Company of St. Louis, MO, (b) Bremmer Biscuit Co., a division of Ralston Purina Co. of Louisville, KY, and (3) Foodmaker, Inc., a subsidiary of Ralston Purina Company, of San Diego, CA. Representative: James B. Murphy, Suite 102, Interchange Bldg., 835 E. Jefferson St., Louisville, KY 40202.

BILLING CODE 7035-01-M

[Volume No. OP5-176]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: April 7, 1983.

The following restriction removal applications, are governed by 49 CFR 1165. Part 1165 was published in the **Federal Register** of December 31, 1980.

at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restricition removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal satutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 3, Members Krock, Joyce and Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 5, at (202) 275–7289.

MC 128819 (Sub-3) X, filed March 25, 1983. Applicant: R. J. HALPIN, INC., Birchwood Lane, Lenox, MA 01240. Representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108; (617) 742–3530. Lead and Sub 2F certificates: (1) Broaden (a) limestone to "clay, concrete, glass or stone products, and ores and minerals" and (b) petroleum products to "petroleum, natural gas and their products"; (2) expand to county-wide authority: Berkshire County, MA (Lee and West Stockbridge, MA), and Albany, Rensselaer, Schenectady, and Saratoga Counties, NY (Albany and Rensselaer, NY); (3) Authorize radial authority in lieu of one-way authority; and (4) remove "in bulk" and "in tank vehicles" restrictions where they appear.

[FR Doc. 83-10019 Filed 4-14-83; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 2, (202) 275–7030.

Plankinton Avenue, Milwaukee, WI 53203; (414) 273–7410. As a *broker* of *general commodities* (except household goods), between points in the U.S. (except AK and HI).

Note.—Applicant also seeks authority in MC 167179 (B) published this same issue.

MC 167180, filed April 1, 1983. Applicant: LUND TRUCK PARTS, P.O. Box 368, Tea, SD 57064. Representative: Douglas Lund (same address as applicant) (605) 743–5611. Transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S. (except AK and HI).

Agatha L. Mergenovich,
Secretary.

[FR Doc. 83-10288 Filed 4-14-83; 8:45 am]
BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the Federal Register on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the Federal Register December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the Federal Register on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier that the transportation to be provided under the certificate is or will

be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 2, (202) 275–7030.

Volume OP2–167

Decided: April 7, 1983.

By the Commission, Review Board No. 1, members Parker, Chandler, and Fortier. (member Fortier not participating.)

MC 143503 (Sub-40), filed March 21, 1983. Applicant: MERCHANTS HOME DELIVERY SERVICE, INC., P.O. Box 5067, Oxnard, CA 93031. Representative: David B. Schneider, 210 West Park Ave., Suite 1120, Oklahoma City, OK 73102; (405) 232–9990. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S., under continuing contract(s) with J. C. Penney Company, Incorporated, of New York, NY.

Motor Carriers; Permanent Authority; Republications of Grants of Operating Rights Authority Prior To Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register.**

An original and one copy of petitions for intervention must be filed with the Commission within 30 days after the date of this **Federal Register** Notice. Applicant may file a verified statement in rebuttal within 50 days. Such pleadings shall comply with 49 CFR 1160.1—1160.49 addressing specifically the issue(s) indicated as the purpose for this republication.

Agatha L. Mergenovich,
Secretary.

Please direct status inquiries to Team 1, (202) 275–7992.

MC 46421 (Sub-19), (Republication), filed August 16, 1983, published in the **Federal Register** September 9, 1982, and republished this issue. Applicant:

ESCRO TRANSPORT LTD., 275 Mayville Avenue, Buffalo, NY 14217. Representative: Robert D. Gunderman, Can-Am Building, 101 Niagara Street, Buffalo, NY 14202. A decision by the Commission, Review Board Number 1, decided March 22, 1983, served March 29, 1983, finds that applicant is authorized to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *food and related products*, and (2) *such commodities* as are dealt in by grocery, food and drug business houses, between points in Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and the District of Columbia. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to include Massachusetts in the territorial grant.

MC 147021 (Sub-10), (Republication), filed October 25, 1983, published in the **Federal Register** November 15, 1982, and republished this issue. Applicant: C. SUMMERS, INC., 112 Spruce St., Elizabethville, PA 17023. Representative: Daniel W. Krane, P.O. Box E, Shiremanstown, PA 17011.A decision by the Commission, Review Board Number 1, decided February 25, 1983, served March 10, 1983, finds that applicant is authorized to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *machinery, building materials, and supplies*, (1) between points in Dauphin County, PA, on the one hand, and, on the other, points in the U.S. (except AK and HI), and (2) between Denver, CO, Van Alstyne, TX, Vancouver, WA, Ontario, CA, and Merrill, WI, and points in Pinellas County, FL, Clay County, IN, and Alameda County, CA, on the one hand, and, on the other, those points in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to include Merrill, WI, as an origin point in part 2 of the territorial description.

MC 156770 Sub 1, (Republication), filed March 10, 1983, published in the **Federal Register** March 24, 1982, and republished this issue. Applicant: L&M TRUCK AND TRAILER COMPANY, INC., P.O. Box 314–K, Rt. 1, Waskon, TX 75692. Representative: Paul J. Guilliot, 111 East Main Street, P.O. Box 2877, Lafayette, LA 70502. A decision by the Commission, Review Board Number 1, decided March 23, 1983, served April 6, 1983, finds that applicant is authorized to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *food and edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S. Applicant is fit, willing and able to properly perform the requested service and to conform to statutory and administrative requirements. The purpose of this republication is to reflect the proper scope of authority requested.

DEPARTMENT OF JUSTICE

Proposed Consent Decree and Related Settlement Documents in an Action Under the Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and Other Federal Statutes

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that by April 15, 1983, a proposed Consent Decree and related settlement documents in *United States* v. *Olin corporation,* Civil Action No. CV80-PT-5300-NE will be lodged in the United States District Court for the Northern District of Alabama.

This action was originally filed in 1980 under Section 7003 of the Resource Conservation Recovery Act, 42 U.S.C. 6973, and under other statutes, against the Olin Corporation which manufactured DDT at a plant site on the Redstone Arsenal in Huntsville, Alabama, between 1947 and 1970. An amended complaint alleges an additional cause of action under the Comprehensive Environmental Response Compensation and Liability Act, 42 U.S.C. 9601 et seq. Five related cases have also been filed in the Federal District Court for the Northern District of Alabama. One is a suit by the State of Alabama against Olin, raising claims similar to those presented by the United States. Four are tort suits by private plaintiffs seeking money damages from Olin arising out of harm allegedly caused by the DDT. The Consent Decree and related documents settle all of the related cases comprehensively.

The Consent Decree provides that Olin develop and implement a remedial plan to isolate DDT from the environment in the area. The settlement also provides for a health care fund to be used for health care and monitoring of persons who brought private tort suits and others who live in the area of the former plant and provides for a fund to be used to mitigate the effects of the DDT on the Wheeler National Wildlife Refuge which is in the area of the former plant. Settlement documents also include the health care plan, a comprehensive agreement settling claims and related releases.

The proposed Decree and all related settlement documents may be examined at the Office of the United States Attorney, 200 Federal Building, Birmingham, Alabama 35203, at the Region IV Office of the Environmental Protection Agency, 345 Courtland Street, NE, Atlanta, Georgia 30365 and at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1515, 10th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed Decree and related settlement documents may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $23.90 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

The Department of Justice will receive written comments relating to the proposed Consent Decree and related settlement documents for a period of thirty (30) days from the date of this notice. Comments should be directed to the Assistant Attorney General of the Land and Natural Resources Division of the Department of Justice, 10th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530, and should refer to *United States* v. *Olin Corporation,* DOJ Reference #90-7-1-150.

Anthony C. Liotta,
Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the Department issuing this form.

The title of the form.

The Agency form number, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small business or organizations are affected.

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202–523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S–5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202–395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Extension (adjustment to burden only)

Employment Standards Administration
Authorization for Release of Medical Information
CM–936
On occasion
Individual or households
3,000 responses; 250 hours; 1 form

This form is necessary in order to obtain medical information on a miner incurred outside of Department jurisdiction. The Privacy Act prevents hospitals, clinics or physicians from releasing this information without patient consent.

Employment and Training Administration
Nonmonetary Determination Activities
ETA–207
Quarterly
State or Local Governments
SIC 944
212 responses; 1166 hours; 1 form

Data are used to monitor the impact of disqualification provisions, to measure workload, and to appraise adequacy and effectiveness of State and Federal nonmonetary determination procedures.

Signed at Washington, D.C., this 12th day of April 1983.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510-24, 4510-28, 4510-43-M

Report on Computer Matching Project Involving Beneficiaries of State Unemployment Insurance

Summary: The Department of Labor, Office of Inspector General, announces a proposal to match by computer certain federal employee records with the listings for recipients of unemployment insurance compensation in several states and the District of Columbia. The matches will be made under written agreement between the participating states and federal agencies. A matching report is set forth below.

a. *Project Authority:* The Office of Inspector General (OIG) pursuant to its Authority Under Pub. L. 95-452 (Inspector General Act of 1978) has initiated a program of computer matching.

b. *Project Description:* One of the responsibilities of the Inspector General under the Act is to prevent and detect fraud and abuse in the programs and operations of the Department of Labor while keeping the Congress fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the need for and progress of corrective actions. Computer matching is the most efficient and also the least intrusive means of determining the propriety of program claimants receiving benefits.

The Employment and Training Administration (ETA) of the Department of Labor provides guidance and administrative funding for state operated Unemployment Insurance (UI) Programs. The state UI programs provide weekly compensation payments to unemployed workers. This matching effort will compare state UI claimant records to Federal employee payroll records to identify individuals who received UI compensation during periods of Federal employment. The organizations in the match are: the State Employment Security Agencies of California, New York, Arkansas, Tennessee, Mississippi, Maryland, Texas, Utah, Pennsylvania, Missouri, Massachusetts, Kentucky, Virginia and the District of Columbia; the U.S. Department of Health and Human Services and the Veterans Administration. The states will provide USDOL/OIG computer tapes with certain claimant data extracted from their benefit history files. The Federal agencies will provide USDOL/OIG computer tapes with certain employee payroll data extracted from their payroll files. The period covered in the match will be October 4, 1980 through October 2, 1982. The State and Federal tapes will be matched using specially developed computer programs which will be used only to support this project. The "raw hits" resulting from the crossmatch will be forwarded to the respective Federal agency of employment for validation that UI benefits were paid while actually employed. Through USDOL/OIG, validated listings of such payments will be forwarded to the appropriate state agency for administrative processing and recovery of validated overpayments. In addition, the Federal agency will use the validated listings to pursue investigations and take other appropriate action. Although scheduled as a one time match, recommendations for expanding the matching to include additional states and/or Federal agencies based on the results of this match may be made.

c. *Description of Records to be Matched:*

Health and Human Services—09-90-0017, Pay Leave, and Attendance Records, HHS/OS/ASPER, 47 FR 198, pg 45759, on October 13, 1982.

Veterans Administration—27NA047, Personnel and Accounting Pay System—VA, 42 FR 187, pg. 49740, on September 27, 1977.

d. *Period of the Match:* The first match should begin approximately in May 1983, and the final match during June 1983. Follow-up procedures may extend through the end of calendar year 1983.

e. *Privacy Protection and Data security:* The personal privacy of individuals identified on tapes is protected by strict compliance with the Privacy Act (Public Law 93-579) and OMB Circular A-108. Information from matching programs is used only for official purposes and "raw hits" are not released to the press or to the public.

All automated data sets will be password protected, and only those who need to know will be given access to the data sets or the passwords. All paper listings of data will be stored in a room which will be locked when not occupied.

f. *Disposition of Source Records and Hits:* Source records will not become part of the DOL/OIG system of records and will be returned to the providing agency and/or destroyed within six months after completion of the match. USDOL/OIG will not retain copies of "raw hit" listings. As stated above these listings will be forwarded to the appropriate Federal agencies of employment for validation. The "raw hit" listings will not be retained by the Federal agencies for more than one year. The "validated hit" listings may be retained by USDOL/OIG, the participating Federal agencies and State Employment Security Agencies for up to three years, (commencing upon completion of the validation process) and will then be destroyed.

Signed at Washington, D.C., on the 7th day of April, 1983.

J. Brian Hyland,

Deputy Inspector General.

BILLING CODE 4510-21-M

Wage and Hour Division

Certificates Authorizing the Employment of Learners at Special Minimum Wages

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act (52 Stat. 1062, as amended; U.S.C. 214), Reorganization Plan No 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and Administrative Order No. 1-76 (41 FR 18949), the firms listed in this notice have been issued special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates otherwise applicable under section 6 of the Act. For each certificate, the effective and expiration dates, number of proportion of learners and the principal product manufactured by the establishment are as indicated. Conditions on occupations, wage rates and learning periods which are provided in certificates issued under the supplemental industry regulations cited in the captions below are as established in those regulations.

The following certificate was issued under the apparel industry learner regulations (29 CFR 522.1 to 522.9, as amended and 522.20 to 522.25 as amended).

Flushing Shirt Mfg. Co., Inc., Grantsville, MD; 1-18-83 to 1-17-84; 10 percent of the total number of factory

production workers for normal labor turnover purposes. (Men's shirts)

The following certificate was issued under the knitted wear industry regulations (29 CFR 522.1 to 522.9, as amended and 522.30 to 522.35, as amended.)

Somerset Mfg. Co., Inc., Somerset, PA: 3–8–83 to 3–7–84; 5 percent of the total number of factory production workers for normal labor turnover purposes. (Ladies' slips and sleepwear)

The following certificate was issued in Puerto Rico.

Glamourette Fashion Mills, Inc., Quebradillas, PR; 2–28–83 to 2–27–84; 61 learners for normal labor turnover purposes in the occupations of: (1) knitting, for a learning period of 480 hours at the rate of $3.02 an hour for the first 240 hours an $3.19 and hour for the remaining 240; (2) machine stitching-seaming, for a learning period of 320 hours at the rate of $3.02 an hour for the first 160 hours and $3.19 an hour for the remaining 160 hours; (3) pressing for a learning period of 320 hours at the rate of $3.02 an hour for the first 160 hours and $3.19 an hour for the remaining 160 hours; and (4) kettle handlers and dyers for a learning period of 240 hours at the rate of $3.02 an hour. (Sweaters and related products)

Each certificate has been issued upon the representations of the employer which, among other things were that employment of learners at special minimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available.

The certificate may be annulled or withdrawn as indicated therein, in the manner provided in 29 CFR Part 528. Any person aggrieved by the issuance of any of these certificates may seek a review or consideration thereof on or before May 2, 1983.

Signed at Washington, DC this 8th day of April 1983.

Arthur H. Korn,

Authorized Representative of the Administrator.

BILLING CODE 4510–27–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Visual Arts Advisory Panel (Challenge/Advancement); Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Visual Arts Advisory Panel (Challenge/Advancement) to the National Council on the Arts will be held on May 4–6, 1983, form 9:00 a.m.–5:30 p.m., at the Nancy Hanks Center, 1100 Pennsylvania Avenue NW., Washington, D.C. 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634–6070.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

April 11, 1983.

BILLING CODE 7537–01–M

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Behavioral and Neural Sciences; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Behavioral and Neural Sciences—Subpanel for Anthropology (Physical- & Archaeology).

Date and time: May 11, 1983—8:30–6:00 p.m.

Place: National Science Foundation, 1800 G Street, NW., Room 1224, Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Charles L. Redman, Anthropology Program, Room 320, National Science Foundation, Washington, D.C. 20550. (202) 357–7804.

Purpose of subpanel: To provide advice and recommendations concerning support for research in archaeology and physical anthropology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: the proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority of close meeting: this determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: April 21, 1983.

M. Rebecca Winkler,

Committee Management Coordinator.

BILLING CODE 7555–01–M

Advisory Committee for International Programs; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Committee for International Programs.

Dates: May 6, 1983, 8:30 a.m. to 4:00 p.m.

Place: National Science Foundation, 1800 G Street, NW., Washington, D.C.; Room 1224.

Type of meeting: Part-open.

Contact person: Dr. Bodo Bartocha, Director, Division of International Programs, National Science Foundation, Washington, D.C. 20550. Telephone (202) 357–9552.

Summary of minutes: May be obtained from Contact Person.

Purpose of Committee: To provide advice, recommendations, and oversight related to support for international cooperation in science and engineering.

Agenda

8:30 a.m. to 11:15 a.m., open.

11:15 a.m. to 11:45 a.m., closed.

1:00 p.m. to 4:00 p.m., open.

8:30 a.m. Recent events affecting the Division of International Programs. NSF policy and planning for international scientific cooperation. Discussion of the Committee's General Report.

11:15 a.m. Review of Peer Oversight Report drafted by the Oversight Subcommittee.

1:00 p.m. Summary of science in international relations. Developing countries updates: India and Mexico

Reason for Closing

The Committee will be reviewing documentation of program actions involving peer reviews and involving privileged information contained in declined and withdrawn proposals. These matters cannot be separated from discussion of public matters relating to awards and are within exemptions (4) and (6) of 5 U.S.C. 552(c). Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: April 21, 1983.

M. Rebecca Winkler,

Committee Management Coordinator.

Advisory Committee for Mathematical and Computer Sciences, Subcommittee for Computer Science; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Subcommittee for Computer Science of the Advisory Committee for Mathematical and Computer Sciences.

Date and Time: May 2 and 3, 1983—9:00 a.m. each day.

Place: Room 338, National Science Foundation, 1800 G. Street, N.W., Washington, D.C. 20550.

Type of meeting: All Sessions Open

—05/02 open 9:00 a.m. to 5:00 p.m.
—05/03 open 9:00 a.m. to 3:00 p.m.

Contact person: Mr. Kent K. Curtis, Head, Computer Science Section, Room 339, National Science Foundation, Washington, D.C. 20550. Telephone: (202) 357-9747. Anyone planning to attend this meeting should notify Mr. Curtis no later than 04/26/83.

Purpose of Subcommittee: To provide advice and recommendations concerning support for research in Computer Science.

Summary minutes: May be obtained from the contact person at the above address.

Monday, May 2, 1983—9:00 a.m. to 5:00 p.m.—Open

9:00-9:15—Opening Remarks, K. K. Curtis
9:15-10:00—Division Director's Remarks, E. F. Infante
10:00-10:30—Assistant Director's Remarks, M. Bardon
10:30-11:30—CSNET Status and Issues, W. R. Adrion
11:30-12:00—Objectives and Procedures for Conducting CER Program Review, W. R. Adrion
12:00-1:00—Lunch
1:00-2:00—Equipment Program Status and Issues, J. R. Lehmann
2:00-5:00—Other Federal Agency Support, Representatives of DOE, NASA, ONR, ARO, AFOSR, and DARPA

Tuesday, May 3, 1983—9:00 a.m. to 3:00 p.m.—Open

9:00-12:30—Directions, Needs, and Appropriate Responses, K. K. Curtis
12:30-1:30—Lunch
1:30-3:00—Chairman's Items, A. Aho
3:00—Adjourn

Dated: April 12, 1983.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-293]

Boston Edison Co. (Pilgrim Nuclear Power Station); Exemption

I

Boston Edison Company (BECo, licensee) is the holder of Facility Operating Licensee No. DPR-35 which authorizes operation of the Pilgrim Nuclear Power Station. This license provides, among other things, that it is subject to all Rules, Regulations, and Orders of the Commission now or hereafter in effect.

The facility is comprised of a boiling water reactor at the licensee's site located in Plymouth County, Massachusetts.

II

Section IV.F of Appendix E to 10 CFR Part 50 requires that an emergency preparedness exercise be conducted at least on annual basis. A full scale emergency preparedness exercise was conducted by Boston Edison Company on March 3, 1982.

By letter dated November 17, 1982, Boston Edison Company, stated that the Federal Emergency Management Agency (FEMA) requested BEC'o cooperation in rescheduling the annual offsite emergency planning exercise for Pilgrim Nuclear Power Station to a date late in June 1983, to allow for the full-scale participation of all parties. Accordingly, the licensee requested NRC approval of a one-time exemption from the schedular requirements of 10 CFR Part 50, Appendix E, Section IV.F to allow BECo's annual emergency preparedness exercise to be conducted in late June, 1983.

The licensee has committed to continual training of personnel as

outlined in the Pilgrim Nuclear Power Station Emergency Plan to ensure that personnel remain familiar with emergency response duties. Therefore, the Pilgrm emergency plan will remain fully functional during the period of this one-time delay in performing the emergency preparedness drill.

Based on this; and on the fact that the last full-scale exercise was held on March 3, 1982 and that the exercise demonstrated an acceptable level of preparedness; and our belief that the most effective and beneficial annual exercises are those involving full-scale participation of State and local government organizations, we find that a delay in performing the annual emergency preparedness exercise will not adversely affect the overall state of emergency preparedness at Pilgrim. The staff therefore concludes that an exemption should be granted.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest. Therefore, the Commission hereby approves the following exemption:

The licensee is exempt from the requirement of Section IV.F of Appendix E to 10 CFR Part 50 with respect to the requirement for conducting an annual emergency preparedness exercise, and is required to conduct the next emergency preparedness exercise for the Pilgrim Nuclear Power Station no later than June 30, 1983.

The NRC staff has determined that the granting of this exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 30th day of March 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 83-10090 Filed 4-14-83; 8:45 am]
BILLING CODE 7590-01-M

[Docket Nos. 50-445, 50-446; (Application for Operating License)]

Texas Utilities Generating Co., et. al. (Comanche Peak Steam Electric Station, Units 1 and 2); Evidentiary Hearing

April 12, 1983

From May 16-20, 1983 the Atomic Safety and Licensing Board (Board) will conduct an evidentiary hearing in this case at the Fritz Lantham Building, Room 5B14, 819 Taylor Street, Fort Worth, Texas. The purpose of the hearing is to receive evidence on a staff study of quality assurance at Comanche Peak (and some related issues), on emergency planning and on some Board questions about unresolved safety issues and board notices.

Ordinary hours of hearing will be from 9 a.m. to 5 p.m., subject to periodic recesses and to extension of hours in order to complete the hearing during the scheduled time period.

Members of the public who are not parties to the proceeding are invited to submit written limited appearance statements and to make brief oral presentations to the Board during a limited-appearance session to be held beginning at 8 p.m. on May 16, 1983. The principal purpose of these statements is to inform the Board about safety and environmental issues which have been placed before it by the parties or about other issues of such importance that the Board may decide to consider them even though the parties have not raised them.

Although statements generally will be permitted regardless of their direct relevance, the Board's authority is limited; in particular, it is prohibited from reaching decisions contrary to the Commission's rules and regulations. Consequently, some questions may be more effectively addressed in petitions to the Nuclear Regulatory Commission or the Congress of the United States.

Limited appearance statements will become part of the record of the case. Generally, written statements are not limited in length. However, oral presentations will be limited to 5 minutes, subject to extension at the Board's discretion. Oral presentations should summarize the key points made in written testimony and, if additional time may be needed, these statements should indicate the specific subjects to be discussed if an extension of time is granted.

Persons wishing to appear may notify the Board of their intention by writing to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Attention: Docketing and Service Branch, Washington, D.C. 20555. Please refer to the Docket Nos. 50-445 and 50-446. People unable to provide advance notice of their intention to participate may schedule an oral appearance by notifying the Board of their intention, in writing, no later than 10 a.m. on Monday morning, May 16, 1983.

For the Atomic Safety and Licensing Board.

Peter B. Bloch,

Chairman, Administrative Judge.

Bethesda, Maryland.

BILLING CODE 7590-01-M

International Atomic Energy Agency Draft Safety Guide; Availability of Draft for Public Comment

The International Atomic Energy Agency (IAEA) is completing development of a number of internationally acceptable codes of practice and safety guides for nuclear power plants. These codes and guides are in the following five areas: Government Organization, Design, Siting, Operation, and Quality Assurance. All of the codes and most of the proposed safety guides have been completed. The purpose of these codes and guides is to provide guidance to countries beginning nuclear power programs.

The IAEA codes of practice and safety guides are developed in the following way. The IAEA receives and collates relevant existing information used by member countries in a specified safety area. Using this collation as a starting point, an IAEA working group of a few experts develops a preliminary draft of a code or safety guide which is then reviewed and modified by an IAEA Technical Review Committee corresponding to the specified area. The draft code of practice or safety guide is then sent to the IAEA Senior Advisory Group which reviews and modifies as necessary the drafts of all codes and guides prior to their being forwarded to the IAEA Secretariat and thence to the IAEA Member States for comments. Taking into account the comments received from the Member States, the Senior Advisory Group then modifies the draft as necessary to reach agreement before forwarding it to the IAEA Director General with a recommendation that it be accepted.

As part of this program, Safety Guide SG-D14, "Design for Reactor Core Safety in Nuclear Power Plants," has been developed. An IAEA working group, consisting of Mr. V. C. Orpen and Mr. A. C. Whittier from Canada, Mr. F. W. Aisch from the Federal Republic of Germany, Mr. S. Saito from Japan, and Mr. A. F. Goode from the United Kingdom, developed this guide from an IAEA collation. The working group draft was modified by the IAEA Technical Review Committee, and we are now soliciting public comment on this draft (Rev. 3, 12/16/82). Comments received

by the Director, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, by June 1, 1983, will be particularly useful to the U.S. representatives of the Technical Review Committee and the Senior Advisory Group in developing their positions on its adequacy prior to their next IAEA meetings.

Single copies of this draft Safety Guide may be obtained by a written request to the Director, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(5 U.S.C. 522(a))

Dated at Washington, D.C. this 11th day of April 1983.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Nuclear Regulatory Research.

[FR Doc. 83-10082 Filed 4-14-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-220]

Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station Unit No. 1; Exemption

I

The Niagara Mohawk Power Corporation (the licensee) is the holder of Facility Operating License No. DPR-63 which authorizes the licensee to operate the Nine Mile Point Nuclear Station, Unit No. 1 (the facility) at power levels not in excess of 1850 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Oswego County, New York. The license provides, among other things, that it is subject to all rules, regulations and Order of the Commission now or hereafter in effect.

II

Section 50.48 of 10 CFR Part 50 requires that licensed operating reactors be subject to the requirements of Appendix R of 10 CFR Part 50. Appendix R contains the general and specific requirements for fire protection programs at licensed nuclear facilities. On February 17, 1981, the fire protection rule for nuclear power plants, 10 CFR 50.48 and Appendix R, become effective. This rule required all licensees of plants licensed prior to January 1, 1979, to submit by March 19, 1981: (1) Plans and schedules for meeting the applicable requirements of Appendix R, (2) a design description of any modifications proposed to provide alternative safe shutdown capability pursuant to Paragraph III.G.3 of Appendix R, and (3) exemption requests for which the tolling provision of § 50.48(c)(6) was to be invoked.

The licensee responded to these requirements by letter dated March 19, 1981, and supplemented its response by information contained in letters dated June 9, 1981, October 1, 1982, and December 3, 1982.

In these submittals, the licensee requested certain exemptions from the requirements of Section III.G of Appendix R to 10 CFR Part 50. Section III.G of Appendix R requires that one train of cables and equipment necessary to achieve and maintain safe shutdown be maintained free of fire damage by one of the following means:

a. Separation of cables and equipment and associated non-safety circuits of redundant trains by a fire barrier having a 3-hour rating. Structural steel forming a part of or supporting such fire barriers shall be protected to provide fire resistance equivalent to that required of the barrier;

b. Separation of cables and equipment and associated non-safety circuits of redundant trains by a horizontal distance of more than 20 feet with no intervening combustibles or fire hazards. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area; or

c. Enclosure of cables and equipment and associated non-safety circuits of one redundant train in a fire barrier having a 1-hour rating. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area.

If these conditions are not met, Section III.G.3 requires alternative shutdown capability independent of the fire area of concern.

The exemption requests we found to be acceptable are as follows:

1. The licensee requested an exemption from the provisions of Section III.G of Appendix R for the battery board rooms (Fire Zones B1A and B1B) because their boundary walls do not provide the required three-hour rated barriers.

The licensee justified the exemption by stating that: redundant systems, equipment and associated cabling in the battery board rooms are separated by a two-hour fire wall; transient combustibles are essentialy non-existent, smoke detectors and manual fire suppression are available; fixed combustible loading is minimal; combustible storage and personnel access is controlled; and automatic suppression capabilities are installed in adjacent areas.

We have reviewed the licensee's submittals and agree with the licensee's evaluation that the area does not comply with Section III.G because the boundary walls are not the required three-hour rated barriers. However, we find that the combustible loading in these rooms is significantly lower than the fire resistance rating of the boundary walls and that detection and manual suppression capability is provided in adjacent areas. We find that this protection, in conjunction with the other features identified by the licensee, provide sufficient fire protection capability such that reasonable assurance exists that one train of components needed for safe shutdown will be maintained free of fire damage.

Therefore, we conclude that the existing fire protection program for the battery board rooms (Fire Zones B1A and B1B) provides a level of fire protection equivalent to the technical requirements of Section III.G of Appendix R and that the licensee's request should be granted.

2. The licensee has requested an exemption from the provisions of Section III.G of Appendix R for the battery rooms located in Fire Zones B2A and B2B because their boundary walls are not the required three hour barriers.

The licensee has justified the exemption request by stating that: Redundant systems, equipment and associated cabling are separated by a two-hour rated fire barrier; transient combustibles are essentially nonexistent; smoke detectors are available; manual suppression is available in adjacent areas; fixed combustible loading in the area is light; and that access to the area is restricted.

We have reviewed the licensee's submittals and agree with the licensee's evaluation that the area does not comply with Section III.G of Appendix R because the boundary walls are not the required three hour barriers. However, we find that the combustible loading in these rooms is significantly lower that the fire resistance rating of the existing boundary walls and that detection and manual suppression capability are provided in adjacent areas. We find that this protection, in conjunction with the other features identified by the licensee, provide sufficient fire protection capability such that reasonable assurance exists that one train of components needed for safe shutdown will be maintained free of fire damage.

Therefore, we conclude that the existing fire protection program for the battery rooms in Fire Zones B2A and B2B provides a level of fire protection equivalent to the technical requirements

of Section III.G of Appendix R and that the licensee's request should be granted.

3. The licensee has requested an exemption from Section III.G for the boundary wall that separates fire Sub-Areas 1 and 2 in the upper level of the Reactor Building and for the boundary wall that separates Fire Sub-Areas 1 and 2 from Fire Zone T8A and T8B in the adjacent Turbine Building because the area does not have a three-hour rated barrier or an automatic suppression system, nor is there an alternate shutdown capability independent of the area.

The licensee has justified the exemption by stating that: redundant systems, equipment, and associated cabling are separated by twenty feet of separation without intervening combustibles; transient combustible loadings are low and controlled; smoke detectors are provided; manual fire suppression is available; fixed combustible loading is extremely light; and maximum fire severity is less than one minute.

We have reviewed the licensee's submittals and agree with its evaluation that the area does not comply with Section III.G because it is not provided with a three-hour rated barrier or an automatic suppression system, and that no alternate shutdown capability independent of the area exists. However, we find that due to the low in-situ fire load, large room volume and a ceiling height in excess of fifty feet, the probability of a fire occurrence of sufficient magnitude to damage redundant cables and components is low. In addition, the fire hazard associated with this small amount of cables has been further reduced by coating the intervening cables with a flame-retardant coating.

Therefore, we conclude that the existing fire protection program provides reasonable assurance that one train of cables and components needed for safe shutdown in Fire Sub-Areas 1 and 2 will be maintained free of fire damage, and the existing fire wall between these sub-areas and the adjacent Fire Zones T8A and T8B in the Turbine Building is adequate to prevent fire propagation to these areas. We also conclude that these measures provide a level of fire protection equivalent to the technical requirements of Section III.G of Appendix R and that the licensee's request should be granted.

4. The licensee has requested an exemption from the provisions of Section III.G of Appendix R for the boundary wall between Fire Zones T8A and T8B along with common boundary of column line 8.

The licensee has justified the exemption by stating that: redundant systems, equipment and associated cabling are separated by twenty feet of separation without intervening combustibles. Transient combustible loadings are low and controlled; early warning ionization-type smoke detectors are used in each fire zone which alarm in the control room; manual suppression is available within and outside each fire zone; and fixed combustible loading is extremely light, with controlled storage of transient combustibles.

We have reviewed the licensee's submittals and agree with the licensee's evaluation which concludes that this area does not comply with Section III.G because the boundary wall between redundant divisions is not three-hour rated barrier, and automatic suppression, or alternate shutdown capability independent of the area is not provided. However, we find that redundant components are separated by twenty feet with only a small amount of intervening combustibles, and that the fire hazard associated with these combustibles has been further reduced by coating the intervening combustibles (cables) with a flame retardant coating. In addition, due to the physical configuration of the room and the materials used in the safety related applications in this area, we find the probability that a fire could damage redundant safety related components is low.

Therefore, we conclude that the existing fire protection program for Fire Zones T8A and T8B provides a level of fire protection equivalent to the technical requirements of Section III.G of Appendix R and that the licensee's request should be granted.

5. The licensee has requested an exemption from the provision of Section III.G of Appendix R for the control room ceiling because the ceiling does not have a three-hour rating from the control room side due to unprotected structural steel members.

The licensee has justified the exemption by stating that: ionization type smoke detectors are installed in the control room and in each control console; manual suppression is available; the control room is continuously manned; access to the control room is controlled; storage of transient combustibles is not allowed; control room systems are capable of removing smoke and byproducts; fire loading is minimal; no safe shutdown systems are located in fire zones above the control room; the ceiling area is well above the combustibles in the control room; and the majority of the combustibles in the control room are enclosed in metal panels.

We have reviewed the licensee's submittals and agree with the licensee's evaluation that the area does not comply with Section III.G because the control room is not provided with a fixed fire suppression system, and is not completely enclosed by three-hour rated fire barriers. However, we find that the fire protection features currently installed in the control room and the continuous manning of the control room provide adequate defense-in-depth fire fighting capability for this area. In addition, we agree that the other features identified by the licensee provide adequate assurance that any fire initiated in the control room would be rapidly extinguished before significant fire damage occurred.

Therefore, we conclude that the existing fire protection program for the control room provides a level of fire protection equivalent to the technical requirements of Section III.G of Appendix R, and that the licensee's request should be granted.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest. Therefore, the Commission hereby approves the following exemption request:

Exemption is granted from the requirements of Section III.G of Appendix R of 10 CFR Part 50 for the following areas:

1. Battery Board Rooms (Fire Zones B1A and B1B).

2. Battery Rooms (Fire Zones B2A and B2B).

3. Reactor Building, upper level (Fire Sub-Areas 1 and 2), including the boundary wall that separates Fire Sub-Areas 1 and 2 from the Fire Zones T8A and T8B in the adjacent Turbine Building.

4. Turbine Building, upper level (Fire Zones T8A and T8B).

5. Control Room (Fire Zone C3).

The NRC staff has determined that the granting of these exemptions will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 21st day of March 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 83-10081 4-14-83; 8:45 am]

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13152; 812-5447]

Hartford Variable Annuity Life Insurance Co. et al; Application

April 8, 1983.

Notice is hereby given that Hartford Variable Annuity Life Insurance Company ("HVA"), Hartford Equity Sales Company, Inc. ("Equity Sales"), Hartford variable Life Insurance Company DC Variable Account–I ("DC–I"), Hartford Variable Annuity Life Insurance Company DC Variable Account-II ("DC–II"), Hartford Variable Annuity Life Insurance Company QP Variable Account ("QP") Hartford Variable Annuity Life Insurance Company NQ Variable Account ("NQ") Hartford Variable Annuity Life Insurance Company Variable Account "A" ("Account A"), Hartford Fund, Incorporated ("Hartford Fund") Hartford Advisers Fund, Inc. ("Advisers"), HVA Bond Fund, Inc. ("HVA-Bond"), HVA Money Market Fund, Inc. ("HVA-Money"), HVA Government Securities Fund, Inc. ("HVA-Government Securities") and HVA Advisers Fund, Inc. ("HVA-Advisers") (hereinafter collectively referred to as "Applicants"), Hartford Plaza, Hartford, Conn. 06115, filed an application on February 3, 1983, and amendments thereto on March 9, 1983 and March 29, 1983, for an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") exempting Applicants from the provisions of Sections 2(a)(32), 2(a)(35), 14(a), 22(c), 26(a)(2)(C), 26(a)(2)(D), 27(c)(1), 27(c)(2) and 27(d) of the Act and Rule 22c–1 thereunder to the extent necessary to permit the Applicants' proposed offering of certain variable annuity contracts, pursuant to Section 6(c) amending prior orders, and pursuant to Sections 11(a) and 11(c) of the Act approving the terms of certain exchange offers. Applicants also request an order pursuant to Section 17(b) of the act and Rule 17d–1 under Section 17(d) of the Act exempting certain transactions from the provisions of Sections 17(a) and 17(d) of the Act and for an order pursuant to Section 26(b) of the Act approving the substitution of the funding media of certain varable annuity contracts. All interested persons are referred to the application and amendments on file with the Commission for a statement of the facts and representation contained therein, which are summarized below, and are referred to the Act and Rules thereunder for a statement of the relevant statutory provisions.

HVA is a stock life insurance company acting as sponsor-depositor of DC–I, DC–II, Account A, Account QP and Account NQ, each of which is a separate account registered under the Act as a unit investment trust (collectively, the "unit trust"). Hartford Fund, which presently serves as the underlying investment medium for the unit trusts, is registered under the Act as an open-end, diversified, management investment company and is presently organized as a series investment company with a bond, stock, and money market portfolio. HVA-Bond, HVA-Money Maket, HVA-Government Securities, Advisers, and HVA Advisers are newly-organized investment companies register under the Act as open-end management investment companies (the "HVA Funds"). Equity Sales is a registered broker-dealer and a wholly-owned subsidiary of HVA.

Applications request an order of the Commission to the extent necessary to take the following actions.

1. Issuance of New Contracts and Amendment of Prior Orders

HVA presently issues Group Master Variable Annuity Contracts through DC–II ("Old Contracts") and previously obtained all necessary "start-up" relief for the issuance of these contracts (see Investment Company Act Rel. No. 12065 (Dec. 1, 1981). HVA also issues other variable annuity contracts through the unit trusts ("Other Contracts") and previously obtained all necessary "start-up" relief for the issuance of these contracts (*see*

Investment Company Act Rel. Nos. 9906 (Aug. 24, 1977), 9907 (Aug. 24, 1977), 9908 (Aug. 24, 1977), 11428 (Nov. 4, 1980), and 12065 (Dec. 1, 1981). HVA now proposes to issue a new series of Group Master Variable Annuity Contracts ("New Contracts") identical to the Old Contracts except for the schedule of contingent deferred sales charges applicable to and the level of the annual policy fee to be deducted from such contracts.

With respect to the sales charge, Applicants propose to implement the revised sales load schedule described in the application and represent that in no event will the sales charge imposed on Old or New Contracts exceed 8½% of the gross purchase payments made. Applicants also represent that the schedule of sales charges on the Other Contracts will remain unchanged and also in no event exceed 8½% of purchase payments made, and request that the prior orders issued with respect to these contracts be amended to include this limitation.

With respect to the annual policy fee, HVA also proposes to reduce the amount of the annual policy fee, which is presently $25 under the Old Contracts, to $18 under the New Contracts, as well as reducing the maximum permissible fee that may be imposed, which is presently $50 under the Old Contracts, to $36 under the New Contracts. Applicants represent that the annual fee will cover the costs incurred in setting up and maintaining contractowners' accounts and that they do not anticipate any profit from this fee. Applicants also represent that any increases in the annual fee up to the maximum permisaible amount will be made only to cover anticipated increases in costs. Applicants further propose not to pro-rate the annual fee upon redemption and represent that this is appropriate as many of the costs of maintaining a contract are incurred regardless of when the contract is redeemed.

2. Reorganization of Hartford Fund and Substitution of Shares

Applicants also propose to reorganize and recapitalize the Hartford Fund. Under the terms of the Old and Other Contracts, contractowners have the option to vary the allocation of their investments between the three existing portfolios of Hartford Fund. As described in the application, Hartford Fund proposes to reorganize by terminating the bond and money market portfolios and changing the Hartford Fund's name to HVA Stock Fund. In connection with this reorganization, the securities underlying the money market and bond portfolios wil be transferred to newly created HVA-Bond and HVA-Money Market and the shares of HVA-Bond and HVA-Money Market will be substituted for the shares of the bond and money market portfolios. After the reorganization, the HVA Funds and the HVA Stock Fund will be the investment alternatives under the Old, New, and Other Contracts, except that the shares of Advisers will not be available to owners of Other Contracts issued through Account NQ.

Applicants represent that the proposed reorganization and recapitalization of Hartford Fund is occasioned by the Internal Revenue Service's position that a series company is taxable as a single entity for Federal income tax purposes. Applicants state that the boards of directors of Hartford

Fund and HVA have determined that taxation of Hartford Fund as a single entity could be detrimental to owners of non-tax qualified contracts in the computation and utilization of capital gains and losses and tax reserve set asides. The boards of directors therefore determined that the reorganization of Hartford Fund is in the best interests of contractowners and Applicants represent that HVA will pay the expenses of the reorganization. Applicants also represent that the shares of HVA-Bonds and HVA-Money Market to be substituted are generally comparable in both character and quality to the shares of Hartford Fund that will become unavailable. Applicants also represent that contractowners will be given written notice of the substitution and may surrender their contracts.

3. Exchange Offers

In addition, Applicants propose to permit owners of Old, New, and Other Contracts to exchange shares of the underlying investment media of their contracts for shares of the other available investment media, as described in the application and subject to certain conditions. In connection with these transfers in the case of New Contracts only, Applicants propose to deduct a $5 transfer fee. Applicants represent that the transfer charge approximates the administrative expenses to be incurred in connection with an exchange and that they do not anticipate any profit from this fee.

Requested Relief

1. *Section 6(c).* Section 6(c) of the Act provides generally that the Commission may exempt any person from any provision of the Act or its Rules and Regulations if and to the extent necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants submit that the relief requested below is appropriate in the public interest and fully consistent with the protection of investors and the policy and purposes of the Act.

Pursuant to this provision, Applicants request the following exemptions: (i) from Sections 26(a)(2)(C) and 27(c)(2) to the extent necessary to permit HVA to deduct the contingent deferred sales charge, the annual policy fee, and the transfer charge; (ii) from Sections 2(a)(32), 2(a)(35), 22(c), 27(c)(1), 27(d) of the Act and Rule 22c–1 thereunder, to the extent necessary, to impose the sales charge and the full annual policy fee upon redemption; and (iii) from Sections 26(a)(2)(D) and 27(c)(2) to the extent necessary to permit HVA to hold the assets of the unit trusts under an open account arrangement without the use of stock certificates. They also request, as discussed above, that certain prior orders be amended to include a sales charge limitation.

Finally, Applicants request relief from section 14(a) of the Act to the extent necessary to permit HVA-Bond and HVA-Money Market to issue their shares to Hartford Fund in exchange for the securities underlying the bond and money market portfolios. Applicants assert that immediately upon such exchange, each of these funds will have in excess of the minimum capital requirement provided by Section 14(a) of the Act, but request relief to the extent that this issuance may be deemed to be a public offering of securities not in compliance with the provisions of Section 14(a) of the Act.

2. *Section 17(b) and Rule 17d–1.* Section 17(a) of the Act provides, in pertinent part, that it is unlawful for any affiliated person of a registered investment company, or any affiliated person of such an affiliated person, knowingly to sell to or purchase from such investment company any security or other property. Section 17(b) of the Act provides, in pertinent part, that notwithstanding Section 17(a) of the Act, a person may file with the Commission an application for an order exempting a proposed transaction from the provisions of Section 17(a). Section 17(d) and Rule 17d–1 thereunder generally make it unlawful for any affiliated person of a registered investment company to effect any transaction in which such investment company is a joint participant without the permission of the Commission.

Applicants request an order pursuant to Section 17(b) and Rule 17d–1 exempting the proposed reorganization and recapitalization of Hartford Fund,and the resultant transfers of the securities, from the provisions of Section 17(a) and Rule 17d–1.

3. *Section 26(b).* Section 26(b) of the Act makes it unlawful for the depositor of any unit investment trust holding the security of a single issuer to substitute another security for such security unless the Commission shall have approved such substitution. Applicants HVA and Hartford Fund request an order pursuant to Section 26(b) authorizing the substitution of the shares of HVA-Bond and HVA-Money Market for the shares of the bond and money market portfolios of Hartford Fund.

4. *Section 11.* Section 11(a) of the Act provides generally that it shall be unlawful for any registered open-end company to make an exchange offer on any basis other than relative net asset values unless the terms of the offer have first been submitted to and approved by the Commission. Section 11(c) provides that, irrespective of the basis of exchange, the provisions of subsection (a) shall be applicable to any type of exchange offer involving the securities of a registered unit investment trust. Applicants request an order of the Commission pursuant to Section 11 approving the terms of the proposed offers of exchange noted above.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 29, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specified issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

Local Forums on Small Business Capital Formation

The Executive Committee of the Securities and Exchange Commission Government-Business Forum on Small Business Capital Formation announces plans to conduct during June and July 1983, a series of five local forums in cities across the nation concerning the small business capital formation process. Small businesspersons, bankers, financial advisers, venture capitalists, pension fund managers and others interested in small business will have an opportunity to present their views on problems and specific proposed remedies relating to tax, credit, access to financial institutions, securities and other areas of importance in the capital formation process.

The Executive Committee, which is chaired by SEC Commissioner John R. Evans, is comprised of representatives of government agencies, major small business organizations and other individuals and groups concerned about small business (see below). A panel of Executive Committee members, including representatives of key federal agencies and departments, will conduct each local forum. The Executive Committee will prepare a report of the local forums, including proposed legislative and regulatory recommendations, to be presented to Congress and appropriate regulatory agencies later this year. The report is intended to provide guidance in establishing small business priorities for the eighties.

The Forum, which was first conducted in 1982 pursuant to the Small Business Investment Incentive Act, represents a unique attempt to establish a meaningful and ongoing dialogue involving small businesspersons, federal government agencies and private sector organizations concerned with small business issues on the problems affecting the small business community. The Final Report of the first Forum, which contained 37 recommendations in the areas of tax, credit, access to financial institutions and securities, was presented to a joint Congressional small business hearing in December 1982, and is the subject of considerable legislative and regulatory activity.

Local forums will be conducted in the following cities:

Washington, D.C., during the week of June 6, 1983.

Houston during the week of June 13, 1983.

St. Louis during the week of June 20, 1983.

San Francisco during the week of June 27, 1983.

Boston during the week of July 11, 1983.

A written summary or outline of the presentation will be requested five days in advance of an appearance at the Forum. This summary will facilitate an informed dialogue between the Executive Committee members and those making presentations.

Persons or groups interested in participating in a local forum should contact Paul A. Belvin, Forum Staff Director, or H. Steven Holtzman, Forum Special Counsel, at (202) 272-2644 or write to the following address: 1983 Small Business Forum, Office of Small Business Policy, U.S. Securities and Exchange Commission, 450 5th Street, NW., Stop 3-11, Washington, D.C. 20549.

George A Fitzsimmons,

Secretary.

April 11, 1983.

1983 Forum—Executive Committee Members

John R. Evans, Commissioner—Executive Committee Chairman, Securities and Exchange Commission

Michael Barton, Director, Community and Consumer Affairs, Office of the Comptroller of the Currency
Mary E.T. Beach, Associate Director, Division of Corporation Finance, Securities and Exchange Commission
Thomas Bennett, Senior Vice President, Stillwater National Bank & Trust Company (Robert Morris Associates)
Robert Blair, Vice President, American Stock Exchange
Hugh Brady, Director, Regulatory Reform, National Association of Manufacturers
Phillip R. Croessmann, Director, Government Affairs, American Institute of Architects
Robert Dederick, Under Secretary of Economic Affairs, U.S. Department of Commerce
Samuel A. Derieux, Esq., Past President, American Institute of Certified Public Accountants
John H. Fitch, Jr., Vice President, Government Relations, National Association of Wholesaler-Distributors
Glendon Hildebrand, Assistant Director, Research and Technical Activities Division, Financial Accounting Standards Board
Patricia Jacobs, President, American Association of Minority Enterprise Small Business Investment Companies
John Kelly, Assistant Secretary for Public Liaison and Consumer Affairs, U.S. Department of the Treasury
Thomas P. Kerester, Coopers & Lybrand
Elbert Mackey, Director, Michigan State Securities Commission
Peter McNeish, Executive Vice President, National Association of Small Business Investment Companies
Alan Mendelson, Assistant Vice President, Aetna Life Insurance Company
Steven Merrill, Chairman, SEC Committee, National Venture Capital Association
Harold Noll, Deputy Assistant Secretary, Public Liaison and Consumer Affairs, Department of the Treasury
Dennis O'Connor, Small Business United
Douglas F. Parrillo, Vice President, Department of Policy Research, National Association of Securities Dealers
George Saunders, Finance Specialist, National Federation of Independent Business
Joseph Schoeberl, Missouri State Securities Commissioner

[Release No. 13153; 812-5487]

World of Technology, Inc. and Financial Programs, Inc.; Filing of Application

April 8, 1983.

Notice is hereby given that World of Technology, Inc. (the "Fund"), 7503 Marin Drive, Englewood, Colorado 80111 registered under the Investment Company Act of 1940 (the "Act") as a diversified, open-end, management investment company, and Financial Programs, Inc. ("Programs"), principal underwriter of the Fund in the United States (collectively "Applicants"), filed an application on March 9, 1983, and an amendment thereto on April 7, 1983, for an order of the Commission pursuant to Section 6(c) of the Act, exempting Applicants from the provisions of Section 22(d) of the Act to the extent necessary to permit them to offer shares of the Fund for a limited period of time to shareholders of other registered investment companies distributed and advised by Programs at current net asset value per share without the imposition of a sales charge. All interested persons are referred to the application on file with the Commission for a statement of the representation contained therein

which are summarized below. Such persons are also referred to the Act for the complete text of the provisions thereof from which an exemption is being sought.

On December 16, 1982, the Fund registered under the Act and filed a registration statement with the Commission under the Securities Act of 1933 pursuant to which it seeks to register its shares for sale to the public in a continuous offering. As of the date of the filing of the application, that registration statement had not yet become effective. The investment objective of the Fund is long-term capital appreciation, which the Fund seeks to achieve through the investment of its assets primarily in the equity securities of domestic and foreign high technology companies.

Programs is a wholly-owned subsidiary of Britannia Holdings Inc., which in turn is a wholly-owned subsidiary of Britannia Arrow Holdings PLC ("Britannia"), a United Kingdom financial holding company organized in 1935. Britannia's principal business, which is conducted through various subsidiaries, is investment management on an international basis. Programs and Britannia International Asset Management Ltd., a wholly-owned subsidiary of Britannia, are investment advisers to the Fund. Pursuant to separate advisory agreements with the Fund, Programs will be responsible for the portfolio management of assets invested in the United States and Britannia International Asset Management Ltd. will be responsible for the management of assets invested outside of the United States.

After the Fund's registration statement becomes effective, it is intended that shares of the Fund will be sold to the public at their current net asset value per share, plus a sales charge ranging from 1% to 5% of the public offering price depending upon the amount invested.

Financial Daily Income Shares, Inc., Financial Industrial Fund, Inc., Financial Industrial Income Fund, Inc., Financial Dynamics Fund, Inc., Financial Bond Shares, Inc. and Financial Tax-Free Income Shares, Inc. (the "Financial Funds") are registered, open-end, diversified management investment companies for which Programs also serves as investment adviser. Pursuant to distribution contracts with each of the Financial Funds, Programs acts as distributor of their shares without remuneration. The Financial Funds have various investment objectives and policies. Shares of each of the Financial Funds are sold to the public without the imposition of a sales charge. In addition, each of the Financial Funds offers shareholders of the other Funds the privilege of exchanging their shares of such Funds for shares of one of the other Financial Funds on a no load basis at the respective net asset values of such Funds' shares at the time of exchange.

Applicants state that the Board of Directors of the Fund determined that it would be appropriate to give recognition to the expectations of current shareholders of the Financial Funds by affording those shareholders the opportunity to purchase shares of the Fund at current net asset value per share without the imposition of a sales charge for a limited period of time. The application states that the offer will be made available for a period of 90 days to shareholders of record of the Financial Funds commencing as of the day before the notice of filing of the application is issued by the Commission (the "Special Offer").

Applicants state that an exemption from the provisions of Section 22(d) of the Act is required to implement the Special Offer described above because the sale of Fund shares at no load to shareholders of the Financial Funds would result in the sale of Fund shares at a price other than that described in the prospectus, which price the general public will pay to purchase shares of the Fund.

Section 6(c) of the Act provides, in part, that the Commission may, by order upon application, exempt any person, security or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act, or from any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants assert that investors in the Financial Funds have been led to expect to have the ability to apportion readily their investments among the various investment companies distributed by Programs and to make investments in new companies within the complex without having to pay a sales charge. Applicants further assert, in this regard, that in determining whether to purchase shares of a particular investment company within a complex, investors are influenced to a significant extent by the perceived benefits associated with becoming part of the complex. Thus, Applicants submit, it would be unfair to deprive shareholders of the Financial Funds of one of the benefits that may have influenced their decisions to invest in one of the funds in the complex. For this reason, Applicants assert that it is appropriate to grant the requested exemption and give recognition to the reliance the shareholders of the Financial Funds have placed upon their ability to obtain shares of investment companies distributed by Programs at no load.

In addition, Applicants state that the requested exemptive order is justified on the basis of the lower costs associated with selling shares to existing shareholders of the Financial Funds as compared to the costs of selling shares to new investors. According to Applicants, because shareholders of the Financial Funds are already familiar with the benefits, services and features associated with the investment companies distributed by Programs, little of those promotional expenses will be incurred in order to induce such shareholders to purchase shares of the Fund. Accordingly, Applicants submit that the Special Offer would not result in any unjust discrimination.

In this regard, Applicants further submit that permitting shareholders of the Financial Funds to purchase shares of the Fund at no load pursuant to the Special Offer would give recognition to the expectations of shareholders of the Financial Funds and thereby contribute to the viability of the complex by confirming the commitment of Programs to provide investors in the Fianacial Funds with the benefits they have been led to expect. In addition, Applicants assert that the Special Offer would be beneficial from the standpoint of promoting better relations between the Fund and a particular category of investors who provide a ready source of investment in the Fund (i.e., existing shareholders of the Financial Funds) and, as a result, could reasonably be expected to lead to increased investment in the Fund which would benefit the Fund and all of its shareholders by helping the Fund achieve certain economies of scale and benefits of size more rapidly than would otherwise be the case.

For the foregoing reasons, Applicants assert that the granting of the requested exemption to permit the Special Offer would be appropriate because the terms of the Special Offer reflect economies of distribution effort and do not unfairly discriminate against those investors who will be charged a sales load. In addition, Applicants state that the Special Offer will not disrupt the Fund's distribution system. Under the circumstances, Applicants submit, granting of the order requested herein would be appropriate in the public

interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 2, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commssion, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8025-01-M

VETERANS ADMINISTRATION

Privacy Act of 1974; New and Revised Routine Use Statements and Changes Other Than Routine Use Statements

Notice is hereby give that the Veterans Administration is revising the paragraphs pertaining to system manager, categories of records in the system, and authority for maintenance of the system in the VA system of records entitled: Personnel and Accounting Pay—VA (27 VA 047) as set forth on page 673 of the **Federal Register** Publication, Privacy Act Issuance, 1980 Compilation, Volume V. The Veterans Administration is also revising a current use in this system of records, as well as creating four new routine uses for this system.

The paragraph pertaining to the system manager is being revised to reflect a recent reorganization of staff functions within the Veterans Administration Central Office. The paragraphs relating to categories of records in the system and the authority for maintenance of the system are also being revised to reflect information and use for the Veterans Administration's carpool and ridesharing program. Four new routine uses are being added to the system notice. Routine use No. 17 is being added in order to identify information disclosed from the PAID Master Records by the Employee Transportation Coordinator to employees in order to implement the agency's carpool and ridesharing program.

Routine uses No. 18 and No. 19 are being added for the following reasons. Questions have arisen regarding the authority under the Privacy Act of 1974 to permit disclosures from VA System of Records 27 VA 047 to respond to subpoenas from a Federal, State, or municipal court or a party in litigation or to respond to subpoenas issued by Federal, State, or municipal agencies functioning in a quasi-judicial capacity. In the past, the VA has interpreted "subpoena" to be within the meaning of subsection (b)(11) of the Privacy Act (5 U.S.C. 552a(b)(11)) which authorizes disclosures of finance records pursuant to an "order of a court of competent jurisdiction." However, due to recent court decisions which have held to the contary, the Office of Budget and Finance is establishing two new routine uses, No. 18 and No. 19, which concern the release of information pursuant to a subpoena from a Federal, State, or municipal grand jury; a Federal, State, or municipal court or a party in litigation; a Federal Agency or party to an administrative proceeding being conducted by a Federal agency; or to a State or municipal administrative agency functioning in a quasi-judicial capacity or a party to a proceeding being conducting by such agency, in order for the VA to respond to and comply with the issuance of the subpoena.

Routine use No. 20 is being added to permit the agency to disclose employee payroll information to the Department of Labor. The Department of Labor is conducting a computer matching program which will match employee records with various State unemployment benefit history files to determine whether these Federal employees have been properly drawing State benefits. These benefits are ultimately reimbursed to the State by the Federal government.

Finally, routine use No. 13 is revised by deleting the last sentence in order to remove any ambiguity pertaining to the disclosure of social security numbers. The revision of this routine use will clarify the release from the PAID Master Records of identifying wage information to State taxing authorities so that such information may be used to improve the administration of various State public assistance programs.

The authority for maintenance of the system is Title 38, United States Code, Section 210(c)(1).

The Privacy Act of 1974, 5 U.S.C. 552a(e), requires agencies to inform the public of any changes to their system or records. Interested persons are invited to submit comments, suggestions, or objections regarding the proposed amendments to the system of records to the Administrator of Veteran's Affairs (271A), Veterans Administration, 810 Vermont Ave., NW., Washington, D.C. 20420. All relevant material received before May 16, 1983 will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays), until May 31, 1983.

If no public comment is received during the thirty day review period allowed for public comment or unless otherwise published in the **Federal Register** by the Veterans Administration, the proposed amendments to the system of records included herein are effective May 16, 1983.

Dated: April 11, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

Notice of System of Records

In the system identified as Personnel and Accounting Pay System—VA (27 VA 047) appearing at page 673 of the **Federal Register** Publication, Privacy Act Issuance, 1980 Compilation, Volume V, the system is revised as follows:

27 VA 047

SYSTEM NAME:

Personnel and Accounting Pay System—VA (27 VA 047).

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

PAID Master Records, Record of Salary Payments, Time and Attendance report file, Earnings and Leave Statement, Individual Retirement Record, Payroll Folder Files, Personnel Action Records and Basic Authorizations, Training and Incentive Awards Record, carpool and ridesharing program records (i.e., name, address, office location at the facility).

* * * * *

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Statutory provisions, Executive Order 12191 (45 FR 7997 (Feb. 6, 1980)) and other Executive Orders of the President, and rules and regulations of certain Federal regulatory departments and agencies.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. To produce and maintain the personnel and payroll records, including reports and statistical data, of VA employees for use by Federal, State and local agencies and organizations authorized by law or regulation to have access to such information.

2. Transfer payroll information to complete payroll checks, bond deductions and withholding taxes to the Treasury Department in order to effect delivery of payroll checks and saving bonds to VA employees.

3. Transfer payroll information to the Social Security Administration in order to credit quarterly posting for social security.

4. Transfer withholding tax information to State and/or city governments to effect payment of taxes to city and/or State governments and to create W–2's.

5. Transfer retirement record information to the Civil Service Commission in order to provide a history of service and retirement deductions.

6. Transfer employee Payroll Folder File, Record of Salary Payments, and Time and Attendance reports to the National Archives and Records Service in order to provide a history of all salaries, deductions and time and leave.

7. Transfer unemployment compensation information to State agencies to compile unemployment compensation data.

8. Transfer personnel data to the Civil Service Commission in order to provide the Civil Service Commission with a readily accessible major data source for meeting work force information needs of the Commission, national planning agencies, the Congress, the White House and the public.

9. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

10. A record from this system of records may be disclosed as a "routine use" to a Federal, State or local agency maintaining civil, criminal or other relevant information, such as current licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefits.

11. A record from this system of records may be disclosed to a Federal, State or local agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevent and necessary to the requesting agency's decision on the matter.

12. Relevant information from this system of records, including the nature and amount of a financial obligation, may be disclosed as a routine use, in order to assist the Veterans Administration in the collection of unpaid financial obligations owned the VA, to a debtor's employing agency or commanding officer so that the debtor-employee may be counseled by his or her Federal employer or commanding officer. This purpose is consistent with 5 U.S.C. 5514, 4 CFR 102.5 and section 206 of Executive Order 11222 of May 8, 1965 (30 FR 6469).

13. To provide State and local taxing authorities employee names, home addresses, social security numbers, gross compensation paid for a given period, taxes withheld for the benefit of the recipient jurisdiction or other jurisdictions, according to the provisions of State and/or local law.

14. Relevant information from this system of records, including available identifying data regarding the debtor, such as name of debtor, last known address of debtor, name of debtor's spouse, social security account number of debtor, VA insurance number, VA loan number, VA claim number, place of birth and date of birth of debtor, name and address of debtor's employer or firm and dates of employment, may be disclosed to other Federal agencies, State probate courts, State drivers license bureaus, and State automobile title and license bureau as a routine use in order to obtain current address, locator and credit report assistance in the collection of unpaid financial obligations owed the U.S. This purpose is consistent with the Federal Claims Collection Act of 1966 (Pub. L. 89–508, 31 U.S.C. 951–953) and 4 CFR Parts 101–105.

15. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

16. Disclosure may be made to NARS (National Archives and Records Service) GSA (General Services Administration) in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

17. The name and general geographic location where an employee resides (not specific home address) may be disclosed by the facility Employee Transportation Coordinator to other employees in order to promote the car/vanpooling and ridesharing program established in accordance with Executive Order 12191 and to enable the VA to verify membership in car and vanpools.

18. Any information in this system may be disclosed to a Federal grand jury, a Federal court or a party in litigation, or a Federal agency or party to an administrative proceeding being conducted by a Federal agency, in order for the VA to respond to and comply with the issuance of a Federal subpoena.

19. Any information in this system may be disclosed to a State or municipal grand jury, a State or municipal court or a party in litigation, or to a State or municipal administrative agency functioning in a quasi-judicial capacity or a party to a proceeding being conducted by such agency, in order for the VA to respond to and comply with the issuance of a State or municipal subpoena.

20. The name of the employee, social security number, beginning and ending pay period dates, the number of hours worked during a given pay period, the gross salary and duty station information may be disclosed to the Department of Labor (DOL) Inspector General's office (IG) in order for the DOL IG to conduct a computer match of these records with various state unemployment benefit files. The purpose of this computer matching program will be to determine if Federal employees have been properly drawing state unemployment benefit payments. These payments are ultimately reimbursed to the state by the Federal Government.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: Tuesday, April 19, 1983, 9:30 a.m. (eastern time).

PLACE: Commission Conference Room 200, second floor, Columbia Plaza Office Building, 2401 E Street NW., Washington, DC 20506.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

1. Ratification of Notation Vote(s).
2. A Report on Commission Operations (Optional).
3. Freedom of Information Act Appeal No. 83–2–FOIA–19–CL, concerning a request for materials in a closed age discrimination charge file.
4. Freedom of Information Act Appeal No. 83–1–FOIA–004–IN, concerning a request for documents from a closed Title VII and ADEA file.
5. Freedom of Information Act Appeal No. 83–2–FOIA–3–LA, concerning a request for documents from a Title VII charge file.
6. Freedom of Information Act Appeal No. 83–02–FOIA–019–MK, concerning copies of deliberative documents in a charge file.
7. Freedom of Information Act Appeal No. 83–01–FOIA–2–CH, concerning a request for copies of conciliation materials, deliberative documents and personnel information from a charge file.
8. Freedom of Information Act Appeal No. 83–1–FOIA–1–LA, concerning a request for materials pertaining to a Commissioner's Charge.
9. EEOC's 17th Annual Report.
10. Proposed Field Redelegation Regulations.
11. Proposed FOIA Fee Schedule Change.

Closed:

1. Litigation Authorization; General Counsel Recommendations.
2. Briefings on Withdrawal of Certain Charges.

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the Federal Register, the Commission also provides recorded announcements a full week in advance on future Commission sessions. Please telephone (202) 634–6748 at all times for information on these meetings.)

CONTACT PERSON FOR MORE INFORMATION: Treva McCall, Executive Secretary to the Commission (202) 634–6748.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 48 FR 15216, April 7, 1983.

STATUS: Closed meeting.

PLACE: 450 5th Street NW., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Monday, April 4, 1983

CHANGES IN THE MEETING: Additional items. The following additional items were considered at a closed meeting scheduled for Tuesday, April 12, 1983, at 10 a.m.:

Consideration of *amici* participation

Chairman Shad and Commissioners Evans, Longstreth and Treadway determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any matters have been added, deleted or postponed, please contact: Jerry Marlatt at (202) 272–2092.

April 12, 1983.

Part II

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

California:	
CA82-5112	July 16, 1982.
CA82-5120	Aug. 27, 1982.
Colorado:	
CO82-5127	Nov. 5, 1982.
CO82-5103	Feb. 12, 1982.
CO82-5107	Apr. 9, 1982.
Indiana:	
IN80-2059	Aug. 1, 1980.
Michigan:	
MI82-2042	July 9, 1982.
MI83-2008	Feb. 11, 1983.
New York:	
NY83-3003	Mar. 25, 1983.
NY81-3023	Apr. 3, 1981.
NY80-3054	Sept. 5, 1980.
NY81-3039	Apr. 4, 1980.
Pennsylvania:	
PA82-3007	Feb. 26, 1982.
Utah:	
UT83-5106	Mar. 25, 1983.
West Virginia:	
WV83-3000	Mar. 11, 1983.
WV82-3002	Oct. 29, 1982.

Supersedes Decisions to General Wage Determination Decisions

The number of the decisions being superseded and their dates of publication in the **Federal Register** are listed with each State. Supersedeas decision numbers are in parentheses following the numbers of the decisions being superseded:

Florida:	
FL82-1003 (FL83-1021)	Feb. 19, 1982.
FL82-1004 (FL83-1022)	Do.
FL78-1025 (FL83-1023)	Mar. 24, 1978.
FL81-1135 (FL83-1024)	May 22, 1981.
Illinois:	
IL81-2054 (IL83-2036)	Aug. 21, 1981.
Kansas:	
KS82-4009 (KS83-4028)	Mar. 26, 1982.
KS82-4010 (KS83-4029)	Mar. 15, 1982.
KS82-4011 (KS-4030)	Do.
Kentucky:	
KY81-1309 (KY83-1020)	Oct. 30, 1981.
KY-81-1292 (KY83-1025)	Sept. 25, 1981.
KY-1312 (KY83-1026)	Nov. 13, 1981.
KY82-1025 (KY83-1027)	Apr. 2, 1982.
Maine:	
ME80-2069 (ME83-3007)	Aug. 15, 1980.
ME80-2009 (ME83-3008)	Mar. 14, 1980.
New Mexico:	
NM83-4016 (NM83-4032)	Jan. 28, 1983.
Oklahoma:	
OK82-4008 (OK83-4031)	Mar. 19, 1982.

Cancellation of General Wage Determination Decision

The general wage decision listed below is cancelled. Agencies with construction projects pending to which the cancelled decision would have been applicable should utilize the project determination procedure by submitting Form SF–308. See Regulations Part 1 (29 CFR), § 1.5. Contracts for which bids have been opened shall not be affected by this notice. Also consistent with 29 CFR, 1.7(b)(2), the incorporation of the cancelled decision in contract specifications, the opening of bids is within ten (10) days of this notice, need not be affected.

MD80–3042—Cecil County, Maryland dated August 29, 1980 in 45 FR 57924—Heavy Construction.

Signed at Washington, D.C., this 8th day of April 1983.

Dorothy P. Come,

Assistant Administrator, Wage and Hour Division.

Group VIII	13.05	1.96
Group IX	12.10	1.96

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii)).

FOOTNOTE: a. Employer contributes 8% of regular hourly rate to Vacation Pay Credit for Employeee who has worked in business more than 5 years. Employer contributes 6% of regular hourly rate to Vacation Pay Credit for Employee who has worked in business less than 5 years.

POWER EQUIPMENT OPERATORS--Classification Definitions:

Group I-All tower cranes(must have 2 operators;mobile,rail,climbers, static mount),cranes with boom length 250 ft. & over(with or without jib), derricks, helicopters, all types of flying cranes & all nuclear powered equipment, single station hydro cranes over 18 tons, but not more than 50 tons, finish grader.

Group II-All cranes with boom length 150 ft and over (with or without jib; friction, hydro, electric, or otherwise), cranes 150 tons & over with boom length less than 250 ft., gantry & overhead cranes.

Group III-Cranes with boom length less than 150 ft (with or without jib), single station hydro cranes 18 tons & under, single station hydro cranes over 50 tons, dual station hydro cranes,clam shell, shovel, backhoe, gradall, dragline, piledriver,drilling of piling, tugger (all types), mechanic, sideboom, or tractor beom, concrete mixer, cableway.

Group IV-Boring & Drilling Machine,concrete pumping machine (all types), batching plant (on job sites), inside elevator, forklift(with vertical lift of over 20 ft).

Group V-Locomotive operator,motor mixing pump (all types),winch truck, A-frame truck, grease truck operator, front end loader, bulldozer, pan, motor grader, forklift

Group VI-Trenching & ditching machine, reller, fireman, distributor, (bituminous), finish machine (paving), wellpoint system(installation & or operation), siphon, vacuum pump, tractor,conveyor.

Group VII-Utility Operator (any combination of equipment up to and including 4 pieces of equipment listed in Group VIII), welding machines (3-4).

Group VIII-Pump(s) or any combination over 2 1/2 inch, compressors or any combination over 125 CFM, generator (s) or any combination over 5 KW.

Group IX-Oiler, fuel truck driver, mechanical helper, boom hauling truck driver, lowboy truck driver.

AREA DESCRIPTIONS

CARPENTERS & PILEDRIVERMEN:
AREA 1: Adams Co.
AREA 2: Brown, Cass, Morgan, Pike, Schuyler & Scott Cos.
AREA 3: Champaign, Douglas (N. of US Rte. #36), & Piatt (NE ½) Cos.
AREA 4: Christian, Menard, & Sangamon (Except Illiopolis) Cos.
AREA 5: Clark, Coles, Cumberland, Douglas (US Rte. #36 & S. thereof), Edgar, Moultrie (Exclu. area N. of Rte. #133), & Shelby (Exclu. Moweaqua & N. thereof) Cos.
AREA 6: DeWitt Co.
AREA 7: Logan Co.
AREA 8: Macon, Moultrie (N. of Rte. #133), Piatt(SW ½), Sangamon (Illiopolis) & Shelby (Moweaqua & N. thereof) Cos.
AREA 9: Mason Co.
AREA 10: Vermilion Co.
CEMENT MASONS:
AREA 1: Adams, Brown, & Pike Cos.
AREA 2: Cass, Mason, Menard, & Sangamon Cos.
AREA 3: Champaign, Clark, Cumberland, Douglas, Moultrie (Exclu. NE Corner), Piatt (Monticello & N. thereof), & Shelby (Exclu. Lovington, Bethany & Moweaqua) Cos.
AREA 4: Christian Co.
AREA 5: Coles & Edgar Cos.
AREA 6: DeWitt (Clinton & S. thereof), Macon, Moultrie (NE Corner), Piatt (S. of Monticello), & Shelby (Lovington, Bethany & Moweaqua) Cos.
AREA 7: Logan Co.
AREA 8: Morgan Co.
AREA 9: Schuyler Co.
AREA 10: Vermilion Co.
ELECTRICIANS:
AREA 1: Adams, Brown, Pike, & Schuyler Cos.
AREA 2: Cass, Logan, Mason (Lynchburg, Bath, Kilbourne, Crane Creek, Salt Creek, & Mason), Menard, Morgan, Sangamon & Scott Cos.
AREA 3: Champaign, DeWitt (Santa Anna Twp.), Douglas (N ½), & Piatt (Blue Ridge, Sangamon & Monticello Twps.) Cos.
AREA 4: Clark & Edgar Cos.
AREA 5: Christian, Coles, Cumberland, DeWitt (Harp, Wapella, Barnett, Clintonia, DeWitt, Turnbridge, Texas, Creek & Nixon Twps.), Douglas (Arcola, Burbon, Garrett Twps. & that portion of Tuscola lying W. of the city of Tuscola & the Illinois Central RR Tracks), Macon, Moultrie, Piatt (Goose Creek, Willow Branch, Carro Gordo, Bement & Unity Twps.), & Shelby Cos.
AREA 6: DeWitt (Waynesville, Wilson & Rutledge Twps.) Co.
AREA 7: Mason (Exclu. Lynchburg, Bath, Kilbourne, Crane Creek, Salt Creek, & Mason) Co.
AREA 8: Vermilion Co.
IRONWORKERS:
AREA 1: Adams (Kingston & Vic.), Brown, Cass, Christian, DeWitt (W ½), Logan, Macon (Except portion E. of Decatur), Mason, Menard, Morgan, Pike, Sangamon, Schuyler (E ½), Scott & Shelby (W ½) Cos.
AREA 2: Adams (Except Kingston & Vic.) & Schuyler ((W ½) Cos.
AREA 3: Champaign, Coles, Cumberland, DeWitt (E ½), Douglas, Edgar, Macon (E. of Decatur), Moultrie, Piatt, Shelby (E ½), & Vermilion Cos.
AREA 4: Clark Co.

AREA DESCRIPTIONS

LINE CONSTRUCTION:
AREA 1: Adams, Brown, Cass, Champaign, Christian, Coles (E. Oakland, Humboldt, Morgan, W. Okaw, & Seven Hickory Twps.), DeWitt, Douglas, Edgar, Logan, Macon, Mason, Menard, Morgan, Moultrie (Except Whitley Twp.), Piatt, Pike, Sangamon, Schuyler, Scott, Shelby (W. of Holland, Prairie, Richland, & Windsor Twps.), & Vermilion (Except work performed on Illinois Power Company & REA Co-op properties) Cos.
AREA 2: Clark, Coles (S ½), Cumberland, Moultrie (Whitley Twp.), Shelby (Except W. of Holland, Prairie, Richland, & Windsor Twps.) Cos.
PAINTERS:
AREA 1: Adams Co.
AREA 2: Brown, Cass, Christian, Logan, Menard, Morgan, Sangamon, & Scott Cos.

AREA 3: Mason Co.
TRUCK DRIVERS:
AREA 1: Adams, Brown, Cass, Champaign, Christian, Clark, Coles, Cumberland, DeWitt, Douglas, Edgar, Logan, Macon, Menard, Morgan, Moultrie, Piatt, Pike, Sangamon, Schuyler, Scott, Shelby & Vermilion Cos.
AREA 2: Mason Co.

LABORERS CLASSIFICATIONS:
UNSKILLED - Common Laborers
SEMI-SKILLED - Asphalt Rakers; Asphalt Saw Operators; Blade Grade Operators; Cement Handlers; Chain Saw Operators; Concrete Saw Operators; Dumping Dry Cement From Dump & Batch Trucks; Form Setters; Handling of Creosote Lumber & Lime; Hopper Men; Mechanical Form Tampers; Powder Men; Powdermen & Dynamite Men ($1.00 premium); Power Tool Operators; Priming & Wrapping of Gas Lines; Puddlers; Rubbing of Concrete; Sewer or Conduit, Tunnel Miners, Top Men, Muckers, & Bottom Men ($.25 premium); Sewer Tile & Pipe Layers; Shoring & Bracing in Sewer & Tunnels; & Spotters & Dumpmen on or on Levees, Fills, or Grades
SKILLED - Air Spades; Brick Tenders; Gunnite Nozzlemen; & Jackhammers

POWER EQUIPMENT OPERATORS CLASSIFICATIONS FOR AREA 1:
CLASS 1: Asphalt Plant Engineer; Asphalt Screed Man; Apsco Concrete Spreaders; Asphalt Pavers; Asphalt Rollers on Bituminous Concrete; Athey Loaders; Backfillers; Crane Type Backhoes; Cableways; Cherry Pickers; Clam Shell; C.M.I. & Similar Type Autograde Formless Paver, Autograde Placer & Finisher; Concrete Breakers; Concrete Plant Operators; Concrete Pumps; Cranes; Derricks; Derrick Boats; Draglines; Earth Auger Boring Machines; Elevating Graders; Engineers on Dredge; Gravel Processing Machines; Head Equipment Greasers; High Lift or Fork Lifts; Hoist w/two Drums or Two or more Loadlines; Locomotives; Mechanics; Motor Graders or Auto Patrols; Operators or Levelman on Dredges; Operators Power Boat; Operators Pug Mill (Asphalt Plants); Orange Peels; Overhead Cranes; Paving Mixers; Piledrivers; Pipe Wrapping & Painting Machines; Push Dozers, or Push Cats; Rock Crushers; Ross Carriers or Similar Machines; Scoops; Skimmers 2 cu. yds., cap. & under; Sheep Foot Roller (Self-propelled); Shovels; Skimmer Scoops; Test Hole Drilling Machines; Tower Cranes; Tower Machines; Tower Mixers; Track Type & Loaders; Track Type Fork Lifts or High Lifts; Track Jacks & Tampers; Tractors; Sideboom; Trenching Machines; Ditching Machine; Tunnel Luggers; Wheel Type End Loaders; Winch Cat; Scoops (All or Tournapull)
CLASS 2: Asphalt Boosters & Heaters; Asphalt Distributors; Asphalt Plant Fireman; Building Elevator; Bull Floats or Flexplanes; Concrete Finishing Machines; Concrete Saws, Self-propelled; Concrete Spreader Machines; Gravel or Stone Spreaders, Power Operated; Hoist Automatic; Hoist w/1 Drum & 1 Load Line; Oiler on 2 Paving Mixers when used in Tandem Boom or Winch Truck; Post Hole Diggers, Mechanical; Road or Street Sweeper-Self-propelled; Scissors Hoist; Seaman Tiller; Straw Machine; Vibratory Compactor; Well Drill Machines; & Mud Jacks (Hwy & Hwy only)
CLASS 3: Air Compressor*; Air Compressors, Track or Self-propelled; Bulk Cement Batching Plants; Conveyors*; Concrete Mixers (except plant, paver, tower); Firemen; Generators*; Greasers; Light Plants*; Mechanical Heaters*; Oilers; Power Form Graders; Power Sub-Graders; Pug Mills, when used for other than Asphalt Operation; Rollers (except Bituminous Concrete); Tractors w/o Power Attachments Regardless of size or type; Truck Crane Oiler & Driver (1 man); Vibratory Hammer; Water Pumps*; Welding Machines (one 300 amp. or over*); Welding Machines*
*COMBINATIONS OF ONE TO FIVE OF ANY AIR COMPRESSORS, CONVEYORS, WELDING MACHINES, WATER PUMPS, LIGHT PLANTS OR GENERATORS SHALL BE IN BATTERIES OR WITHIN 300 FT.
POWER EQUIPMENT OPERATORS CLASSIFICATIONS FOR AREA 2:
CLASS 1: Master Mechanic
CLASS 2: Utility Operator
CLASS 3: Power Cranes; Draglines; Derricks; Shovels; Gradalls; Mechanics; Concrete Mixers with Skip; Tourmamixers; Two Drum Machine; One Drum Hoists with Tower or Boom; Cableways; Tower Machines; Motor Patrol; Boom Trucks; Boom or Winch Truck; Winch or Hydraulic Boom Truck; Truck Crane; Tournapull; Tractor Operating Scoops; Bulldozer; Push Tractor; Asphalt Planer; Finishing Machine on Asphalt; Large Rollers on Earth; Rollers on Asphalt Mix; Ross Carriers or similar Machine; Gravel Processing Machine; Asphalt Plant Engineer; Paver Operator; Farm Tractor w/half yard Bucket and/or Backhoe Attachment; Dredging Equipment or Dredge Engineer or Dredge Operator; Central Mix Plant Engineer; CMI or similar type machine; Concrete Pump; Truck or Skid mounted; Tower Crane; Engine or Rock Crusher Plant; Concrete Plant Engineer; Ditching Machine with dual attachment; Tractor mounted Loaders; Cherry Picker; Hydro Crane; Standard or Dinkey Locomotives; Scoopmobiles; Euclid Loader; Soil Cement Machine; Back Filler; Elevating Machine; Power Blade; Drilling Machine, inclu. Well Testing, Caissons, Shaft or any similar type Drilling Machines; Motor Driven Paint Machine; Pipe Cleaning Machine; Pipe Wrapping Machine; Pipe Bending Machine; Apsco Paver; Boring Machine; Head Equipment Greaser; Barber-Greene Loaders; Formless Paver; Well Point System; Concrete Spreader; Hydra Ax; Resco Concrete Saw; Marine Scoops; Brush Mulcher; Brush Burner; Mesh Placer; Tree Mover; Helicopter Crew (3); Piledriver - Skid or Crawler; Stump Remover; Root Rake; Tug Boat Operator; Refrigerating Machine; Freezing Operator; Chair Cart - Self-Propelled; Hydra Seeder; Straw Blower; Power Sub Grader; Bull Float; Finishing Machine; Self-propelled Pavement Breaker (Backhoe attached); Lull or similar type machine; Two Air Compressors; Compressors hooked in Manifold; Overhead Crane; Chip Spreader; Mud Cat; Sull-Air; Tractor Highlift; Tournadozer; Tube Float; Spray Machine; Curing Machine; Concrete or Asphalt Milling Machine

POWER EQUIPMENT OPERATORS CLASSIFICATIONS FOR AREA 2 (CONT'D):

TRUCK DRIVERS CLASSIFICATIONS:
GROUP 1: Drivers on 2 Axles hauling less than 9 tons; Air Compressor & Welding

UMI 1983 APR 15 ISSN 74 VOL

POWER EQUIPMENT OPERATORS CLASSIFICATIONS FOR AREA 2 (CONT'D):
CLASS 4: Concrete Mixers without Skips; Rock Crusher; Ditching Machine under 6'; Curbing Machine; One Drum Machines without Tower or Boom; Air Tugger; Self-propelled Concrete Saw; Machine mounted Post Hole Digger; Two to Four Generators; Water Pumps or Welding Machines within 400 ft.; Air Compressor 600 cu. ft. and under; Rollers on Aggregate and Seal Coat Surfaces; Fork Lift; Concrete and Blacktop Curb Machine; Farm Tractor with less than half yard Bucket; One Water Pump; Oilers; Air Valves or Steam Valves; One Welding Machine; Truck Jack; Mud Jack; Gunite Machine; House Elevators when used for Hoisting Material; Engine Tenders; Fireman; Wagon Drill; Flex Plane; Conveyor; Siphons and Pulsometer; Switchman; Fireman on Paint Pots; Fireman on Asphalt Plants; Distributor Operator on Trucks; Tampers; Self-propelled Power Broom; Striping Machine (motor driven); Form Tamper; Seaman Tiller; Bulk Cement Plant Equipment Greaser; Deck Hands; Truck Crane; Oiler Driver; Cement Blimps; Form Grader; Temporary Heat; Throttle Valve; Farm Tractor

POWER EQUIPMENT OPERATORS CLASSIFICATIONS FOR AREA 3:
GROUP 1 - Cranes; Hydro Crane; Shovels; Crane Type Backfiller; Tower Cranes, Mobile & Crawler & Stationary; Derricks & Hoist (3-drum); Dragline; Drott Tumbo & similar Types considered as Cranes; Backhoe; Derrick Boats; Pile Driver & Skid Rigs; Clam Shells; Locomotive Cranes; Road Pavers, Single Drum, Dual Drum & Tri Batcher; Motor Patrols & Power Blades, Dumore, Elevating & Similar types; Mechanics; Central Concrete Mixing Plant Op.; Blacktop Plant Ops. & Plant Engineers; Gradall; Caisson Rigs; Skimmer Scoop, Koehring Scooper; Dredges (all types); Hoptoe, Crane type; Escalated rate on Crane & Derricks Booms, $.01 per hour, per ft., over 80' incl. jib; Cherry Pickers; Work Boat; Ross Carrier; Helicopter; Dozer & Tournadozer
GROUP 2 - Asphalt Heater & Planer Combination (used to plane streets); Trench Machines; Pump Crete; Belt Crete; Squeeze Crete; Screw type Pumps & Gypsum; Bulker & Pump; Dinkeys; Tournapulls, all, & similar types; Multiple Unit Earth Movers, $.25 per hour for each scoop over one; Scoops (all sizes); Pushcats; End Loaders (all types); Side Booms; P-H One Pass Soil Cement Machines & similar types; Wheel Tractors (industrial or farm type with Dozer, Hoe, End Loader Other attachments; Backfiller; Asphalt Surfacing Machine; Euclid Loader; Fork Lifts; Formless Finishing Machine; Jeep with Ditching Machine or other attachment; Tune-luger; Rockcrusher; Automatic Cement & Gravel Batching Plants; Mobile Drills (Soil Testing); & Similar types; Pugmill with Pump; Flaherty Spreader & Similar types; Heavy Equipment Greaser (Top Greaser on Spread); Power Launches; Boring Machine & Pipe Jacking Machine; C.M.I & similar types; All (1) & (2) Drum Hoists; Dewatering System; Straw Blower; Hydro-seeder; Boring Machine; Hydro-broom; Starting Engineer on Pipeline; F. W. D. & similar types
GROUP 3: Apsco Spreader or similar types; Tractors (track-type) without Power Units pulling Rollers; Rollers on Asphalt-brick or Macadam; Concrete Breakers; Concrete Spreaders; Center Stripper; Cement Finishing Machines; Vibro Tampers (all similar types) self-propelled; Mechanical Bull Floats; Mixers, over 3 bag to 27E; Winch & Boom Trucks; Tractor, pulling Power Blade or Elevating Grader; Porter Tek Rail; Clary Screed; Mule, pulling Rollers; Pugmill without Pump; Barber Greene or similar Loaders; Track-type Tractors with Power unit attached (minimum); Fireman; Screed Man on Laydown Machine; & Spray Machine on Paving
GROUP 4 - Power Subgrader; Oil Distributor; Straight Tractor; Tracair (without attachments); Curb Machines; Paved Ditch Machines; Truck Crane Oiler; & Truck type Hoptoe Oilers
GROUP 5 - Herman Nelson Heater, Dravo, Warner, Silent Glo & Similar types; Self-propelled Concrete Saws; Assistant Heavy Equipment Greaser; Crawler Crane & Skid Rig Oilers; Rollers, 5 tons & under on Earth & Gravel; Form Graders; Pump (1) or (2); Light Plant (1) or (2); Generator (1) or (2); Conveyor (1) or (2); Mixer, 3 bags & under; Bulk Cement Plant; Air Compressor (1) or (2); & Welding Machine (1) or (2)

TRUCK DRIVERS CLASSIFICATIONS:
GROUP 1: Drivers on 2 Axles hauling less than 9 tons; Air Compressor & Welding Machine incl. those pulled by separate units; Fork Lifts up to 6,000 lbs. cap.; Mechanic Tenders; Pick-ups when hauling materials, tools, or men to and from and on the job site; & Truck Driver Tenders

GROUP 2: 2 or 3 Axles hauling more than 9 tons, but hauling less than 16 tons; A-Frame Winches; Fork Lifts over 6,000 lbs. cap.; 4-Axle Combination units; Hydrolifts or similar equipment when used for transportation purposes; & Winches

GROUP 3: 2, 3 or 4 Axles hauling 16 tons or more; Dispatcher; 5-Axles or more combination units; Mechanics & Working Foreman; & Water Pulls

GROUP 4: Drivers on Oil Distributors; & Drivers on Semi-Lowboys when moving equipment

DREDGING CLASSIFICATIONS:
GROUP 1 - Operators on Hydraulic Dipper or Clamshell Dredges,, Engineers and Repairmen, Operators on Work Boats
GROUP 2 - Power Winches 1-2-3 Drums
GROUP 3 - Semunity Engineer
GROUP 4 - Cranemen on Dipper Dredges, Operators on Launches or Power Boats
GROUP 5 - Firemen & Oilers

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii)).

DECISION NO.: KS83-4028

DATE: Date of Publication

Supersedes Decision No. KS82-4009 dated March 26, 1982, in 47 FR 13105

DESCRIPTION OF WORK: Highway Projects (does not include bridges over navagable waters, Tunnels; Building structures in rest area projects; Railroad construction) and Water and Sewer Line Construction

AREA I	Basic Hourly Rates	Fringe Benefits
Asphalt Paver Screed Operator	$6.26	
Asphalt Paving Machine Operator	6.80	
Ashphalt Plant Operator	7.10	
Asphalt Raker	6.00	
Backhoe Operator	7.78	
Batching Plant Scaleman	5.32	
Blowing Mechanism or Mulch Seeder Operator	6.00	
Brick, Block and Stonesetter	8.20	
Bulldozer Operator (Push Cat)	7.55	
Carpenter	8.00	
Carpenter (rough)	6.16	
Concrete Finisher	6.94	
Crane or any Machine Power Swing	7.75	
Crusher and Screening Plant Operator	6.58	
Distributor Operator	6.485	
Electrician	7.94	
Form Liner and Setter	5.60	
Front End Loader Operator	6.49	
Laborer (Construction)	5.064	
Mechanic	7.29	
Mechanic Helper	7.00	
Motor Grader Operator (finish)	7.31	
Motor Grader Operator (rough)	6.70	
Motor Scraper Operator	7.55	
Painters (Structural Steel & Bridge)	8.00	
Paving Equipment Operator	7.71	
Post Driver and/or Auger Operators	6.50	
Reinforcing Steel Setter	6.67	
Roller/Compactor Operator (self-propelled)	6.00	
Rotary Broom Operator	6.00	
Rotomill Operator	6.975	
Sandblaster (Structural Steel & Bridge)	8.00	
Serviceman (Equipment)	5.947	
Spreader Box Operator (self-propelled)	6.00	
Tank Heater Attendant	$4.25	
Tractor Operator (80 HP or less)	5.25	
Tractor Operator (80 HP or more)	5.655	
Trenching Machine Operator	6.50	
Truck Driver (Single Axle)	4.87	
Truck Driver (tandem Axle)	5.38	
Truck Driver (triple Axle & Semi)	6.00	

Unlisted classification needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5(a)(1)(ii)).

CLASSIFICATIONS' AREA AND ZONE DEFINITIONS

ASBESTOS WORKERS:
ZONE I - Statewide, except Union, Lea, Harding, Curry, Roosevelt and Quay Counties.
ZONE II - Union, Lea, Harding, Curry, Roosevelt and Quay Counties

BRICKLAYERS-STONEMASONS:
ZONE I-A; I-B and I-C - Union, Harding, Santa Fe, Valencia, Torrence, Taos, Socorro, Mora, McKinley, Colfax, Catron, San Miguel, San Juan, Sandoval, Rio Arriba, Bernalillo, Cobila and Los Alamos Counties
FROM BASING POINT OF ALBUQUERQUE MAIN POST OFFICE:
Zone I-A - 0 to 25 road miles
Zone I-B - 25 to 50 road miles
Zone I-C - Over 50 road miles
ZONE II - Curry and Roosevelt Counties
ZONE III - DeBaca, Guadalupe and Quay Counties
ZONE IV - Chaves County
ZONE V - Lincoln County
ZONE VIA - Lee and Eddy Counties (except at Mine and Refinery sites outside Municipal Limits)
ZONE VIB - Lee and Eddy Counties (Employees at Mine and refinery sites outside Municipal Limits
ZONE VII - Otero County
ZONE VIII - Luna and Grant Counties, communities of Silver City, Bayard, Central, Hurley and New town site of Tyrone; Hildago and Sierra Counties
ZONE IX - Dona Ana County

CARPENTERS:
STATEWIDE - From nearest basing points of the following cities or towns; Alamogordo, Albuquerque, Artesia, Bayard, Belen, Carlsbad, Clovis, Deming, Espanola, Eunice, Farmington, Gallup, Grants, Hobbs, Las Cruces, Las Vegas, Lordsburg. Lovington, Portales, Raton, Roswell, Ruidoso, Santa Fe, Santa Rosa, Silver City, Socorro, Taos and Tucumcari:
ZONES I AND II
Zone 1-A and 2-A - 0 to 15 road miles from neaeest basing point
Zone 1-B and 2-B - 15 to 35 road mi. from nearest basing point
Zone 1-C and 2-C - Over 35 road mi. from nearest basing point
SAN JUAN COUNTY (ONLY)
Zone I - Within 15 rd. mi. of the City of Farmington
Zone II - Over 15 mi. but less than 35 mi. from Farmington
Zone III - 35 miles ofr more from the City of Farmington

CEMENT MASONS:
AREA I - Statewide except Farmington, San Juan County
AREA II - Farmington, San Juan County
Zone I - 0-15 miles from Farmington City Hall
Zone II - 15-35 miles from Farmington City Hall
Zone III - 35 miles and over from Farmington City Hall

ELECTRICIANS-CABLE SPLICERS:
ZONE I
AREA 1 - Bernalillo, Santa Fe, Torrance, DeBaca, Guadalupe, Quay, San Miguel, Mora, Harding, Union, Colfax, Taos, Rio Arriba, Grant, Sandoval, Valencia, Socorro, Catron, McKinley, Sierra, San Juan, Chaves, Curry, Lincoln, Cibola and Roosevelt Counties

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

ELECTRICIANS-CABLE SPLICERS (Cont'd):
Area 1-A - From nearest basing point cities, towns and mileage from main post office in the following towns:
Albuquerque - 15 miles from main post office
Santa Fe - 10 miles from main post office
Las Vegas - 8 miles from main post office
Farmington - 6 miles from main post office
Raton - 6 miles from main post office
Tucumari - 6 miles from main post office
Aztec - 6 miles from main post office
Roswell - 12 miles from main post office
Ruidoso - 12 miles from main post office
Portales - 12 miles from main post office
Carrizozo - 12 miles from main post office
Clovis - 12 miles from main post office
Gallup - 10 miles from main post office
*Pojoaque - 2 miles from main post office
*All areas adjacent to Pojoaque that are over 2 mi. distant from the main post office in that town will be zoned out of Santa Fe.
Area 1-B - extending up to 20 miles beyond Area 1-A
Area 1-C - Extending up to 30 miles from Area 1-A
Area 1-D - anything beyond 30 miles from Area 1-A
ZONE II - Los Alamos County
ZONE III - Dona Ana, Otero, Luna, Hidalgo Counties
Zone 3-A - Within 10 miles radius from the p.o. in Las Cruces & within a 5 mi. radius from the p.o. in Alamogordo
Zone 3-B - Dona Ana, Otero, Luna, and Hidalgo Counties (except that area specified in zone 3-A0
ZONE IV - Eddy and Lea Counties - the following zones shall be designated from the main p.o. in Artesia, Carlsbad, Hobbs and Lovington
Zone 4-A - 0 to 12 miles from main post office
zone 4-B - 12 - 22 miles from main post office
Zone 4-C - 22 - 40 miles beyond main post office
Zone 4-D - 40 miles and beyond main post office

ELEVATOR CONSTRUCTORS:
AREA I - Bernalillo, Catron, Colfax, Curry, DeBaca, Guadalupe, Harding, Lincoln, Los Alamos, McKinley, Mora, Quay, Rio Arriba, Roosevelt, Sandoval, San Juan, San Miguel, Santa Fe, Socorro, Taos, Torrance, Union, Cibola and Valencia Counties
AREA II - Chaves, Hidalgo, Dona, Ana, Eddy, Grant, Lea, Luna, Otero and Sierra Counties

IRONWORKERS:
ZONE I - Bernalillo, Catron, Colfax, DeBaca, Guadalupe, Lincoln, Los Alamos, McKinley, Mora, Rio Arriba, Sandoval, Santa Fe, Socorro, Taos, Torrance, Cibola and Valencia Counties.
ZONE II - Farmington, San Juan County
Area 1 - Shall extend a distance of 6 road miles inclusive beyond City Hall
Area 2 - Shall extend a distance of 8 road miles inclusive beyond the outer perimeter of area 1

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

UMI 1983 APR 15 74 ISS 4 VOL

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

IRONWORKERS (Cont'd):
ZONE II - Farmington, San Juan County (cont'd)
Area 3 - Shall extend a distance of 10 road miles inclusive beyond the outer limits of area 2
Area 4 - Shall extend a distance of 27 road miles inclusive beyond the outer limits of a area 3
Other areas not within area 1, 2, 3 and 4 shall revert to the $15.00 per day subsistence.
ZONE III - Dona Ana County with the exception of that portion of the county that lies within the White Sands Missisile Range; Chaves County, Eddy County except that Potash Basin and defined as the area 10 road miles on Highway 62 and Highway 180, east of Carlsbad.
ZONE IV - Curry, Harding, Quay, Union, Hidalgo, Grant, Lea, Luna, Otero, and Sierra Counties; also Potash Basin, White Sands and McGregor Missile Ranges.

LABORERS ZONE DEFINITIONS FOR BUILDING AND HEAVY CONSTRUCTION:
ZONE I - STATEWIDE including that 15 mile radius from the City Hall in Farmington.

ZONES II and III FOR LABORERS BUILDING AND HEAVY CONSTRUCTION DEFINITIONS APPLIES TO THE FARMINGTON AREA ONLY AS FOLLOWS:

ZONE II - 15-35 miles from the City Hall in Farmington
ZONE III - 35 miles and over from the City Hall in Farmington

BUILDING LABORERS CLASSIFICATION DEFINITION
GROUP I - Unskilled; building and common laborers, carpenter tenders, concrete workers, concrete buggy operators.
GROUP II - Semi-skilled; air and power tool operator, asphalt rakers, demolition, gunite, rebound men, fog machine operator, power buggy operators, sandblasters (potmen), window washers, wagon core diamond drillers, tender; outside scaler, grade setter
GROUP III - Concrete burner, cement mason tenders, hod carriers, mortar mixers, plaster spreader operators, plaster tenders, gunite nozzlemen, pipelayers, pumpcrete nozzlemen
GROUP IV - Powdermen and blasteres

HEAVY CONSTRUCTION LABORERS' CLASSIFICATION DEFINITIONS
GROUP I - Unskilled - Construction and general laborers, carpenter tenders, concrete workers, concrete buggy operators.
GROUP II - Semi-skilled - Air and power tool operators, asphalt rakers, cutting torch operators demolition, gunite rebound men, grade setters, power buggy operators, sand blasters (pot men), nozzlemen, wagon core and diamond drillers' tenders, outside scalers, fog machine operators
GROUP III - Wagon core, diamond drillers
GROUP IV - Miscellaneous - concrete burner, cement mason tenders, hod carriers, mortar mixers, plaster spreader operators, plaster tenders, gunite nozzlemen, pipelayers, pumpcrete nozzleman
GROUP V - Powdermen and blasters

RESIDENTIAL LABORERS' CLASSIFICATION DEFINITIONS
GROUP I - Unskilled - Building and common laborers, carpenter tenders, concrete workers, concrete buggy operators, hand.

GROUP II - Semi-skilled - air and power tool operator, asphalt rakers, demolition, gunnite rebound men, fog machine operator, power buggy

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

RESIDENTIAL LABORERS' CLASSIFICATION DEFINITIONS (Cont'd):
GROUP II (CONT'D)
operator, sand blasterers (pot men), window washers, wagon core and diamond drillers, tender outside
GROUP III - Concrete burner, cement mason tenders, hod carriers, mortar mixers, plaster spreader operators, plaster tenders, gunnite nozzleman, pipelayer, pumpcrete nozzleman

LATHERS BASING POINTS & ZONE DEFINITIONS:
Alamogordo, Albuquerque, Antosia, Bayard, Belen, Carlbad, Clovis, Deming, Espanola, Eunice, Farmington, Gallup, Grants, Hobbs, Las Cruces, Las Vegas, Lordobango, Lovington, Portales, Raton, Roswell, Ruidoso, Santa Fe, Silver City, Socorro, Taos, Tucumcari.
ZONE I - Jobs within 15 miles of Base points
ZONE II - Jobs 15 to 35 miles
ZONE III - Jobs 35 miles and more

LEADS BURNERS BASING POINT & AREA DEFINITIONS
BASING POINT CITIES OR TOWNS:
Albuquerque, Alamorgordo, Anthony, Artesia, Belen, Carlsbad, Clovis, Deming, Espanola, Farmington, Gallup, Grants, Hobbs, Las Cruces, Las Vegas, Lovington, Portales, Raton, Socorro, Roswell, Ruidoso, Santa Fe, Silver City, Santa Rosa, Taos, Tucumcari and Truth of Consequence
ZONE I - Shall include a distance of seven road miles inclusive beyond the city or town limits
ZONE II - Shall extended a distance of 4 road miles inclusive beyond the outer perimeter of area I.
ZONE III - Shall apply to all areas not within 1 or 2, or not within the specific areas.
ZONE IV (SPECIFIC AREA) - Los Alamos, White Rock, South Mesa, McGregor Range, White Sands Missile Range, and/or Proving Grounds

COMMERCIAL LINE WORK
AREA A - Bernalillo, Colfax, Catron, Chaves, Curry, DeBaca, Grant, Guadalupe, Harding, Lincoln, Los Alamos, McKinley, Mora, Quay, Rio Arriba, Roosevelt, Sandova, San Juan, San Miguel, Santa Fe, Sierra, Socorro, Taos, Torrance, Union, Valencia and White Sands Missile Range and that portion of Fort Bliss in New Mexico
ZONE I
Cities and Towns Basing Points - Miles from Main Post Offices

Albuquerque - 15 miles	Ruidoso - 12 miles
Santa Fe - 10 miles	Portales - 12 miles
Las Vegas - 8 miles	Clovis - 12 miles
Farmington - 6 miles	Gallup - 12 miles
Raton - 6 miles	
Tucumcari - 6 miles	
Aztec - 6 miles	
Roswell - 12 miles	

*All areas adjacent to Pojoaque that are over two miles distant from the main post office in that town will be zoned out of Santa Fe.
ZONE II - Extending up to 20 miles beyond zone 1
ZONE III - Extending up to 30 miles beyond zone 1

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

COMMERCIAL LINE WORK (Cont'd)
ZONE IV - Anything beyond 30 miles from zone 1
Las Alamos County - Use ZONE III rates
AREA B - Applies to switching stations and su-stations adjacent to power plants in Zone 1 and Zone 2 in Luna, Dona Ana, Otero, and Hidalgo Counties, exclusive of White Sands Missile Range and that portion of Fort Bliss in New Mexico
ZONE I - That area within 25 miles radius from the downtown Post Office of El Paso, Texas. Fort Bliss and Biggs Field; the area within a five mile radius of any city, town or municipality within which an employer established or maintains his place of business; the area within ten mile radius form the post office in Las Cruces, New Mexico, and within a five mile radius from the post office in Alamogordo, New Mexico.
ZONE II - All other areas of the jurisdiction except those specified in zone 1
AREA C - Applies to switching stations adjacent to power plants in Eddy and Lea Counties; the following zones listed shall be designated from main Post Office of Artesia, Carlsbad, Hobbs & Lovington,
ZONE I - 0 - 12 miles
ZONE II - 12 - 22 miles
ZONE III - 22 to 40 miles
ZONE IV - 40 miles and beyond

MILLWRIGHTS & PILEDRIVERMEN ZONE DEFINITIONS
BASING POINT - FROM ALBUQUERQUE CITY LIMITS:
ZONE 1 - 0 to 15 road miles from basing point
ZONE 2 - 15 to 35 road miles from basing point
ZONE 3 - Over 35 road miles from basing point

PAINTERS' ZONE AND CLASSIFICATION DEFINITION
ZONE I - San Juan, McKinley, Bernalillo, Torance, Guadalupe, Quay, Catron, Socorro, Lincoln, DeBaca, Roosevelt, Chaves, Valencia, Sierrra, Grant, Hidalgo, Curry, Lea, Eddy and Sandoval, Counties, New Mexico.
CLASS A - Painters, roller and hand textures
CLASS B - Painters, spray, sandblasting, painter on steel bridges, tanks towers, pipe and structural
Class C - Paperhanger
CLASS D - Drywall finisher; ames tool operator
CLASS E - Hand finisher machine texture
ZONE II - Colfax, Harding, Los Alamos, Mora, San Miguel, Rio Arriba, Taos, Union and Santa Fe Counties
Class A - Painters and roller
Class B - Paperhangers
Class C - Spray, Sandblast, steel, special coating applicator
Class D - Sing Painters
Class E - Drywall finisher tool and machine texture
Class F - Hand finisher
ZONE III - Luna, Otero, and Dona Ana Counties
Class A - Brush, paperhangers
Class B - Spray, sandblasting, swing stage, striping machine
Class C - Ames tool and steel brush after erection
Class D - Radio towers, water tanks smoke stake 70 - 100 ft.

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

PLUMBERS - PIPEFITTERS' ZONES DEFINITIONS
BASING POINT CITIES OR TOWNS:
Albuquerque, Alamogordo, Anthony, Artesia, Belen, Carlsbad, Clovis, Deming, Espanola, Farmington, Gallup, Grants, Hobbs, Las Cruces, Las Vegas, Lordsburg, Lovington, Portales, Raton, Roswell, Ruidoso, Santa Fe, Silver City, Santa Rosa, Taos, Tucumcary, Truth of Consequence and Socorro, New Mexico.
Area I - Shall include a distance of seven road miles inclusive beyond the city or town limits.
Area II - Shall extend a distance of four road miles inclusive beyond the outer perimeter of area I.
Area III - Shall apply to all areas not within areas 1 or 2 or not within the specific area.
Specific Area - Los Alamos, White Rock, South Meas, McGregor Range, White Sands Missile Range and/or Proving Grounds, Atlas Missile Complex Sites in Chaves and Lincoln Counties, and the Oro Grande Range Camp and Dona Ana and Otero Co.

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS
BUILDING, RESIDENTIAL & HEAVY CONSTRUCTION
GROUP I - Fireman, oiler, screedman, scale operator such as bin-a batch, rubber tired farm type tractor, tractors under 50 HP without attachments, breakman, concrete paving curing machine (bridgetype), helper; (mechanic, welder, grease truck)
GROUP II - Rollers, sheepsfoot or pneumatic self propelled w/o dozer, concrete conveyor, service truck operator (head oiler), air compressor (300 CFM & over), pumps (6" and over), screening plants, concrete mixers (under 1 CY), concrete saw or grinder-span type, 1 drum hoist, air tugger, elevating belt type loaders, forklift, lumber stacker, tractor farm type (under 50 HP with attachments) motorman and industrial locomotive operator, winch truck, front end loaders (under 2 CY), power plants which generate over 15 KW, welding machines
GROUP III - Bituminous distributors, boilers, retort and hot oil heaters, concrete mixers (1 CY and over), concrete paver-single drum, drilling equipment; (refrigeration, slusher, jumbo forms), trenching machines (all types), pump crete and gunite machines, slipform paver, mechanical bullfloats, concrete slab spreading machine, concrete slab finishing machine, asphalt plants, bituminous finishing machines, crushing plants
GROUP IV - Front end loaders (2 thru 10 CY), rollers steel wheeled-all types, bulldozers, scrapers (motor or towed), elevating graders, concrete batching plants, self-propelled rollers -- equipped with dozer, twin-bowl scrapers and quad 8 or 9 pushc (35¢ over basic rate, three bowl scraper (60¢ over basic rate)
GROUP V - Hydraulic cranes-with less than 50 feet of boom (20 tons and under), concrete paver-double drum, cat cranes, hysters, side and swingboom cats, 2 drum hoist, auto fine grader
GROUP VI - Mucking machines - all types, motor grader (finish) mechanic - welder
GROUP VII - Steam engineers, loader (front end over 10 CY), concrete pump (snorkel type)

16418 Federal Register / Vol. 48, No. 74 / Friday, April 15, 1983 / Notices

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS
BUILDING, RESIDENTIAL & HEAVY CONSTRUCTION (CONT'D)
GROUP VIII - All shovel type equipment; cranes, draglines, backhoes, derricks, guy & stiff leg, pipemobile (No. 2 operator), piledriver, hydraulic cranes (20 tons & over), mine hoist, belt loader ("C.M.I." Type), boom & jibs 150 ft. through 199 ft. - 25¢ per hour above base pay 200 ft. and over - 50¢ per hour above base pay. Shove (wheel type), boring machine (tunnel or shaft mole), pipe mobile

SHEET METAL WORKERS ZONE & CLASSIFICATION DEFINITIONS
ZONE I - Bernalillo, Catron, Chaves, Colfax, Curry, De Baca, Guadalupe, Harding, Lincoln, Los Alamos, McKinley, Mora, Quay, Rio Arribo, Roosevelt, Sandoval, San Juan, San Miguel, Santa Fe, Socorro, Taos, Torrance, Union, Cibola and Valencia Counties.
ZONE IA - Any area within a five (5) mile radus of the city limits of Albuquerque, Santa Fe, Farmington, Roswell and Kirtland AFB, East and West; Rio Rancho; Paradise Hills; An area including ten (10) miles each direction east and west of interstate Highway 25 and extending north and south, terminating with but including, Santa Fe and Belen; an area identified by corner reference points beginning at and including Pojoaque, to Chimayo, to Velarde, to Abiquiu and back to Pojaque; An area identified by corner reference points beginning at the including Farmington to Aztec, to Bloomfield and back Farmington.
ZONE IB - Los Alamos County
ZONE IC - San Juan (except that area in Zone 1A)
ZONE ID - All area not in Zone iA, IB, or IC.
ZONE II - Dona Ana, Eddy, Grant, Hidalgo, Lea, Luna, Sierra and Otero Counties.
ZONE IIA - Any area within a five (5) mile radus of the city limits of Carlsbad, Las Cruces, Artesia, Alamogordo, Hobbs and Sunland Park.
ZONE IIB - White Sands, Including Holloman, McGregor and Lyndon B. Johnson.
ZONE IIC - All area not in Zone IIA or IIB.

SOUND INSTALLERS ZONE DEFINITIONS
ZONE I - Thirty mile radius of main post office in Albuquerque
ZONE II - Remainder of Valencia, Sandoval, Santa Fe, Torrance, and Socorro Counties, the hourly rates of pay shall be increased for twelve and one-half (12½) percent of journeymen rate of pay for Zone I.
ZONE III - Chavez, Curry, Roosevelt, Lincoln, Guadalupe, DeBaca, Quay, San Miguel, Mora, Harding, Union, Colfax, Taos, Rio Arribo, Catron, Sierra, Grant, Los Alamos, San Juan, McKinley Counties the hourly rates of pay shall be increased by thirty-seven and one-half (37.5) percent of the journeyman rate of pay for Zone I
ZONE IV - Eddy and Lea Counties

CLASSIFICATION AREA AND ZONE DEFINITIONS (CONT'D)

TRUCK DRIVERS ZONE PAY BASING POINTS AND DEFINITIONS LISTED BELOW FOR BUILDING AND HEAVY CONSTRUCTION
BASING POINTS ARE AS FOLLOWS:
Alamogordo, Albuquerque, Artesia, Bayard, Belen, Carlsbad, Clovis, Deming, Espanola, Eunice, Farmington, Gallup, Grants, Hobbs, Las Cruces, Las Vegas, Lordsburg, Lovington, Portales, Raton, Roswell, Ruidoso, Santa Fe, Santa Rosa, Silver City, Socorro, Taos, Tucumcari
ZONE I - Shall be jobs or projects within 15 road miles from the starting points listed above
ZONE II - Shall be jobs or projects which are more than fifteen road miles, but less than thirty-five road miles from base points, also, includes all of Los Alamos Co.
ZONE III - Shall be those jobs or projects which are thirty-five road miles or more from the base points.

TRUCK DRIVERS CLASSIFICATION DEFINITIONS (BUILDING, HEAVY AND RESIDENTIAL CONSTRUCTION)
GROUP I - Pickup 3/4 ton and under, lubricatimn, light tire repair and washer, swamper, 2 or 4 and up.
GROUP II - Dump or batch truck under 8 C.Y.W.L.C.; flat bed (bobtail) 2 ton and under; warehouseman including material checker, fork lift under 5 tons MRC.
GROUP III - Dump trucks (including all highway and off highway) 8 up to 16 C.Y.W.L.C.; water, fuel or oil trucks less than 3,000 gal., flat bed (bobtail) over 2 tons
GROUP IV - Distributor driver, heavy tire repair, lumber carrier driver, young buggy or similar equipment, transit mix or agitator 2 or 3 axle bobtail equipment, scissor truck, bulk cement bobtail 2 or 3 axles, semi-trailer flatbed or van single axle, forklift 5 ton and over M.R.C.
GROUP V - Dumpsters and dumpcrete driver; water, fuel or oil truck 3,000 to 6,000 gal; lowboys and light equipment driver; euclid type tank wagon under 6,000 gal.
GROUP VI - Vacuum truck; dump trucks (including all highway and off-highway 16 up to 22 C.Y.W.L.C.
GROUP VII - Transit mix or agitator semi or 4 axle equipment driver; flaherty truck type spreader box driver; slurry truck driver; bulk cement driver; semi-doubles; 4 axle bobtail; winch truck and "A" frame; dump truck (including all highway and off-highway) 22 CY up to 35 C.Y.W.L.C.
GROUP VIII - Euclid diesel power turnarocker; terra coba-DW20-Le-Tourneau Pulls and similar diesel powered equipment when used to haul materials and assigned to a teamster-lowboy heavy equipment driver; water, fuel or oil trucks 6,000 gal. and over including tank wagon drivers, semi-trailer driver (flat-bed or van tandems); light equipment mechanic; dump trucks (including all highway and off-highway) 35 C.Y.W.L.C. and over; truck and trailer or semi-trailer (flatbed); eject all
GROUP IX - Lowboy (heavy equipment double gooseneck); heavy equipment mechanic; welder (body and fender man)

DECISION NO. MM83-4012 PAGE 14

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day; G-Friday after Thanksgiving

WELDERS - receive rate prescribed for craft performing operation to which welding is incidental.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii)).

SUPERSEDEAS DECISION

STATE: Oklahoma

COUNTY: Statewide (except heavy construction within the city of Muskogee)

DECISION NO. OK83-4031

DATE: Date of Publication

SUPERSEDES DECISION #OK82-4008 dated March 19, 1982 in 47 FR 12020

DESCRIPTION OF WORK: Construction, alteration, and/or repair of streets, highways, runways, erosion control structures, well drilling, and water and sewer utilities (but does not include building structures on highway rest areas).

	Basic Hourly Rates	Fringe Benefits
Carpenters	$7.00	
Carpenters helper	6.00

Department of Housing and Urban Development

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

Section 8—Fair Market Rents for New Construction and Substantial Rehabilitation—All Market Areas

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 888

[Docket No. R-83-1074]

Section 8—Fair Market Rents for New Construction and Substantial Rehabilitation—All Market Areas

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Interim rule and request for comments.

SUMMARY: This rule amends the Section 8 Fair Market Rents applicable to New Construction and Substantial Rehabilitation for all market areas, in compliance with the requirements of Section 8(c)(1) of the U.S. Housing Act of 1937. Revised Section 8 Fair Market Rents (FMRs) must be published at least annually in the **Federal Register**. HUD published the last annual revision of the FMRs for Section 8 New Construction and Substantial Rehabilitation on November 25, 1981 (46 FR 57838).

The amended Fair Market Rents reflect the changes which have occurred in the general level of market rents for recently completed or newly-constructed dwelling units of modest design within each market area since their last Annual or Special (Interim) Revision.

The Fair Market Rents applicable to the State of Virginia have been reduced both for the 2–4 story and for the 5=plus story elevator structural categories. An estimation error was discovered and correction had the effect of reducing the elevator rents for all Virginia market areas.

Accordingly, the revised schedules of elevator Fair Market Rents for all of the Virginia market areas now have been brought into closer alignment with those of other principal cities, such as Washington, D.C., Baltimore, MD, and Philadelphia, PA.

DATES: *Effective date:* After the comment due date set forth below, notice of the effective date of this rule will be published in the **Federal Register.**

Comments due: May 16, 1983.

ADDRESS: Comments should be sent to the Rules Docket Clerk, Room 10278, Office of the General Counsel, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410. Each person submitting a comment should include his/her name and address and refer to the docket number and title shown in the heading of this rule and give reasons for any recommendation. A copy of each comment submitted will be available for public inspection in the Office of the Rules Docket Clerk during regular business hours. In order to expedite consideration of comments, a copy of each comment should also be sent to the HUD Field Office having jurisdiction for the market area involved.

FOR FURTHER INFORMATION CONTACT: Edward M. Winiarski, Chief Appraiser, Valuation Branch, Technical Support Division, Office of Multifamily Housing Development, 451 7th Street, SW., Washington, D.C. 20410, (202) 755–5743. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Fair Market Rents are based primarily on the level of rentals paid for recently completed or newly-constructed dwelling units of modest design within each market area, as determined by HUD Field Office staff. They are estimates of rentals that prospective tenants who are not receiving federal rental subsidies would be willing to pay for recently completed or newly-constructed dwelling units of modest design.

Fiscal Year 1980 Fair Market Rents were subject to the financing adjustment Note published at 45 FR 40111 on June 13, 1980. Fiscal Year 1981 Fair Market Rents were subject to the financing adjustment published at 46 FR 51905 on October 23, 1981, and the later financing adjustment published at 47 FR 22520 on May 25, 1982. The publication of this rule does not affect the operation of the financing adjustment factor under these Notes. These financing adjustments will continue to be available as adjustments to the Fiscal Year 1980 and 1981 Fair Market Rents, where applicable, after publication of this rule.

The Fair Market Rents in Schedule A of this rule reflect trended rents in order to allow for the period of construction or rehabilitation.

This interim rule includes Fair Market Rents for 0, 1, 2, 3, and 4 or more bedroom units in five structural categories (detached, semi-detached/row, walkup, elevator 2–4 story, and 5 plus story). Construction or rehabilitation of elevator projects for families with children is legally prohibited unless there is no practical alternative. Fair Market Rents for family units in elevator structures have been listed in these schedules for appropriate market areas. However, the determination that there is "no practical alternative" must be made on a project-by-project basis.

Proposals involving combinations of structural types and unit sizes for which Fair Market Rents have not yet been published may not be approved until the applicable Fair Market Rents are published and become effective.

A 30-day public comment period is being provided from the date of publication. If evaluation of comments submitted during that period indicates a need to change any of the Fair Market Rents in Schedule A, such Fair Market Rents will be withdrawn or revised.

Interested parties may submit information with adequate documentation on Fair Market Rents at any time, even after expiration of the 30-day public comment period. This data will be considered in initiating interim revisions to Fair Market Rent schedules. In order to expedite consideration of comments, please send a copy of your comments to the HUD Field Office having jurisdiction for the market area involved.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implements Section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours at the Office of the Rules Docket Clerk at the address set forth above.

This rule does not constitute a "major rule" as that term is defined in Section 1(b) of Executive Order 12291 on Federal Regulation. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule is listed at 47 FR 48424 as item H–97–82 in the Department's Semiannual Agenda of Regulations published on October 28, 1982 (47 FR 48422), pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

Pursuant to the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. Although this rule will have an effect on developers and owners of Section 8 projects, some

of whom may constitute small entities, it is not expected that the economic impact on them will be significant.

The Catalog of Federal Domestic Assistance Program number and title is 14.156, Lower Income Housing Assistance Program (Section 8).

List of Subjects in 24 CFR Part 888

Rent subsidies.

Accordingly, Schedule A of Part 888 is revised to read as set forth below.

Authority: Sec. 8(c)(1) of the U.S. Housing Act of 1937, 42 U.S.C. 1437f(c)(1); Section 7(d), Department of HUD Act, 42 U.S.C. 3535(d).

Dated: March 10, 1983.

Philip Abrams,

Assistant Secretary for Housing—Federal Housing Commissioner.

Schedule A—Fair Market Rents for New Construction and Substantial Rehabilitation (Including Housing Finance and Development Agencies Program)

These Fair Market Rents have been trended ahead to October 1, 1984, to update the current Fair Market Rent schedules which these revised schedules will replace.

Note 1.—The Fair Market Rents for: (1) Dwelling units designed for the elderly or handicapped are those for appropriate size units, not to exceed 2-bedrooms for the elderly, multiplied by 1.05; (2) congregate housing dwelling units are the same as for noncongregate units; (3) single room occupancy dwelling units (applicable only for Substantial Rehabilitation projects) are 75 percent of those for zero bedroom units of the same structural type; (4) living units in a group home (each composed of a bedroom plus a proportionate part of common living space which is ordinarily included in a living unit) are those for zero bedroom or one bedroom units of the walkup structural type (or, if the group home contains an elevator, of the elevator 2–4 story structural type). In group homes, one bedroom Fair Market Rents may be applied only when the bedroom space plus the proportionate part of the common space is at least 450 square feet; (5) manufactured homes (unit and space) shall be 95 percent of the rents for detached units of the appropriate bedroom size (except that where a manufactured home Fair Market Rent is given on the schedule for the area, the amount on the schedule shall be the Fair Market Rent); (6) manufactured home spaces in newly-constructed or substantially rehabilitated manufactured home parks shall be the Fair Market Rents for spaces published for the Existing Housing Program under Schedule D, multiplied by 1.25.

Note 2.—In cases where the owner's application for Section 202/Section 8 assistance or owner's proposal for other Section 8 new construction or substantial rehabilitation assistance is accepted for processing by HUD (by FmHA in the case of assistance under Part 884; by the State Agency in the case of assistance under Part 883) prior to the effective date of this Rule, the applicable Fair Market Rent shall be the higher of: (1) The Fair Market Rent as determined under this schedule (and any interim revisions), or (2) the Fair Market Rent as determined under the schedule published on November 25, 1981 (and any interim revisions).

All rents computed in accordance with these notes shall be rounded down to the nearest whole dollar.

Part IV

Department of Energy

Office of the Secretary

Amendments to Procurement Regulations

DEPARTMENT OF ENERGY

Office of the Secretary

41 CFR Parts 9–3, 9–4, 9–7, 9–16, 9–30, 9–50, and 9–51

Amendments to Procurement Regulations

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: This final rule revises the DOE Procurement Regulations to more clearly state DOE policy regarding letter contracts, extensions of contracts originally justified under unsolicited proposal evaluation procedures, and updates some sections which are out of date. A detailed listing of specific revisions is given below under the section entitled **"SUPPLEMENTARY INFORMATION."**

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT:

Richard Langston, Procurement Policy Branch, MA421.1, Procurement and Assistance Management Directorate, Department of Energy, (202) 252–8188

Prentis Cook, Office of General Counsel, AGC for Procurement and Financial Incentives, GC44, Department of Energy, (202) 252–1526.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Statutory and Regulatory Requirements.
III. Public Comments.

I. Background

Under Section 644 of the Department of Energy Organization Act (hereinafter referred to as "the Act") Pub. L. 95–91, 91 Stat. 565 (41 U.S.C. 7254), the Secretary of the Department is authorized to prescribe such procedural rules and regulations as may be deemed necessary or appropriate to accomplish the functions vested in him. Accordingly, the Department of Energy Procurement Regulations (DOE–PR) were promulgated with an effective date of June 30, 1979 (see 44 FR 34424).

The specific changes being made are as follows:

Change 7.0 is a listing of changes to the Table of Contents.

Change 7.1 supplements section 9–3.408 by providing additional guidance for letter contracts.

Change 7.2 revises Subpart 9–4.9, "Unsolicited Proposals," to provide guidance on the extension of contracts originally awarded as the result of unsolicited proposals.

Change 7.3 revises Subpart 9–4.50, "Multiple Award-Phased Procurements."

Change 7.4 revises Subpart 9–4.51, "Special Research Contracts with Educational Institutions," to clearly state that no-cost extensions may be granted by the cognizant procurement office.

Change 7.5 revises several clauses in part 9–7, "Contract Clauses," and adds new clauses for letter contracts.

Change 7.6 revises section 9–16.50, "Contract Outlines," by correcting an incorrect citation at section 9–16.5002–1 and adds a new section 9–16.5002–5, "Outline of a letter contract."

Change 7.7 revises 9–30.703, "Assignment of Claims," to correct an outdated reference to a predecessor organization.

Change 7.8 revises Part 9–50, "Operating and On-Site Service Contracts" regarding identical bids, and expands the extend-compete review process to include consideration of site planning, maintenance, construction, facility management, schedule, and technical performance.

Change 7.9 revises Subpart 9–51, "Contract Reviews," to delete references to organizations that no longer exist.

II. Statutory and Regulatory Requirements

A. Review Under Executive Order 12291

Inasmuch as this final rule relates to agency management of the procurement function, the OMB clearance procedures set forth in Executive Order 12291 (February 17, 1981) are not applicable.

B. Review Under the Regulatory Flexibility Act

This final rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96–354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have significant economic impact on a substantial number of small entities. DOE certifies that this final rule will not have a significant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

C. Review Under the Paperwork Reduction Act

DOE has determined that this rulemaking imposes no information collection and reporting requirements on organizations and individuals external to DOE that may be subject to this regulation in accordance with the Paperwork Reduction Plan Act (44 U.S.C. 3501 et seq.).

D. Review Under the National Environmental Policy Act

DOE has concluded that promulgation of this rule clearly would not represent a major Federal action having significant impact on the human environment under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 432 et seq. 1976), the Council on Environmental Quality Regulations (40 CFR Parts 1500–1508), and the DOE guidelines (10 CFR Part 1020), and therefore does not require an environmental impact statement pursuant to NEPA.

III. Public Comments

The changes being made by this final rule were published as a notice of proposed rulemaking on November 4, 1982, 47 FR 49983. That notice invited public comments for a 30-day period ending December 6, 1982. Comments were received from one association representing research universities and from two DOE offices.

One reviewer suggested that section 9–3.408 be clarified regarding to whom letter contracts should be reported. This matter was clarified by adding a reference to the Procurement and Assistance Data System at section 9–3.408(e). Change 7.2 proposed new procedures for acceptance of unsolicited proposals. The new procedures would parallel the procedures used for other non-competitive procurements. The proposed change included procedures for the review and acceptance of proposals for extensions of contracts originally awarded as a result of unsolicited proposals and provided that requests for extensions of Special Research Contracts would be handled in accordance with the new procedures. All those commenting were critical of this latter concept and suggested that the existing Special Research Contract procedures at Subpart 9–4.51 were adequate. The Department accepts these views and will not make the changes originally proposed at section 9–4.904(a), 9–4.5111–1, and 9–4.5111–2. One reviewer suggested that section 9–4.955 be retitled "Renewals." This suggestion is based on the practice within the financial assistance community of referring to an unfunded allotment of additional time as extension and referring to a funded allotment of additional time as a renewal. The Department sees no real benefit in making such a distinction in its procurement regulations.

The proposed changes involving unsolicited proposals mention competition at sections 9–4.909(e)(1), 9–4.955–1(a)(8), and 9–4.955–6. Concern was expressed that DOE might inappropriately introduce competition as a result of an unsolicited proposal evaluation. This is not intended. FPR 1–4.911 prohibits the use of an unsolicited proposal as the basis of a competitive solicitation.

At the same time, FPR 1–4.910(a) provides that a favorable technical evaluation does not in itself establish adequate grounds for non-competitive procurement. Competition would be appropriate if the subject matter of the unsolicited proposal were available without restriction from other sources. To alleviate this concern, a note will be added to section 9–4.909(e)(1) to refer the reader to FPR 1–4.910 and 1–4.911.

A suggestion was received asking that consideration be given to establishing master basic agreements with universities. These agreements would be updated annually and be incorporated into individual research contracts throughout the Department. There are no existing policy impediments to such a concept. The suggestion has been referred to the Office of Energy Research which is the primary source of funding for university research.

The Department thanks those parties providing comments for the helpful insights furnished by their views and has carefully considered those comments in preparing this final rule.

List of Subjects in 41 CFR Parts 9–3, 9–4, 9–7, 9–16, 9–30, 9–50 and 9–51

Government procurement.

For the reasons set out in the preamble, Chapter 9 of Title 41 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, D.C., April 11, 1983.

Hilary J. Rauch,

Director, Procurement and Assistance, Management Directorate.

The regulations in 41 CFR Chapter 9 are amended as set forth below.

Authority: Sec. 644 of the Department of Energy Organization Act, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

Note.—As an aid in identifying specific changes to the DOE Procurement Regulations, a two-digit identification number is assigned to each specific change. The first digit represents the numerical sequence of proposed changes; thus, this is Change 7 to indicate that this is the seventh time that DOE has issued a rulemaking for the purpose of amending 41 CFR Chapter 9. The second digit is the numerical sequence of specific changes proposed within a particular notice; thus, the first change within the seventh notice is identified as Change 7.0.

Change 7.0

The Table of Contents is amended as follows:

Sec.

* * * * *

9–4.955 Extensions.
9–4.955–1 Extension proposals.
9–4.955–2 Evaluation of requests for extension.
9–4.955–3 Approval.
9–4.955–4 Content of extension justification.
9–4.955–5 Rejection of extension request.
9–4.955–6 Continuation of effort on other than a direct extension basis.

PART 9–50—OPERATING AND ON-SITE SERVICE CONTRACTS

* * * * *

9–50.105 Reporting possible antitrust violations and identical bids.

* * * * *

Change 7.1

Section 9–3.408, "Letter contract" is amended by adding a new paragraph (d) directing attention to additional letter contract coverage at 9–7, "Contract Clauses" and 9–16, "Procurement Forms," and a new paragraph (e) regarding letter contract reporting requirements. Therefore, section 9–3.408 is amended by the addition of paragraphs (d) and (e) as follows:

Subpart 9–3.4—Types of Contracts

§ 9–3.408 Letter contract.

* * * * *

(d) Additional guidance regarding letter contracts may be found at 9–7.11 which prescribes clauses to be used in letter contracts and 9–16.5002–5 which contains a format for letter contracts.

(e) Letter contract awards should be reported to the Procurement and Assistance Data System as soon after award as possible. Should it be necessary to modify a letter contract prior to its definitization, such actions shall be handled and reported as formal modifications as they occur. The actual definitization of the letter contract, in turn, shall be accomplished by formal contract modification and be reported as such.

Change 7.2

Subpart 9–4.9, "Unsolicited Proposals" is amended at section 9–4.908 to provide for an alternate receiving office if a Notice of Program Interest is the basis for submitting an unsolicited proposal, at section 9–4.909(e) to revise the review and approval procedures, at section 9–4.950, paragraph (b), to clarify the term "Expiration Date" and to allow use of the Alternate Late Proposals clause without the approval required by section 9–3.802–1 if a Notice of Program Interest is involved, and at paragraphs (c) and (d) to assure that Notices of Program Interest are coordinated with the Procurement and Assistance Management Directorate and that a copy of any such Notice is furnished to that Office, and by adding a new section 9–4.955 regarding procedures to be used in considering the renewal of contracts resulting from unsolicited proposals. Therefore, sections 9–4.908(b), 9–4.909(e), 9–4.950 (b)(5), (c) and (d) are revised and 9–4.955 through 9–4.955–6 are added to read as follows:

Subpart 9–4.9—Unsolicited Proposals

§ 9–4.908 Agency point of contact.

* * * * *

(b) Unless otherwise specified in a Notice of Program Interest, all unsolicited proposals shall be submitted to the Procurement and Assistance Management Directorate, U.S. DOE, Attn: Unsolicited Proposals Management Officer, MA432, Washington, DC 20585. If the proposer has ascertained the cognizant program office through preliminary contacts with Program staff, the proposal may be submitted directly to that Office. In such instances, the proposer should separately send a copy of the proposal cover letter to the Unsolicited Proposal Management Officer to assure that the proposal is logged in the Department's automated tracking system for unsolicited proposals.

§ 9–4.909 Receipt, review and evaluation.

* * * * *

(e) *Review and approval.* The justification shall contain a recommendation, concurrence (when needed), and approval as follows: (In the case of cost shared contracts, review levels shall be based on the sum of the contractor and Government shares.)

(1) The recommendation shall be prepared and reviewed within the initiating office at such levels as are deemed appropriate by the Senior Program Official for procurements initiated by Headquarters or the Head of the Procuring Activity for field initiated

procurements. In establishing levels for the review of such recommendations, the Senior Program Official or Head of the Procuring Activity shall assure that the recommendation is reviewed at a senior organizational level in order to assure that competition is sought when appropriate. See FPR 1–4.910 and 1–4.911.

(2) The more complex and costly transactions will benefit from early coordination with counsel. Justifications exceeding $1,000,000, or such lower level as counsel may determine, shall be submitted by the initiator to counsel, at the Headquarters or field location of the initiator, for concurrence prior to forwarding to the Contracting Officer.

(3) The justification, following review of the recommendation and concurrence of counsel (if required or considered appropriate), shall be forwarded to the cognizant Contracting Officer for approval. If the justification is acceptable to the cognizant Contracting Officer, review shall be sought at such level as the Head of the Procuring Activity may require. In specifying levels of review, the HPA shall assure that justifications of more than $10,000 are reviewed at a level above the cognizant Contracting Officer as required by Section 1–3.101(d) of the FPR. The HPA shall further assure that the official designated as the reviewing official is a Contracting Officer.

* * * * *

§ 9–4.950 Notice of program interest.

* * * * *

(b) * * *

(5) An expiration date, as needed. An expiration date for a Notice of Program Interest is not to be considered a formal due date or common cut-off date for the submission or receipt of unsolicited proposals as is associated with formal procurement solicitations. Rather the expiration date is an approximation of the time after which program interests or directions may be expected to change less the necessary administrative time that will be needed for the evaluation and possible award of contracts resulting from the notice. The Alternate Late Proposal clause of FPR 1–3.802–2 may be used for Notices of Program Interest without regard to the approval requirement of section 9–3.802–1. When used, the clause at FPR 1–3.802–2 should be appropriately modified at paragraph (a)(4) to substitute some other cut-off milestone as a competitive range determination is not involved.

* * * * *

(c) The content of the notice should be consolidated at the responsible office level and should be in the format that best reflects the needs of that specific office; e.g., letter, booklet, bulletin, or related documents. Such notices shall be coordinated in advance with the Unsolicited Proposals Management Officer identified at section 9–4.908(b).

(d) The notice should be distributed widely. It may be distributed to industry, associations, including small business associations, schools, colleges and universities, appropriate professional and scientific journals, other DOE offices, as well as individuals and organizations that request copies on a one-time basis. Copies of the notice are to be sent to the Unsolicited Proposals Management Officer identified at section 9–4.908(b).

* * * * *

§ 9–4.955 Extensions.

§ 9–4.955–1 Extension proposals.

(a) Where additional time beyond the current contract period is required to complete or continue the work approved in the acceptance of the initial unsolicited proposal, the Contractor should submit six copies of an extension proposal to the awarding office in sufficient time to allow evaluation and possible processing before the date of expiration of the contract. These procedures do not apply to requests for no-cost extensions as may sometimes be needed to complete all details such as final report of the project.

(b) The extension proposal should outline and justify a program and budget for the succeeding year(s), showing in detail the estimated cost for the additional period(s) requested. It should include the same type of information to the same extent as was contained in the initial proposal. Any contemplated change in program or scope for the ensuing period(s) should be justified and explained clearly, and must remain consistent with the original method, approach or idea which was accepted as the basis for award by DOE as a result of the initial unsolicited proposal. This is not, however, intended to preclude a redirection based upon a discovery or breakthrough occurring under the contract to date.

(c) The extension proposal should include a financial profile under the current contract including:

(1) Total project costs to date, indicating the amount chargeable to DOE;

(2) An estimate of the total costs to be incurred during the remainder of the current period, including a statement of unextended balance.

§ 9–4.955–2 Evaluation of requests for extension.

(a) Requests for extensions are to be evaluated by the appropriate program office in light of:

(1) Progress reports submitted by the Contractor;

(2) Research results published in scientific media;

(3) Field visits by technical personnel;

(4) Contractor's progress and potential for achieving desired results;

(5) Continued relevance to DOE's mission;

(6) Scientific and technical merit of the research;

(7) Availability of funds;

(8) Likelihood that competition at this stage in the project would hasten achieving the desired results.

(b) Requests for extensions generally follow the same process of review and evaluation of technical aspects and funding, preparation and execution of contract, and administration as does a new project.

§ 9–4.955–3 Approval.

(a) When the extension request has received a favorable technical evaluation and when a determination has been made that similar conditions exist relative to those that justified acceptance of the initial unsolicited proposal, a justification for extension of the award resulting from an unsolicited proposal shall be processed for review and approval as indicated in section 9–4.909(e).

§ 9–4.955–4 Content of extension justification.

(a) As a minimum, the extension justification should contain:

(1) A statement of the result of the technical evaluation (9–4.955–2)

(2) An evaluation of any contemplated change in the contract scope of work for the renewal period and a justification explaining why this change is consistent with the original method, approach or idea which was accepted as the basis for award by DOE as a result of the initial unsolicited proposal.

(3) An assessment of the current status of the original circumstances and conditions which justified acceptance of the initial unsolicited proposal identifying any changes that may have developed and providing rationale as to why such change(s) should not preclude renewal.

§ 9–4.955–5 Rejection of extension request.

(a) If, after evaluation, it is decided that the extension period should not be supported on the basis of technical merit or other reasons, such as lack of

funding, or changed mission relevance, the project officer shall:

(1) Prepare a written statement setting forth the basis for rejection, submit one copy to the responsible program official for approval and transmittal to the proposer and retain one copy in the permanent file.

(2) Promptly notify the Contracting Officer in order that the current contract may be closed out.

§ 9-4.955-6 Continuation of effort on other than a direct extension basis.

(a) Under certain circumstances it may be in the Government's best interest to continue or complete the work begun under a contract awarded as a result of an unsolicited proposal but which is not appropriate for extension. Continuation or completion of the work shall be accomplished by means of competition, unless non-competitive procurement can be justified in accordance with section 9-3.805-51.

Change 7.3

Subpart 9-4.50, "Multiple Awards—Phased Procurements," is amended by deleting the final sentence of section 9-4.5002(a) and substituting a new sentence to provide that counsel will be a non-voting advisory member of any subsequent phase evaluation team unless counsel concurs in a waiver of such participation. Therefore, section 9-4.5002(a) is amended by substituting a new final sentence as follows:

Subpart 9-4.50—Multiple Awards—Phased Procurements

§ 9-4.5002 Evaluation.

(a) * * * Counsel will be included as a non-voting advisory member of the evaluation team unless such participation is waived with the concurrence of counsel.

* * * * *

Change 7.4

Subpart 9-4.51, "Special Research Contracts with Educational Institutions," is amended at section 9-4.5111-3, "Authorization to renew," by substituting the word "procurement" for "field" at the second word. Therefore, section 9-4.5111-3 is amended by revising paragraph (c) to read as follows:

Subpart 9-4.51—Special Research Contracts with Educational Institutions

§ 9-4.5111-3 Authorization to renew.

* * * * *

(c) The procurement office that has administrative jurisdiction of an existing contract may extend the term of an existing contract without authorization from the cognizant program office, provided that:

(1) Any such extension does not provide for an increase in DOE's monetary obligation under the contract;

(2) The scope of work is not revised by such extension;

(3) Such extension is necessary to permit completion of the scope of work authorized by Headquarters, including preparation of required reports; and

(4) Any such extension will not be for a period in excess of 90 days.

* * * * *

Change 7.5

Part 9-7, "Contract Clauses," is amended at several places. Section 9-7.103-53, "Security," is modified to add language erroneously left out when this clause was updated at 46 FR 28925. The change adds the following phrase to the end of the third sentence of paragraph (a)," or properly destroy the classified matter and furnish a Certificate of Nonpossession to DOE." The change also adds the phrase "include a Statement of Justification," between the words "shall" and "identify" at the fifth sentence of paragraph (a). The change also adds "subsequent and" between the words "or" and "prior" at the second sentence of paragraph (f). Section 9-7.204-5 is amended to correct paragraph references which should be upper-case rather than lower-case. Section 9-7.802-6, "Assignment of Claims," is amended to include reference to the DOE-PR section being added by Change 7.7. Section 9-7.803-2, "Authorization and Consent," is amended to correct an erroneous reference to "section 9-9.102-2" which should be "section 9-9.102-1." Section 9-7.804-51, "Privacy Act," is deleted as it duplicates section 9-7.803-11. The final change in this Part is the addition of a new Subpart 9-7.11, "Letter Contracts." Therefore, sections 9-7.103-53 (a) and (f), 9-7.204-5, 9-7.802-6, 9-7.803-2 are revised, § 9-7.804-51 is removed and reserved, and a new Subpart 9-7.11 is added, consisting of sections 9-7.1101 through 9-7.1102-5, as follows:

PART 9-7—CONTRACT CLAUSES

§ 9-7.103-53 Security.

Security

(a) *Contractor's duty to safeguard all classified information.* The contractor shall, in accordance with DOE security regulations and requirements, be responsible for safeguarding all classified information, and protecting against sabotage, espionage, loss and theft, the classified documents and material in the contractor's possession in connection with the performance of work under this contract. Except as otherwise expressly provided in this contract, the contractor shall, upon completion or termination of this contract, transmit to DOE any classified matter in the possession of the contractor or any person under the contractor's control in connection with performance of this contract or properly destroy the classified matter and complete a Certificate of Nonpossession to be furnished to DOE. If retention by the contractor of any classified matter is required after the completion or termination of the contract and such retention is approved by the Contracting Officer, the contractor will complete a Certificate of Possession to be furnished to DOE specifying the classified matter to be retained. The certification shall include a statement of justification, identify the items and types or categories of matter retained, the conditions governing the retention of the matter, and the period of retention, if known. If the retention is approved by the Contracting Officer, the security provisions of the contract will continue to be applicable to the matter retained.

* * * * *

(f) *Definition of National Security Information.* The term "National Security Information" means information or material which is owned by, produced for or by, or under the control of the United States Government, which has been determined pursuant to Executive Order 12065 or subsequent and prior Orders to require protection against unauthorized disclosure, and which is so designated.

* * * * *

§ 9-7.204-5 Insurance liability to third persons.

Insert the clause in FPR 1-7.204-5 with the following modification in paragraph (C). Change (C) to (D) and insert a new (C) between "Officer," and "or" at the end of (B) as follows: "(C) for which appropriated funds are not available,".

§ 9-7.802-6 Assignment of Claims.

Insert the clause prescribed by FPR 1-30.703 as modified by section 9-30.703.

§ 9-7.803-2 Authorization and consent.

Insert the clause prescribed by section 9-9.102-1 under the conditions stated therein.

§ 9-7.804-51 [Reserved]

Subpart 9-7.11—Letter Contracts

§ 9-7.1101 Applicability.

This subpart sets forth uniform contract clauses for use in letter

contracts as defined and described at FPR 1–3.408 and DOE–PR section 9–3.408.

§ 9–7.1102 Required clauses.

Letter contracts shall include all clauses required for the type of definitive contract anticipated to result from the letter contract. See section 9–16.5002–4 for a suggested outline of a letter contract. The following shall be included in all letter contracts.

§ 9–7.1102–1 Definitization.

(a) When it is known at the time of entering into the letter contract that the price of the definitive contract will be based on adequate price competition or will otherwise meet the criteria of FPR 1–3.807–3, paragraph (1) of the following clause may be appropriately modified to eliminate the requirement for cost of pricing data. The definitization schedule in paragraph (2) shall include a date for the receipt of the contractor's proposal, if one has not yet been furnished, a date for the commencement of contract negotiations and a target date for definitization as well as any other meaningful milestones appropriate to the individual acquisition.

Definitization

A—— type definitive contract is contemplated. To accomplish this result, the Contractor agrees to enter into negotiation promptly with the Contracting Officer over the terms of a definitive contract, which will include all clauses required by the Federal and DOE Procurement Regulations or by law as of the date of execution of the letter contract, and such other clauses, terms, and conditions as may be mutually agreeable. The Contractor agrees to submit a proposal and cost or pricing data supporting the proposal.

(2) The schedule for definitization of this contract is set forth below: (Insert appropriate milestone, e.g., receipt of proposal, begin negotiations, draft contract, etc.)

Milestone ——————————
Date ——————————

Target Date for Definitization: ——

(3) If agreement on a definitive contract to supersede this letter contract is not reached by the target date set forth in (2) above or any extension thereof by the Contracting Officer, the Contracting Officer may, with the approval of the Head of the Procuring Activity, determine a reasonable price or fee in accordance with the applicable cost principles of the Federal and DOE Procurement Regulations, subject to appeal by the Contractor as provided in the "Disputes" clause of this contract. In any event, the Contractor shall proceed with completion of the contract, subject only to the "Limitation of Government Liability" clause. After the date of the Contracting Officer's determination of price or fee, the contract shall be governed by:

(i) All clauses required by the Federal and DOE Procurement Regulations on the date of execution of this letter contract for either a fixed-price type contract or a cost-reimbursement type contract as determined by the Contracting Officer under this paragraph (3);

(ii) All clauses required by law as of the date of the Contracting Officer's determination; and

(iii) Such other clauses, terms and conditions as may be mutually agreed upon. To the extent consistent with the foregoing, all clauses, terms and conditions included in this letter contract except which by their nature are applicable only to a letter contract shall continue to be effective.

(End of clause)

(b) When the award of the letter contract is based on price competition, the following paragraph (4) shall be added to the clause in paragraph (a) of this section. In the blank therein, insert the contractor's proposed price on which the award was based.

(4) The definitive contract resulting from this letter contract will include a negotiated (price ceiling) (firm-fixed price) in no event to exceed $——

(End of clause addendum)

§ 9–7.1102–2 Execution and commencement of Work

Execution and Commencement of work.

The Contractor's acceptance of this letter contract will be indicated by affixing its signature thereto and returning such signed copies, except one for its file, to the Contracting Officer not later than ——. Upon acceptance, the Contractor shall proceed with performance of the work described herein, including procurement on necessary materials.

(End of clause)

§ 9–7.1102–3 Limitation of Government liability.

Limitation of Government Liability

The Contractor is not authorized to make expenditures or to incur obligations, in performance of this contract, which exceed —— dollars ($——), which is the maximum amount for which the Government shall be liable if this contract is terminated.

§ 9–7.1102–4 Payment.

Payment

Payments will be made in accordance with the appropriate payments provision of the General Provisions except no payment will be made for fee under a cost-type contract and payments will not exceed the limitation of Government liability stated above during the letter contract period.

(End of clause)

§ 9–7.1102–5 Termination.

Termination

The Government retains its rights to terminate this letter contract for default or convenience of the Government as provided in the General Provisions.

(End of clause)

Change 7.6

Subpart 9–16.50, "Contract Outlines," is amended at section 9–16.5002–1, Article B–XIV, to correct an erroneous FPR citation and at section 9–16.5002–5 to add a new section entitled "Outline of a Letter Contract. Therefore, § 9–16.5002–1 Appendix B is amended by revising Article B–XIV and § 9–16.5002–5 is added to read as follows:

Subpart 9–16.5002–1—Contract Outlines.

§ 9–16.5002–1 Special Research Contracts (SRC) with educational institutions.

* * * * *

Appendix B—General Provisions

* * * * * *

Article B–XIV Contract Work Hours and Safety Standards Act—Overtime Compensation

Insert the clause set forth in FPR 1–7.402–16.

* * * * *

§ 9–16.5002–5 Outline of a letter contract.

Department of Energy (Use Letterhead Stationary) Date of Transmittal
Office Issuing Letter Contract and address
Contract Number
To: Insert Contractor's Name and Address
Brief Description of Work
(If a Defense contract is involved, insert the appropriate priority rating from the DOD Priorities and Allocation Manual. A rating may be appropriate to other types of contracts. See section 9–7.104–50(b).)
Dear: ——————————

This letter, when accepted by you, will constitute a contract on the terms set forth herein and signifies the intention of both parties to execute a formal, definitive (insert type of contract) contract for the delivery of the supplies or the performance of the services described herein.

In accordance with the clause entitled "Execution and Commencement of Work," you shall immediately proceed to commence performance of the work.

In accordance with the clause entitled "Definitization," you shall submit a proposal regarding the price or estimated cost to the Government as well as any special terms you wish reflected in the definitive contract for the articles or services covered by this contract. Your proposal shall include documentation supporting the price or estimated cost in accordance with the suggested format attached. Full supporting rationale should likewise be furnished for any special terms. A Certificate of Current Cost or Pricing Data shall be submitted upon agreement regarding the price or estimated cost.

Please indicate your acceptance of the foregoing by signing and returning this letter contract.

Sincerely yours,
(Signature) ——————————

Enclosure 1—Schedule

Part 1—Special Provisions Applicable to Letter Contract
Part 2—Proposed Special Provisions of Definitive Contract
Part 1—Special Provisions Applicable to Letter Contract
Article I—Definitization

(1) A——type definitive contract is contemplated. To accomplish this result, the Contractor agrees to enter into negotiation promptly with the Contracting Officer over the terms of a definitive contract, which will include all clauses required by the Federal and the DOE Procurement Regulations or law as of the date of execution of the letter contract, and such other clauses, terms and conditions as may be mutually agreeable. The Contractor agrees to submit a proposal and cost or pricing data supporting the proposal.

(2) The schedule for definitization of this contract is set forth below: (Insert appropriate milestones, e.g., receipt of proposal, begin negotiations, draft contract, etc.)
Milestone _____
Date _____

Target Date for Definitization:——

(3) If agreement on a definitive contract to supersede this letter contract is not reached by the target date set forth in (2) above or any extension thereof by the Contracting Officer, the Contracting Officer may, with the approval of the Head of the Procuring Activity, determine a reasonable price or fee in accordance with the applicable cost principles of the Federal and DOE Procurement Regulations, subject to appeal by the Contractor as provided in the "Disputes" clause of this contract. In any event, the Contractor shall proceed with completion of the contract, subject only to the "Limitation of Government Liability" clause. After the date of the Contracting Officer's determination of price or fee, the contract shall be governed by:

(i) all clauses required by the Federal and DOE Procurement Regulations on the date of execution of this letter contract for either a fixed-price type contract or a cost-reimbursement type contract as determined by the Contracting Officer under this paragraph (3);

(ii) all clauses required by law as of the date of the Contracting Officer's determination; and

(iii) such other clauses, terms and conditions as may be mutually agreed upon. To the extent consistent with the foregoing, all clauses, terms and conditions included in this letter contract except which by their nature are applicable only to a letter contract shall continue to be effective.

(End of clause)

(If the letter contract award is based on *price competition* use this additional paragraph and insert the contractor's proposed price on which the selection was based.)

(4) The definitive contract resulting from this letter contract will include a negotiated (insert price ceiling or firm-fixed price) not to exceed
$ _____

(End of clause addendum)

Article II—Execution and Commencement of Work

The contractor's acceptance of this letter contract will be indicated by affixing its signature thereto and returning such signed copies to the Contracting Officer not later than ——. Upon acceptance, the Contractor shall proceed with performance of the work described herein, including procurement of necessary materials.

(End of Clause)

Article III—Limitation of Government Liability

During the term of this letter contract, and prior to its definitization as a result of the negotiations contemplated by the parties, the maximum liability of the Government shall not exceed $—— except as may be provided in any modification of this letter contract agreed to by both parties.

(End of Clause)

Article IV—Payment

Payments will be made in accordance with the appropriate payments provision of the General Provisions except that no payment will be made for fee and payments will not exceed the limitation of Government liability stated above during the letter contract period.

(End of Clause)

Article V—Termination

The government retains its rights to terminate this letter contract for default or convenience of the Government as provided in the General Provisions.

(End of Clause)

Part 2—Proposed Special Provisions of Definitive Contract

The following draft special provisions reflect the Government's best estimate, at the time of offering this letter contract, of the special provisions to be included in the definitive contract. The parties recognize that the exact provisions may vary as a result of their contemplated negotiations. (Insert the appropriate provisions which are expected to appear in the definitive contract.)

Enclosure 2—General Provisions

Part 1—Alterations of General Provisions (Insert any appropriate alterations)
Part 2—Additional General Provisions (Insert any appropriate additions)
Part 3—General Provisions (Attach appropriate set of DOE Standard General Provisions; e.g., 100.A, 400.A, etc.)

Enclosure 3—Proposal Preparation Material

(Attach here materials that will be needed for preparation of an adequate proposal to support negotiation of the definitive contract, e.g., cost or pricing data forms, representations and certification forms, etc.)

Enclosure 4—Administrative Matters

(Insert here such items as billing instructions, billing address, identification of Contract Specialist, Contracting Officer, Technical Representative, and Patent Counsel, etc.)

Change 7.7

Section 9–30.703, "Contract clause—assignment of claims," is amended to add a new second sentence instructing that the text of the clause be updated to recognize the Department of Energy as the successor agency of the Energy Research and Development Administration. Therefore, section 9–30.703 is amended by the addition of a new second sentence as follows:

§ 9–30.703 Contract clause—assignment of claims.

* * * * *

Modify the clause at FPR 1–30.703 by substituting the Department of Energy for the Energy Research and Development Administration at the last sentence of paragraph (a) of the clause.

Change 7.8

Part 9–50, "Operating and On-Site Service Contracts," is amended to add coverage at 9–50.105 regarding identical bids received, at 9–50.303 and 9–50.304, to make security and facilities management matters a part of the formal extend or compete evaluation process and to make clarifications. Section 9–50.1510–20 is also being revised to update the Department's policy and principles relating to reimbursement of expenses of operating and on-site contractors for the relocation of employees essential to contract performance. Therefore, sections 9–50.105, 9–50.303(c)(1), 9–50.304(c)(2) introductory text and (iv), and 9–50.1510–20 are revised as follows:

PART 9–50—OPERATING AND ON-SITE SERVICE CONTRACTS

§ 9–50.105 Reporting possible antitrust violations and identical bids.

The procedures in FPR Subparts 1–1.9 and 1–1.16 shall be applied to procurements by operating and on-site contractors. Reports required by these subparts shall be submitted to the Head of the Procuring Activity to be handled in accordance with 9–1.9 and 9–1.16.

§ 9–50.303 Operating and on-site service contracts.

* * * * *

(c) * * *

(1) Overall performance of an incumbent contractor including specific consideration of the contractor's

administrative, environmental, safeguards and security, safety, health, site planning, maintenance, construction, facility management, energy conservation program considerations and cost, schedule and technical performance.

* * * * *

§ 9-50.304 Field recommendations to extend or compete operating and on-site contracts.

* * * * *

(c) * * *

(2) A statement of the present contractor's overall performance since award of the contract, of if previously extended, since Headquarters' last authorized extension of the contract. This should be supported by a copy or detailed summary of the most recent overall DOE management appraisal of the contractor's performance and a brief summary of the annual DOE appraisals of the contractor's performance.

* * * * *

(iv) For these items not covered by sections 9-50.303(c)(2) (i) and (ii) above, a separate appraisal shall be made of the contractor's performance in assuring consideration of the elements identified in section 9-50.303(c)(1).

* * * * *

§ 9-50.1510-20 Relocation costs.

(a) Relocation costs are costs incident to the permanent change of duty assignment (for an indefinite period or for a stated period of not less than 12 months) of an existing employee or upon recruitment of a new employee. The following types of costs are allowable as noted, subject to provisions of paragraphs (b), (c), and (d) of this section.

(1) Cost of travel of the employee and members of his immediate family and transportation of his household and personal effects to the new location.

(2) Costs of finding a new home, such as advance trips by employees and spouses to locate living quarters, and temporary lodging during the transition periods, not exceeding separate cumulative totals of 60 days for employees and 45 days for spouses and dependents, including advance trip time.

(3) Closing costs (i.e., brokerage fees, legal fees, appaisal fees, points, finance charges, etc.) incident to the disposition of actual residence owned by the employee when notified of transfer; *provided* that closing costs when added to the continuing costs described in (a)(6) of this section shall not exceed 14% of the sales price of the property sold.

(4) Other necessary and reasonable miscellaneous expenses incident to relocation, such as disconnecting and connecting household applicances; automobile registration; drivers license and use taxes; cutting and fitting rugs, draperies, and curtains, forfeited utility fees and deposits; and purchase of insurance against damage to or loss of personal property while in transit.

(5) Cost incident to the acquisition of a home in a new location, except that these costs will not be allowable for existing employees or newly recruited employees who prior to the relocation were not homeowners and the total costs shall not exceed 5% of the purchase price of the new home.

(6) Continuing costs of ownership of the vacant former actual residence being sold, such as maintenance of building and grounds (exclusive of fixing up expenses), utilities, taxes, property insurance, mortgage interest etc., after settlement date or lease date of new permanent residence; *provided* that when added to the closing costs described in (a)(3) of this section, the costs shall not exceed 14% of the sales price of the property sold.

(7) Mortgage interest differential payments, except that these costs are not allowable for existing or newly recruited employees who prior to the relocation were not homeowners, and the total payments are limited to an amount determined as follows:

(i) difference between the mortgage interest rates of the old and new residence times the current balance of the old mortgage times 3 years; and

(ii) when mortgage differential payments are made on a lump sum basis and the employee leaves or is transferred again in less than 3 years, the amount initially recognized shall be proportionately adjusted to reflect payments only for the actual time of the relocation.

(8) Rental differential payments covering situations where relocated employees retain ownership of a vacated home in the old location and rent at the new location. The rented quarters at the new location must be comparable to those vacated, and the allowable differential payment may not exceed the actual rental costs for the new home, less the fair market rent for the vacated home times 3 years.

(9) Cost of canceling an unexpired lease.

(b) The cost described in paragraph (a) of this section must also meet the following criteria to be considered allowable.

(1) The move is for the benefit of the Government.

(2) Reimbursement must be in accordance with an established policy or practice and program that is consistently followed and is designed to motivate employees to relocate promptly and economically.

(3) Amounts to be reimbursed do not exceed the employee's actual expenses, except that for miscellaneous costs of the type discussed in (a)(4), a flat amount, not to exceed $1,000, may be paid in lieu of actual costs.

(c) The following types of costs are not allowable:

(1) Loss on sale of a home.

(2) Continuing mortgage principal payments on residence being sold.

(3) Cost incident to the acquisition of a home in a new location as follows:

(i) real estate brokers fee and commissions;

(ii) costs of litigation;

(iii) real and personal property insurance against damage or loss of property;

(iv) mortgage life insurance;

(v) owner's title policy insurance when such insurance was not previously carried by the employee on the old residence (however, costs of a mortgage title policy is allowable) and;

(vi) property taxes and operating or maintenance costs.

(4) Payments for employee's income taxes or FICA (social security taxes) incident to reimbursed relocation costs.

(5) Costs incident to furnishing equity or nonequity loans to employees or making arrangements with lenders for employees to obtain lower-than-market rate mortgage loans.

(d) If relocation costs for an employee have been allowed and the employee resigns within 12 months for reasons within the employee's control, it is expected the contractor shall refund or credit the relocation costs to the Government.

(e) Contractor payments to independent relocation assistance firm handling acquisitions and sales of houses of transferred employees are allowable in amounts which otherwise represent payment for itemized costs when are allowable in accordance with the provisions of this section.

Change 7.9

Section 9-51.101(a) (1) and (2) are removed as they involve organizations, Resource Applications and Energy Technology, which no longer exist. Therefore, Section 9-51.101 is amended by removing and reserving paragraphs (a) (1) and (2) as follows:

§ 9-51.101 General instructions regarding submissions to Headquarters.

(a) * * *

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Recombinant DNA Research; Action Under Guidelines

AGENCY: National Institutes of Health, PHS, DHHS.

ACTION: Notice of action under NIH guidelines for research involving recombinant DNA molecules.

SUMMARY: This notice sets forth an action taken by the Director, NIAID, under the August 1982 NIH Guidelines for Research Involving Recombinant DNA Molecules (47 FR 38048).

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Additional information can be obtained from Dr. William J. Gartland, Jr., Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205; (301) 496–6051.

SUPPLEMENTARY INFORMATION: Today a major action is being promulgated under the NIH Guidelines for Research Involving Recombinant DNA Molecules. The proposed action wa published for comment in the **Federal Register** of September 22, 1982, and reviewed and recommended for approval by the Recombinant DNA Advisory Committee (RAC) at its meeting on October 25, 1982. Final action on the proposal was deferred pending a review by the USDA Recombinant DNA Committee (48 FR 1156). In accordance with section IV–C–1b of the NIH Guidelines, this action has been found to comply with the Guidelines and to present no significant risk to health or the environment.

I. Approval to Field-Test Transformed Tomato and Tobacco Plants

In a letter dated June 9, 1982, Dr. John Sanford of Cornell University requested permission to field-test tomato and tobacco plants tranformed with bacterial (*E. coli* K–12) and yeast DNA using pollen as a vector. Plants would then be screened in the field to detect transformation events. Dr. Sanford argued that P1 Containment is impractical when the screening of thousands of whole seedlings become necessary.

The proposal was summarized in the September 22, 1982, **Federal Register** (47 FR 41925). During the comment period, no comments were received.

The RAC reviewed the request at its meeting on October 25, 1982. Although the RAC recommended approval of this proposal by a vote of ten in favor, one opposed, and three abstentions, final action on the recommendation was deferred pending a review of the proposal by the USDA Recombinant DNA Committee (48 FR 1156).

The USDA Recombinant DNA Committee met on February 23, 1983, and discussed the proposal. The USDA Committee unanimously approved the proposal and could foresee no potential hazard to humans or the environment as a result of having these experiments tested in the fields of the New York State Agricultural Experiment Station at Geneva, New York. The Committee said that it recognizes the need to field test plants, produced by whatever method, in order to assess the value of the putative "engineered plant."

I accept the recommendations of the RAC and the USDA Recombinant DNA Committee, and Appendix D of the Guidelines is amended to reflect this decision.

II. Summary of Action

The following new section is added to Appendix D of the Guidelines:

"Appendix D-IX. Permission is granted to Dr. John Sanford of Cornell University to field test tomato and tobacco plants transformed with bacterial (*E. coli* K–12) and yeast DNA using pollen as a vector."

Note.—OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance*. Normally NIH lists in its announcements the number and title of affected individual programs for guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every federal program would be included as many federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: April 4, 1983.

Richard M. Krause,

Director, National Institute of Allergy and Infectious Disease, National Institutes of Health.

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

Publication of Approved Systems of Need Analysis for the National Direct Student Loan, College Work-Study, and Supplemental Educational Opportunity Grant Programs

AGENCY: Department of Education.

ACTION: Notice of approved systems of need analysis for academic year 1983–1984.

SUMMARY: The Secretary of Education annouces approved need analysis systems that institutions of higher education must use in calculating a student's financial need during academic year 1983–1984 under the National Direct Student Loan (NDSL), College Work-Study (CWS), and Supplemental Educational Opportunity Grant (SEOG) Programs. These programs are know collectively as the campus-based programs.

FOR FURTHER INFORMATION CONTACT: Margaret O. Henry or Paula Husselmann, Division of Policy and Program Development, Office of Student Financial Assistance, Department of Education, 400 Maryland Avenue, SW., (Room 4018, ROB–3) Washington, D.C. 20202, Telephone (202) 245–9720.

SUPPLEMENTARY INFORMATION: The campus-based programs are "need based" student financial aid programs. Under each program, an institution must determine whether a student has financial need. It determines need by subtracting from the student's educational costs, his or her expected family contribution, i.e., the amount the student and his or her parents may reasonably be expected to contribute toward his or her educational costs. Institutions determine a student's expected family contribution by using a need analysis system.

Prior to the 1982–1983 academic year, institutions participating in the campus-based programs were permitted to use any one of several need analysis systems approved by the Secretary for that purpose. The Secretary approved a need analysis system for the campus-based programs if it produced an expected family contribution that: (1) Increased incrementally as parents' financial strength, measured in constant dollars, increased and (2) was equal for families of equal financial strength. In addition, such a system had to produce expected family contribution amounts that came within $50 of the expected family contribution amounts determined by the Secretary in published sample benchmark cases, in at least 75 percent of those cases.

The Secretary was also directed by statute to publish a separate schedule of expected family contributions for the Pell Grant program only.

The Education Amendments of 1980, Public Law 96–374, amended the Higher Education Act by requiring that the Secretary develop and publish a single schedule of expected family contributions for the Pell Grant and campus-based programs. However, the Third Continuing Resolution for Fiscal Year 1982, Public Law 97–92, directed that, for the 1982–1983 academic year, there not be a single schedule of family contributions for the Pell Grant and campus-based programs. The law directed the Secretary to approve separate need analysis systems developed by private organizations and agencies to be used by institutions under the campus-based programs.

For the 1983–1984 and 1984–1985 academis years, the Congress in the Student Financial Assistance Technical Amendments Act of 1982, Public Law 97–301, has again legislatively overriden the requirement enacted in the Education Amendments of 1980 that the Secretary establish one schedule of expected family contributions for the Pell Grant and campus-based programs. Section 4 of that Act provides that the Secretary "shall establish or approve separate systems of need analysis for academic year 1983–1984 and for academic year 1984–1985 for the * * * [campus-based programs.]" Accordingly, the Secretary is approving separate systems of need analysis under the authority of Section 4 of the Student Financial Assistance Technical Amendments Act of 1982 and the following program regulations, 34 CFR 674.13, 175.13, and 676.13 for the NDSL, CWS, and SEOG programs, respectively.

The systems listed below qualified as approved systems of need analysis under the sample cases published in the **Federal Register** of January 25, 1983 (48 FR 3401–3402), or are systems that are specifically approved under the above cited regulations for each program. Therefore, an institution, in academic year 1983–1984, must use any one of the following systems of need analysis to determine a student's expected family contribution under the National Direct Student Loan, College Work-Study, and Supplemental Educational Opportunity Grant Programs:

1. Academic Computing Systems, Incorporated, Dallas, Texas
2. Advanced Process Laboratories, Omaha, Nebraska
3. The American College Testing Program, Iowa City, Iowa
4. The College Scholarship Service, The College Board, New York, New York
5. Compugrant, Incorporated, Hiram, Ohio
6. Financial Analysis Service, Hiram, Ohio
7. Functional Solutions, Incorporated, Utica, New York
8. G. E. White Needs Analysis System, Lake Forest, Illinois
9. The Graduate and Professional School Financial Aid Service, Princeton, New Jersey
10. M-Data, Incorporated, Cedar Springs, Michigan
11. Pennsylvania Higher Education Assistance Agency, Harrisburg, Pennsylvania
12. SAFE System—Information and Communications, Incorporated, Burbank, California
13. Student Aid Management (SAM–II) System—Sigma Systems, Incorporated, Los Angeles, California
14. T.E.K. Computer Systems, Wurtsboro, New York
15. Family Contribution (FC) printed on the Student Aid Report, United States Department of Education
16. The method of calculating student aid indices used in the Pell Grant Program (34 CFR 690), United States Department of Education
17. The Income Tax System (dependent students only), United States Department of Education

Dated: April 13, 1983.

(Catalog of Federal Domestic Assistance No. 84.038, National Direct Student Loan Program; 84.033, College Work-Study Program; and 84.007, Supplemental Educational Opportunity Grant Program)

Edward M. Elmendorf,

Assistant Secretary for Postsecondary Education.

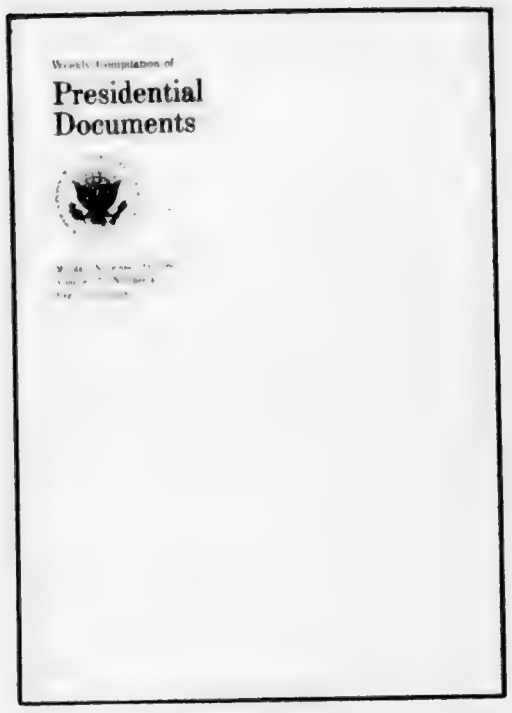
The authentic text behind the news . . .

The Weekly Compilation of **PRESIDENTIAL DOCUMENTS**

Administration of Ronald Reagan



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published quarterly, semiannually, and annually. Other features include lists of acts approved by the President and of nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by Office of the Federal Register, National Archives and Records Service, General Services Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 75
Monday, April 18, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 83-308]

7 CFR Part 301

Witchweed Regulated Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: This document amends the list of suppressive areas under the witchweed quarantine and regulations by adding areas in 9 counties in North Carolina and 1 county in South Carolina to the list of suppressive areas and by deleting areas in 9 counties in North Carolina and 3 counties in South Carolina from the list of suppressive areas. Other changes are also made to reflect changes in ownership of certain properties and to make corrections in certain descriptions to more accurately described the area regulated. This action is necessary as an emergency measure in order to prevent the artificial spread of witchweed and to delete unnecessary restrictions of the interstate movement of regulated articles.

DATES: Effective date of amendment April 18, 1983.

Written comments concerning this rule must be received on or before June 17, 1983.

ADDRESS: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 728 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Paul F. Sand, Staff Officer, Field Operations Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 663 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8295.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This interim rule is issued in conformance with Executive Order 12291 and Secretary's Memorandum No. 1512-1, and has been determined to be not a "major rule." Based on information complied by the Department, it has been determined that this interim rule will have an annual effect on the economy of approximately $650; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not cause significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived the review process required by Executive Order 12291. Also, the Assistant Secretary for marketing and Inspection Services has waived the requirements of Secretary's Memorandum 1512-1.

Certification Under the Regulatory Flexibility Act

Mr. James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small businesses and should not have a significant economic impact on any small organizations or small governmental jurisdictions. This action affects the interstate movement of regulated articles from specified areas in North Carolina and South Carolina. Based on information complied by the Department, it has been determined that there are approximately 290,000 small entities that move regulated articles interstate from such States and many hundreds of thousands of small entities that move regulated articles interstate from other States. However, based on such information, it has been determined that only approximately 35 entities move regulated articles interstate from the specified areas affected by this action. Further, the overall economic impact from this action is estimated to be only about $650.

Emergency Action

Harvey L. Ford, Deputy Administrator of the Animal and Plant Health Inspection Service for Plant Protection and Quarantine, has determined that an emergency situation exists which warrants publication without opportunity for a public comment period on this interim action. Due to the possibility that witchweed could be artificially spread interstate to noninfested areas of the United States, a situation exists requiring immediate action to better control the spread of this pest. Also, where witchweed no longer occurs, immediate action is needed to delete unnecessary restrictions on the interstate movement of regulated articles.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim rule are impracticable and contrary to the public interest and good cause if found for making this action effective less than 30 days after publication of this document in the **Federal Register**. Comments have been solicited for 60 days after publication of this document, and a final document discussing comments received and any amendments required will be published in the **Federal Register** as soon as possible.

Background

Witchweed is a parasitic plant which causes the degeneration of corn, sorghum, and other grassy crops. It has been found in the United States only in parts of North Carolina and South Carolina. The Witchweed Quarantine and regulations (7 CFR 301.80 through 301.80-10) quarantine the States of North Carolina and South Carolina and restrict the interstate movement of certain witchweed hosts from regulated areas in the quarantined States for the

purpose of preventing the artificial spread of witchweed.

Regulated areas are divided into suppressive areas and generally infested areas. Suppressive areas are regulated areas where eradication of witchweed is undertaken as an objective. Generally infested areas are regulated areas not designated as suppressive areas. Restrictions are imposed on the interstate movement of regulated articles from generally infested areas and suppressive areas in order to prevent the artificial movement of witchweed to noninfested areas and to prevent the reinfestation of suppressive areas where the witchweed no longer occurs.

Designation of Areas as Suppressive Areas

Surveys conducted by the United States Department of Agriculture and State agencies of North Carolina and South Carolina establish that witchweed has spread or is likely to spread to certain areas beyond the outer perimeter of areas previously designated as suppressive area. Therefore, as an emergency measure, the following areas in Cumberland, Duplin, Harnett, Johnston, Lenoir, Pender, Richmond, Scotland, and Wayne Counties in North Carolina, and Darlington County in South Carolina which were previously nonregulated areas are designated as witchweed suppressive areas. These additional areas are areas where eradication of witchweed is undertaken as an objective. This action is necessary in order to prevent the spread of witchweed and to facilitate its ultimate eradication.

North Carolina.

Cumberland County. The Holiday, Waddell, farm located on the south side of State Secondary Road 3122 and its junction with State Secondary Road 1402.

The Jackson, J. T., farm located on the west side of State Secondary Road 1403 and 0.7 mile north of its junction with U.S. Highway 401.

The Roberts, Christine Dawson, farm located on the south side of State Secondary Road 1714 and 0.5 mile west of its junction with State Secondary Road 1716.

Duplin County. The Branch, Hall, farm located 0.3 mile northwest of State Highway 11 and 1.0 mile northeast of junction of said highway and State Secondary Road 1378.

The Dodson, Twillie, farm located on the south side of State Secondary Road 1912 and 0.7 mile west of the junction of said road and State Highway 11.

The Pickford, P. H., farm located on the south side of State Secondary Road 1980 and 0.2 mile east of the dead end of said road.

The Stokes, J. D., Jr., farm located on both sides of State Secondary Road 1980 and 0.3 mile east of the dead end of said road.

The Thomas, J. R., farm located on the south side of State Secondary Road 1700 and 1.8 miles east of intersection of said road and State Secondary Road 1701.

Harnett County. The Forthberry, Bennett, farm located on the south side of State Secondary Road 1141 and 0.4 mile east on the junction of said road with State Secondary Road 1139.

The Frizzelle, Roscoe, farm located on the south side of State Secondary Road 1141 and 0.3 mile east of the junction of said road with State Secondary Road 1139.

The McNeil, Raymond F., farm located on the east side of State Secondary Road 1201 and north of the junction of said road with State Secondary Road 1202.

The Serina, David, farm located on the south side of State Secondary Road 1141 and 0.4 mile east of the junction of said road with State Secondary Road 1139.

The Spaulding, James, farm located on the north side of State Secondary Road 1141 and 1.3 miles east of the junction of said road with State Secondary Road 1139.

Johnston County. The McArthur, Margaret, farm located 1.4 miles north of State Secondary Road 1199 and 0.9 mile west of the junction of said road and State Secondary Road 1008.

Lenoir County. The Sutton, W. Edward, farm located on the east side of State Secondary Road 1333 and 0.4 mile south of State Secondary Road 1330.

The Taylor, Heber, farm located on the north side of State Secondary Road 1161 and 0.3 mile east of its junction with State Highway 55.

Pender County. The Hutcheson, Katie, farm located on field road 1.7 miles east of U.S. Highway 117 and 0.3 mile south of its intersection with State Secondary Road 1411.

The Thompson, Dick, farm located on the southwest side of State Secondary Road 1108 and 0.5 mile northwest of its junction with State Secondary Road 1107.

Richmond County. The David, Ethel, farm located on both sides of State Secondary Road 1803, on the west side of the intersection of said road with State Secondary Road 1825.

Scotland County. The Carmichael, John, farm located on both sides of State Secondary Road 1612 and 0.2 mile southwest of its intersection with State Secondary Road 1611.

Wayne County. The Lofton, Mary F., farm located on the south side of State Secondary Road 1745 and 0.1 mile west of its junction with State Secondary Road 1952.

The Smith, M. G., farm located on the west side of State Secondary Road 1952 and 0.3 mile south of its junction with State Secondary Road 1745.

South Carolina

Darlington County. The Johnson, William, farm located on the north side of a dirt road and 0.6 mile northwest of its junction with State Secondary Highway 133, said junction being 2 miles south of the intersection of said highway and State Secondary Highway 41.

Deletion of Areas From List of Regulated Areas

All previous suppressive areas in Columbus, Cumberland, Duplin, Hoke, Lenoir, Onslow, Richmond, Scotland, and Wayne Counties in North Carolina, and Darlington, Florence, and Horry Counties in South Carolina, are being released, except for those suppressive areas listed in this document in § 301.80–2a, which remain regulated.

It has been determined that the witchweed no longer occurs in certain suppressive areas of the above listed counties in North Carolina and South Carolina. There is therefore no basis to continue listing such areas as regulated areas for the purpose of preventing the artificial spread of witchweed. Therefore, as an emergency measure, parts or all of such counties are deleted from the list of suppressive areas in order to delete unnecessary restrictions on the movement of witchweed regulated articles.

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant pests, Quarantine, Transportation, Witchweed.

PART 301—DOMESTIC QUARANTINE NOTICES

Under the circumstances referred to above, § 301.80–2a of the witchweed quarantine and regulations (7 CFR 301.80–2a) is revised to read as follows:

§ 301.80–2a Regulated areas; suppressive and generally infested areas.

The civil divisions and parts of civil divisions described below are designated as witchweed regulated areas within the meaning of the provisions of this subpart; and such regulated areas are hereby divided into generally infested areas or suppressive areas as indicated below:

North Carolina

(1) *Generally infested areas.* None.

(2) *Suppressive areas.*

Beaufort County. The Jefferson, Russell M., farm located on the southwest side of State Secondary Road 1609 and 0.6 mile southeast of the junction of said road and State Highway 32.

The Osborne, H. R., farm located on both sides of State Secondary Road 1609 and 0.5 mile southeast of the junction of said road and State Highway 32.

Bladen County. The entire county.

Brunswick County. The Bryant, Ottice, farm No. 1 located at the end of a farm road 1.0 mile west of State Secondary Road 1342, 2.5 miles northwest of said State Secondary Road and its junction with State Highway 211.

The Bryant, Ottice, farm No. 2 located on both sides of State Secondary Road 1342, 2.3 miles northwest of said road and its junction with State Highway 211.

The Hewett, Patricia J., farm located on the west side of State Secondary Road 1151 and 0.4 mile south of its junction of State Secondary Road 1147.

The Hewett, Jr., R. B., farm located at the end of a farm road on the northeast side of State Secondary Road 1132, 0.4 mile northeast of said road and its intersection with N.C. Highway 130.

Columbus County. That part of the county lying north and west of a line beginning at a point where State Highway 211 intersects the Bladen-Columbus County line, thence south along said Highway 211 to its intersection with State Secondary Road 1740, thence southwest and south along said State Secondary Road 1740 to its junction with U.S. Highways 74 and 76, thence west along said highways to its intersection with White Marsh Swamp, thence south along said swamp to its junction with Cypress Creek, thence southwest along said creek to its intersection with State Highway 130, thence northwest along said highway to its junction with State Secondary Road 1166, thence southwest along said road to its junction with State Secondary Road 1157, thence southwest along said road to its junction with U.S. Highway 701, thence south and west along said highway to its intersection with State Secondary Road 1314, thence west along said road to its junction with State Secondary Road 1346, thence southwest along said road to its junction with the North Carolina-South Carolina State line.

The Brown, Annie, farm located on the west side of State Highway 11 and 0.6 mile south of the junction of said road with State Highway 87.

The Jacobs, Thomas, farm located 0.2 mile north of State Secondary Road 1847 and 1 mile northeast of the junction of said road 1847 with State Secondary Road 1740.

Craven County. The Chapman, Idel M., farm located on the west side of State Secondary Road 1459 and 0.1 mile north of junction of State Secondary Road 1463 with said road 1459 and 0.3 mile off west side of State Secondary Road 1459.

The Hawkins, Annie A., farm located on both sides of State Secondary Road 1283 and 1 mile east of the junction of said Road 1283 with State Secondary Road 1262.

The Hawkins, Mattie, farm located on the west side of State Secondary Road 1283 and 1.2 miles east and north of its southern junction with State Secondary Road 1282.

The Jones, Vann, farm located on the west side of State Secondary Road 1459 and 0.1 mile north of junction of State Secondary Road 1463 with said road and 0.4 mile off of west side of State Secondary Road 1459.

The Morris, Gerald K., farm located on the north side of State Secondary Road 1444 and 1.4 miles northwest of the junction of State Secondary Road 1447 with said road.

The Nelson Estate, Joseph, located on both sides of State Secondary Road 1450 and located 0.1 mile northeast of intersection of State Secondary Road 1454.

The Nobles, Jr., Jack, farm located on both sides of State Secondary Road 1262 and located 0.7 mile south of the junction of State Secondary Road 1258 and State Secondary Road 1262.

The Register, Keith, farm located 0.3 mile west of the junction of State Secondary Road 1251 with Highway 55 and on the north side of Highway 55.

The West, Gladys W., farm located on both sides of State Secondary Road 1263 and 1.4 miles east of its southern junction with State Secondary Road 1262.

The White, Raymond E., farm located on both sides of State Secondary Road 1263 and 0.2 mile east of its northern junction with State Secondary Road 1262.

Cumberland County. That area bounded by a line beginning at a point where U.S. Highway 401 intersects the Cumberland-Hoke County line, then east along said highway to its intersection with the Fayetteville city limits, then south, east, and northeast along said city limits to its junction with U.S. Highway 301 north, then northeast along said highway to its junction with U.S. Interstate 95, then northeast along said interstate to its junction with U.S. Highway 13, then east and northeast along said highway to its intersection with the Cumberland-Sampson County line, then southerly along said county line to its junction with the Bladen-Cumberland County line, then westerly along said county line to its junction with the Cumberland-Robeson County line, then northwesterly along said county line to its junction with the Cumberland-Hoke county line, then northwesterly along said county line to the point of beginning.

The Autry, J. C., farm located on the east side of U.S. Highway 301 and 0.1 mile north of its junction with State Secondary Road 1722.

The Barefoot, William, farm located on the east side of State Secondary Road 1005 and 1.1 miles northeast of its junction with State Secondary Road 1813.

The Bullock, Burline, farm located on the northeast side of State Secondary Road 1722 and 0.4 mile west of its junction with U.S. Highway 301.

The Bunce, Mrs. John, farm located on the north side of State Secondary Road 1814 and 0.3 mile west of its junction with State Secondary Road 1813.

The Costrell, C. T., farm located on the west side of State Secondary Road 1400 at its junction with State Secondary Road 1401.

The Elliott, Lattie, farm located on the north side of State Secondary Road 1722 and 0.4 mile east of its junction with State Secondary Road 1714.

The Elliott, W. H., farm located on the south side of State Secondary Road 1609 and 0.5 mile east of its junction with State Secondary Road 1710.

The Geddie, W. H., farm located on the east side of State Secondary Road 1714 and 0.2 mile north of its junction with State Secondary Road 1722.

The Gerald, Rufus, farm located on the east side of State Secondary Road 1818 and 0.5 mile north of its intersection with U.S. Highway 13.

The Godwin Ada P., farm located on the east side of State Secondary Road 1714 and 0.2 mile south of its junction with State Secondary Road 1722.

The Grimble, A. L, farm located on the east side of State Secondary Road 1608 and 0.5 mile north of its junction with U.S. Highway 401.

The Holiday, Waddell, farm located on the south side of State Secondary Road 3122 and its junction with State Secondary Road 1402.

The Jackson, J. T., farm located on the west side of State Secondary Road 1403 and 0.7 mile north of its junction with U.S. Highway 401.

The Lambert, Jack, farm located on the west side of State Secondary Road 1716 and 0.2 mile north of its junction with State Secondary Road 1717.

The Lee, Jack, farm located on the west side of State Secondary Road 1716 and 0.1 mile north of its junction with State Secondary Road 1717.

The Lovick, Eugene, farm located on the north side of State Secondary Road 1732 and 0.9 mile west of its junction with U.S. Highway 301.

The Lovick, Grady, farm located on the west side of State Secondary Road 1716 and 0.2 mile north of its junction with State Secondary Road 1717.

The Matthews, Ada H., farm located on the east side of State Secondary Road 1818 and 0.7 mile north of its intersection with U.S. Highway 13.

The Matthews, E. M., farm located on the east side of State Secondary Road 1005 and at its north intersection with State Secondary Road 1813.

The Matthews, Isiah, farm located on a private road off the east side of U.S. Highway 301 and 0.1 mile north of its junction with State Secondary Road 1722.

The McKeithan, Sarah E., farm located on the west side of U.S. Highway 301 and 0.3 mile north of its junction with State Secondary Road 1815.

The McLaurin, Burnice, farm located on the north side of State Secondary Road 1720 and 0.7 mile east of its intersection with State Secondary Road 1719.

The McLaurin, Elwood, farm located on the west side of U.S. Highway 301 and 0.2 mile north of its junction with State Secondary Road 1828.

The McLaurin, George, farm located on the north side of State Secondary Road 1722 and 0.4 mile west of its junction with U.S. Highway 301.

The McLaurin, Greg, farm located on the south side of State Secondary Road 1722 and

0.3 mile west of its junction with U.S. Highway 301.

The McLaurin, H. A., farm located on the south side of State Secondary Road 1722 and 0.41 mile west of its junction with U.S. Highway 301.

The McLaurin, Henry, farm located on the south side of State Secondary Road 1722 and 0.4 mile west of its junction with U.S. Highway 301.

The McLaurin, McLaurin, farm located on the north side of State Secondary Road 1722 and 0.5 mile west of its junction with U.S. Highway 301.

The McLaurin, Octavious, farm located on the north side of State Secondary Road 1722 and 0.51 mile west of its junction with U.S. Highway 301.

The McLaurin, W. A, farm located on the south side of State Secondary Road 1722 and 0.43 mile west of its junction with U.S. Highway 301.

The McMillan, Vander, farm located on the west side of U.S. Highway 301 and 0.5 mile north of its junction with State Secondary Road 1722.

The McNeill, Mattie J., farm located on the west side of State Secondary Road 1593 and 0.8 mile north of its junction with U.S. Highway 401.

The Melvin, Edith, farm located on the east side of State Secondary Road 1600 and 1.7 miles north of its intersection with State Secondary Road 1615.

The Odums, Marshal, farm located on the north side of State Secondary Road 1722 and 0.2 mile west of its junction with U.S. Highway 301.

The Powell, William Clinton, farm located on the south side of State Secondary Road 1722 and 0.3 mile east of its junction with State Secondary Road 1714.

The Pruitt, K. D., farm located on the west side of U.S. Highway 13 and 0.6 mile north of its intersection with State Secondary Road 1818.

The Roberts, Christine Dawson, farm located on the south side of State Secondary Road 1714 and 0.5 mile west of its junction with State Secondary Road 1716.

The Shirman, Harry, farm located on the west side of State Secondary Road 1400 and 0.1 mile south of its junction with State Secondary Road 1401.

The Smith, Agnes, farm located on the south side of State Secondary Road 1720 and 0.7 mile east of its intersection with State Secondary Road 1719.

The Smith, Gilbert, farm located on the west side of State Secondary Road 1714 and 0.2 mile south of its junction with State Secondary Road 1724.

The Smith, J. B., farm located on the north side of State Secondary Road 1719 and 1.1 miles east of its intersection with State Secondary Road 1720.

The Smith, J. B., farm located on the south side of State Secondary Road 1722 and 0.6 mile west of its junction with State Secondary Road 1721.

The Smith, Larry Don, farm located on a private road off west side of U.S. Highway 301 and 0.2 mile south of its junction with State Secondary Road 1722.

The Thompson, Mrs. Paul, farm located on the west side of U.S. Highway 301 and 0.4 mile south of its junction with State Secondary Road 1863.

The Turner, W. E., farm located on a private road off the east side of U.S. Highway 301 and 0.2 mile north of its junction with State Secondary Road 1722.

The Underwood, George, farm located on the south side of State Secondary Road 1730 and 0.5 mile east of its junction with State Secondary Road 1723.

The Underwood, Olive T., farm located on the east side of State Secondary Road 1723 and 0.8 mile south of its junction with State Secondary Road 1722.

The Valentine, Ike, farm located on the west side of State Secondary Road 1402 and 0.9 mile south of its junction with State Secondary Road 1400.

The Vann, J. R., farm located on the north side of State Secondary Road 1813 and 0.5 mile east of its intersection with State Secondary Road 1005.

The Vann, W. E., farm located on both sides of State Secondary Road 1813 at its junction with State Secondary Road 1819.

The Williams, C. D., farm located on the north side of State Secondary Road 1719 and 1.21 miles north of its intersection with State Secondary Road 1720.

The Williams, Maggie, farm located on the north side of State Secondary Road 1719 and 1.2 miles north of its intersection with State Secondary Road 1720.

The Williams, M. C., farm located on the south side of State Secondary Road 1728 and at its east intersection with State Secondary Road 1725.

The Williams, Robert, farm located on the east side of State Secondary Road 1813 and at its intersection with Interstate 95.

The Williams, Robert F., farm located on the west side of State Secondary Road 1728 and 0.6 mile north of its junction with State Secondary Road 1714.

Duplin County. That area bounded by a line beginning at a point where State Secondary Road 1337 intersects the Duplin-Sampson County line, then northeast along said road to its intersection with State Secondary Road 1301, then southeast along said road to its intersection with State Highway 50, then northwest along said highway to its junction with State Secondary Road 1355, then northeast along said road to its junction with State Secondary Road 1332, then northeast along said road to its junction with State Secondary Road 1304, then southeast along said road to its intersection with Bear Swamp, then east along said swamp to its junction with Goshen Swamp, then southeast along said swamp to its intersection with State Secondary Road 1004, then southeast along said road to its intersection with Nahunga Creek, then southwest along said creek to its intersection with State Secondary Road 1301, then northwest along said road to its junction with State Secondary Road 1346, then southwest along said road to its junction with State Secondary Road 1385, then west along said road to its junction with State Highway 50, then southeast along said highway to its junction with State Secondary Road 1900, then southeast along said road to its junction with State Secondary Road 1003, then east along said road to its junction with State Highway 11, then south along said highway to its junction with State Secondary Road 1922, then southwest along said road to its junction with State Secondary Road 1909, then south along said road to its junction with State Secondary Road 1912, then west along said road to its intersection with the Magnolia city limits, then south, west, and north along said city limits to its intersection with State Secondary Road 1003, then southwest along said road to its junction with State Secondary Road 1101, then southeast along said road to its intersection with State Secondary Road 1102, then southwest along said road to its junction with State Secondary Road 1126, then west along said road to its intersection with State Secondary Road 1100, then southeast along said road to its intersection with State Secondary Road 1102, then south along said road to its junction with State Secondary Road 1129, then southwest along said road to its intersection with State Secondary Road 1128, then northwest along said road to its intersection with Duplin-Sampson County line, then north along said county line to the point of beginning.

The Beard, Mary Lou, farm located on both sides of State Secondary Road 1961 and 0.6 mile west of the intersection of said road and the Northeast Cape Fear River.

The Bradshaw, Milton J., farm located at the northwest end of State Secondary Road 1980.

The Branch, Hall, farm located 0.3 mile northwest of State Highway 11 and 1.0 mile northeast of junction of said highway and State Secondary Road 1378.

The Brown, George, farm located on the west side of State Secondary Road 1004 and 0.8 mile north of its junction with State Secondary Road 1504.

The Chambers, D.F., farm located on the south side of State Secondary Road 1700 and 0.6 mile west of its intersection with the Northeast Cape Fear River.

The Dodson, Twillie, farm located on the south side of State Secondary Road 1912 and 0.7 mile west of the junction of said road and State Highway 11.

The Garner, C. C., farm located on both sides of State Secondary Road 1961 and 0.5 mile west of the intersection of said road and Northwest Cape Fear River.

The Goodson, Emma, farm located on the south side of State Secondary Road 1501 and 0.3 mile west of the junction of said road and State Highway 1505.

The Grady, E. C., farm located on both sides of State Secondary Road 1700 and 0.7 mile west of the intersection of said road and the Northeast Cape Fear River.

The Hollingsworth, Denver, farm located 0.1 mile east of State Secondary Road 1831 and 1.0 mile south of the junction with State Road 1827.

The Howard, Henry, farm located on the north side of State Secondary Road 1700 and 0.8 mile west of the intersection of said road and the Northeast Cape Fear River.

The Ivey, Foy, No. 2, farm located on both sides of State Secondary Road 1004 and 0.1 mile south of the junction with State Secondary Road 1561.

The Jernigan, Cornelia, farm located on the west side of State Secondary Road 1360 and 0.4 mile south of the junction with State Secondary Road 1004.

The Johnson, Eldora, farm located on both sides of State Secondary Road 1123 and 1.2 mile west of the junction of said road and State Secondary Road 1103.

The Jones, H. A. No. 2, farm located on both sides of State Secondary Road 1700 and 0.6 mile west of the intersection with the Northeast Cape Fear River.

The King, W. R., farm located on the east side of State Secondary Road 1302 and 0.1 mile south of the junction of said road and State Highway 1308.

The Kornegay, Cecil, farm located on the northwest sides of State Secondary Road 1306 and 1 mile southwest of the intersection with State Secondary Road 1500.

The McCullen, Larry, farm located on the northeast side of State Highway 24 and 0.2 mile northwest of the junction of said highway and State Secondary Road 1904.

The McGowan, Henry C., Heirs, farm located 0.6 mile south of State Secondary Road 1700 and 0.7 mile east of the junction with State Highway 11.

The Miller, O'Berry, farm located on the north side of State Secondary Road 1700, and 0.1 mile east of its junction with State Highway 11.

The Miller, Willie Mae, farm located on the south side of State Secondary Road 1961 and 1.1 miles west of the intersection of said road and State Secondary Road 1962.

The Outlaw, Oliver, farm located on both sides of State Secondary Road 1300 and the east side of State Secondary Road 1301 where these roads intersect.

The Pate, Robert Lee, farm located on both sides of State Secondary Road 1357 and 0.9 miles southwest of the junction of said road and State Secondary Road 1306.

The Phillips, Hubert, farm located on the east side of State Secondary Road 1357 and 0.7 mile northwest of its junction with State Highway 24.

The Pickford, P. H., farm located on the south side of State Secondary Road 1980 and 0.2 mile east of the dead end of said road.

The Rivenbark, George W., farm located on the northwest side of State Secondary Road 1131 and 0.4 mile southwest of the junction of said road and State Secondary Road 1128.

The Rouse, Beatrice S., farm located on both sides of State Secondary Road 1980 and at the west end of said road.

The Stokes, Fred, farm located on the south side of State Secondary Road 1980 and 2.4 miles west of the junction of said road and State Secondary Road 1979.

The Stokes, J. D., Jr., farm located on both sides of State Secondary Road 1980 and 0.3 mile east of the dead end of said road.

The Stokes, William C., farm located at the southwest end of State Secondary Road 1980.

The Thomas, J. R., farm located on the south side of State Secondary Road 1700 and 1.8 miles east of intersection of said road and State Secondary Road 1701.

The Turner, Lumas, farm located on the south side of State Secondary Road 1703 and 0.6 mile west of the junction of said road and State Secondary Road 1732.

The Whitman, Herman E., farm located on the north side of State Secondary Road 1300 and 0.8 mile east of the intersection of said road and State Secondary Road 1301.

The Williams, Jasper, farm located on the east side of State Secondary Road 1323 and 0.2 mile south of its junction with State Highway 403.

The Williams, McArthur, farm located on the south side of State Secondary Road 1961 and 1 mile west of the intersection of said road and State Secondary Road 1962.

The Wilson, Mammie, farm located on the east side of State Highway 111 and 1.0 mile south of the intersection of said highway and State Secondary Road 1700.

Greene County. That area bounded by a line beginning at a point where State Highway 903 intersects State Highway 123 and extending southerly along State Highway 123 of its intersection with Contentnea Creek, then northwest along said creek to its junction with Panther Swamp, then northerly along said swamp to its intersection with U.S. Highway 258–13, then northeasterly to its intersection with State Highway 903; then easterly along said highway to the point of beginning.

The Carmon, James E., farm located on the east side of State Secondary Road 1004 and 0.4 mile south of its junction with State Highway 903.

The Dixon, John, farm located on the east side of State Secondary Road 1004 at the junction on State Secondary Road 1405.

The Dixon, Sudie, farm located on the west side of State Secondary Road 1004 and 0.2 miles south of its junction of State Secondary Road 1405.

The Murphrey, Edward, farm located on the east side of State Secondary Road 1004 and 0.3 mile south of its junction with State Highway 903.

The Whitaker, J. H., farm located on the east side of State Secondary Road 1004 and 0.6 mile south of its junction with State Highway 903.

Harnett County. That area bounded by a line beginning at a point on the Harnett-Lee County line due west of the head of Barbecue Swamp and extending east to the head of said swamp, then south and east along Barbecue Swamp to its intersection on State Secondary Road 1201, then south and southeast along said road to its junction with State Highway 27, then southeast along said highway to its junction with State Highway 24, then southeast along said highway to its junction with State Secondary Road 1111, then southwest along said road to its intersection with Harnett-Moore County line, then northwest along the Harnett-Moore County line to its junction with the Moore-Harnett-Lee County line, then northeast along the Harnett-Lee County line to the point of beginning.

That area bounded by a line beginning at a point where the Harnett-Cumberland County line and McLeod Creek intersect and extending northwest along said creek to its intersection with State Secondary Road 1117, then northeast, northwest and north along said road to its intersection with Anderson Creek, then southeast along said creek to its intersection with the State Highway 210, then northeast along said highway to its junction with State Secondary Road 2030, then southeast along said road to its junction with State Secondary Road 2031, then southwest along said road to its intersection with the Harnett-Cumberland County line, then southwest and west along said county line to the point of beginning.

The Cook, A. L., farm located on the east side of State Secondary Road 1201 and 1.5 miles southeast of the junction of said road with State Secondary Road 1203.

The Forthberry, Bennett, farm located on the south side of State Secondary Road 1141 and 0.4 mile east of the junction of said road with State Secondary Road 1139.

The Frizzelle, Roscoe, farm located on the south side of State Secondary Road 1141 and 0.3 mile east of the junction of said road with State Secondary Road 1139.

The Gilchrist, Leonard W., farm located on the southeast side of State Secondary Road 1111, 0.4 mile north of the junction of said road with State Secondary Road 1110.

The McNeil, Raymond F., farm located on the east side of State Secondary Road 1201 and north of the junction of said road with State Secondary Road 1202.

The Serina, David, farm located on the south side of State Secondary Road 1141 and 0.4 mile east of the junction of said road with State Secondary Road 1139.

The Spaulding, James, farm located on the north side of State Secondary Road 1141 and 1.3 miles east of the junction of said road with State Secondary Road 1139.

The Thomas, Floyd E., farm located on the northeast side of State Secondary Road 1146 and 0.2 mile north of the junction of said road with State Secondary Road 1117.

The Womack, E. H., farm located on the east side of State Highway 27, and 1.0 mile north of the junction of said highway with State Highway 24.

Hoke County. That area bounded by a line beginning at a point where U.S. Highway 401 intersects with Hoke-Scotland County line, then northeasterly along said highway to its junction with the Raeford city limits, then southeast and north along said city limits to its junction with Business Highway 401, then east and northeast along said highway to its junction with U.S. Highway 401, then easterly along said highway to its intersection with the Cumberland-Hoke County line, then southeast along said county line to its junction with the Hoke-Robeson County line, then southwest and west along said county line to its junction with the Hoke-Scotland County line, then northerly along said county line to the point of beginning.

The Bronson, Amos, farm located on the north side of State Secondary Road 1302 and 0.8 mile west of the junction of said road with State Secondary Road 1303.

The Burke, Will, Estate farm located to the southeast of State Secondary Road 1233 and 0.2 mile south of the junction of said road with State Secondary Road 1218.

The Cameron, Hermon, farm located on the east side of State Secondary Road 1212 and 0.1 mile south of the junction of said road with State Secondary Road 1211.

The Ellis, W. H., farm located on both sides of State Secondary Road 1200 and 0.2 mile south of the junction of said road with State Secondary Road 1203.

The Flowers, Effie Lee, farm located on the north side of State Secondary Road 1203 and 0.1 mile northeast of the junction of said road with State Seondary Road 1207.

The Flynn, Charlie, farm located on the east side of State Secondary Road 1216 and 1 mile south of the junction of said road with State Secondary Road 1219.

The Fowler, Arne, farm located on the north side of State Secondary Road 1203 and 0.2 mile northeast of the junction of said road with State Secondary Road 1207.

The Gainey, Marvin, farm located on the west side of State Secondary Road 1200 and 0.5 mile south of the junction of said road with State Secondary Road 1203.

The Gainey, Marvin, farm located on the east side of State Secondary Road 1200 and 0.5 mile south of the junction of said road with State Secondary Road 1203.

The Graham, William, farm located on the north side of State Secondary Road 1316 and 0.5 mile east of the junction of said road with State Highway 211.

The Johnson, George, farm located on the south side of State Secondary Road 1219 and 0.3 mile east of the junction of said road with State Secondary Road 1218.

The Leslie, Dora N., farm located north of the junction of State Secondary Roads 1200 and 1203.

The McDuffie, Cleo, farm located on the south side of State Secondary Road 1203 and 0.1 mile northeast of the junction of said road with State Secondary Road 1202.

The McPhatter, Tom, farm located on the east side of State Secondary Road 1202 and 0.1 mile south of the junction of said road with State Secondary Road 1203.

The McRae, Annie, farm located on the west side of State Secondary Road 1302 and 0.1 mile north of the junction of said road with U.S. Highway 401 bypass.

The McRae, Ervin, farm located on the north side of State Secondary Road 1302 and 1 mile west of the junction of said road with State Secondary Road 1303.

The Moon, Leonard, farm located on the west side of State Highway 211 and 0.3 mile north of the junction of said highway with State Secondary Road 1228.

The Pandure, Ralph, farm located on the north side of State Secondary Road 1211 and 0.5 mile south of the junction of said road with State Secondary Road 1212.

The Ray, Howard, farm located on the north side of State Secondary Road 1203 and 0.1 mile west of the junction of said road with State Secondary Road 1240.

The Ray, Neil, farm located on the west side of State Secondary Road 1320 and 0.1 mile west of the junction of said road with State Secondary Road 1304.

The Williams, Alex, farm located in the southeast junction of State Secondary Roads 1202 and 1203.

The Winecroff, Lee, farm located on both sides of State Secondary Road 1215 and 0.4 mile east of the junction of said road with State Secondary Road 1216.

Johnston County. The Holt, Dorothy C., farm located on the west side of State Secondary Road 2542 and 0.1 mile south of its junction with State Secondary Road 1007.

The Johnson, Wade, farm located on both sides of State Secondary Road 1144 and 0.2 mile west of the junction of said road with State Secondary Road 1138.

The Martin, John L., farm located on the west side of State Secondary Road 1201 and 0.3 mile north of the junction of said road with State Secondary Road 1200.

The Massengill, R. T., farm located on the south side of State Secondary Road 1145 and 0.2 mile west of its junction with State Secondary Road 1144.

The McArthur, Margaret, farm located 1.4 miles north of State Secondary Road 1199 and 0.9 mile west of the junction of said road and State Secondary Road 1008.

Lee County. The McGilvary, Aquilla, farm located north of State Secondary Road 1188 and 0.6 mile east of the junction of said road with State Secondary Road 1001.

Lenoir County. The Barwick, Charles H. and Evelyn Sutton, farm located on the north side of State Secondary Road 1324 and 0.1 mile east of its junction with State Secondary Road 1308.

The Braxton, Clyde, Estate located on both sides of State Secondary Road 1802 and 0.9 mile northeast of the junction of State Secondary Road 1802 and State Highway 11.

The Brown, Nannie H., farm located in the southwest junction of State Secondary Roads 1152 and 1309.

The Carey, Jack, farm located on both sides of State Secondary Road 1906 and 1 mile east of its junction with U.S. Highway 285.

The Dawson, Wayne, farm located on the east side of State Secondary Road 1318 and 0.3 mile north of its junction with State Secondary Road 1316.

The Faulkner, Isabelle, farm located on both sides of State Secondary Road 1809 and 0.5 mile east of its junction with State Secondary Road 1720.

The Foss, Reginal D., farm located on the north side of State Secondary Road 1316 and 0.6 mile northwest of its junction with State Secondary Road 1318.

The Hamilton, C. W., farm located on the southeast side of State Secondary Road 1802 and 1.2 miles northeast of its junction with State Highway 11.

The Herring, Ben D., No. 1, farm located on both sides of State Secondary Road 1330 and 0.2 mile west of the junction of State Secondary Roads 1330 and 1331.

The Herring, Ben D., No. 2, farm located on the west side of State Secondary Road 1310 and 0.3 mile south of its junction with State Secondary Road 1311.

The Herring, Frances F., farm located on the west side of State Secondary Road 1310 and 0.6 mile south of its junction with State Secondary Road 1311.

The Herring, Jack A., farm located on both sides of State Secondary Road 1310 and 0.4 mile south of its junction with State Secondary Road 1311.

The Jarman, F. R., farm located on the southeast side of State Secondary Road 1311 and 0.7 mile southwest of its junction with State Secondary Road 1318.

The Jones, Edward S., farm located on the west side of U.S. Highway 258 and 0.3 mile north of its junction with State Secondary Road 1116.

The Parrott Farms, Inc., farm located on the northwest side of State Secondary Road 1157 and 0.7 mile northwest of its intersection with State Highway 55.

The Rouse, Forrest, farm located on the northeast side of State Secondary Road 1143 and 2.9 miles northwest of its intersection with State Secondary Road 1154.

The Rouse, Jim W., farm located on the northeast side of State Secondary Road 1143 and 2.8 miles northwest of its intersection with State Secondary Road 1154.

The Sutton, Curtis, Estate located on the west side of State Secondary Road 1324 and 0.5 mile north of its junction with State Secondary Road 1309.

The Sutton, Harvey, farm located on the west side of State Secondary Road 1331 and 0.2 mile south of its junction with State Secondary Road 1330.

The Sutton, John W., farm located in the southwest junction of State Secondary Road 1333 and State Secondary Road 1330.

The Sutton, Nancy, farm located on the south side of State Secondary Road 1330 and 0.5 mile east of its junction with State Secondary Road 1331.

The Sutton, Nathan, farm located on the southeast side of State Secondary Road 1311 and 0.6 mile southwest of its junction with State Secondary Road 1318.

The Sutton, Robert H., farm located on the south side of State Secondary Road 1324 and 0.2 mile east of its junction with State Secondary Road 1327.

The Sutton, W. Edward, farm located on the east side of State Secondary Road 1333 and 0.4 mile south of State Secondary Road 1330.

The Taylor, Heber, farm located on the north side of State Secondary Road 1161 and 0.3 mile east of its junction with State Highway 55.

The Walters, H. F., farm located on both sides of State Secondary Road 1335 and 0.4 mile north of its junction with State Secondary Road 1324.

Moore County. The Burwell, Sam, farm located on the south side of State Secondary Road 2023 and 0.4 mile southwest from the junction of said road and State Secondary Road 1853.

The Marks, E. M., farm located on the south side of State Secondary Road 2019 and 2.5 miles east of the junction of said road and State Secondary Road 2018.

Onslow County. The Henderson, Charlie, farm located on the east side of State Secondary Road 1528, and 0.2 mile north of the junction of said road with State Secondary Road 1518.

The Lanier, Larry, farm located on the north side of State Secondary Road 1223 and 0.5 mile east from the junction of said road and State Secondary Road 1222. Said junction being located 1.2 miles north of junction of State Secondary Roads 1222 and 1001.

The Lanier, Marion, farm located on the southeast side of State Secondary Road 1224, and 0.7 mile northeast from the junction of said road and State Secondary Road 1222.

The Marshburn, James B., farm located on the southeast side of State Secondary Road 1224, and 0.8 mile from the junction of said road and State Secondary Road 1222.

Pender County. That area bounded by a line beginning at a point where State Secondary Road 1104 intersects the Pender-

Bladen County line, and extending northeast along said county line to its junction with Black River, then southeast along said river to its intersection with State Highway 210, then southwest along said highway to its junction with State Secondary Road 1103, then southeast along said road to its junction with State Secondary Road 1104, then southwest and northwest along said road to the point of beginning.

That area bounded by a line beginning at a point where State Secondary Road 1517, junctions with U.S. Highway 117, and extending northwest along said highway to its intersection with Walker Swamp, then northeast along said swamp to its junction with Pike Creek, then southeast along said creek to its junction with the Northeast Cape Fear River, then south along said river to its intersection with State Highway 210, then southwest along said highway to its junction with State Secondary Road 1518, then southeast along said road to its junction with State Secondary Road 1517, then westerly along said road to the point of beginning.

The Anderson, Julian W., farm located on both sides of State Secondary Road 1106 and 0.9 mile northwest of the junction of said road and State Secondary Road 1107.

The Batson, Arthur, farm located on the east side of State Secondary Road 1411 and 1.5 miles east of its intersection with U.S. Highway 117.

The Corbett, W. M., farm located on both sides of State Secondary Road 1201 at its junction with State Secondary Road 1200.

The Dees, Betty B., farm located 0.6 mile east of State Secondary Road 111 and 1.5 miles east of its intersection with U.S. Highway 117.

The Fensel, F. P., farm located on the north side of State Secondary Road 1103 and 0.6 mile west of its junction with State Secondary Road 1133.

The Kea, Leo, farm located 0.5 mile east of State Secondary Road 1105 and 1 mile southwest of the junction of said road and State Secondary Road 1104.

The Hutcheson, Katie, farm located on field road 1.7 miles east of U.S. Highway 117 and 0.3 mile south of its intersection with State Secondary Road 1411.

The Lanier, Admah, farm located on the southeast side of State Secondary Road 1411 and 1.4 miles east of its intersection with U.S. Highway 117.

The Marshall, Crawford, farm located on the north side of State Secondary Road 1103 and 0.6 mile west of its junction with State Secondary Road 1133.

The Marshall, Milvin, farm located on the north side of State Secondary Road 1103 and 0.6 mile east of the southern junction of said road and State Secondary Road 1104.

The McCallister, Mary K., farm located 0.2 mile east of State Secondary Road 1105 and 1 mile southwest of the junction of said road and State Secondary Road 1104.

The Newkirk, M and F, farm located on the south side of State Secondary Road 1131 and 0.7 mile west of its junction with State Secondary Road 1121.

The Stringfield Estate, John, located on southwest side of State Secondary Road 1517 and 1.4 miles east of the junction of said road and U.S. Highway 117.

The Terrell, Nancy, farm located on a field road 2.8 miles east of U.S. Highway 117 and 0.3 mile south of its intersection with State Secondary Road 1411.

The Thompson, Dick, farm located on the southwest side of State Secondary Road 1106 and 0.5 mile northwest of its junction with State Secondary Road 1107.

The Ward, Mary Alice, farm located on a field road 0.9 mile east of State Secondary Road 1141 and 1.5 miles east of its intersection with U.S. Highway 117.

Pitt County. That area bounded by a line beginning at a point where State Secondary Road 1919 intersects the Pitt-Craven County line, then southwest along said county line to its intersection with State Secondary Road 118, then westward along said highway to its intersection with State Secondary Road 1753, then northward along said road to its junction with State Secondary Road 1919, then eastward to the point of the beginning.

The Gardner, Charlie D., farm located on both sides of State Secondary Road 1910 at junction of said road and State Highway 118.

The Garris, Bruce E., farm located in the south junction of State Highway 118 and State Secondary Road 1916.

The Hodges, M. B., farm located on the east side of State Secondary Road 1907 and 1.1 miles north of State Highway 118.

Richmond County. The David, Ethel, farm located on both sides of State Secondary Road 1803, on the west side of the intersection of said road with State Secondary Road 1825.

The Dumas, Reba, farm located on the northeast side of State Secondary Road 1083 and 0.3 mile northwest of said intersection of State Highway 38.

The Poe, William, farm located 0.6 mile on unnumbered road off State Road 1475 and 0.2 mile southeast of its junction with State Road 1486.

The Sorenzen, Gladys, farm located on the southwest side of State Secondary Road 1803 and 0.4 miles northwest of the intersection of said road and State Highway 38.

The Steele, Thomas, farm located on the northwest side of State Road 1442 and 0.4 mile southwest of its junction with State Road 1489.

The Terry, Ruth, farm located on both sides of State Secondary Road 1442 and 0.2 mile northeast of its junction with State Secondary Road 1477.

The Thomas, Walter, farm located on both sides of U.S. Highway 220 and 0.4 mile northeast of its junction with State Secondary Road 1433.

The Wall, Ben, farm located on the northeast side of the State Secondary Road 1440 and 0.4 mile southeast of its junction with State Secondary Road 1433.

The Waters, Will, farm located on both sides of State Secondary Road 1623 and 0.4 mile southwest of its junction with State Secondary Road 1607.

The Watkins, John Q., farm located on the southeast side of State Secondary Road 1476 and 0.3 mile northeast of its junction with State Secondary Road 1442.

The Watkins, Mosby, farm located on both sides of State Secondary Road 1476 and 0.2 mile northeast of its junction with State Secondary Road 1442.

Robeson County. The entire county.

Sampson County. The entire County.

Scotland County. That area bounded by a line beginning at a point where U.S. Highway 74 intersects the Robeson-Scotland County line, then west along said highway to its intersection with the Laurinburg city limits, then northerly and westerly along said city limits to its junction with U.S. Highway 15, 401, and 501, then southwest along said highway to its intersection with State Secondary Road 1300, then northwesterly along said road to its junction with State Secondary Road 1105, then northwesterly along said road to its junction with State Secondary Road 1324, then northerly along said road to its intersection with State Secondary Road 1345, then northwesterly along said road to its intersection with State Secondary Road 1341, then northeasterly along said road to its junction with State Secondary Road 1328, then northerly along said road to its intersection with the Southern boundary to the Sandhills Game Management Area, then easterly along said boundary to its intersection with U.S. Highway 15–501, then north along said highway to its intersection with the Scotland-Hoke County line, then southeasterly along said county line to the Scotland-Robeson County line, then southwest along said county line to the point of beginning.

The Butler, Luther, farm located on the south side of State Secondary road 1154 and 0.2 mile east of the junction of said road with State Secondary Road 1155.

The Carmichael, John, farm located on both sides of State Secondary Road 1612 and 0.2 mile southwest of its intersection with State Secondary Road 1611.

The Jones, R. D., farm located on the northeast side of State Secondary Road 1601 and 0.2 mile northwest of its junction with State Secondary Road 1609.

The Morgan, J. D., farm located on the east side of State Secondary Road 1346 and 0.5 mile north of the junction of said road with State Secondary Road 1343.

The Morgan, J. D., farm located on both sides of State Secondary Road 1345 and 0.1 mile northwest of its junction with State Secondary Road 1342.

The Sharpe, Preston, farm located on the south side of U.S. Highway 74 and 0.2 mile west of the junction of said highway with State Secondary Road 1153.

The Steele, J. D., farm located on both sides of State Secondary Road 1351 and 0.9 mile northwest of the junction of said road with State Secondary Road 1346.

The Stewart, Claude, farm located on the northwest side of State Secondary Road 1612 and 0.7 mile northeast of the junction of said road with State Secondary Road 1619.

Wayne County. That area bounded by a line beginning at a point where the State Highway 111 and State Secondary Road 1744 intersect, then westerly along said road to its junction with State Secondary Road 1948, then southerly along said road to its intersection with State Secondary Road 1745, then westerly along said road to its junction with State Secondary Road 1915, then northerly along said road to its intersection with State Secondary Road 1744, then

westerly along said road to its intersection with State Secondary Road 1937, then northerly on said road to its junction with State Secondary Road 1932, then northerly on said road to its intersection with State Secondary Road 1120, then easterly along said road to its junction with State Secondary Road 1915, then easterly from said junction along an imaginary line to the junction of Sleepy Creek and Nuese River, then easterly along said river to its intersection with State Highway 111, then southerly along said highway to the point of beginning.

The Bowden, B. J., farm located on the west side of State Secondary Road 1931 and 0.2 mile south of intersection of said road and State Secondary Road 1120.

The Carraway, Ethel, farm located on the east side of State Secondary Road 1915 and 0.1 mile north of the junction of said road and State Secondary Road 1120.

The Crawford, William P., farm located on the south side of State Secondary Road 1330 and 0.9 mile west of State Highway 581.

The Dawson, L. A., farm located on the west side of State Highway 111 and 0.5 mile south of the junction of said highway and State Secondary Road 1730.

The Grady, Gertrude W., farm located on the south side of State Secondary Road 1741 and 0.7 mile east of its junction with State Secondary Road 1740.

The Grant, Charlie, farm located on the south side of State Secondary Road 1745 and 0.4 mile west of its junction with State Secondary Road 1952.

The Grant, Maggie, Estate located on the west side of State Highway 111 and 1.9 miles south of the junction of State Secondary Road 1730 with said highway.

The Green, Bessey, farm located at the southern end of the State Secondary Road 1741 and 1.3 miles east of its junction with State Secondary Road 1740.

The Haggin, Joe, No. 2, farm located on the east side of State Secondary Road 1931 and 1.1 miles northeast of its intersection with State Secondary Road 1120.

The Herring, Charles F., farm located on the south side of State Secondary Road 1741 and 0.3 mile east of its junction with State Secondary Road 1740.

The Herring, Harmon, farm located on the south side of State Secondary Road 1734 and 0.4 mile east of its junction with State Secondary Road 1731.

The Herring, Thel, farm located on the west side of State Secondary Road 1711 and 0.4 mile north of its junction with U.S. Highway 70A.

The Humphrey, Josephine, farm located on the east side of State Secondary Road 1932 and 0.2 mile north of its intersection with State Secondary Road 1120.

The Ivey, W. H., farm located on the south side of State Secondary Road 1734 and 0.3 mile east of its junction with State Secondary Road 1731.

The Jackson, Major, farm located on the east side of State Secondary Road 1731 and 0.6 mile north of the Neuse River.

The Jones, Mary, farm located on both sides of State Secondary Road 1730 and its junction with State Secondary Road 1731.

The Lane, Alfred, farm located on the south side of State Secondary Road 1730 and 0.4 mile east of its junction with State Highway 111.

The Lofton, Burt & Davis, King, farm located on the east side of State Secondary Road 1739 and 0.3 mile south of its junction with State Highway 55.

The Lofton, Mary F., farm located on the south side of State Secondary Road 1745 and 0.1 mile west of its junction with State Secondary Road 1952.

The McClenny, G. A., farm located on the south side of State Secondary Road 1007 and 0.1 mile west of the junction of said road with State Highway 581.

The Parks, Robert, farm located on the southeast side of State Secondary Road 1932 and 0.5 mile northeast of its intersection with State Secondary Road 1120.

The Price, James, farm located in the southeastern intersection of State Highway 111 and State Secondary Road 1745.

The Price, Jessie W., farm located on the east side of State Secondary Road 1948 and 0.7 mile south of the junction of said road and State Secondary Road 1744.

The Ray, Cora Pate, farm located on both sides of State Secondary Road 1730 and 0.8 mile west of its junction of State Secondary Road 1731.

The Raynor, Early, No. 1, farm located on the south side of U.S. Highway 13 and 0.3 mile east of its junction with State Secondary Road 1207.

The Raynor, Early, No. 2, farm located on the north side of State Secondary Road 1101 and 0.7 mile east of its intersection with State Secondary Road 1105.

The Raynor, Elester, farm located on the east side of State Secondary Road 1105 and 0.8 mile south of its intersection with U.S. Highway 13.

The Sasser, Johnny, farm located on the west side of State Secondary Road 1931 and 0.3 mile south of its junction with State Secondary Road 1930.

The Sasser, Rosa, farm located on both sides of State Highway 111 and 0.1 mile south of its junction with State Secondary Road 1912.

The Smith, Alfred, farm located on the north side of State Secondary Road 1330 and 0.9 mile west of the junction of said road and North Carolina Highway 581.

The Smith, Arnold, farm located on the southeast side of State Secondary Road 1932 and 0.5 mile northeast of its intersection with State Secondary Road 1120.

The Smith, M. G., farm located on the west side of State Secondary Road 1952 and 0.3 mile south of its junction with State Secondary Road 1745.

The Smith, W. H., farm located on the east side of State Secondary Road 1932 and 1.5 miles southeast of intersection of said road and State Secondary Road 1744.

The Talton, Lillian D., farm located on the south side of State Secondary Road 1730 and 0.6 mile east of its junction with State Highway 111.

The Whitfield, Herman, farm located at the end of State Secondry Road 1729.

The Williams, Eddie, farm located on the north side of State Highway 581 and the east side of State Secondary Road 1238 at the junction of said roads.

South Carolina

(1) *Generally infested area.* None.

(2) *Suppressive areas.*

Darlington County. The Atkinson Farms located on both sides of State Secondary Highway 173 and 0.5 mile west of its intersection with State Secondary Highway 35.

The Flowers, William M., farm located on the north side of State Secondary Highway 14 and 1.4 miles east of its intersection with State Secondary Highway 13.

The Green, M. L., farm located on the east side of State Secondary Highway 133 and 0.75 mile north of junction of said highway 133 with State Secondary Highway 29.

The Johnson, William, farm located on the north side of a dirt road and 0.6 mile northwest of its junction with State Secondary Highway 133, said junction being 2 miles south of the intersection of said highway and State Secondary Highway 41.

Dillion County. The entire county.

Florence County. That area bounded by a line beginning at a point where State Secondary Highway 925 and State Secondary Highway 24 junction and extending east and southeast along State Secondary Highway 24 to its junction with State Secondary Highway 13, then along a line projected due east from said junction to its intersection with the Great Pee Dee River, then south along said river to its junction with Barfield's Old Mill Creek, then northwest and west along said creek to its intersection with State Secondary Highway 57, then north along said highway to its junction with State Secondary Highway 893, then west and southwest along State Secondary Highway 893 to its junction with State Secondary Highway 70, then northwest along said highway to its junction with State Secondary Highway 897, then southwest and south along said highway to its junction with State Primary Highway 51, then west and northwest along said highway to its intersection with State Primary Highway 327, then northwest and west along said highway to its junction with State Secondary Highway 552, then north along said highway to its junction with State Secondary Highway 551, then northwest along a dirt road to its junction with a second dirt road, said junction being 0.1 mile east of Goodland School, then northeast along said second dirt road to its junction with State Secondary Highway 57, then southeast along said highway to its intersection with the Seaboard Coast Line Railroad, then northwest along said railroad to its intersection with State Secondary Highway 13, then east along said highway to its junction with State Secondary Highway 918, then north and northeast along said highway to its junction with State Primary Highway 327, then north along said highway to its intersection with U.S. Highway 76, then west along said highway to its junction with State Secondary Highway 925, then north along said highway to the point of beginning, excluding the area within the unincorporated limits of the town of Hyman.

That area bounded by a line beginning at a point where State Secondary Highway 794 and State Secondary Highway 72 junction and extending south along State Secondary Highway 72 to its intersection with State

Secondary Highway 46, then northeast along said highway to its intersection with State Secondary Highway 34, then southeast along said highway to its junction with State Secondary Highway 360, then northeast along said highway to its junction with a dirt road, said junction being 1.8 miles northeast of the junction of State Secondary Highways 34 and 360, then southeast along said dirt road for a distance of 1.2 miles to its junction with a second dirt road, then southwest along said dirt road to its junction with State Secondary Highway 34, then south along said highway to its junction with U.S. Highway 378, then west along said highway to its junction with State Secondary Highway 47, then northwest and west along said highway to the corporate limits of the town of Scranton, then north and west along the east and north perimeter of said corporate limits to its intersection with the Seaboard Coast Line Railroad, then north along said railroad to the corporate limits of the town of Coward, then north along the east perimeter of the town of Coward to its intersection with State Secondary Highway 794, then northeast along said highway to the point of the beginning.

That area bounded by a line beginning at a point where State Secondary Highway 66 and the Seaboard Coast Line Railroad intersect and extending southeast along said railroad to its intersection with State Secondary Highway 57, then south along said highway to its junction with U.S. Highway 378, then west along said highway to its intersection with Deep Creek, then southwest along said creek to its junctions with Lynches River, then west along said river to its junction with Little Swamp, then north along said swamp to its intersection with State Secondary Highway 66, then east along said highway to the point of the beginning.

The Canal Timber Company, farm located at the junction of State Secondary Highway 57 and State Secondary Highway 791. Said farm being on all sides of said junction.

The Carroway, Hayward, farm located on the south side of State Secondary Highway 72 and 1 mile southwest of its intersection with U.S. Highway 52.

The Carroway, Luther, farm located on both sides of State Primary Highway 51 and 0.1 mile northwest of the intersection of said highway and State Secondary Highway 46.

The Georgia Pacific Paper Company, farm located on the south side of the junction of two dirt roads, said junction being 0.8 mile east of its junction with State Secondary Highway 461, said junction being 0.8 mile north of the intersection of said highway and State Secondary Highway 85.

The Hall, James, farm located on both sides of a dirt road and 0.6 mile south of its junction with State Secondary Highway 501, said junction being 1.5 miles southeast of the junction of said highway and U.S. Highway 301.

The Hannah, Bert, farm located on the south side of a dirt road and 1 mile west of its junction with State Secondary Highway 633, said junction being 0.1 mile south of the junction of said highway and State Secondary Highway 58.

The Lyde, Mamie, farm located on the east side of State Secondary Highway 72 and 0.5 mile south of its junction with State Secondary Highway 794.

The McAllister, Armstrong, farm located at the end of a dirt road and 0.4 mile northwest of its junction with another dirt road, then south along said dirt road to its junction with another dirt road, then westerly along said dirt road to its junction with the State Secondary Highway 34, said junction being 1.1 miles southeast of the junction of State Secondary Highway 149 with State Secondary Highway 34.

Horry County. That area bounded by a line beginning at a point where State Secondary Highway 33 intersects the South Carolina-North Carolina State line and extending south along said highway to its intersection with State Secondary Highway 306, then west along said highway to its intersection with State Secondary Highway 142, then south along said highway to its junction with State Primary Highway 9, then northwest along said highway to its intersection with State Secondary Highway 59, then southwest and south along said highway to its junction with State Primary Highway 917, then southwest along said highway to its intersection with State Secondary Highway 19, then south and southeast along said highway 19 to its intersection with U.S. Highway 701 at Allsbrook, then northeast along said highway to its intersection with State Primary Highway 9, then southeast and south along said highway to its intersection with the Waccamaw River, then northeast along said river to its intersection with South Carolina-North Carolina State line, then southeast along said State line to its intersection with U.S. Highway 17, then southwest along said highway to its junction with State Primary Highway 90, then west along said highway to its intersection with a dirt road known as Telephone Road, said intersection being 1.3 miles west of Wampee, then southwest and south along Telephone Road to its end, then northwest along a projected line for 1.9 miles to its junction with Jones Big Swamp, then northwest along said swamp to its junction with the Waccamaw River, then west along said river to its intersection with Stanley Creek, then north along said creek 1.6 miles, then northwest along said creek 2.8 miles, then north along a line projected from a point beginning at the end of the main run of said creek, and extending north to the junction of said line with State Primary Highway 905, then southwest along said highway to its junction with State Secondary Highway 19, then north along said highway 2.4 miles to its junction with a dirt road.

Then southwest along said road to its intersection with Maple Swamp, then north along said swamp to its intersection with State Secondary Highway 65, then southwest along said highway to its junction with U.S. Highway 701, then south along said highway to its intersection with U.S. Highway 501, then northwest along said highway to its intersection with State Secondary Highway 548, then west along said highway to its junction with a dirt road, then west along said dirt road to its junction with State Secondary Highway 76, then north along said highway to its junction with State Secondary Highway 391, then northeast along said highway to its junction with U.S. Highway 501, then southeast along said highway to its junction with State Secondary Highway 591, then north along said highway to its intersection with State Secondary Highway 97, then east 0.2 mile to its intersection with a dirt road, then north along said dirt road to its junction with State Primary Highway 319, then northwest along said highway to its junction with State Secondary Highway 131, then east and north along said highway to its intersection with Loosing Swamp, then west and northwest along said swamp to its intersection with State Secondary Highway 45, then southwest along said highway to its junction with State Secondary Highway 129, then northwest along said highway to its junction with U.S. Highway 501, then northwest along the latter highway to its intersection with Little Pee Dee River, then northwest along said river to its junction with the Lumber River, then northeast along said river to its intersection with the South Carolina-North Carolina State line, then southeast along said State line to the point of beginning, excluding the area within the corporate limits of the towns of Conway and Loris.

The Alford, Alex, farm located on the south side of a dirt road and being 2 miles southwest and west of the junction of said dirt road and State Secondary Highway 99, said junction being 1.75 miles north of the junction of said highway and State Secondary Highway 97.

The Barnhill, Edgar, farm located on both sides of a dirt road and 0.4 mile east of its junction with State Primary Highway 90, said junction being 0.1 mile northeast of the junction of said highway and State Secondary Highway 377.

The Edge, Nina L., farm located on the west side of a dirt road and 0.8 mile southeast of its junction with a second dirt road, said junction being 0.5 mile south of the junction of the second dirt road and State Primary Highway 90, said second junction being 0.8 mile southwest of the junction of said highway and State Secondary Highway 31.

The Gore, Sumpter, farm located on both sides of a dirt road and 0.75 miles north of the intersection of said dirt road and State Primary Highway 9, said intersection being at Goretown.

The Hucks, Edd, farm located on the north side of a dirt road and 1 mile west of its junction with State Secondary Highway 109, said junction being 1.5 miles northeast of the junction of said highway and State Secondary Highway 79.

The Jordan, Blease, farm located on the north side of a dirt road and 0.6 mile east of its junction with State Secondary Highway 78, said junction being 1.9 miles northwest of the junction of said highway and U.S. Highway 378.

The Martin, Daniele E., farm located on the east side of State Primary Highway 90 and 0.9 mile northeast of the junction of said highway and State Secondary Highway 377.

The Page, Cordie, farm located on the north side of State Secondary Highway 128 and 0.4 mile west of the junction of said highway and U.S. Highway 501, said junction being at Aynor.

The Richardson, Talmage, farm located on the north side of a dirt road and 1 mile southwest of the junction of said dirt road

and State Secondary highway 99, said junction being 1.75 miles north of the junction of said highway and State Secondary Highway 97.

The Williamson, Vide, farm located on both sides of a dirt road and 0.4 mile from the junction of said dirt road and State Primary Highway 410, said junction being 0.7 mile northeast of the intersection of State Primary Highway 410 and State Secondary Highway 19.

Marion County. The entire county.

Marlboro County. That portion of the county lying south and east of U.S. Highway 15, excluding the area within the corporate limits of the towns of Bennettsville, McColl, and Tatum.

The Bowman, Cecil, farm located on both sides of a dirt road and 0.5 mile northeast of junction of said dirt road and State Secondary Highway 257, said junction being 0.4 mile north of junction of said highway and State Secondary highway 165.

The Quick, B. F., farm located on the south side of a dirt road 1 mile southwest of its junction with State Secondary Highway 257, said junction being 1.75 miles northeast of the intersection of said highway and State Secondary Highway 165.

The Strong, Marvin, farm located on the south side of the South Carolina North-Carolina State line and 1.3 miles east of its intersection with State Primary Highway 177.

BILLING CODE 3410-34-M

Agricultural Marketing Service

7 CFR Parts 1033 and 1036

Milk in Ohio Valley and Eastern Ohio-Western Pennsylvania Marketing Areas; Order Suspending Certain Provisions of the Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends for April through December 1983 the seasonal producer payment plans (Louisville plans) under the Ohio Valley and Eastern Ohio-Western Pennsylvania milk order. The payment plans were designed to encourage dairy farmers to maintain more stable production levels throughout the year. The plans operate by withholding 25 cents per hundredweight from payments to producers during April through July and distributing the money to producers supplying the market during September through December. The suspension was requested by Milk Marketing, Inc., a cooperative association representing producers supplying milk to both markets. The association expressed concern that the proposed suspension of the seasonal payment plans in the Indiana and Louisville-Lexington-Evansville orders would cause serious price misalignment due to intermingling of producers shipping to handlers regulated under those adjoining Federal orders.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Chief, Order Formulation Branch, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-6273.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued March 18, 1983; published March 24, 1983 (48 FR 12387).

It has been determined that this suspension is not a major action under the criteria set forth in Executive Order 12291.

It also has been determined that the need for suspending certain provisions of the orders on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted fro review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register.** However, this would not permit the completion of the required suspension procedures in time to include April 1983 in the suspension period. The initial request for this action was received March 14, 1983. A notice of proposed suspension was issued on March 18, 1983, inviting interested parties to comment on the proposed action by March 31, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action assures the orderly marketing of milk in the affected and adjoining marketing areas in that producers regularly supplying the markets otherwise would have an incentive to shift their supply to adjoining markets during the "take-out" months of the seasonal payment, or "Louisville", plans in order to avoid the months in which 25 cents per hundredweight is deducted under the Ohio Valley and Eastern Ohio-Western Pennsylvania milk orders.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the orders regulating the handling of milk in the Ohio Valley and Eastern Ohio-Western Pennsylvania marketing areas.

Notice of proposed rulemaking was published in the **Federal Register** on March 24, 1983, (48 FR 12387) concerning a proposed suspension of certain provisions of the orders. Interested persons were afforded an opportunity to file written data, views, and arguments thereon.

After consideration of all relevant material, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that for the months of April through December 1983 the following provisions of the orders do not tend to effectuate the declared policy of the Act:

1. In § 1033.61, paragraph (g), the words", except for the months specified below,"; and all of paragraphs (h) through (l).

2. In § 1033.70, all of paragraph (b); and in paragraph (c), the words "or (1)".

3. In § 1036.61, paragraph (f), the words "For the months of January through March and August,"; and all of paragraphs (g) through (l).

4. In § 1036.70, all of paragraph (b).

Statement of Consideration

This action makes inoperative for 1983 the provisions of the Ohio Valley and Eastern Ohio-Western Pennsylvania milk orders that contain the seasonal producer payment plans, or "Louisville" plans, for those orders. Under those provisions, 25 cents per hundredweight of producer milk is deducted from the pooled value of milk in computing the uniform prices to producers during the months of April through July. The monies so accumulated are added to the pool funds in computing the uniform prices to producers for each month of September through December. The payment plan is intended to encourage a more stable level of milk production throughout the year.

Suspension of the Louisville plans for 1983 was requested by Milk Marketing, Inc. (MMI), a cooperative association representing a large proportion of the producers supplying both markets. In supporting its request, the cooperative claims that proposed suspensions of the Louisville plans in the Indiana and Louisville-Lexington-Evansville orders would cause serious price misalignment between Federal orders and could result in disorderly marketing unless the

seasonal payment plans for Ohio Valley and Eastern Ohio-Western Pennsylvania are also suspended. The cooperative stated that producers shipping to handlers regulated by the Ohio Valley, Louisville-Lexington-Evansville, and Indiana orders are intermingled geographically, as are producers shipping to handlers regulated by the Ohio Valley and Eastern Ohio-Western Pennsylvania orders. According to the cooperative, misalignment between pay prices to producers in these orders would occur for eight of the twelve months of 1983 and could result in disorderly marketing as producers change markets for temporary gains.

The cooperative also claims that the seasonal payment plans have become less effective in leveling out producer deliveries as the seasonal adjustment has become a smaller percentage of the total price received by producers. In 1970, for instance, the 25-cent "take-out" represented approximately 4.3 percent of the blend price paid to producers in Eastern Ohio-Western Pennsylvania, while in 1982 the same deduction was less than 2 percent of the blend price.

A further consideration cited by MMI in support of its suspension request is the impact on dairy farmers' cash flow of the April through July 25-cent reduction of the producer pay prices when combined with the 50-cent per hundredweight assessment under the Dairy Price Support Program, to be effective with April 16, 1983, milk deliveries. The cooperative asserts that suspension of the seasonal payment plans will absorb some of the impact of that assessment, if implemented, and allow dairy farmers time to adjust their operations.

Interested parties were given the opportunity to submit written data, views or arguments concerning the suspension. Comments supporting the suspension were received from a cooperative association which markets the milk of its members in the Eastern Ohio-Western Pennsylvania marketing area, from several individual dairy farmers, and from Milk Marketing, Inc. Negative comments received related primarily to the 50-cent per hundredweight assessment under the Dairy Price Support Program rather than specifically being addressed to the suspension of the Louisville plans.

In view of the potential for disorderly marketing, the aforesaid provisions should be suspended to avoid serious misalignment of prices to producers in adjoining Federal milk orders. This action will remove an incentive for dairy farmers to change markets in order to benefit from producer pay prices that are temporarily higher.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to assure the orderly marketing of milk in the affected and adjoining marketing areas in that producers who regularly supply the markets otherwise would have an incentive to shift to neighboring markets during the "take-out" months of the "Louisville" plans, thereby causing a disruption in the orderly marketing of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded an opportunity to file written data, views or arguments concerning this suspension. No views opposing this suspension were received.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register.**

List of Subjects in 7 CFR Parts 1033 and 1036

Milk marketing orders, Milk, Dairy products.

PARTS 1033 AND 1036—[AMENDED]

It is therefore ordered, That the aforesaid provisions in §§ 1033.61 and 1033.70 of the Ohio Valley order and §§ 1036.61 and 1036.70 of the Eastern Ohio-Western Pennsylvania order are hereby suspended for April through December 1983.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Effective date: April 18, 1983.

Signed at Washington, D.C., on April 13, 1983.

John Ford,

Deputy Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 563 and 563c

[No. 83-194]

Amortization Methods for Loan Premiums and Deferred Income; State Concurrence in Use of Deferral Accounting

Dated: April 6, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board has amended its regulations to prohibit use of the straight-line and sum-of-the-years-digits methods to amortize premiums and deferred income (such as loan discounts) on loans and securities if the amounts of such premiums and deferred income exceed 10 percent of the outstanding principal balances of those loans at the time the loans are made or acquired and the loans have a remaining term to maturity in excess of 7 years. Instead, use of the level-yield method of amortization of discounts and premiums is required in these circumstances. Prohibiting use of the straight-line and sum-of-the-years-digits methods is intended to avoid distorting reported earnings and remove artificial incentives for investment in deep-discount loans or securities. The Board also has amended its regulations to clarify that a state-chartered insured institution must notify the Principal Supervisory Agent of the concurrence of the institution's state supervisory authority when the institution elects to defer and amortize gains and losses from the disposition of mortgage loans or securities. Lastly, the Board has clarified provisions of the matching requirements contained in its regulations which authorize deferral and amortization of losses by eliminating unnecessary references and by adding clarifying language. The last two amendments are technical in nature and merely clarify existing requirements.

EFFECTIVE DATE: April 13, 1983 (amendments to 12 CFR 563c.14); December 31, 1982 (amendments to 12 CFR 563.23–1).

FOR FURTHER INFORMATION CONTACT: Michael S. Joseph (202–377–6392), Professional Accounting Fellow, Office of Examinations and Supervision, or Robert S. Monheit (202–377–6466), Attorney, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: On December 16, 1982, the Federal Home Loan Bank Board, by Resolution No. 82-809, proposed amendments to §§ 563.23–1 and 563c.14 of the regulations for the Federal Savings and Loan Insurance Corporation (48 FR 417; January 5, 1983). First, the proposal would have amended 12 CFR 563.23–1(g)(9) (1982) to require the use of the level-yield method of amortization of discounts and premiums related to loans when such deferred items exceed ten percent of the related loan balance (unless the loan was fully amortizing over a period not in excess of

seven years). The current regulation permits amortization by the level–yield, straight–line, or sum–of–the–years–digits methods. Second, the proposal would have amended 12 CFR 563c.14(b)(2) (1982) to clarify that a state–chartered insured institution should forward to the Principal Supervisory Agent at its Federal Home Loan Bank and the Director, Office of Examinations and Supervision, the concurrence of its state supervisory authority if the institution elects to defer and amortize gains and losses from the disposition of mortgage loans or certain securities. The current regulation does not specify to whom the required notification should be sent. Lastly, the proposal would have amended 12 CFR 563c.14(b)(3)(ii) and (c)(2) (1982) to clarify certain provisions of the matching requirements contained in the regulations which authorize the deferral and amortization of losses.

The Board received eleven comment letters on the proposed amendments. Commenters consisted of nine insured savings and loan associations, a savings and loan trade group, and a law firm which represents associations. All of the comments related only to the proposed change to acceptable amortization methods for premiums and discounts on loans. Five commenters were generally opposed to the proposed changes, four supported them, and two suggested certain clarifications to the proposal without specifically expressing support or opposition.

Clarifying Amendments

The clarifying amendments to § 563c.14 of the regulations are straightforward and, as demonstrated by the lack of comment with respect to them, noncontroversial. These clarifying amendments:

1. Remove specific references to § 563.23–1 of the Regulations in § 563c.14(c)(2) which requires that matching amortization methods and lives must be used with respect to deferred losses and discounts from the purchase of long-term deep-discount securities, and

2. Provide that a state–chartered institution that elects to defer and amortize gains and losses from the sale of loans or securities pursuant to § 563c.14 document the concurrence of its state supervisory authority to the Principal Supervisory Agent at the Federal Home Loan Bank at which it is a member.

The specific references to § 563.23–1 are unnecessary and have caused some institutions to incorrectly interpret § 563.14 as making § 563.23–1 applicable to transactions, specifically those involving securities, to which it does not apply. The wording of paragraph (c)(2) of § 563.14 is amended to clarify that the amortization method and period used to amortize discounts and matching losses must be the same (except to the extent a shorter period is appropriate for the discount or the loss) and must be an appropriate method and period for both the discount and the loss. Finally, the amendment clarifies that an institution may change the method and period used to amortize a previously recorded deferred loss if necessary to comply with paragraph (c)(2). These amendments will make an institution's use of loss deferral accounting easier and less confusing. In addition, § 563c.14(b)(2) has been amended to explicitly state how a state supervisory authority's concurrence in the authority granted to institutions to defer and amortize gains and losses from the disposition of loans and certain securities is to be communicated to the Board. This amendment will eliminate confusion and will ensure that the information is sent to the most useful place. The Board therefore adopts these amendments as proposed, except for the requirement that additional notice be sent to the Director of the Office of Examinations and Supervision, which the Board deems necessary.

Amortization Methods

The proposed amendments to § 563.23–1 of the regulation would require that the level-yield method of amortization be used to recognize premiums and deferred income associated with loans which are not fully amortized within a period of seven years when such amounts exceed ten percent of the related loan balances and the loans have a remaining term to maturity in excess of seven years. Currently, the sum-of-the-years-digits or straight-line method may also be used to amortize these amounts.

When the Board authorized use of methods other than the level-yield method of amortization, accretion of premiums and deferred income did not constitute a significant portion of an institution's earnings from an investment in loans. Thus, the amortization method used did not materially affect an institution's reported income. At present, however, market interest rates differ from contract interest rates on a significant portion of mortgage loans available for purchase and sale in the secondary market. In addition, institutions are relying to a greater degree on the acquisition of loans to meet their investment requirements. One result of these new circumstances is that the method by which deferred income and premiums (principally loan discounts) are amortized to income can have a significant impact on institutions' reported earnings.

The use of an accelerated amortization method, such as the straight-line or sum-of-the-years-digits method, tends to overstate the net book value of assets purchased at discount held by an insured institution. These methods permit income recognition during the early years after loan acquisition of a greater amount of discounts than is necessary to recognize a market rate of return on an institution's investments. The same is true with respect to deferred acquisition credits and other items of deferred income related to the making of a loan where the deferred income is intended to compensate an institution for making a below-market-rate loan. And the converse occurs (i.e., carrying amounts and income tend to be understated during the early years) when these methods are used to amortize premiums paid upon the purchase of loans.

Under the level-yield method of amortization, an institution's reported periodic earnings on a below-market-rate loan are maintained at the same level as a loan that bears an interest rate equal to a market interest rate in the amount invested in the loan. However, because the greatest distortions of reported earnings occur from the making or purchasing of longer-term loans whose contract interest rates are significantly different from market levels, the Board proposed to prohibit use of the straight-line or sum-of-the-years-digits methods only where the premiums or deferred income exceed ten percent of the remaining principal balances of the loans made or acquired. The prohibition would not have applied to a loan that provided for full amortization within its term and whose term did not exceed seven years. The commenters supporting the proposed amendment noted that this change would bring the Board's accounting regulations more closely into line with generally accepted accounting principles (GAAP) which require the level-yield method to be used with respect to premiums and deferred income. (Three commenters mistakenly indicated that the sum-of-the-years-digits method was consistent with generally accepted accounting principles.)

Two of the commenters favoring the proposal suggested that the Board fully embrace GAAP for all aspects of accounting for loan-related income. Even after adoption of the proposed action, differences between the Board regulations and GAAP would exist with

respect to the periods over which these amounts are to be amortized and the treatment of loan commitment fees received by an institution. Upon consideration, the Board believes that these areas of departure are not generally viewed to be significant and, accordingly, no action with respect to these aspects of the Board's regulations will be taken at this time.

One commenter suggested that the level-yield method is somewhat complex and guidance is needed with respect to its application. The complexity cited is premised, to a large extent, on the need to estimate prepayments (and to periodically evaluate the accuracy of these estimates) over the 20- to 30-year contractual life of a loan or group of loans. The Board notes, however, that the current regulation, 12 CFR 563.23–1 (1982), permits amortization over a period as short as ten years (or in certain circumstances fewer than ten years). Use of a ten-year amortization period simplifies the use of the level-yield method by eliminating the need to estimate prepayments. Further, the requirement to use the level-yield method can easily be avoided by purchasing loans at a price of at least 90 percent of their face amount or those with a remaining contractual life of seven years or less.

The Board believes, however, that the appearance of complexity should not be a deterrent to the adoption of a more accurate accounting procedure. To the extent the proposal is so perceived, the following discussion of the intended method of applying the level-yield method is intended to provide additional guidance in this area. The amortization method should be applied by assuming that scheduled monthly payments will be received for the amortization period (typically ten years) at the end of which time the entire remaining balance will be repaid. The amortization schedule derived from this application should then be applied regardless of the actual repayment characteristic of the loan or loans, unless of course it is completely repaid prior to the expiration of the ten-year period. The following example is intended to demonstrate how an amortization schedule should be constructed.

Assume that an institution purchases a loan which has a remaining principal balance of $100,000, term of 20 years, and contract interest rate of 8 percent at a price of $80,000. The resulting discount to be amortized is $20,000 ($100,000–$80,000). The contractual monthly payment on this loan is $836.44. Its projected balance at the end of the ten-year amortization period is scheduled to be $60,940.61.

The internal rate of return on the institution's $80,000 investment (assuming receipt of monthly payments of $836.44 for ten years and a balloon payment of $60,940.61 at the end of the tenth year) is 11.8177%, compounded monthly. These amounts give rise to the following amortization schedule, which is also determined on a monthly compounding basis.

	Scheduled interest income on $100,000, 8 percent loan with $836.44 monthly payments	Scheduled interest income on $80,000, 11.8177 percent loan with $836.44 monthly payments	Discount amortization (difference)
Year:			
1	$7,923.60	$9,421.53	$1,497.93
2	7,748.17	9,344.67	1,596.50
3	7,558.18	9,258.24	1,700.06
4	7,352.43	9,161.03	1,808.60
5	7,129.59	9,051.67	1,922.08
6	6,888.24	8,928.69	2,040.45
7	6,626.89	8,790.33	2,163.44
8	6,343.81	8,634.73	2,290.92
9	6,037.25	8,459.68	2,422.43
10	5,705.25	8,262.84	2,557.59
Total discount			20,000.00

Those commenters who were opposed to the proposed action generally acknowledged that the straight-line or sum-of-the-years-digits methods overstate income during the early years of owning a loan purchased at discount. However, they generally viewed this income enhancement to be desirable for the industry given its current financial condition. The Board believes that this approach toward accounting for investments of the industry is inappropriate and does not encourage investment decisions based upon economic merits. The Board therefore has determined to adopt the amendments as proposed.

Regulatory Flexibility Act Certification

Pursuant to 12 U.S.C. 605(b), the Board hereby certifies that the final rule will not have a significant economic impact on a substantial number of small entities. The amendments to 12 CFR 563c.14 are technical clarifying changes that impose no new costs but, instead, simplify the application of existing rules. The amendment to 12 CFR 563.23–1 will not impose new, significant costs, but will result in a more accurate reflection of income in accordance with generally accepted accounting principles.

Retroactive Application and Immediate Effective Date

In its notice of proposed rulemaking, the Board indicated that if adopted, the rule would be effective for all purchases of loans or commitments to purchase loans occurring on or after December 16, 1982. The proposed change would have permitted institutions to continue to use the straight-line and sum-of-the-years-digits method to amortize premiums and deferred income only: (1) With regard to loans that were invested in or committed to prior to December 16, 1982, and (2) where the use of such methods was authorized at the time of investment. This announcement of the proposed early effective date was intended to prevent institutions from making or acquiring deeply-discounted loans solely for the purpose of obtaining a boost to earnings from accelerated amortization of the deferred income during the period that the Board reviewed the comments on its proposal. Failure to impose a retroactive effective date would have provided a non-economic incentive to make investments in long-term deeply discounted loans during the comment period, potentially adversely affecting the inherent value of individual institutions. To facilitate the bookkeeping for these transactions, the Board has advanced the effective date of this final action to December 31, 1982, the end of the calendar year. For these reasons, the Board finds good cause to waive the 30-day delayed effective date requirement (for the amendment to 12 CFR 563.23–1), pursuant to 12 U.S.C. 553(d)(3) and 12 CFR 508.14.

As to the amendments to 12 CFR 563c.14, while the Board finds that retroactive application of these changes is unnecessary, the Board also finds good cause to waive the 30-day delayed effective date requirement because these changes are technical and clarifying in nature, 5 U.S.C. 553(d)(3), 12 CFR 508.14.

List of Subjects in 12 CFR Parts 563 and 563c

Savings and loan associations.

Accordingly, the Board hereby amends Parts 563 and 563c of Subchapter D, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—OPERATIONS

1. Revise paragraphs (g)(9)(i) and (ii) of § 563.23–1, as follows:

§ 563.23–1 Premiums, discounts, charges, and credits with respect to loans; sale of real estate; and related items.

* * * * *

(g) *Definitions.* For purposes of this section:

* * * * *

(9) The term "approved method" means any one of the following methods for computing amortization of a capitalized premium or for recognizing deferred income (*e.g.*, discounts and deferred acquisition credits):

(i) "Straight-line" method, as described in § 1.167(b)–1 of the Federal Income Tax regulations (26 CFR 1.167(b)–1), but not, as to loans made or acquired after December 31, 1982 (excluding loans made or acquired after such date pursuant to a commitment entered into on or prior to such date), with respect to premiums or deferred income that exceed ten percent of the outstanding principal balance of a related loan on the date it is made or acquired unless the loan will be fully amortized within seven years of the date of closing or acquisition.

(ii) "Sum-of-the-years-digits" method, as described in § 1.167(b)-3 of the Federal Income Tax Regulations (26 CFR 1.167(b)-3), but not, as to loans made or acquired after December 31, 1982 (excluding loans made or acquired after such date pursuant to a commitment entered into on or prior to such date), with respect to premiums or deferred income that exceed ten percent of the outstanding principal balance of a related loan at the time it is made or acquired unless the loan will be fully amortized within seven years of the date of closing or acquisition.

* * * * *

PART 563c—ACCOUNTING REQUIREMENTS

2. Amend § 573c.14 by revising paragaraphs (b)(2), (b)(3)(ii), (c)(2) and (c)(3) thereof, as follows:

§ 563c.14 Accounting for gains and losses on the sale or other disposition of mortgage loans, redeemable ground-rent leases, and certain securities; matching the amortization of discounts.

* * * * *

(b) *Amortization.* An institution making this election shall:

* * * * *

(2) If it is a state-chartered institution, exercise this election only if its state supervisory authority has provided the Corporation with either specific or blanket concurrence for state law purposes in the use of this accounting treatment by sending the concurrence to the board's Principal Supervisory Agent at the Federal Home Loan Bank of which the institution is a member.

(3) Account for such gains and losses as follows:

* * * * *

(ii) Such gains or losses shall be amortized by the straight-line or level-yield methods over a period not to exceed the average of the remaining terms to maturity of the disposed mortgage loans or qualifying securities, or, in the case of redeemable ground-rent leases, a period not to exceed 40 years, with the yield calculated to reflect the length of the amortization period. Amortization periods for gains shall be established in the same manner as are amortization periods for losses deferred in the same fiscal year.

(c) *Matching the amortization of discounts and losses.*

(2) When long-term, deep-discount securities are purchased or otherwise acquired within six months preceding or subsequent to the disposition of a mortgage loan, mortgage-related security or debt security with respect to which an election to defer and amortize any loss or gain has been made pursuant to paragraph (a) of this section, the resulting discount shall be amortized over the same period and by the same method used to amortize any matching loss: *Provided,* that: (i) The method used for the loss is also an appropriate method by which to amortize a discount, and (ii) if the average of the remaining terms to maturity of the securities purchased is shorter than the period used to amortize the matching loss, then the average of the remaining terms to maturity of the securities purchased may be used as the amortization period for the discount.

(3) If necessary to meet the requirements of paragraph (c)(2) of this section, an institution may change the method and period by which the matching loss is being amortized. When making such a change, the amount of the matching loss shall be that portion of the loss that remains to be amortized as of the date of the change.

* * * * *

(Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730). Reorg. Plan No. 3 of 1947, 12 FR 4891, 3 CFR, 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

BILLING CODE 6720–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82–ANE–48; Amdt. 39–4521]

Airworthiness Directives; McCauley Accessory Division C200, C300, and C400 Series Constant Speed Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: In Docket No. 82–ANE–48, appearing on Page 633, Volume 48, No. 4 in the Federal Register of January 6, 1983, a list of "Applicable Blade Serial Numbers" and corresponding blade types were listed for Airworthiness Directive 82–27–02. The blade types for serial numbers B117730 through B117769 were erroneously stated as 90DHB–8 and 78TCA–0. The correct blade types are 90DCB–8 and 78TCA–0.

FOR FURTHER INFORMATION CONTACT: Mr. Henry L. Weiss, Chicago Aircraft Certification Office, Propulsion Branch, ACE–140C, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018; telephone: 312–694–7134.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator, Amendment 39–4521 published in the Federal Register on page 633, Volume 48, Number 4, January 6, 1983, is hereby amended by correcting the blade type for Applicable Blade Serial Numbers B117730 through B117769 from 90DHB–8 and 78TCA–0 to 90DCB–8 and 78TCA–0.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); Sec. 1189 Federal Aviation Regulation (14 CFR 11.89).

Issued in Burlington, Massachusetts on April 4, 1983.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 83–10162 Filed 4–15–83; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 83–CE–45–AD; Amdt. 39–4632]

Airworthiness Directives; EMBRAER Models EMB–110P1 and EMB–110P2 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), AD 83-04-03, applicable to EMBRAER Models EMB-110P1 and EMB-110P2 airplanes and codifies the corresponding emergency AD letter dated February 16, 1983, into the **Federal Register**. The priority letter AD required insertion of a temporary revision in the Airplane Flight Manual (AFM) Limitations Section which limited operation to a crew of two pilots for all operations. This version of the AD incorporates this requirement. Additionally, it provides for removal of this limitation if EMBRAER Control Wheel Spindles P/N 111A-500-10-01-10-01 or P/N 110-500-10-01-10-04 are installed and clarifies the airplane models to which the AD is applicable. Priority letter AD 83-04-03 was issued following a report of separation of a control wheel from an EMBRAER EMB-110 airplane as a result of a failure of a P/N 4A-500-10-01-10-03 control wheel spindle. The priority letter and this action will preclude loss of airplane control should the spindle fail at the crew station occupied by a single pilot.

DATES: Effective date: April 25, 1983, to all persons except those to who it has already been made effective by priority letter from the FAA dated February 16, 1983. Compliance: As prescribed in the body of the AD.

ADDRESSES: EMBRAER Service Bulletin No. 110-027-A070 dated February 10, 1983, applicable to this AD may be obtained from Empresa Brasileira de Aeronautica S/A (EMBRAER), P.O. Box 343-CEP, 12.200, Sao Jose Dos Campos, Sao Paulo, Brazil. A copy of this information is also contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Ben Davis, Airframe Branch, Atlanta Aircraft Certification Office, 1075 Inner Loop Road, College Park, Georgia 30337; Telephone (404) 763-7407.

SUPPLEMENTARY INFORMATION: The FAA was notified by the manufacturer and Centro Technico Aerospacial of Brazil (CTA) that a separation of a control wheel caused by failure of P/N 4A-500-10-01-10-03 control wheel spindle had occurred on an EMBRAER Model EMB-110 airplane. This resulted in the inability of the pilot to control the airplane at the crew station of the separated control wheel.

The FAA determined that this is an unsafe condition that may exist in other airplanes of the same type design, thereby necessitating the AD. It was also determined that an emergency condition existed, that immediate corrective action was required and that notice and public procedure thereon was impractical and contrary to the public interest. Accordingly, the FAA notified all known United States registered owners of the airplanes affected by this AD by priority mail letter dated February 16, 1983. The AD became effective immediately as to these individuals upon receipt of that letter and is identified as AD 83-04-03.

Subsequently, the FAA has received EMBRAER Alert Service Bulletin No. 100-027-A070 dated February 10, 1983, which contains information for identification of spindles of the part number which failed and acceptable P/N 111A-500-10-01-10-01 or P/N 110-500-10-01-10-04 spindles not subject to the previously experienced failure. If either of the later identified control wheel spindles is installed, the temporary limitation establishing two crewmembers for all operations required to be inserted in the AFM by priority letter AD 83-04-03 is no longer necessary in the interest of safety. Also, the FAA has become aware of an ambiguity in the applicability statement caused by not specifying the complete model designations of the United States certificated airplanes.

Accordingly, priority letter AD 83-04-03, applicable to EMBRAER EMB-110 airplanes, is being expanded to incorporate a criteria for identification of the acceptable and unacceptable control wheel spindles and authorize deletion of the temporary limitations requiring two crewmembers for all operations when the acceptable control wheel spindles are installed. The applicability statement is also being clarified by stating the specific and complete model designation of United States certificated airplanes.

Since the unsafe condition described herein may still exist on other EMBRAER EMB-110 airplanes, this AD is being published in the **Federal Register** as an amendment to Part 39 of the Federal Aviation Regulations (14 CFR Part 39) to make it effective to all persons who did not receive the letter notification. Because a situation still exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive.

EMBRAER: Applies to Models EMB-11OP1 and EMB-11OP2 airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent loss of airplane control in the event of a control wheel failure, accomplish the following:

(a) Effective immediately, operate the airplane with a minimum flight crew of two.

(b) Within the next 10 hours time-in-service after the effective date of this AD, insert a temporary revision in the Airplane Flight Manual (AFM), Limitations Section, paragraph 2-19, Minimum Flight Crew, which substitutes the following for the flight crew requirements. "Minimum flight crew for all operations—two pilots".

Note.—Insertion of a copy of this AD at the above location in the AFM satisfies the requirements of paragraph (b).

(c) Incorporation of the temporary AFM revision required by this AD may be accomplished by the owner/operator of the airplane. This person must make the prescribed entry in the aircraft maintenance records, indicating compliance with paragraph (b) of this AD.

(d) If an inspection of the control wheel installation in accordance with EMBRAER Alert Service Bulletin No. 110-027-A070, dated February 10, 1983, verifies that the aircraft has Control Wheel Spindle P/N 111A-500-10-01-10-01 or P/N 110-500-10-01-10-04, installed at both crew stations, or upon installation of either of the above part numbers, the requirements of paragraphs (a) and (b) of this AD are no longer applicable.

(e) An equivalent method of compliance with this AD may be used if approved by the Manager, Atlanta Aircraft Certification Office, ACE-110A, 1075 Inner Loop Road, College Park, Georgia 30337.

This amendment becomes effective on April 25, 1983, to all persons except those to whom it has already been made effective by priority letter from the FAA dated February 16, 1983, and is identified as AD 83-04-03.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); § 11.89, Federal Aviation Regulations (14 CFR 11.89)).

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an

emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket at the location identified under the caption "ADDRESSES."

Issued in Kansas City, Missouri, on April 7, 1983.

Murray E. Smith,

Director, Central Region.

[FR Doc. 83-10165 Filed 4-15-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 82-ACE-21]

Designation of Transition Area; Eagle Grove, Iowa

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to designate a 700-foot transition area at Eagle Grove, Iowa, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Eagle Grove, Iowa, Airport, utilizing the Fort Dodge VORTAC as a navigational aid. The intended effect of this action is to ensure segregation of aircraft using the new approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR).

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Dwaine E. Hiland, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE-532, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374-3408.

SUPPLEMENTARY INFORMATION: To enhance airport usage, a new instrument approach procedure is being developed for the Eagle Grove, Iowa, Airport, utilizing the Fort Dodge VORTAC as a navigational aid. The establishment of an instrument approach procedure based on this approach aid entails designation of a transition area at Eagle Grove, Iowa, at or above 700 feet above the ground (AGL) within which aircraft are provided air traffic control service. Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation and while transiting between the terminal and en route environment. The intended effect of this action is to ensure segregation of aircraft using the new approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR). This action will change the airport status from VFR to IFR.

Discussion of Comments

On pages 6551 and 6552 of the Federal Register dated February 14, 1983, the Federal Aviation Administration published a Notice of Proposed Rulemaking which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Eagle Grove, Iowa. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t. June 9, 1983, by designating the following transition area:

Eagle Grove, Iowa

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Eagle Grove, Iowa Airport (latitude 42°42'35"N, longitude 93°54'49"W), and 2½ miles either side of the Fort Dodge, Iowa VOR 071° radial extending from the 5-mile radius area to 8 miles southwest of the airport excluding that airpace within the Clarion, Iowa, transition area.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and § 11.69 of the Federal Aviation Regulations (14 CFR 11.69).

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Kansas City, Missouri, on April 8, 1983.

John E. Shaw,

Acting Director, Central Region.

[FR Doc. 83-10163 Filed 4-15-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 23604; Amdt. No. 1240]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO-730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence

Avenue, SW., Washington, D.C. 20591; telephone (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Approaches—standard instrument, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of th Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

Issued in Washington, D.C., on April 8, 1983.

John M. Howard,

Manager, Aircraft Programs Division.

BILLING CODE 4910-13-M

Federal Highway Administration

23 CFR Part 635

Contract Procedures; Labor and Employment

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The Federal Highway Administration (FHWA) is amending its regulation on Federal-aid labor and employment requirements to implement provisions mandated by sections 148 and 149 of the Surface Transportation Assistance Act of 1982 (STAA of 1982). Section 148 amends 23 U.S.C. 114(b) by including "materials produced by convict labor" within the prohibition of the use of convict labor in Federal-aid highway projects. Section 149 amends 23 U.S.C. 113(a) by striking the word "initial" so that the Davis-Bacon Act provisions would apply to construction work, as opposed to initial construction work, performed on projects on Federal-aid highway systems. The regulations implementing 23 U.S.C. 113(a) and 114(b) are revised to reflect the statutory amendments.

EFFECTIVE DATE: This final rule is effective January 6, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. P. E. Cunningham, Chief, Construction and Maintenance Division, (202) 426-0392, or Mr. Michael J. Laska, Office of the Chief Counsel, (202) 426-0761, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 to 4:15 p.m. e.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: On January 6, 1983, the President signed into law the Surface Transportation Assistance Act of 1982 (Pub. L. 97-424, 96 Stat. 2097). Section 148 of the STAA of 1982 amends 23 U.S.C. 114(b) which provides that convict labor cannot be used in the construction of any highway or portion of highway located on a Federal-aid system unless the convict labor is performed by convicts who are on parole or probation. Section 148 extends this restriction to materials produced by convict labor. The convict

labor provisions as implemented in 23 CFR 635.124(a) are being revised to include the provisions of section 148.

Section 149 of the STAA of 1982 amends 23 U.S.C. 113(a) which provides for the application of prevailing rate of wages in accordance with the Davis-Bacon Act (40 U.S.C. 276a) to Federal-aid highway projects. Section 149 deletes the word "initial" so that the Davis-Bacon provisions apply to construction work as opposed to initial construction work performed on highway projects on the Federal-aid systems. The Davis-Bacon provisions as implemented in 23 CFR 635.124(d) are being revised to reflect this deletion of section 149.

The FHWA has determined that this document does not contain a major rule under Executive Order 12291 or significant regulation under the regulatory policies and procedures of the Department of Transportation. Since the amendments in this document merely reflect statutory language mandated by the STAA of 1982, public comment is unnecessary. Therefore, the FHWA finds good cause to make the amendments final without prior notice and opportunity for comment and without a 30-day delay in effective date under the Administrative Procedure Act. Notice and opportunity for comment are not required under the regulatory policies and procedures of the Department of Transportation because it is not anticipated that such action could result in the receipt of useful information since the statutory language incorporated in the regulation requires no interpretation and provides for no discretion. It is anticipated that the economic impact of this rulemaking action will be minimal, since such economic impact as will occur is mandated by the cited statutory changes themselves, and not by the rulemaking action. Accordingly, a full regulatory evaluation is not required. For the foregoing reasons and under the criteria of the Regulatory Flexibility Act, it is certified that this action will not have a significant economic impact on a substantial number of small entities.

In consideration of the foregoing, and under the authority of 23 U.S.C. 315; 148 and 149, Surface Transportation Assistance Act of 1982, Pub. L. 97–424, 96 Stat. 2097; and 49 CFR 1.48(b), the FHWA is amending Part 635, Subpart A of title 23, Code of Federal Regulations, as set forth below:

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The coordination process provided in OMB circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs apply to this program.)

List of Subjects in 23 CFR Part 635

Government contracts, Grant programs—transportation, Highways and roads.

Issued on: April 8, 1983.

L. P. Lamm,

Deputy Federal Highway Administrator, Federal Highway Administration.

PART 635—CONSTRUCTION AND MAINTENANCE

1. In § 635.124, paragraph (a)(1) is revised to read as follows:

§ 635.124 Labor and employment

(a)(1) No convict labor shall be employed or used for maintenance or any other purpose at the site and no materials produced by convict labor shall be utilized in the construction of a project or within the limits of any Federal-aid project from the time of program approval to final acceptance of the work by the State highway agency and removal of all free labor therefrom except as provided in § 635.124(a)(2). Program approval is interpreted to refer to approval of the program for any phase of the project; such as, preliminary engineering, right-of-way acquisition, or physical construction.

* * * * *

2. In § 635.124, paragraph (a)(2) is amended in the first sentence by inserting the words "or material produced by convict labor utilized" after the word "employed" and in the second sentence by inserting the words "or material produced by convict labor" after the word "labor."

3. In § 635.124, paragraph (d) is amended by removing the word "initial" before the word "construction."

BILLING CODE 4910–22–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7885]

Income Tax; Taxable Years Beginning After December 31, 1953 Automatic Extension of Time for Filing Income Tax Returns

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations under the Tax Equity and Fiscal Responsibility Act of 1982 relating to the automatic extension of time for filing income tax returns. In general, the regulations will extend the length of automatic extensions available to corporations and individuals. These regulations provide necessary guidance to the public and affect corporations and individuals seeking an automatic extension of the time for filing income tax returns.

DATE: The regulations are effective for taxable years ending on or after December 31, 1982.

FOR FURTHER INFORMATION CONTACT: Philip R. Bosco of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T, 202–566–3238, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This Treasury decision amends § 1.6081–3 of the regulations so as to extend the present three-month automatic extension of time to file a corporation income tax return to a six-month automatic extension. To obtain the automatic extension, the corporation must file Form 7004 (Application for Automatic Extension of Time to File U.S. Corporation Income Tax Return). Form 7004 must show the amount of tax properly estimated for the taxable year, be signed by a person authorized by the corporation to request such extension, and be filed on or before the due date for filing Form 1120 (U.S. Corporation Income Tax Return). The corporation shall make a remittance, on or before the date prescribed for payment, of the amount of the properly estimated unpaid tax liability. This amendment is effective for taxable years ending on or after December 31, 1982.

Section 234(b)(2)(B) of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) amended section 6081(b) so as to deny a corporation requesting an automatic extension of time to file the right to remit any unpaid tax liability in installments. This Treasury decision amends § 1.6081–3 of the regulations so as to require that Form 7004 be accompanied by the full amount of the estimated unpaid tax liability. This amendment is effective for taxable years beginning after 1982.

Finally, this Treasury decision amends § 1.6081–4 of the regulations so as to extend the present two-month automatic extension of time to file an individual income tax return to a four-month automatic extension. To obtain the automatic extension, the individual must file Form 4868 (Application for

Automatic Extension of Time to File U.S. Individual Income Tax Return). Form 4868 must show the amount of tax properly estimated for the taxable year, be signed by the individual or some other person duly authorized by the individual to sign, be accompanied by the full remittance of the unpaid estimated tax, and be filed on or before the due date for filing Form 1040 (U.S. Individual Income Tax Return). In the case of certain U.S. citizens and residents outside of the United States (as described in § 1.6081–2 of the regulations), the four-month automatic extension will run concurrently with the two-month extension to file otherwise available to such individuals, and Form 4868 must be filed on or before the expiration of such two-month extension.

Both the new six-month automatic extension for corporations and the new four-month automatic extension for individuals extend only the time for filing. Such automatic extensions do not extend the time for payment of the tax.

Special Analyses

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. Because this regulation is nonsubstantive and essentially procedural, no general notice of proposed rulemaking is required by 5 U.S.C. 553(b). Accordingly, no Regulatory Flexibility Analysis is required for this rule.

Drafting Information

The principal author of this regulation is Philip R. Bosco of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects in 26 CFR 1.6001–1—1.6109–2

Income taxes, Administration and procedure, Filing requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—[AMENDED]

Paragraph 1. Section 1.6081–3 is amended by revising the introductory text of paragraph (a) and (a) (2) and (3), and (b) to read as follows:

§ 1.6081–3 Automatic extension of time for filing corporation income tax returns.

(a) *In general.* A corporation shall be allowed an automatic extension of time to the fifteenth day of the sixth month (third month in the case of taxable years ending before December 31, 1982) following the month in which falls the date prescribed for the filing of its income tax return provided the following requirements are met:

(1) * * *

(2) The application must be filed on or before the date prescribed for the filing of the return of the corporation with the internal revenue officer with whom the corporation is required to file its income tax return.

(3) The corporation shall make a remittance, on or before the date prescribed for payment, of the amount of the properly estimated unpaid tax liability. For taxable years beginning before 1983, the corporation shall make a remittance of an estimated amount of tax which shall not be less than would be required as the first installment under section 6152(a)(1) should the corporation elect to pay the tax in installments. Upon the time by filing of Form 7004, properly prepared, the 6-month (3-month in the case of taxable years ending before December 31, 1982) extension shall be considered as allowed. For taxable years beginning before 1983, if the taxpayer elects to pay in installments the tax shown on Form 7004, the installment privilege provided in section 6152(a)(1) is limited to the amount shown on the form.

(b) *Consolidated returns.* An application for an automatic extension of time for filing a consolidated return shall be made by a person authorized by the parent corporation to request such extension. Such person must be a person authorized under section 6062 to execute the return of the parent corporation; a person currently enrolled to practice before the Treasury Department; or after November 7, 1965, either an attorney who is a member in good standing of the bar of the highest court of a State, possession, territory, commonwealth, or the District of Columbia, or a certified public accountant duly qualified to practice in a State, possession, territory, commonwealth, or the District of Columbia. There shall be attached to such application a statement listing the name and address of each member of the affiliated group for which such consolidated return will be made. For taxable years beginning after December 31, 1970, the application shall be filed with the internal revenue officer with which the parent corporation will file its income tax return. Upon the timely filing of Form 7004 with the internal revenue officer with which such corporation files its return, the 6-month (3-month in the case of taxable years ending before December 31, 1982) extension shall be considered as granted to the affiliated group for the filing of its consolidated return or for the filing of each member's separate return.

* * * * *

Par. 2. Section 1.6081–4 is amended by revising paragraphs (a) (1), (3), and (5) to read as follows:

§ 1.6081–4 Automatic extension of time for filing individual income tax returns.

(a) *In general.* (1) An individual who is required to file an income tax return on Form 1040 for any taxable year ending on or after December 31, 1982, shall be allowed an automatic 4-month extension of time to file such return after the date prescribed for filing of the return only if the requirements contained in paragraphs, (a) (2), (3), and (4) of this section are met. Accordingly, in the case of an individual described in § 1.6081–2(a) (5) or (6), the automatic 4-month extension will run concurrently with the extension of time to file granted pursuant to § 1.6081–2(a). (For returns filed for taxable years ending on or after December 31, 1971 and before December 31, 1982, the extension allowed by this paragraph shall be a 2-month extension.)

* * * * *

(3) Except in the case of an individual described in § 1.6081–2(a) (5) or (6), the application must be filed on or before the date prescribed for the filing of the return of the individual with the internal revenue officer with whom the return is required to be filed. In the case of an individual described in § 1.6081–2(a) (5) or (6), the application must be filed on or before the expiration of the extension of time to file granted pursuant to § 1.6081–2(a).

* * * * *

(5) Upon the timely filing of Form 4868, properly prepared, and accompanied by remittance of the full amount of the estimated unpaid tax liability, the 4-month (2-month, in the case of taxable years ending on or after December 31, 1971 and before December 31, 1982) extension shall be considered as allowed. Except in undue hardship cases, no extension of time for filing an individual income tax return shall be granted under § 1.6081–1 until an automatic extension has been granted pursuant to the provisions of this paragraph.

* * * * *

Because this regulation is nonsubstantive and essentially procedural, it is found unnecessary to

issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

This Treasury decision is issued under the authority contained in sections 6081 and 7805 of the Internal Revenue Code of 1954 (68A Stat. 751, 26 U.S.C. 6081; 68A Stat. 917, 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: April 6, 1983.

John E. Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[Reg. 83-06]

COTP Hampton Roads, VA; Safety Zone Regulations; Chesapeake Bay, Hampton Roads, Willoughby Bay, Norfolk, Virginia

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone in Willoughby Bay, Hampton Roads, Chesapeake Bay, Virginia, in the vicinity of the Norfolk Naval Air Station on 23 April 1983. This zone is established to safeguard watercraft from damage during the U.S. Navy Blue Angels flight demonstration team arrival show on 23 April 1983 and air show on 24 April 1983. Entry into this zone is prohibited except as otherwise stated.

EFFECTIVE DATES: This regulation becomes effective on 23 April 1983, at 5:30 PM local time. It terminates on 23 April 1983, at 6:30 PM local time. It again becomes effective on 24 April 1983 at 2:15 PM local time, and terminates on 24 April 1983 at 3:45 PM local time.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander W. K. Six, Chief, Port Operations Department, Coast Guard Marine Safety Office, Hampton Roads, Norfolk, Virginia 23510, (804) 441-3296.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and it is being made effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to safeguard watercraft and their occupants.

Drafting Information

The drafter of this regulation is Lieutenant Commander W. K. Six, project officer for the Captain of the Port.

Discussion of Regulation

The Federal Aviation Administration has required that this safety zone be imposed as a condition for its granting approval for the arrival show and air show to take place. To prevent possible damage to watercraft and their occupants, no watercraft will be permitted to enter, remain in, moor in, or transit this safety zone unless specifically authorized by the Captain of the Port, Hampton Roads, Virginia. This rule is in response to a request by the U.S. Navy for Coast Guard assistance in precluding vessels from transiting the area.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended by adding a new § 165.T517 to read as follows:

§ 165.T517 Safety Zone: Chesapeake Bay, Hampton Roads, Willoughby Bay, Virginia.

(a) *Location.* The following area is a safety zone: The waters of Willoughby Bay, Norfolk, Virginia, bounded by a line beginning at a point 36-56-54N, 76-17-37W, thence to 36-57-30N, 76-17-37W, thence to 36-57-30N, 76-17-01W, thence to 36-56-56N, 76-17-01W, thence along the shoreline to the point of beginning.

(b) *Regulations:* (1) In accordance with the general regulations in 165.23 of this part, no person may enter, remain in, moor in, or operate any vessel within this safety zone between 5:30 PM local time and 6:30 PM local time, 23 April 1983, or between 2:15 PM local time and 3:45 PM local time on 24 April 1983.

(33 U.S.C. 1225 and 1231; 49 CFR 1.46; 33 CFR 165.3)

Dated: March 30, 1983.

J. D. Webb,

Captain, U.S. Coast Guard, Captain of the Port, Hampon Roads, U.S. Coast Guard.

34 CFR Part 682

Family Contribution Schedule for the Guaranteed Student Loan Program for 1983-84; Correction

AGENCY: Department of Education.

ACTION: Final regulations; Corrections.

SUMMARY: This document makes technical corrections in the final regulations for the Family Contribution Schedule for the Guaranteed Student Loan Program for 1983-84 (48 FR 14316, April 1, 1983).

FOR FURTHER INFORMATION CONTACT: Mr. Larry Oxendine, Policy Section, Guaranteed Student Loan Branch, Division of Policy and Program Development, Office of Student Financial Assistance, 400 Maryland Avenue, SW., (Room 4310, ROB-3) Washington, D.C.

SUPPLEMENTARY INFORMATION: On April 1, 1983, the Secretary published final regulations for this program in the **Federal Register** at 48 FR 14316-14343. This document corrects errors made in the Preamble and Appendix to those regulations.

On page 14317, second column, the sentence beginning on line four is revised to read as follows:

"First, spouses of independent student borrowers acquire, either directly under community property statutes, or indirectly through their right to support, a claim on their spouses' future earnings, enhanced because of the education paid for with the student loan."

On page 14328, the last sentence is removed.

Dated: April 12, 1983.

(Catalog of Federal Domestic Assistance Number 84.032, Guaranteed Student Loan Program)

Daniel Oliver,

General Counsel.

BILLING CODE 4000-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 85

[AMS-FRL 2336-1]

Control of Air Pollution From Motor Vehicles and Motor Vehicle Engines; Importation of Motor Vehicles and Motor Vehicle Engines

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Revised Administrative Procedures and Enforcement Policy Regarding the Importation of Motor Vehicles and Motor Vehicle Engines.

SUMMARY: This action announces a reduction in paperwork burden concerning importation of conforming motor vehicles and motor vehicle engines and a revised enforcement policy regarding the importation of nonconforming vehicles and engines by individual, non-commercial importers, under 40 CFR Part 85, Subpart P, and parallel regulations of the U.S. Customs Service (Customs) at 19 CFR 12.73.

DATES: The changes announced in this notice became effective during October and November, 1981, as discussed below.

ADDRESSES: Materials relevant to this notice are contained in Public Docket No. EN-79-9 located at: Central Docket Section (LE-131), West Tower Lobby, Gallery 1, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. The docket is open for inspection and documents may be copied Monday through Friday from 8:00 a.m. to 4:00 p.m. A reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Gerard C. Kraus, Chief, Investigation/Imports Section, Manufacturers Operations Division (EN-340F), U.S. Environmental Protection Agency, Washington, D.C. 20460. Telephone: (202) 382-2504.

SUPPLEMENTARY INFORMATION:

Discussion

The enforcement policy noted today took effect during October and November 1981, at which time it was announced in an EPA press release. Since then, EPA has received requests from Customs, various manufacturers and the California Air Resources Board for a **Federal Register** notice to explain this policy further.

Section 203(a)(1) of the Clean Air Act prohibits any person from importing any motor vehicle which is not certified as conforming to applicable Federal emission standards, except as provided by regulation of the Administrator. For the purpose of helping EPA implement this provision, existing Customs regulations (19 CFR 12.73) require that every vehicle (or shipment of vehicles) imported into the United States must be accompanied by a written declaration that it does or does not conform with Federal emission requirements. Prior to November 1981, approximately 118,000 declarations were filed annually: about 113,000 covering 2.7 million mostly new conforming vehicles, the remainder covering 1400 nonconforming vehicles exempted under existing regulations (e.g., test vehicles) and approximately 5000 nonconforming vehicles, conditionally imported under bond by individual and commercial importers. (The number of declarations does not equal the number of vehicles because a declaration often covers more than one vehicle). EPA estimates that preparation of these declarations for conforming vehicles imposed over 16,000 hours of burden on importers annually with little beneficial effect. Most conforming vehicles are equipped with labels installed by the manufacturer indicating that they meet EPA requirements. These labels may be used to distinguish conforming vehicles from nonconforming vehicles by Customs inspectors. Accordingly, since EPA and Customs have little use for declaration forms for conforming vehicles, on October 27, 1981, EPA requested that Customs suspend the written declaration requirement for conforming vehicles equipped with EPA labels. Effective November 18, 1981, Customs began requiring written declarations only for nonconforming and exempt vehicles. The Agency estimates that this action has reduced the burden on importers from more than 16,000 to approximately 1000 hours per year.

Further, under the existing Customs and EPA regulations, each person who imports a nonconforming motor vehicle must post a bond with Customs (19 CFR 12.73(c)), equal to the value of the vehicle plus any applicable duty, and then bring the vehicle into conformity with Federal emission requirements within 90 days after importation (40 CFR 85.1508(h)). An importer may demonstrate conformity of the vehicle by modifying it to a configuration identical to one already certified or by having it modified and tested in accordance with the Federal Test Procedure to show compliance with emission standards applicable to the model year of the vehicle. Failure to bring the vehicle into conformity may result in a civil penalty under the Clean Air Act of not more than $10,000 and forfeiture of the bond, and/or redelivery of the vehicle to Customs.

On July 21, 1980, EPA and Customs proposed amendments to the importation regulations referred to above (45 FR 48812, 48817). As stated above in the preamble to the EPA proposal (45 FR 48812-13), EPA experienced two difficulties with the existing regulations: first, many individuals importing nonconforming vehicles have not fully understood the complexity and expense of the modification and testing options and learned of the EPA requirements only after importation of their vehicles; and second, the administration of the regulations by EPA and Customs requires substantial resources as compared to the air quality benefits that the program offers. Publication of a final rule has been deferred pending possible revision of the Clean Air Act since Congress is considering amendments to the present provisions covering the importation of nonconforming cars.

EPA conducted an analysis of importations of uncertified vehicles by individuals and commercial importers for resale and found that most vehicles imported by individuals are at least five model years old at the time of importation. Because of the difficulties involved, few such vehicles imported by individuals were brought into conformity and the importers were usually assessed a penalty while retaining ownership of their nonconforming vehicles.

Since the number of such older vehicles that are imported by individuals but not brought into conformity (about 1500 per year) is so small, representing a fraction of one percent of the total number of vehicles imported each year, the Agency concluded that a massive increase in importations of such uncertified vehicles would have to occur before there would be any measurable effect on air quality. Also, because the importation of older vehicles by individuals should not significantly affect the purchase of new vehicles from dealerships located in the United States and since most vehicles imported by commercial importers are new vehicles, a change in enforcement policy applicable to individuals who import older cars was not considered likely to have a substantial effect on American automobile businesses.

For these reasons, EPA decided in October 1981 to exercise its enforcement discretion by not taking enforcement action under sections 203(a)(1), 204 and 205 of the Clean Air Act against an individual importing a vehicle at least five model years old, who has not imported a nonconforming vehicle since the effective date of the Clean Air Act of 1970 and who thus may not have knowledge of the importation requirements. (For the purpose of this policy, model year age is determined from January 1 of the current calendar year; therefore, as of January 1, 1983, model year 1978 and older vehicles qualify.) In November 1981, at EPA's request, Customs also decided not to require any forfeiture of the importation bond in such cases.

In addition, EPA decided not to take enforcement action, on a first time only basis, against any individual immigrating to the United States who imports a nonconforming vehicle for personal use, or an individual in a special hardship situtation where EPA determines that imposition of a penalty is not appropriate (e.g., a handicapped person who imports a specially-equipped vehicle not available in a certified configuration.) Customs will also not require any forfeiture of the importation bond in such cases. Only about 150 vehicles per year are affected by these criteria.

This policy significantly reduces the burden of compliance for the majority of first-time importers of vehicles for personal use. This policy does not apply to importations by an individual through a commercial enterprise or other business agent, or to persons who arrange importations of nonconforming vehicles for individuals.

Individuals who have previously imported uncertified vehicles and commercial importers are presumed to have knowledge of the importation requirements and, hence, must bring each nonconforming imported vehicle into conformity under the regulations. These individuals were excluded from this new enforcement policy for to do otherwise is likely to have resulted in a substantial increase in the number of uncertified vehicles imported into this country. All importers, whether or not included in the policy discussed above, must comply with any State and local government emission requirements and Federal safety standards administered by the U.S. Department of Transportation.

In order to take advantage of this revised enforcement policy, any individual who imports a vehicle that would qualify must, under the present Customs regulations, post a bond with Customs at the time of entry and complete a declaration that the vehicle does not conform to Federal emission requirements. EPA will then determine if this policy applies to that individual and, if so, will ask Customs to release the EPA obligation on the bond. In such a case, Customs has agreed not to require forfeiture of the importer's bond. Any importer who believes that he or she may qualify for an exception because of a handicap or other hardship should contact EPA at the address given earlier in this notice before importing a vehicle.

Environmental Impact

Approximately 5000 nonconforming vehicles are conditionally imported under bond, pursuant to the existing importation regulations, into the United States each year by individuals and by commercial importers for resale. The revised importation enforcement policy affects less than one-third of these vehicles. This number is relatively insignificant compared to approximately 2.7 million conforming new vehicles imported each year. During the year since this policy was implemented, the proportion of noncomforming vehicles has not increased and the percentage of noncomforming vehicles at least five years old to newer nonconforming vehicles imported by individuals has remained about the same. The proportion of these older vehicles to all nonconforming vehicles imported by individual and commercial importers has also not increased. Based on this experience, EPA believes that this policy will not cause or result in a significant adverse environmental impact.

This policy should help EPA to accomplish more effectively the purposes of the clean Air Act by allowing scarce Agency resources to be concentrated on those areas of the imports program where there is greater potential for abuse—importation of uncertified vehicles by commercial importers and individuals who have previously imported uncertified vehicles.

Economic Impact

The suspension of the declaration requirement has reduced the administrative and paper work burden upon importers by over 15,000 hours per year.

As discussed above, this policy has not had, and is not expected to have, a substantial effect on domestic or foreign car sales in the United States. The revised importation enforcement policy applies only to certain first-time individual importers, generally those who import vehicles at least five model years old. This policy covers approximately 1600 vehicles, total, per year. It does not affect commercial or repeat importers. The incentive created by the revised policy for an individual to purchase and import a vehicle from overseas, given the need to meet the bonding and compliance requirements regarding Federal safety standards, should not be substantial enough to stimulate a significant increase in importations of older, nonconforming vehicles and experience over the past year confirms this conclusion. Furthermore, EPA does not expect the limited, one time only, enforcement policy for individual importers to reduce significantly the demand for commercial importers' servicies.

This revised enforcement policy has also reduced the reporting and recordkeeping burden of individual importers who qualify for a one time exception by an estimated 300 hours per year.

Information collection reguirements affected by this notice have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and have been assigned OMB control numbers 2000-0228 and 2000-0440.

Note.—This notice was submitted to OMB for review as required by Executive Order 12291. Although this is not a regulation, it is subject to OMB review under the Executive Order. Any comments from OMB to EPA and any EPA response to those comments are available for public inspection in Public Docket No. EN-79-9 and at U.S. EPA, Manufacturers Operations Division, Fairchild Building, Second Floor, 499 South Capitol Street, Washington, D.C. 20003.

Section 3(b) of Executive Order 12291 requires EPA to determine whether a rule it intends to propose or to issue is a major rule and to prepare Regulatory Impact Analyses (RIAs) for all major rules. EPA has determined that this action is not a "major rule" requiring preparation of an RIA. It will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S. based enterprises to compete with foreign companies. In fact, the suspension of the declaration requirement and the revision to the EPA importation compliance policy announced in this notice will reduce the cost of compliance for many importers with Subpart P of 40 CFR Part 85.

This is a nationally applicable action. Under section 307(b)(1) of the Clean Air Act, judicial review of this action is available *only* by the filing of a petition for review in the United States Court of Appeals for the District of Columbia Circuit within 60 days of April 18, 1983. Under section 307(b)(2) of the Clean Air Act, this final action may not be challenged later in civil or criminal proceedings brought by EPA to enforce this action.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 299

Revocation of Merchant Ship Sales Act of 1946 Regulations

AGENCY: Maritime Administration, DOT.

ACTION: Revocation of obsolete regulations.

SUMMARY: The Maritime Administration (MARAD) has completed a review of the regulations in 46 CFR Part 299, which were promulgated to implement the Merchant Ship Sales Act of 1946. MARAD selected these regulations for priority review, as reflected in its Review List entries on the last DOT Semi-Annual Regulations Agenda and Review List (47 FR 48562; October 28, 1982). The principal purpose of the regulations in 46 CFR Part 299 is to impose conditions for the sale or charter by MARAD, for commercial use, of ocean-going vessels of at least 1500 gross tons that were either: (1) Built by or for the account of the United States during the period beginning January 1, 1941, and ending September 2, 1945; or (2) acquired by the United States during the period beginning September 3, 1939, and ending September 2, 1945. Some of these World War II—built ocean-going vessels remain in the National Defense Reserve Fleet. Such vessels may not be sold for commercial operation (46 U.S.C. 1160(g)). Although there is existing general authority under Title VII of the Merchant Marine Act, 1936 (46 U.S.C. 1191 et seq.), for MARAD to charter vessels, the age and condition of these vessels make it impracticable to do so. Therefore, as the provisions in 46 CFR Part 299, relating to the Merchant Ship Sales Act of 1946, are obsolete and no longer serve any useful purpose, MARAD is revoking the entire Subchapter F of 46 CFR Chapter II, which contains only Part 299.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Jessie Fernanders, (202) 426-5821.

SUPPLEMENTARY INFORMATION: The Maritime Administrator has determined that this is not major rulemaking requiring preparation of a regulatory impact analysis, pursuant to EO 12291. Since this rulemaking action merely revokes regulations that implement authority which has no present or prospective practical application, the Maritime Administrator has found that notice and public procedure thereon is unnecessary and that this rulemaking should become effective upon publication (5 U.S.C. 553). Accordingly, the further certifies that the Regulatory Flexibility Act of 1980 (Pub. L. 96-354) is not applicable. Since the rulemaking will not have a significant economic impact on a substantial number of small entities, that Act would not otherwise be applicable. Also the Paperwork Reduction Act of 1980 (Pub. L. 96-511) is not applicable. Pursuant to DOT Order 2100.5, he has also determined that this revocation of 46 CFR Part 299 is a nonsignificant rulemaking action with such a minimal expected impact that it does not warrant a full Evaluation to be placed in the rulemaking docket.

List of Subjects in 46 CFR Part 299

Accounting, Maritime carriers, Reporting recordkeeping requirements.

PART 299—[REMOVED AND RESERVED]

Accordingly, Subchapter F of 46 CFR Chapter II consisting of Part 299 is hereby removed and reserved.

Authority: 50 U.S.C. App. 1735 et seq.; 46 U.S.C. 1114(b).

Dated: April 4, 1983.

By Order of the Maritime Administrator.

Georgia P. Stamas,

Acting Secretary, Maritime Administration.

[FR Doc. 83-10063 Filed 4-15-83; 8:45 am]

BILLING CODE 4910-81-M

46 CFR Part 310

Admission and Training of Midshipmen at the United States Merchant Marine Academy; Pay Increase

AGENCY: Maritime Administration, DOT.

ACTION: Final rule.

SUMMARY: The Maritime Administration amends its regulations relating to merchant marine training to increase the pay that midshipmen of the United States Merchant Marine Academy receive while assigned to merchant vessels for sea year training. The purpose of this amendment is to implement the Maritime Administration policy that midshipmen shall receive the same rate of pay from their steamship company employers for the sea year training as cadets receive at the Federal service academies.

EFFECTIVE DATE: April 1, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Edwin M. Hackett, Acting Academies Program Officer, Office of Maritime Labor and Training, Department of Transportation, Washington, DC 20590 (202) 426-5758.

SUPPLEMENTARY INFORMATION: Part 310 of Title 46 of the Code of Federal Regulations is hereby amended. The amendment increases the pay that midshipmen of the United States Merchant Marine Academy receive while assigned to merchant vessels for sea year training. It would reflect MARAD policy of adjusting midshipmen pay periodically to accomplish comparability with the monthly rate of pay per cadets or midshipmen at the service academies. That rate has been raised to $480 by EO 12387 (47 FR 44981 October 13, 1982).

The rate of pay received by midshipmen while assigned to subsidized merchant vessels is a matter of public contract with the owners of vessels operating under operating-differential subsidy agreements (ODSA). Accordingly, this amendment is exempt from the application of 5 U.S.C. 553, and is being issued as a final rule, effective April 1, 1983, without opportunity for public comment. The Maritime Administrator has determined that this amendment is not a major regulation requiring preparation of a regulatory impact analysis, within the scope of EO 12291. This is a nonsignificant regulation under the criteria in DOT Order 2100.5. Based on an economic evaluation made pursuant to that Order, a determination has been made that the economic impact is so minimal that a full Regulatory Evaluation is not required to be included in the rulemaking docket. This increase of $18.60 monthly for midshipmen assigned to merchant ships represents an increase in cost to vessel operators under ODSA's of about $55,800 annually. The Maritime Administrator certifies that the regulation will not exert a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354), since it affects only a small number of large subsidized operators and cadets at the U.S. Merchant Marine Academy. It includes no reporting requirement for the collection of information within the scope of the Paperwork Reduction Act of 1980 (Pub. L. 96-511).

List of Subjects in 46 CFR Part 310

Grant programs—education, Schools, Seamen.

PART 310—[AMENDED]

Accordingly, Part 310 Title 46 of the Code of Federal Regulations is amended by revising paragraph (c) of § 310.58 to read as follows:

§ 310.58 Training on subsidized vessels.

* * * * *

(c) *Pay*—Midshipmen shall receive pay while employed aboard merchant vessels, at the rate of $480.00 per month directly from their steamship company employers. While aboard ship, they shall be berthed in single-occupancy rooms with other midshipmen in that part of the vessel designated for licensed officers (or in first-class passenger quarters) and shall mess with the licensed officers. The steamship company employers shall also pay the midshipmen such subsistence and room allowance in port, transportation allowances, and other bonuses or allowances as are paid to the licensed officers of the vessel in which the midshipmen are employed.

(Sections 204(b) and 1301–1308, Merchant Marine Act, 1936, as amended, (46 U.S.C. 1114(b); and 1295–1295g); Pub. L. 96–453; Pub. Law 97–31; 49 CFR 1.66 (46 FR 47458, September 28, 1981); EO 12387 (47 FR 44961, October 13, 1982).

Note.—This regulation is not subject to the requirements of Section 3507 of Pub. L. 96–511 December 11, 1980.

Catalog of Federal Domestic Assistance Program No. 11–507 U.S. Merchant Marine Academy (Kings Point).

Dated: April 4, 1983.

47 CFR Part 21

Point-to-point microwave.

Report and order

In the matter of amendment of Parts 2 and 21 of the Commission's Rules concerning calculation of necessary bandwidth for Frequency Modulation Microwave Radio Relay Systems, Gen. Docket No. 81–743, RM–3625.

Adopted: March 31, 1983.
Released: April 12, 1983.

By the Commission.

1. In response to a petition filed by American Telephone and Telegraph (AT&T),[1] the Commission adopted a Notice of Proposed Rulemaking in Gen. Docket No. 81–743 (NPRM), 88 FCC 2d 134 (1981), in which it proposed to amend Parts 2 and 21 of its rules. The intent of the proceeding is to improve the efficiency of the radio spectrum utilized for multi-channel telephone circuit transmission. This Report and Order (Report) deals with the issues raised by the parties who submitted comments to the NPRM.[2]

2. *Background.* In 1978, Bell Laboratories, AT&T's wholly owned research arm, conducted a survey of the signal power levels generated by telephone network users (or "talkers").[3] The results of that survey indicated that the average signal power per voice circuit for multiplex groups of 240 or more channels was −19.6 dBm0.[4] This result was in conflict with the −15 dBm0 level specified in § 2.202, Bandwidths, and Section 2.989, Measurements Required: Occupied Bandwidth, of the Commission's rules. *See* Appendix A hereto. In its petition for rulemaking, AT&T argued that amending the rules to reflect the lower average signal power would:

* * * permit manufacturers to design, and licensees to operate, FM microwave equipment in accordance with the intent of the present rules, and, at the same time, achieve:

(a) A significant increase in channel capacity, and hence more efficient radio spectrum utilization;

(b) Easier interference coordination resulting from increased deviation which reduces susceptibility to interference; and

(c) Improved transmission reliability during fading because of increased signal-to-noise ratio.

(AT&T Petition at pages 9–10). Also, Western Electric, AT&T's manufacturing subsidiary, requested a waiver of the bandwidth rules to permit type acceptance and use of its FM transmitters with additional channel capacity.

3. In the NPRM, we agreed with AT&T's analysis and proposed a modification to our rules that would reflect the lower average signal power revealed by Bell Laboratories' surveys. We also agreed with ASC's concerns regarding the possibility of monopolization of the spectrum by AT&T and the potential for interference between AT&T's terrestrial fixed service and ASC's satellite service. Accordingly, we proposed a revision of § 21.710(c) of the rules that would discourage unnecessary reservation of unused spectrum in the 4 GHz band by existing licensees. The rule revision would require that existing licensees in the 4 GHz band wishing to increase the capacity of their radio systems to more than 1500 channels must: (a) Coordinate frequency utilization with other spectrum users and (b) file under Section 214 of the Act for authorization for the additional telephone channels within 6 months of completion of frequency coordination.

---

[1] RM–3625.

[2] Comments were filed by American Satellite Corporation (ASC), American Telephone and Telegraph Company (AT&T), the Central Committee on Telecommunications of the American Petroleum Institute (API), GTE Service Corporation (GTE), Georgia Power Company (GPC), MCI Telecommunications Corporation (MCI), Offshore Telephone Company (Offshore), Southern Pacific Communications (SPC), and Utilities Telecommunications Council (UTC). Reply Comments were filed by ASC, AT&T, Harris Corporation (Harris), Farinon Division, and MCI.

[3] *See* AT&T Reply Comments, Attachments 1 and 2. It does not appear from these attachments that the 1978 study was ever published. Another Bell Laboratories survey, conducted in 1974–5, reports a similar result, *viz.*, that the signal power in telephone circuits is approximately 5 dB lower than previously assumed. *See* W.C. Ahern, *et al.*, "Speech Signal Power in the Switched Message Network," Bell System Technical Journal, Vol. 57, No. 7, Part 2, September 1978.

[4] "dbm0" refers to the power, in dB, relative to one milliwatt referred to a point of zero relative transmission level. (See *Transmission Systems for Communications*, Bell Telephone Laboratories, Inc., USA, 1971, p. 27–28).

4. *The comments.* MI & SPC, both common carriers, fully concur with the proposals set forth in the NPRM. UTC and API, both Private Operational Fixed System (POFS) users, and GTE, a manufacturer of common carrier equipment, express support for the principles underlying the proposed changes, but note that some POFS operators, governed by Part 94 of the Commission's rules, may typically transmit large amounts of data. UTC, API and GTE argue that since there may be a different mix of voice and data channels in POFS than there is in common carrier systems (with different statistical power distributions), POFS operators should be permitted to use the proposed −19.6 dBm0 level on an optional basis. Offshore and GPC also support the basic concept of permitting flexibility in the use of the −19.6 dBmO level. GPC, in addition, expresses concern about the creation of interference among users who might lease circuits from common carriers.

5. For its part, AT&T supports the proposed changes to Part 2 of the rules, but cautions that any new construction requirements for higher channel capacity equipment following frequency coordination may necessitate a delay of up to 30 months in the submission of Section 214 applications. AT&T therefore proposes to change the six month period of proposed § 21.710(c) to 30 months.

6. ASC, a satellite carrier, filed comments and is the only party that opposes the proposed rules. It expresses concern that: (a) There would be increased interference to satellite circuits operated on adjacent frequencies, (b) in some locations existing satellite communications services would be impaired, and (c) it would be difficult to coordinate new satellite communications services in other areas. ASC urges that we not adopt AT&T's proposed amendments, but that if we do, we must adopt stronger measures to assure that satellite carriers continue to receive reasonable access to the spectrum. It proposes that the Commission's rules be further modified to: (a) Prevent carriers from "hoarding" spectrum in the 4 GHz band, (b) interpret our prior coordination rules (especially § 21.100(d), Frequencies) in a manner that would require existing carriers to accommodate new services, and (c) require existing carriers to provide data on interference susceptibility as a function of frequency offset for the 6 GHz band.

7. AT&T, in its reply comments, indicates that while an average "talker" level of —19.6 dBm0 is appropriate for its systems, it would support additional flexibility in the rules to accommodate the needs expressed by POFS operators, but it urges rejection of ASC's suggestion regarding prior coordination.

8. *Discussion.* Our proposed modification of § 21.710(c) is intended to equalize the opportunities for use of the 4 GHz spectrum that the Commission, in an earlier proceeding, determined should be shared equally.[5] In the NPRM, we stated that:

> We believe that this is a reasonable compromise in that terrestrial carriers will have access to this otherwise unoccupied incremental spectrum only with a showing of a specific need, thereby allowing other uses at all other times." 88 FCC 2d at 140.

We remain convinced that this is the most equitable approach for spectrum sharing. Moreover, as we demonstrate below in our discussions of the applicable Rules this approach provides satellite carriers with equitable access to the spectrum in question.

9. As we indicated in the NPRM, it has been the Commission's policy, commensurate with the intent of the Communications Act of 1934, to encourage efficient use of the radio spectrum. *See* 88 FCC2d at 138. Our proposal to §§ 2.202(f)(1)(ii) and 2.989(f)(2) of the rules, we believe, is consistent with this policy. Moreover, equipment manufacturers and users of POFS agree that we should permit some flexibility in the value of the average "talker" level to accommodate the differences encountered by non-common carrier users of FM microwave radio systems. We agree with this point and will modify our proposals to permit a range of average "talker" values of —15 dBm0 to —19.6 dBm0 for multiplex groups of 240 or more channels.[6] *See* Appendix B, §§ 2.206 and 2.989.

10. We proposed in the NPRM to amend § 21.710(c) of the rules to require those planning to operate 4 GHz systems with more than 1500 voice-equivalent channel capacity to (a) coordinate pursuant to § 21.706(c) of the rules and (b) file for necessary authority pursuant to Section 214 of the Communications Act within 6 months of that coordination. Our intent was to minimize the possibility of interference with other authorized users in the band and to prevent the possibility of effective monopolization of the spectrum by an existing user.

11. AT&T urges that the rule language be changed to distinguish among three situations involving a terrestrial carrier desiring to operate with more than 1500 channel capacity: (a) New radio station construction, (b) adding radio channels to an existing station, and, (c) expanding the capacity of an existing radio channel currently carrying fewer than 1500 circuits. AT&T argues that our proposed language for § 21.710(c) creates inconsistent coordination requirements. It asserts that if an amendment to § 21.710(c) is necessary the elapsed time period allowed before submission of a Section 214 application for situations (b) and (c) should be 18 months and for situation (a), 30 months. These longer periods are sought to permit adequate time for facilities planning and provisioning processes, according to AT&T. In a later discussion we will show that our present rules, with minor modifications, are sufficient to allow equitable use of the 4 GHz spectrum (*See* paragraph 16) without any further elapsed time constraints. Accordingly, we have changed the language of our § 21.710(c) amendment such that we believe AT&T's concerns are eliminated.

12. In its reply comments, ASC argues that our proposed amendment of § 21.710(c) is inadequate , and that AT&T suggestion for additional filing periods would exacerbate matters by permitting terrestrial carriers to extend their monoploy of the spectrum. ASC further argues that terrestrial carriers should be required to file implementation schedules for planned increases in channel capacity. Moreover, it asserts, such carriers should forfeit their right to augment currect capacity if they fail to adhere to their schedules. In order to resolve ASC's concerns, we will show that the present rules, to a large degree, already achieve those objectives.

13. Section 21.100(d)(11) of the current rules of the Commission provides that "If applications have not been filed 6 months after coordination was completed, carriers may assume, unless notified otherwise, that such frequency use is no longer desired". Further, the normal period for construction allowed by our construction permits (CP) is 18 months. *See* § 21.43(b) of the rules. Additional time to complete construction is granted only upon application and an adequate showing. *See* § 21.44 of the rules. Thus, we see, for new and modified radio facilities, our present rules are meant to prevent the kind of monopolization feared by ASC since failure to timely file for construction permit or to complete construction, forfeits the spectrum.

---

[5] *See* American Satellite Corporation, 72 FCC 2d 750, 753–4 (1979).

[6] Multiplexed groups of less than 240 channels also will have a corresponding range of acceptable "talker" levels to avoid an undesirable discontinuity in the transition at 240 channels 86 FCC 2d 134, 136 (1981).

14. Section 214 authorizations, like CP's for radio stations, also contain expiration dates. Section 63.05 of the rules provides that for projects involving an expenditure of more than $500,000, construction shall have begun within 12 months of issuance of the Section 214 authority and the additional channels shall have been placed in operation within 36 months thereof. In situations involving expenditures of less than $500,000, construction shall have begun within 9 months of Section 214 issuance and operation within 18 months thereof. Thus, the Commission has already considered and acted upon the issue of unreasonable delays between issuance of Section 214 authorization and completion of the project.

15. We note, however, that there is also a situation where additional circuit capacity in a station may be created with no new construction. This might be accomplished by adjustment of the existing station equipment. Such adjustments do not generally cause interference to other terrestrial users, so that coordination is not normally required. However, in the case of the 4 GHz band such adjustment could affect authorized satellite services that share the 4 GHz band.

16. Thus, presently, applicants or licensees who intend to construct new or modify existing radio facilities for use in the 4 GHz band are required to either file for CPs or complete construction within a reasonable time period as indicated in paragraph 13. Failure to do so will cause the loss to the applicant of the use of initially assigned spectrum. However, the current rules only apply to those situations where applicants seek the use of a part of or a complete 4 GHz radio channel, and where construction is required to: (a) Build a new station; (b) add radio channels to an existing station; or (c) expand the capacity of an existing radio station channel. The rules do not clearly address the situation described in paragraph 15, where an applicant who wishes to expand an existing station channel beyond 1500 circuits can do so without further radio construction. For that case, we will revise § 21.710(c) of our rules to require applicants to seek prior coordination pursuant to § 21.100(d) and to provide an indication of successful coordination if an authorization for additional channels is sought pursuant to Section 214. *See* Appendix B hereto. By doing so, applicants, as in the case where radio construction is required, must return the spectrum within 6 months if a subsequent Section 214 authorization is not filed as indicated in paragraph 14, or if the additional circuits are not implemented within 12 or 36 months pursuant to the Section 214 authorization.

17. We believe that our existing rules, including our revision of § 21.710(c), now offers sufficient protection against spectrum monopolization. Further, the rules as modified also provide procedures to minimize the possibility of harmful interference in the 4 GHz band. While it may be arguable in some situations to further reduce the period during which spectrum availability is uncertain, we believe the period currently embodied in the rules, as modified, are sufficiently reasonable and equitable for both terrestrial and satellite carriers.

18. ASC expressed a desire for availability of data regarding interference susceptibility of 6 GHz terrestrial microwave systems. AT&T has agreed to provide these data. We expect AT&T to implement its agreement without further regulatory intervention. We therefore consider this issue resolved.

19. Finally, as to Western Electric's request for a waiver of our bandwidth rules so as to permit type acceptance of their equipment, we find that our adoption of the rule changes contained herein effectively moots the necessity for such waiver. Accordingly, we will dismiss Western Electric's waiver request.

20. For the purpose of equipment authorization, changes required to implement the loading according to the new rules in Appendix B hereto shall be considered as Class I Permissive changes and no filing with the Commission will be necessary.

Conclusion

21. Having carefully considered the arguments of all interested parties in this proceeding, the Commission believes that adoption of the proposed rule changes will promote more efficient use of the radio spectrum by both terrestrial and satellite common carriers.

22. The revised formulas are modifications of those existing and can result in a change in the distribution of power within the radio frequency channel, as shown in Appendix C.[7] Our modified formulas will continue to reflect the intent of interference control set down in certain international documents as well as in our existing rules. In particular, such calculations are addressed in Appendix 6 to the Radio Regulations of the International Telecommunications Union, Edition of 1982, and in Report 418–2 contained in

[7] Appendices A and C are filed as a part of the original document.

Volume I of the documents of the International Radio Consultative Committee, XV Plenary Assembly, Geneva, 1982. Modification of Part 2 of the Commission's rules to revise these formulas can put the Commission's rules at variance with the ITU recommendations. As the ITU recommendations were based upon information supplied by the United States, it may be appropriate to propose a change to the ITU Radio Regulations based upon arguments contained in this Report and Order.

23. In accordance with the Regulatory Flexibility Act of 1980, the regulations adopted in this Order have been reviewed for their impact on small entities. It has been determined that the companies in this industry exceed the size standards set forth in Part 121, Schedule A of the Small Business Administration Rules and Regulations. Pursuant to Section 605(b) of the Regulatory Flexibility Act of 1980, a regulatory analysis will not be required as there is no significant impact on a substantial number of small entities.

24. Accordingly, it is ordered, pursuant to the Sections 4(i), 214(c), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 214(c) and 303(r), that Parts 2 and 21 of the Commission's Rules and Regulations are amended as shown in Appendix B hereto, effective May 19, 1983.

25. It is further ordered that Western Electric's request for a waiver of Part 2 of the Commission's Rules and Regulations, 47 CFR Part 2, is dismissed.

26. It is further ordered that this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Note.—Appendices A and C are filed as part of the original document.

Appendix B

Parts 2 and 21 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS GENERAL RULES AND REGULATIONS

1. Section 2.202(f)(1)(ii) is revised as follows:

§ 2.202 Bandwidths.

* * * * *

(f) * * *

(1) * * *

(ii) The value of D is then calculated by multiplying the rms value of the per-channel deviation by the appropriate factors, as follows:

Number of message circuits	Multiplying factors	Limits of X (P_{mp} (dBm0))
More than 3, but less than 12	* * *	
At least 12, but less than 60	$\frac{3.76 \text{ antilog } (X + 2 \log_{10} N_c)}{20}$	X: −2 to +2.6.
At least 60, but less than 240	$\frac{3.76 \text{ antilog } (X + 4 \log_{10} N_c)}{20}$	X: −5.6 to −1.0.
240 or more	$\frac{3.76 \text{ antilog } (X + 10 \log_{10} N_c)}{20}$	X: −19.6 to −15.0.

Where X represents the average power in a message circuit in dBm0; N_c is the number of circuits in the multiplexed message load; 3.76 corresponds to a peak load factor of 11.5 dB.

* * * * *

§ 2.202 [Amended]

2. Section 2.202(g), Table of necessary bandwidth, subheading II Frequency Modulation, is revised by removing the first three entries starting with the words "Composite transmission: F9" and inserting the following three entries in their place as follows:

* * * * *

(g) *Table of necessary bandwidths.*

* * *

II FREQUENCY MODULATION

Description and class of emission	Necessary bandwidth in hertz	Examples	
		Details	Designation of emission
* * *	* * *	* * *	* * *
Composite transmission: F9	$B_n = 2P + 2DK$ K=1	Microwaver radio relay system specifications: 60 telephone channels occupying baseband between 60 and 300 kHz; rms per-channel deviation 200 kHz; continuity pilot at 331 kHz produces 100 kHz rms deviation of main carrier. Computation of B_n:D=(200×10³×3.76×1.19) Hz=0.895×10⁶; P=0.331×10⁶ Hz. Bandwidth: 2.452×10⁶ Hz	2450F9
Composite transmission: F9	$B_n = 2M + 2DK$ K=1	Microwave radio relay system specifications: 1200 telephone channels occupying baseband between 60 and 5564 kHz; rms per-channel deviation 200 kHz; continuity pilot at 6199 kHz produces 140 kHz rms deviation of main carrier. Computation of B_n:D=(200×10³×3.76×3.63)=2.73×10⁶; M=5.564×10⁶× Hz; P=6.2×10⁶ Hz; (2M+2DK)>2P. Bandwidth: 16.59×10⁶	16,600F9
Composite transmission: F9	$B_n = 2P$	Microwave radio relay system specifications: 600 telephone channels occupying baseband between 60 and 2540 kHz; continuity pilot at 8500 kHz produces 140 kHz rms deviation of main carrier. Computation of B_n:D=(200×10³×3.76×2.565)=1.93×10⁶ Hz; M=2.54×10⁶ Hz; K=1; P=8.5×10⁶; (2M+2DK)<2P. Bandwidth: 17×10⁶ Hz	17,000F9

3. Section 2.989 is amended by revising paragraph (f)(2) to read as follows:

§ 2.989 Measurement required: Occupied bandwidth.

* * * * *

(f) * * *

(2) Modulation reference level being established, the total rms deviation of the transmitter is measured when a test signal consisting of a band of random noise extending from below 20 kHz to the highest frequency in the baseband, is applied to the modulator input through any preemphasis networks used in normal service. The average power level of the test signal shall exceed the modulation reference level by the number of decibels determined using the appropriate formula in the following table:

Number of message circuits that modulate the transmitter	Number of dB by which the average power (P_{av}) level test signal shall reference level	Limits of P_{av} (dBm0)
	* * *	
More than 3, but less than 12	$X+2 \log_{10} N_c$	X: −2 to +2.6
At lease 12, but less than 60	$X+4 \log_{10} N_c$	X: −5.6 to −1.0
At least 60, but less than 240	$X+10 \log_{10} N_c$	X: −19.6 to −15.0
240 or more		

Where X represents the average power in a message circuit in dBm0; N_c is the number of circuits in the multiplexed message load P_{av} shall be selected by the transmitter manufacturer and included with the technical data submitted with the application for type acceptance. (See § 2.202(e) in this Chapter).

* * * * * * *

PART 21—DOMESTIC PUBLIC FIXED RADIO SERVICES (OTHER THAN MARITIME MOBILE)

§ 21.710 [Amended]

Section 21.710(c) is amended to add the following new sentence to the end of the paragraph:

* * * * *

(c) * * * For the 3700–4200 MHz band, all persons intending to utilize baseband frequencies above 7.3 MHz, or to operate with more than 1500 equivalent 4 kHz voice channels per radio channel, must submit evidence of coordination pursuant to § 21.100(d). Where no construction of radio facilities is requested, licensees must submit this evidence with their filing of any necessary authority required pursuant to Section 214 of the Communications Act and Part 63 of this Chapter.

BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1201

[Docket No. 36848]

Elimination of Supplement 4 to Valuation Order No. 3—List of Units for Use of Carriers in the Preparation of Completion Reports

AGENCY: Interstate Commerce Commission.

ACTION: Final rule; elimination of basis for reporting.

SUMMARY: ICC is eliminating Revised Supplement No. 4 to Valuation Order No. 3, Second Revised Issue—List of Units for Use of Carriers in the Preparation of Completion Reports and the Record of Property Changes. This Order became effective January 1, 1933. In previous years this information was used in ratemaking decisions. However, the Commission now relies upon Annual Report Form R–1 for all data on net investment in railway operating property. Therefore, the Commission believes the recordkeeping required in Revised Supplement No. 4 is extraneous and should be eliminated. No changes to the uniform system of accounts are contemplated by this proceeding, nor does Revised Supplement No. 4 currently appear in the Code of Federal Regulations.

DATES: The effective date of this elimination is January 1, 1982.

FOR FURTHER INFORMATION CONTACT: Charles S. Thomason, (202) 275–7448.

SUPPLEMENTARY INFORMATION:

Background

On October 29, 1982, the Commission served a notice of proposed rulemaking entitled Elimination of Supplement 4 to Valuation Order No. 3—List of Units for Use of Carriers in the Preparation of Completion Reports (47 FR 49480, November 1, 1982).[1] Revised Supplement No. 4 to Valuation Order No. 3, Second Revised Issue (RS4), became effective January 1, 1933. This Order cancelled Supplement No. 4 to Valuation Order No. 3, Second Revised Issue. It established a list of property units which affected carriers were to keep records of, including changes made to that property. Valuation Order No. 3, Second Revised Issue, prescribed the instructions to govern the recording and reporting of all extensions and improvements or other changes in physical property for every common carrier subject to the Interstate Commerce Act. In order to establish a uniform manner of reporting and recording this information, carries were required to record changes in property subsequent to December 31, 1932, in accordance with the list of property units specified in Revised Supplement No. 4 to Valuation Order No. 3, Second Revised Issue.

Until 1964, the information required in RS4 was used in ratemaking decisions. However, since then the Commission has used information from Annual Report Form R–1 to determine the book value of net investment in railway property. This data is also used for the Uniform Rail Costing System. In Ex Parte No. 393, *Standards for Railroad Revenue Adequacy*, (364 ICC 803 (1981)) only the dollar amounts for the variuos property accounts are needed. Instructions for Property Accounts (2–1 through 2–20), in Part 1201, contain all necessary instructions for the proper accounting of investment in carrier property. Thus, the Commission feels that the detail required in RS4 is extraneous and should be eliminated.

The Commission stated in Docket No. 36988, *Alternative Methods of Accounting for Railroad Track Structures*, served February 17, 1983 (48 FR 7180, February 18, 1983), that rail track structure shall be accounted for under the Depreciation method rather than the Retirement-Replacement-Betterment method. Instruction 2–19, List of Units of Property, and other instructions for property accounts have been revised.

Review of Responses

The Commission received two responses to the notice of proposed rulemaking. The Association of American Railroads (AAR) agrees with our proposal.

The Western Coal Traffic League (WCTL) is concerned that precision in costing may be lost by eliminating the units of property prescribed by Supplement 4 to Valuation Order No. 3. It is primarily concerned that our

[1] Note: This document was submitted for publication in the Notices Section of the **Federal Register**.

proposal may permit the elimination of property records which the Commission will need in future ratemaking proceedings.

Discussions and Conclusions

The extent of this rulemaking is not to eliminate the need for a uniform series of units of property but rather to eliminate duplicative requirements. Instruction 2-19 of the Uniform System of Accounts (49 CFR Part 1201) specifies a list of units of property which will be required in place of the list required by RS4. No changes are contemplated in the records required to be kept by railroad companies or in the requirements for maintenance of valuation sections as specified by Part 1262 of the Code of Federal Regulations. References to Supplement 4 to Valuation Order No. 3 were removed in the revision of Part 1262 at 45 FR 81051, December 9, 1980.

Regulatory Flexibility Act

This final rule will not have a significant economic impact on a substantial number of small entities. This final rule does not impose new accounting or reporting requirements, rather it eliminates an existing burden on railroads. This rule will only affect the reporting procedures of a small number of railroads and the economic impact, though beneficial, will not be significant.

List of Subjects in 49 CFR Part 1201

Railroads, Uniform System of Accounts.

This decision does not significantly affect the quality of the human environment or the conservation of energy resources.

This rule is issued under the authority of 49 U.S.C. 10781 and 5 U.S.C. 553.

Decided: March 23, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, and Gradison. Commissioner Andre was absent and did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 23

Export of Bobcats Taken in 1982-83 Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final findings and rule.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) regulates international trade in certain animal and plant species. Exports of animals and plants listed in Appendix II of CITES may only occur if a Scientific Authority (SA) has advised a permit-issuing Management Authority (MA) that such exports will not be detrimental to the survival of the species, and if a Management Authority is satisfied that the animals or plants were not obtained in violation of laws for their protection.

This notice announces final findings by the Scientific and Management Authorities of the United States on the export of bobcats. These are final determinations on the export of specimens taken in the 1982-83 harvest season. Such findings are made annually on a state-by-state basis. These findings and guidelines are to be effective on April 25, 1983—less than 30 days from the date of publication. The Fish and Wildlife Service has determined that good cause exists for making this rule effective on April 25 and has explained the reasons supporting such determination in the Supplementary Information section of this rule.

DATE: These findings are effective on April 25, 1983.

ADDRESS: Please send correspondence concerning this notice to the Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240. Materials received will be available for public inspection from 7:45 a.m. to 4:15 p.m., Monday through Friday, at the Office of the Scientific Authority, room 537, 1717 H Street, NW., Washington, D.C., or at the Federal Wildlife Permit Office, room 621, 1000 N. Glebe Road, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT:

Scientific Authority Finding—Dr. Richard M. Mitchell, Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (202) 653-5948.

Management Authority Finding—Mr. S. Ronald Singer, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (703) 235-2418.

Export Permits—Ms. Maggie Tieger, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (703) 235-1903.

SUPPLEMENTARY INFORMATION: This is the last of four notices concerning the Service's findings on export of bobcats (*Lynx rufus*) taken in the 1982-83 harvest season.

In the first notice for the 1982-83 season (47 FR 14664; April 5, 1982), the Service invited comments on proposed guidelines and information on the bobcat and certain other Appendix II species. These guidelines were based on a ruling by the U.S. Court of Appeals for the District of Columbia Circuit that bobcat exports should not be permitted under CITES unless the SA findings were based on "reliable estimates of the bobcat population and data showing the total number of bobcats to be killed, in each of the states involved." (Defenders of Wildlife, Inc., vs. Endangered Species Scientific Authority, No. 79-2512, D.C. Cir., February 3, 1981). The Service's second notice (47 FR 34457; August 20, 1982) announced the guidelines being used to develop SA advice on bobcat export and described the proposed state-by-state findings on export of bobcats taken in the 1982-83 season under the judicially-defined, pre-1982 Amendment standards. The third notice announced supplementary proposed findings by Scientific and Management Authorities of the United States on the export of bobcats. These findings incorporated the 1982 Amendments to Section 8A of the Endangered Species Act, which establish standards for findings by the SA on export of animal species included in CITES Appendix II. CITES regulates international trade in species included in Appendix II through a system of permits issued by designated Management Authorities in each Party nation. Export permits are to be issued only if a Management Authority receives advice from a Scientific Authority that the export will not be detrimental to the survival of the species.

The Endangered Species Act of 1973, as amended in 1979, designates the Secretary of the Interior as both Management Authority and Scientific Authority of the United States, for purposes of CITES. These functions are carried out by the Fish and Wildlife Service. Management Authority responsibilities are delegated to the Associate Director—Federal Assistance. Scientific Authority responsibilities are delegated to the Associate Director—Research.

Criteria for Scientific Authority advice were elaborated upon in the February 23, 1983, **Federal Register** notice (48 FR 7604). At the same time, the Service requested comments on these proposed findings and information on the species involved.

A. Comments and Information Received

The Service received comments from 13 State wildlife agencies (Arizona, Colorado, Georgia, Idaho, Kansas, Louisiana, Maine, Missouri, New Mexico, Pennsylvania, Tennessee, Texas and Washington) and 6 non-governmental organizations (Covington and Burling on behalf of Defenders of Wildlife, Inc., and the Humane Society of the United States; Georgia Trappers Association; International Association of Fish and Wildlife Agencies; Law Offices of Kiefer and Morrison; the American Fur Resources Institute; and The Wildlife Legislative Fund of America).

1. States' Comments

The State comments were generally the same: (1) That the Secretary of the Interior "[. . . is not required to make, nor may he require any State to make, estimates of population size in making such determinations or giving such advice"; (2) that target harvest levels should be a matter of State choice and not a federal requirement; (3) that setting target harvest levels not to exceed 20 percent of the estimated pre-harvest population is too restrictive and does not represent sound and accepted wildlife management practices; and (4) that the proposed requirement of a possession tag for the 1983–84 taking season will only add another layer of regulations to the tagging process and do little for enforcement purposes.

The States contend that the interpretation of target harvest levels by the Scientific Authority involves the use of pre-harvest population estimates, which they believe was overruled by Congress in the 1982 Amendments.

2. Non-governmental Organizations' Comments

The law firm of Covington and Burling submitted comments on behalf of both Defenders of Wildlife, Inc., and the Humane Society of the United States. In summary, their comments are: (1) The proposed standards for application of the Scientific Authority guidelines contain fundamental legal and factual errors; (2) The Service has failed to take into consideration the effects of past harvest on the bobcat species; (3) The Service has impermissibly reversed the burden of proof regarding export of bobcats; (4) The Service makes use of past harvest data to derive population estimates; (5) the Scientific Authority's use of available population estimates is generally acceptable, with some exceptions; (6) The Scientific Authority should have adopted a lower ratio of allowable kill to population in setting its harvest levels; and (7) The Management Authority requirements are seriously flawed.

The Georgia Trappers Association challenged the accuracy and necessity of population estimates, with particular emphasis on pre-harvest population estimates. They contend that after Congress passed the Endangered Species Act Amendments of 1982, "reliable population estimates" were eliminated as a requirement for export. They also object to the Management authority findings on tagging requirements, especially the proposed rule for the 1983–84 season where a possession tag must be applied to the skin at the time of take.

The International Association of Fish and Wildlife Agencies (IAFWA) submitted extensive comments on the proposed guidelines for export of bobcats taken during the 1982–83 season. They feel that revisions to the proposal guidelines should be made in order to respect basic principles of wildlife management and to carry out the intent of Congress as expressed in the Endangered Species Act Amendments of 1982, Pub. L. No. 97–304. A summary of their comments is: (1) The proposal should be revised to eliminate the requirement that non-detriment findings are made on the basis of target harvest levels which are not to exceed a fixed percentage of each State's estimated population; (2) Because the proposal bases non-detriment findings under CITES on harvest, which is targeted not to exceed 20 percent of each State's estimated population, it necessarily requires that a population estimate be made for each State; (3) The proposal shifts the focus of decision making with regards to bobcat management from the States to the federal government; (4) The Service's proposal contravenes principles of sound wildlife management, and (5) The methodology adopted in the proposed guidelines . . . setting harvest objectives as a fixed percentage of total population—excludes a variety of other techniques which are applied successfully to the management of bobcats.

The Law Offices of Kiefer and Morrison, representing the American Fur Industry, stated that the proposed action does have a significant economic impact on a substantial number of fur manufacturers and fur brokers.

The American Fur Resources Institute (AFRI) offered the following comments: (1) Because of the Amendments passed by Congress to the Endangered Species Act, population estimates cannot be required as a condition for export; (2) The AFRI does not believe that under the 1982 Amendment to the Act, that the Secretary *may require* the establishment of target harvest levels; and (3) that they oppose the proposed management authority export criterion of a possession tag for the 1983–84 harvest.

The Wildlife Legislative Fund of America commented on the utilization of target harvest levels for decision-making for export of bobcats and the use of a target harvest level in terms of a percentage of a pre-harvest population estimate. They propose that the achievement of the target harvest objective be substituted for the target harvest level as the guideline for SA monitoring of State management programs.

In the following, the Service would like to address all the pertinent comments received.

(1) *Comments on Scientific Authority Guidelines.* The Endangered Species Act Amendment of 1982, Pub. L. No. 97–304, specifically overruled the decision of the United States Court of Appeals for the District of Columbia Circuit in *Defender of Wildlife, Inc. v. Endangered Species Scientific Authority*, 627 F. 2d 1238 (D.C. Cir. 1980), which had imposed two requirements on the Scientific Authority for issuing export findings for bobcats under CITES: (1) That each State be required to submit reliable population estimates for bobcats, and (2) that information on maximum level of kill (quotas) be submitted by the States to the Scientific Authority. By overruling this decision, Congress intended that the Scientific Authority be allowed to make export findings under CITES on the basis of the best available biological information derived from professionally-accepted wildlife management practices and that in no case would the States be required to submit population estimates of the bobcat population within their territories. On the other hand, the Scientific Authority was expressly directed by Congrees to consider population estimates along with all other scientific data in making export findings if such population estimates were available. S. Rep. No. 418, 97th Cong., 2d Sess. 22 (1982).

The committee reports to the 1982 Amendments provided for the Scientific Authority, in its discretion, to require the establishment of target harvest levels as a part of the process used in making export findings. E.G., S. Rep. No. 418, *supra*, at 23.

The reports did not specify whether those levels were to be set by the Service or the States. However, the Service has determined that harvest level objectives should be determined

annually by the States. This information has been requested since 1977 and the States have determined their own harvest level objectives based upon their mangement programs for the species.

Nevertheless, Congress did not intend that the concept of target harvest levels be used to revive the requirement of "quotas" that had been imposed by the Circuit Court opinion. Therefore, the Service interprets the concept of "target harvest levels" to be a discretionary, diagnostic tool that is available to the Scientific Authority when needed to alert States of possible problems with their management programs that might lead to a finding of "detriment" for the following season's export findings. Further, the Service believes that the Scientific Authority should consider target harvest levels supplied by the States and need not suggest Federal levels in those instances where the States have shown through the data submitted by them that their management programs for regulating bobcat take are operating effectively and clearly fit within the "no detriment" requirements needed for export approval under CITES. It must be noted that in no instance should the target harvest level established by a State be treated as a Federal quota. If a target harvest level set by a State is exceeded in an amount that the Scientific Authority believes to be detrimental to the survival of the species, export approval should be denied for the *following* season for that State unless it takes steps that can reasonably be expected to reduce the harvest to a level acceptable to the Scientific Authority in the following season. In no event would a target harvest level operate to cut-off Federal export approval while a State's bobcat season is in progress.

In order to ensure that expert was not deterimental to the survival of the species the Scientific Authority evaluated target harvest levels for 1982–83 using variations in habitat and long-term recruitment figures from State to State.

The Scientific Authority has taken into consideration all data submitted and has been flexible to a degree if States were able to supply information on recruitment and survival rates to justify a higher target harvest level.

Defenders and the Humane Society suggest setting lower target harvest levels. They provided no data to substantiate their figures nor did they give reasons for setting lower limits. The final findings for export of bobcats in the 1982–83 season do not differ significantly from the reproposed findings in the February 23, 1983 Federal Register notice.

Although the Scientific Authority "no detriment" findings are properly based on data supplied by State wildlife agencies possessing primary management authority for bobcats, it is important to recognize the independent authority of the Scientific Authority to make these findings on the basis of its own separate review of the data in light of CITES requirements. To this end, the best available biological information has been analyzed in the context of professionally accepted wildlife management practices for bobcats, as required by statute and as determined by the Secretary of the Interior.

(2) *Proposed requirement of possession tags for the 1983–84 harvest season.* The Service does not require possession tags in order to meet MA requirements for the 1982–83 export season. The Service solicited comments on the proposed requirement of possession tags for the 1983–84 season and will announce its decision on the issue in the near future when the SA and MA publish their notice of intent for export of bobcats taken during the 1983–84 season.

Scientific Authority Advice

In determining if export of bobcats will not be detrimental to the survival of the species, the Service adopted guidelines that were developed by a working group of wildlife biologists (January 23–24, 1978). The 1982 Amendments to the Act were also incorporated into these guidelines with provision for population estimates to be considered, when available, along with other biological information in making export findings. The 1982 Amendments also allow the Secretary to require, at his discretion, the establishment of target harvest levels.

These guidelines are listed below, with the additional provisions for consideration of population estimates and target harvest levels in making non-detriment findings for export of bobcats:

A. Minimum Requirements for Biological Information

(1) Information on the condition of the population, including trends (the method of determination to be a matter of state choice), and population estimates where such information is available.

(2) Information on total harvest of the species.

(3) Information on distribution of harvest.

(4) Habitat evaluation.

B. Minimum Requirements for a Management Program

(1) There should be a controlled harvest, methods and seasons to be a matter of state choice.

(2) All pelts should be registered and marked.

(3) Harvest level objective should be determined annually by the States.

The types of specific information on bobcat populations considered by the Service in applying these guidelines included (a) current estimate (if such information is available) of the total number of animals in the preharvest population derived by extrapolating the number of animals per unit area in each of the major habitat types to obtain an estimate of the total number of animals in the state, where the number of animals per unit area is determined by direct count (e.g., by using radio tracking) or by indirect indications of abundance (e.g., track counts, scented track plots, hunter/trapper surveys, and/or harvest records), or by using population modeling (e.g., calculation population size from data on recruitment, mortality, sex ratio, age composition, or other parameters), (b) a description of any research being conducted to assess the distribution, abundance, or general condition of the species in the State, summarizing results so far obtained, including results of any analyses of age structure or reproductive parameters, and (c) an assessment of long-term population trends of the species in the State, and the relationship of these trends to habitat condition, management practices, harvesting pressure, or other factors.

The change in the Act does not require the states to submit reliable population estimates in order to export bobcats taken on or after January 1, 1981. However, if these data were provided by the States or by other sources, they were considered by the Service in making "non-detriment" findings. The Service, therefore, considered all pertinent information, including indices of population size, and information on age and sex structure, habitat, and harvest in evaluating the condition of bobcat populations; if population estimates were available, they were considered together with the above data in making SA findings, the Service conducted an independent assessment of the effect that harvest for export is expected to have on the survival of bobcat populations. It made decisions on the basis of the best available biological information of the types described above.

The types of specific information on harvest considered by the Service included (a) The number of animals (by county or game management unit, if data are available at these local levels) that were (i) harvested, (ii) tagged, and (iii) bought by dealers operating in the state during the previous season; (b) that total number of animals that were harvested and tagged in the season before that; (c) the number of licensed trappers in the state, and the number of these trappers setting from the species in question, (d) any available information on harvest per unit effort, and (e) prices paid to harvesters for pelts of the species, including the average price and the range of extremes. The Service used this information to assess harvest pressure on the species, which is important in making export findings.

The Service evaluated the harvest level objectives set by the state in relation to information on the condition of the bobcat population. If the best available biological information indicated that the harvest allowed by a state is causing or contributing to a serious decline in the condition of the bobcat population, then the Service did not issue SA advice in favor of export for that state.

Under the 1982 Amendments to the Act, the Secretary may require the establishment of target harvest levels and tagging procedures to ensure that the export of bobcats will not be detrimental to the survival of the species. Accordingly, the SA has determined that target harvest levels are required for tihe 1982–83 export season.

The Service finds that current information on population condition, management, and harvest submitted by certain states, as well as that collected by the Service, fully support its final SA findings. The Service has summarized this information in documents that detail the basis for SA advice for each state. Due to their length, details of these documents are not published in the **Federal Register**, but are available for public inspection at the Office of the Scientific Authority (address given above).

Management Authority Findings

Exports of Appendix II species are to be allowed under CITES only if the MA is satisfied that the specimens were not obtained in contravention of laws for the protection of wildlife or plants. The Service, therefore, must be satisfied that bobcat pelts or products were not obtained in violation of state or Federal law, in order to allow export. Evidence of legal taking for bobcat is provided by state tagging systems. For the 1982–83 season, the Service is requiring the use of locking plastic strip tags with embossed legends. The Service has arranged for the manufacturing of such tags for the majority of the states. Other states already use similar tags. Several states were permitted to use state purchased, nonconforming tags for the current season because of tags on hand, or mistakes in their tag orders.

The states receiving export approval for the 1982–83 season had to satisfy the following criteria, which do not differ from those proposed earlier for this season's harvest:

(1) Each skin must be marked with a tag that is:

(a) Made of some permanent material in the style recommended by the Service;

(b) Applied within a specific time of taking that is established by the state; and

(c) Permanently attached to each skin by the state, state registered dealer, or taker. (Dealer and taker must be accountable for all tags received).

(2) The tags must show state or origin, year of take, species, and be serially unique.

(3) Report of take and tagging must be required by state law.

(4) A sample of each tag must be received by the Service.

The Service approves exports of bobcats harvested during the 1982–83 season in the following states and Indian Nations on the grounds that both SA and MA guidelines are met: Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Idaho, Kansas, Klamath Tribe, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Navajo Nation, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

The Service has denied general approval for export of bobcats harvested in North Dakota. The Service presently lacks information that its SA guidelines are met in this state.

For all other states not addressed above, either the taking of bobcats is not allowed by the state, bobcats do not occur in the state, or the Service did not obtain adequate information on which to base SA and MA findings. The Service did not intend to grant general approval for export of bobcats from such states.

These findings and rule are issued under authority of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.; 87 Stat. 884 as amended), and were prepared by Dr. Richard M. Mitchell, Office of the Scientific Authority.

Note.—The Department has determined that these final findings are not a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act and, therefore, the preparation of an Environmental Impact Statement is not required. The Department has determined that this is not a major rule under Executive Order 12291 and does not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601). This rule treats exports on a state-by-state basis and, in most cases, approves export in accordance with state management programs. Since any effects on small entities are imposed by these state management programs, this rule will have little effect on small entities in and of itself.

The Department has further determined that good cause exists for making these findings and guidelines effective on April 25, 1983, 5 U.S.C. Sec. 553(d). This final notice represents the last administrative step in authorizing the export of bobcat pelts taken in the 1982–83 season. This action has been delayed for many months due to the injunction against bobcat export that remained in force as late as December 23, 1982. The SA has evaluated all available data in carefully making these final findings effective as soon as possible to avoid further economic injury to individual trappers, dealers, or other small entities that are directly affected by these findings. Because further delays in making these findings effective would probably cause loss of sale and/or injury to those small entities at the auctions to be held at the end of April, good cause exists to take this action, and the Department has exercised its discretion to relieve the export restriction at an earlier date in light of the "no detriment" findings noted herein. It must be noted that by shortening the timing of the effective date no adverse effects of any kind will result to bobcat populations. As of March 31, 1983, the bobcat season for 1982–83 had ended throughout the United States. Therefore, no animals in the wild are impacted; only those bobcats killed during the 1982–83 season are affected by this notice. Therefore, further takings are not stimulated by this action. The Department considers this action to fall within the emergency exception of Executive Order 12291 for the reasons noted above.

Endangered and threatened wildlife, Exports, Fish, Imports, Plants (agriculture), Treaties.

PART 23—[AMENDED]

Accordingly, the Service proposes to amend Part 23 of Title 50, Code of Federal Regulations, as set forth below:

VOL
48
ISS
75
AP
—
18
1983
UMI

Subpart F—Export of Certain Species

In § 23.52, add new paragraph (g) as follows:

§ 23.52 Bobcat (Lynx rufus).

* * * * *

(g) 1982–83 Harvest: Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Idaho, Kansas, Klamath Tribe, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Navajo Nation, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

Condition on export: Each pelt must be clearly identified as to state of origin and season of taking by a permanently attached state tag of a type approved and attached under conditions established by the Service.

Dated: April 13, 1983.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

Proposed Rules

Federal Register
Vol. 48, No. 75
Monday, April 18, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

1 CFR Ch. III

Exceptions Processes; Meeting

AGENCY: Administrative Conference of the United States; Committee on Regulations.

ACTION: Committee meeting.

SUMMARY:

Agenda: The Committee will consider comments received on a proposed recommendation on the subject of "administrative exceptions processes." (Reference: 48 FR 14910.) This topic includes agency procedures involved in the granting of waivers, exemptions, variances, or other individualized exceptions to rules of general applicability. The Committee may take a final vote on this proposal.

DATE: April 27, 1983, at 1:30 p.m.

ADDRESS: 2120 L Street, NW., Washington, D.C., Lower Level Hearing Room No. 1.

FOR FURTHER INFORMATION CONTACT: William C. Bush, Administrative Conference of the United States, 2120 L Street NW., Suite 500, Washington, D.C. 20037. Telephone: (202) 254–7065.

SUPPLEMENTARY INFORMATION:

Public Participation: Attendance at the Committee's meeting is open to the public, but limited to the space available. Persons wishing to attend should notify the contact person at least two days in advance of the meeting. The Committee chairman may permit members of the public to present appropriate oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during, or after the meeting. Minutes of the meeting will be available on request to the contact person. This meeting is subject to the Federal Advisory Committee Act (Pub. L. 92–463).

Subjects:

1. Administrative practice and procedure
2. Exceptions

Richard K Berg,
General Counsel.
April 11, 1983.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 20

[Docket No. PRM–20–13]

Victor E. Anderson; Withdrawal of Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Withdrawal of petition for rulemaking (PRM–20–13) that was filed by Victor E. Anderson.

SUMMARY: The Nuclear Regulatory Commission is withdrawing, at the petitioner's request, a petition for rulemaking (PRM–20–13) that was filed by Victor E. Anderson. The petitioner, in his January 17, 1979 letter, requested that the Commission amend 10 CFR Part 20 to require that health physics personnel be certified by the Commission.

ADDRESSES: A copy of the NRC's letter confirming the withdrawal of the petition is available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, DC. A copy of the NRC's letter confirming the withdrawal of the petition may be obtained by writing to the Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: John Philips, Chief, Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301–492–7086 or Toll Free: 800–368–5642.

SUPPLEMENTARY INFORMATION: In a **Federal Register** notice published on February 28, 1979 (44 FR 11284), the Commission announced the receipt of and requested comments on a petition for rulemaking (PRM–20–13) filed by Victor E. Anderson. The comment period was subsequently extended for an additional 30 days on May 2, 1979 (44 FR 25716). The petition, which was dated January 17, 1979, requested that the Commission amend 10 CFR Part 20 to require that health physics personnel be certified by the Commission. The petitioner's proposed amendment of § 20.600 provided for the certification of health physicists on five levels. It also provided for the certification, validation, and revocation of certificates. By letter dated March 8, 1983, the NRC has confirmed that the petitioner stated his intention to withdraw his petition during a March 4, 1983 telephone conversation with a member of the NRC's staff. This withdrawal was based on the fact that several developments in radiation protection during the past few years were likely to achieve the objectives of the petition. The developments included the publication of draft NUREG–0761, revision 4 of Regulatory Guide 8.8, publication of the RSO Qualifications guide, the NRC Health Physics Appraisal program, and the INPO/Industry effort in dose reduction.

Dated at Bethesda, Md., this 6th day of April 1983.

For the Nuclear Regulatory Commission.

William J. Dircks,
Executive Director for Operations.

BILLING CODE 7590–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

Proposed Advisory Circular; Active Flight Controls; Reopening of Comment Period

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Reopening of comment period.

SUMMARY: This notice reopens the comment period for proposed Advisory Circular (AC) 25–XX (48 FR 7464; February 22, 1983), which sets forth an acceptable means of compliance with the provisions of Part 25 of the Federal Aviation Regulations (FAR) pertaining to the certification requirements of active flight controls. This notice is based on requests from industry for additional time to study the AC and prepare comments.

DATE: Comments must be received on or before May 18, 1983.

ADDRESS: Send all comments on the proposed AC to: Federal Aviation Administration, Northwest Mountain Region, ANM–110, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. Comments may be inspected at the above address weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Iven Connally, Regulations and Policy Office, at the above address, telephone (206) 764–7053.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the draft AC may be obtained by contacting the person named above under "**FOR FURTHER INFORMATION CONTACT.**" Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they may desire. Communications should identify AC 25–XX and be submitted to the address specified above. All communications received on or before the closing date for comments, including those received in response to the first notice, will be considered by the regulations and Policy Office before issuing the final AC.

Background

Stability augmentation systems (SAS) have been successfully used on transport airplanes for several years. The earlier SAS were limited in authority to assure acceptable handling qualities with the system malfunctioning or inoperative. Although the SAS provided some alleviation of flight loads, no credit was given since the SAS effectiveness in relieving loads was not assessed against system reliability.

In recent years, significant developments in active controls technology have advanced the state-of-the-art of active flight control systems in both effectiveness and reliability to the point some alleviation from flight loads can be achieved. Flutter suppression systems (FSS) may also be installed in conjunction with the load alleviation system (LAS) to provide flutter margins.

The procedures set forth in the proposed AC were developed jointly by the FAA and the aerospace industry (Aerospace Industries Association of America (AIA)) for use in certification of active controls. Adherence to these criteria will provide a level of safety in airplanes equipped with these systems consistent with the level of safety found in airplanes without them.

On February 22, 1983, the FAA issued a notice of availability of proposed AC 25–XX (48 FR 7464). Some of the comments received in response to the notice included a request for additional time in which to study the AC and to coordinate and prepare comments.

Additionally, the FAA has amended the introductory paragraph of the AC to more accurately reflect the regulatory basis upon which the AC is predicated. This change does not affect the technical content of the AC.

Individuals who requested a copy of the AC when the notice of availability was originally published need not submit another request as copies of the amended AC will be provided to those individuals by the Regulations and Policy Office.

Reopening of Comment Period

In consideration of some of the comments received in response to AC 25–XX, and due to the fact that the introductory paragraph of the AC has been amended, the FAA concludes that it is in the public interest to reopen the comment period. This will allow an additional opportunity for individuals to adequately review the AC and to furnish comments. Accordingly, the comment period for AC 25–XX, Active Flight Controls, is reopened.

Issued in Seattle , Washington, on April 6, 1983.

Leroy A. Keith,

Manager, Aircraft Certification Division, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 83–NM–18–AD]

Airworthiness Directives; British Aerospace Aircraft Group Model H.S. 748 Series 1, 2, and 2A Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an airworthiness directive (AD) that would require inspection of fasteners on the wing lower surface on certain British Aerospace Model H.S. 748 airplanes. In several cases incorrect fasteners were inadvertently installed when the wing was manufactured. These incorrect fasteners reduce the structural capability of the wing.

DATES: Send comments in duplicate to FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. Comments must be received no later than June 7, 1983.

ADDRESSES: The applicable service information and copies may be obtained from British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C. 20041, or may also be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM–150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2530.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in duplicate to the address specified below. All communications received on or before the closing data for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 83–NM–18–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion: The United Kingdom Civil Aviation Authority has classified British Aerospace Aircraft Group H.S. 748 Service Bulletins 57/62 and 57/63 as mandatory. The following conditions are described in these bulletins:

1. Incorrect fasteners at the rib/stringer attachment brackets have been found on a number of wing assemblies of series 2 and 2A airplanes on the wing bottom surface at rib 224.366 and at stringers 4 and 6 at all ribs on each side of wing access panels W3 to W12 except W10. Some of the fasteners have been identified as $\frac{3}{16}$-inch diameter rivets; the correct item should be a $\frac{3}{16}$-inch diameter huckbolt. In addition, other incorrect fasteners at the other locations have been identified as rivets; the correct items should be $\frac{3}{16}$-inch diameter huckbolts.

2. Incorrect fasteners at the rib/stringer attachment bracket on the wing lower surface at rib 16.071 and stringers 9, 10, 11, and 12 on series 1, 2, and 2A airplanes have been found on a number of wing assemblies. One of the fasteners at each of the above rib/stringer brackets has been identified as a ⅛-inch diameter rivet. The correct item should be a 5/16-inch diameter rivet.

The service bulletins prescribe replacement of the incorrect fasteners.

Since these conditions are likely to exist on airplanes of this model registered in the United States, the FAA has determined that an AD is necessary which would require replacement of the incorrect fasteners.

It is estimated that five U.S. registered airplanes would be affected by this AD, that it would take approximately 64 manhours per airplane to accomplish the required actions, and that the average labor cost would be $35 per manhour. Repair parts are supplied by the manufacturer at no cost to user. Based on these figures, the total cost impact of this AD to U.S. users is estimated to be $11,200. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

British Aerospace Aircraft Group

Applies to Model H.S. 748 airplanes certified in all categories. To prevent wing structural failure accomplish the following, unless already accomplished:

1. (For series 2 and 2A airplanes with wing fuel tanks extending outboard beyond rib 350.366) Within the next 1,500 hours or six months time in service, whichever occurs first after the effective date of this AD, inspect the rib/stringer bracket fasteners of the wing bottom surface at rib 224.366 and at stringers 4 and 6 at all ribs on each side of wing access panels W3 to W12 except W10, and perform the actions described in paragaph 2, Accomplishment Instructions, of British Aerospace Aircraft Group H.S. 748 Service Bulletin 57/62 dated June 1980.

2. (For series 1, 2 and 2A airplanes) Within the next 500 hours of 60 days time in service, whichever occurs first after the effective date of this AD, inspect the rib/stringer bracket fasteners of wing bottom surface rib 16.071 and stringers numbered 9, 10, 11, and 12 and perform the actions described in paragraph 2, Accomplishment Instructions, of British Aerospace Aircraft Group H.S. 748 Service Bulletin 57/63 dated June 1980.

3. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

4. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85).

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington on April 8, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 83-10164 Filed 4-15-83; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-NM-31-AD]

Airworthiness Directives; Lockheed Model L-1011 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend an existing Airworthiness Directive (AD) applicable to Lockheed Model L-1011 Series Airplanes which requires initial and repetitive leak tests and visual inspections of fuel line couplings, fittings, and hydraulic servos located in the afterbody compartment. The AD was issued to detect the accumulation of flammable fluids and/or vapors in the vicinity of the APU exhaust shroud, an area which does not have fire extinguishing nor fire detection systems. Since the issuance of this AD, Lockheed has released a modification for the APU exhaust shroud which reduces the skin temperature to a safe level and eliminates the need for repetitive inspections. This amendment, is adopted, would require accomplishment of the modification.

DATES: Comments must be received no later than June 7, 1983.

Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules, Docket 83-NM-31-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from: Lockheed-California Company, P.O. Box 551, Burbank, California 91520, Attention: Commercial Support Contracts, Dept. 63-11, U-33, B-1. This information also may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Stephen Kolb, Aerospace Engineer, Propulsion Branch, ANM-140L, Federal Aviation Administration, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808, telephone (213) 548-2835.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 83-NM-31-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion: Airworthiness Directive 82-03-04, Amendment 39-4310, was published in the **Federal Register** February 4, 1982 (47 FR 5197), applicable to all Lockheed Model L-1011 Series Airplanes, requiring initial and repetitive leak test and visual inspections of fuel line couplings and fittings and the hydraulic servos located in the afterbody compartment.

After issuing Amendment 39-4310, the FAA approved a modification to the APU exhaust duct and shroud contained in Part II of the Accomplishment Instructions of Lockheed L-1011 Service Bulletin 093-49-058, Revision 3, dated October 28, 1982. This modification consists of the installation of insulation blankets over the APU exhaust duct and exhaust shroud. Tests have confirmed that the modified shroud surface temperatures are reduced to acceptable levels; therefore, repetitive tests and inspections will not be required after the modification has been installed.

The possibility still exists for fuel leaks to occur between the inspections called for by the present AD, which if directed toward the APU exhaust shroud, represent a potential fire hazard in an area that does not have fire walls or fire detection systems. For this reason, the proposed AD is considered to be necessary.

The estimated costs associated with the proposed AD are as follows: Kit costs: $2,000 per airplane × 111 airplanes = $222,000. Installation cost 12.3 manhours per airplane × $35 per manhour × 111 airplanes = $47,486. The total cost is estimated to be $269,786. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by amending AD 82-03-04, Amendment 39-4310 (47 FR 5197; February 4, 1982), as follows:

Revise the first paragraph to read as follows:

Lockheed-California Company: Applies to Lockheed Model L-1011 Series Airplanes, prior to Serial No. 1239, certificated in all categories. Compliance required as indicated, unless previously accomplished.

Revise paragraphs A, B, and C by changing the word "Chief" to "Manager" and by deletion of the word "Area."

Reidentify paragraph B. as paragraph A.3.

Add new paragraph B. to read as follows:

B. Within 5000 flight hours or two (2) calendar years after the effective date of this amendment, whichever occurs first, install APU Exhaust Duct and Shroud Insulation as specified in Part II, Accomplishment Instructions of Lockheed L-1011 Service Bulletin 093-49-058, Revision 3, dated October 28, 1982, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region. This action terminates the requirement for repetitive inspections as required in paragraph A., above.

Delete the first paragraph after paragraph D. and revise the second to read as follows:

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to: Lockheed-California Company, P.O. Box 551, Burbank, California 91520, Attention: Commercial Support Contracts, Dept. 83-11, U-33, B-1. These documents also may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 4344 Donald Douglas Drive, Long Beach, California.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Section 6(c) of the Department of Transportation Act (49 U.S.C 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble: the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Wash., on April 8, 1983

Wayne J. Barlow,

Acting Director, Northwest Mountain Region

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

15 CFR Part 400

[Docket No. 21222-257]

Foreign-Trade Zones in the United States; Additional Information and Time Extension for Comments

AGENCY: Foreign-Trade Zones Board, Commerce.

ACTION: Proposed rule; Extension of comment period.

SUMMARY: A proposed revision of the Foreign-Trade Zones Board's regulations (15 CFR Part 400) was published in the **Federal Register** on February 18, 1983 (48 FR 7188-7200), with corrections published on February 28, 1983 (48 FR 8291).

This notice contains a revision to one section of the proposal, and extends the period for comments to May 31, 1983.

The original period for comments was to close on April 19, 1983. As a result of a number of requests for an extension, and the further changes to proposed § 400.303, the period for public comment is extended to May 31, 1983.

DATE: Comments must be received by May 31, 1983.

ADDRESS: Comments (original and 6 copies) are to be addressed to the: Executive Secretary, Foreign-Trade Zones Board, International Trade Administration, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue NW., Room 1872, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: John J. Da Ponte, Jr., Executive Secretary, Foreign-Trade Zones Board, 202/377-2862.

SUPPLEMENTARY INFORMATION:

PART 400—[AMENDED]

After publication of the proposed changes, a further change to § 400.303, concerning eligible locations for subzones, was received from the Customs Service.

Section 400.303 is proposed to be revised and is published below so that interested parties can comment.

§ 400.303 Location in relation to ports of entry.

Zones and subzones may be located only in or adjacent to ports of entry. The definition of "adjacent" is a location within 35 statute miles of a Customs port of entry. For the purposes of this section, a Customs station designated by Customs Regulations is considered a port of entry if it is staffed by at least one full-time Customs officer at the time the application is filed. Because of the special nature of subzones, a more distant location may be considered "adjacent" if the subzone operator agrees to deliver the merchandise and its associated Customs documentation to the adjacent port designated by Customs for inspection before admission to, and upon removal from, the subzone, and gives bond as required by the U.S. Customs Service to guarantee safe delivery and compliance with U.S. laws and regulations.

Dated: April 13, 1983.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 4

Proposed Customs Regulations Amendment Relating to Filing of Coastwise Cargo Declaration

AGENCY: Customs Service, Treasury.

ACTION: Proposed rule.

SUMMARY: Generally, the coastwise trade involves the transportation by vessel of merchandise or passengers between points in the United States embraced within the coastwise laws. These points include ports and places in the United States, its territorial waters, and nearly all of the territories and possessions of the United States. By statute, any vessel, properly registered under the laws of the United States, may engage in trade between ports in the United States with the privilege of touching at one or more foreign ports during the the voyage.

The Customs regulations provide that a certified coastwise Cargo Declaration must be used to identify the merchandise to be transported from the port of lading in the United States via the foreign port or ports to the subsequent ports in the United States. Under current procedures, this cargo declaration must be presented to Customs for certification and returned to the master of the vessel *before* the vessel can depart from the United States port of lading. Because this has on occasion unnecessarily prevented a vessel from departing timely, this document proposes to amend the regulations by providing an alternative procedure so that a vessel operator may present the required coastwise cargo declaration for certification *after* the vessel's departure from the United States port of lading.

DATE: Comments must be received on or before June 17, 1983.

ADDRESS: Written comments (preferably in triplicate) may be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Donald H. Reusch, Carriers, Drawback and Bonds Division (202-566-5706); U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

Generally, the coastwise trade involves the transportation by vessel of merchandise or passengers between points in the United States embraced within the coastwise laws. These points include ports and places in the United States, its territorial waters, and nearly all of the territories and possessions of the United States.

In accordance with section 293 of title 19, United States Code (19 U.S.C. 293), any vessel, on being duly registered in pursuance of the laws of the United States, may engage in trade between ports in the United States with the privilege of touching at one or more foreign ports during a voyage. At a foreign port, the vessel may discharge or take on merchandise, passengers and their baggage, letters and mail.

Section 293 further provides that all such vessels (in coastwise trade via foreign ports) shall be furnished by the appropriate Customs officers of the ports at which they shall take in their cargoes in the United States, with certified manifests, setting forth the particulars of the cargoes such as the marks and numbers of the packages, the names of the shippers and consignees, and the destinations.

Section 4.82, Customs Regulations (19 CFR 4.82), sets forth the applicable procedures relating to vessels touching at a foreign port while in the coastwise trade. Section 4.82(a), provides that Cargo Declaration, Customs Form 1302 or 1302-A, must be used to identify only cargo for a foreign destination. Section 4.82(b) provides that a certified coastwise Cargo Declaration must be used to identify the merchandise to be transported from the port of lading in the United States via the foreign port or ports to the subsequent ports in the United States. In accordance with § 4.82(c), upon arrival from the foreign port or ports at the subsequent port in the United States, the master of the vessel is required to present the Cargo Declaration and the certified copies of the coastwise Cargo Declaration, Customs Form 1302, to Customs. Section 4.82(d) provides that all merchandise on the vessel upon its arrival at the subsequent port in the United States is subject to such Customs examination and treatment as may be necessary to protect the revenue. Any article on board which is not identified to the satisfaction of the district director by the coastwise Cargo Declaration as part of the coastwise cargo shall be treated as imported merchandise.

The coastwise cargo declaration is essential because it is used by Customs at the subsequent port of destination in the United States to identify domestic cargo on the vessel which is not imported and, therefore, not subject to entry for Customs purposes.

Based on 19 U.S.C. 293, § 4.82(b) provides that at the port of lading in the United States, the master is required to present to the district director for certification the coastwise Cargo Declaration and the district director shall return two certified copies to the master. As a result of the requirement that the certified copies be returned to the master, the vessel can not depart until a manifest is prepared, presented to Customs for certification, and returned certified to the master. Customs is aware of occasions when a vessel is loaded and ready to depart on a coastwise voyage via foreign ports before the manifest is completed and presented to Customs for certification. Holding the vessel in port pending completion, presentation, certification, and return of the manifest to the master is extremely costly and burdensome to the vessel operator.

Additionally, § 4.82(b) may place one vessel operator at a competitive disadvantage with another. For example, a vessel may transport coastwise merchandise from New York to Puerto Rico (covered by the coastwise laws) via Jamaica and the Dominican Republic. Before leaving New York, the procedure set forth in § 4.82(b) must be followed. The master must present to Customs in New York for certification a coastwise manifest of cargo to be unladed in Puerto Rico. The certified coastwise manifest must be returned to the vessel before it can depart New York. Because the coastwise manifest must be completed to be certified and returned before the vessel departs, lading operations must necessarily be terminated several hours before the time of the vessel's departure to do the necessary paperwork. However, in the situation where a competing vessel operator provides service directly from New York to Puerto Rico, the vessel can accept shipments until the last minute before departure because, as Puerto Rico is within the coastwise laws, manifests are not required.

This situation is unsatisfactory for vessel operators and Customs. Accordingly, this document proposes to amend § 4.82(b) by providing an alternative procedure which would permit the vessel to depart the port of

lading in the United States *before* presentation of the coastwise Cargo Declaration to Customs for certification. The operator of the vessel could present the coastwise Cargo Declaration to the district director for certification and return to the operator after the vessel's departure. The vessel operator at the port of lading could use the mail, telecopy, or other electronic data transmission to forward the manifest to the subsequent United States port of destination in advance of the arrival of the vessel. The responsibility for the timely presentation of the certified manifest upon the vessel's arrival at the subsequent port in the United States would be exclusively with the master. Failure to present the manifest timely would result in the merchandise being treated as imported pursuant to § 4.82(d).

The master of a vessel, which is also transporting foreign merchandise during the coastwise voyage, is still required to obtain from the district director a certified copy of the complete inward foreign manifest (traveling manifest) before the vessel departs from the first United States port of arrival.

Authority

This amendment is proposed under the authority of R.S. 251, as amended (19 U.S.C. 66), R.S. 3126 (19 U.S.C. 293), R.S. 3127 (19 U.S.C. 294), section 624, 46 Stat. 759 (19 U.S.C. 1624).

Comments

Before adopting this proposal, consideration will be given to any written comments timely submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.11(b), Customs Regulations (19 CFR 103.11(b)), during regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

E.O. 12291

The proposed amendment does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Regulatory Flexibility Act

Pursuant to the provisions of section 3 of the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601 *et seq.*), it is hereby certified that the proposed regulation set forth in this document will not have a significant economic impact on a substantial number of small entities. There is no indication that a substantial number of small entities, if any, will be affected by the proposal. Accordingly, this regulation is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Drafting Information

The principal author of this document was Charles D. Ressin, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Part 4

Customs duties and inspection, Imports, Cargo vessels.

Proposed Amendments

It is proposed to revise § 4.82(b), Customs Regulations (19 CFR 4.82(b)), by designating the present paragraph as paragraph (b)(1) and by adding a new paragraph (b)(2) to read as follows:

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

§ 4.82 Touching at foreign port while in coastwise trade.

* * * * *

(b)(1) * * *

(2) As an alternative to the procedure described in paragraph (b)(1) of this section, upon approval by the district director of a vessel operator's written request, the vessel operator may present the coastwise Cargo Declaration to the district director for certification and return to the operator after the vessel has departed. The master shall be responsible for the timely presentation to the district director of the coastwise Cargo Declaration when the vessel arrives at the subsequent port in the United States.

William von Raab,

Commissioner of Customs.

David Q. Bates,

Acting Assistant Secretary of the Treasury.

[LR-274-81]

Accounting for Long-Term Contract

Correction

In FR Doc. 83–6524 beginning on page 10702 in the issue of Monday, March 14, 1983, make the following corrections:

1. In § 1.451–3(a)(6), in the last two lines of the middle column of page 10705, "method § 1.451–3(a)(6) described" should have read "method described".

2. In § 1.451.3(b)(1)(ii), in the third column of page 10705, the line reading "§ 1.451.3(B)(1)(ii)" which appears above the paragraph designated "(2) *Completion*" should be removed.

3. In § 1.451.3(b)(3)(iii)(C)(*3*), in the third column of page 10708, the last two lines of paragraph (*e*) now reading "An option to acquire shall be considered as an option to acquire such an interest" should have read "An option to acquire an option, and each one of a series of such options shall be considered as an option to acquire such an interest."

4. In § 1.451–3(b)(3)(v)(B), on page 10709, eleven lines from the bottom of the third column, the line reading "subassemblies, or (*2*) any other subject" should have read "subassemblies are first incurred after the".

5. In § 1.451–3(d)(1), on page 10710, six lines from the top of the first column, "in paragraph (d)(2)" should have read "in paragraph (b)(2)". Also, a line of five asterisks should have appeared after the paragraph to indicate that (d)(2) through (d)(4) were not changed.

6. On page 10718, middle column, § 1.471–11(c)(1), twenty-one lines from the bottom of the column, the line reading "paragraph (d)(6) of § 1.451–3 rather than" should be removed and the words "paragraph. For contracts entered into" should be inserted.

Family Contribution Schedule for the Guaranteed Student Loan Program for 1984–85; Correction

AGENCY: Department of Education

ACTION: Notice of proposed rulemaking; Corrections.

SUMMARY: This document makes technical corrections in the Notice of Proposed Rulemaking for the Family Contribution Schedule for the Guaranteed Student Loan Program for 1984–85 (48 FR 14344, April 1, 1983).

FOR FURTHER INFORMATION CONTACT: Mr. Larry Oxendine, Policy Section, Guaranteed Student Loan Branch, Division of Policy and Program Development, Office of Student Financial Assistance, 400 Maryland Avenue, SW., (Room 4310, ROB–3)

Washington, D.C., telephone: (202) 245–2475.

SUPPLEMENTARY INFORMATION: On April 1, 1983, the Secretary published a notice of proposed rulemaking for this program in the **Federal Register** at 48 FR 14344–14346. This document corrects several errors that were made in those regulations.

On page 14344, third column, the sentence beginning on line 9 is revised to read as follows:

"The Secretary also proposes to modify the standard used to measure family resources under the tables in this schedule to include untaxed income such as nontaxable investment income, welfare benefits, and child support payments."

On page 14345, third column, the sentence beginning on line 9 is revised to read as follows:

"The Secretary expects to issue regulations regarding the verification of information provided by the student and the student's family."

On page 14345, third column, the sentence beginning on line 38 is revised to read as follows:

"The Secretary considers the present dependent/independent classification inadequate to address the different financial needs of students of different ages, marital status, years of independent living, and numbers of dependents, and will propose redefining 'independent student' to reflect those varying equities."

(Catalog of Federal Domestic Assistance Number 84.032, Guaranteed Student Loan Program)

Dated: April 13, 1983.

Daniel Oliver,

General Counsel.

BILLING CODE 4000–01–M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 219

National Forest System Land and Resource Management Planning

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Department of Agriculture is proposing to revise 36 CFR 219.17, wilderness designation. The rule would direct reevaluation through forest planning of those National Forest System roadless and undeveloped areas recommended in 1979 for wilderness designation or designated for management for nonwilderness uses. The proposed rule would apply only to those roadless areas which have not been addressed by Congress. The action is necessary to respond to a recent court ruling that the environmental statement on which the 1979 roadless area decisions were based did not adequately meet National Environmental Policy Act requirements. The intent of the proposed action is to minimize future legal challenges and disruption of National Forest planning and management activities.

DATE: Comments must be received on or before June 17, 1983.

ADDRESS: Comments or questions on the proposed rule may be addressed to: R. Max Peterson, Chief (1920), Forest Service, USDA, P.O. Box 2417, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Charles R. Hartgraves, Director, Land Management Planning Staff, (202) 447–6697.

SUPPLEMENTARY INFORMATION: In January 1979 the Forest Service issued a national environmental statement documenting the results of a review of 62 million acres of roadless and undeveloped areas within the National Forest System (RARE II). On the basis of the environmental statement, the Department of Agriculture announced decisions to recommend that Congress designate 15.1 million acres as wilderness, to continue to study an additional 10.8 million acres, and to manage the remaining 36 million acres for multiple uses other than wilderness. Consistent with those decisions, the regulations governing National Forest Land and Resource Management Planning specify, at 36 CFR 219.17, that the 36 million acres are to be managed for nonwilderness uses and that no such area will be considered for wilderness designation until a forest plan is revised.

In 1979, the State of California filed a lawsuit challenging the adequacy of the RARE II Environmental Impact Statement as the basis for deciding to manage 47 roadless areas in California for uses other than wilderness. In October 1982, the U.S. Court of Appeals for the Ninth Circuit ruled that the RARE II Environmental Impact Statement did not adequately meet the requirements of the National Environmental Policy Act (NEPA) with regard to evaluation of environmental consequences of the actions proposed for these areas. *California, et. al. v. Block, et. al.*, Nos. 80–4101, 80–4111, 80–4112, 80–4115, 80–4216 (Ninth Circuit, October 22, 1982). The Ninth Circuit ruling leaves the regulation at 36 CFR 219.17 vulnerable to future court challenge unless it is changed to direct further NEPA evaluation of these areas.

The recommendations that Congress designate other National Forest System roadless areas as wilderness also were left vulnerable to future court challenge by the Ninth Circuit ruling. These decisions relied on the same evaluation that was found inadequate under NEPA by the court. The court's decision also left unanswered the question of whether administrative decisions to recommend individual roadless areas for wilderness designation or to manage them for uses besides wilderness may be made outside the forest planning process required by the National Forest Management Act and described in 36 CFR Part 219.

For these reasons, the proposed rule would remove the prohibition against further consideration for potential wilderness designation of roadless areas made available to nonwilderness uses as a result of RARE II. In order to minimize future risk of court challenge, it would direct that all roadless areas reviewed in RARE II or existing unit and forest plans are subject to evaluation for their wilderness designation potential in current and future forest planning cycles. This direction would apply if the roadless area remains essentially roadless and undeveloped, and if it has not been designated wilderness or released for nonwilderness uses by an Act of Congress. The proposed rule is so written that this direction is subject to existing and future legislation by Congress. For example, in regard to National Forest roadless areas in Alaska, Colorado, Indiana, Missouri, New Mexico, and West Virginia, Congress has acted affirmatively to ratify the legal adequacy of the RARE II Environmental Impact Statement and study process and to prohibit further review of roadless areas for wilderness designation potential in each State except as provided in the legislation.

The proposed change recognizes that considerable evaluation of roadless areas has already been completed in RARE II and existing plans. It provides that the appropriate scope and detail of evaluation in the forest planning process for each area will be determined with the help of public participation. This approach is consistent with the current regulations implementing NEPA, 40 CFR Parts 1500–1507, and the existing forest planning process described in 36 CFR 219.

It should not be necessary for forest staffs who are already far along in preparation of a forest plan to formally repeat planning process steps already completed. It should be sufficient to

initiate a public meeting or other public participation activity to determine the appropriate scope and detail of evaluation necessary for each roadless area subject to further evaluation on a forest. Additional consideration of alternative uses for these areas, examination of environmental consequences, and other planning analyses may then be integrated into existing planning documents. Those draft forest plans which have been published and accompanying draft environmental impact statement documents may be amended and supplemented accordingly (see 40 CFR 1502.9). All evaluations would include consideration of the items currently listed in 36 CFR 219.17(b)(2), as well as address the concerns described in the *California v. Block* decision. Additional evaluation would fully utilize existing information and analysis available for roadless areas from RARE II and other sources, but would not be bound by past recommendations for or against wilderness designation for these areas. Under the proposed rule, information, analysis, and public participation, in addition to that available from RARE II and other sources would be developed for each area that is subject to evaluation to minimize the risk that any future legal challenges based on *California* v. *Block* will occur.

Prior to the *California v. Block* decision, a tremendous amount of planning, scheduling, and implementation of management activities proceeded based on the RARE II decision, and these activities have not been challenged. The court order invalidates the RARE II process only as applied to the 47 California areas involved in the lawsuit. Therefore, for other roadless areas, the Forest Service does not anticipate proposing changes in either RARE II wilderness recommendations or management of areas for nonwilderness uses on individual National Forests until completion of the forest plan. If the forest planning process results in a change in actual or recommended management of a roadless area, the change would be implemented in the same manner as for roadless areas already designated for further planning by RARE II or by legislation. In other words, any such changes will not be implemented without adequate notice to Congress and the public.

Finding of No Significant Environmental Impact

This proposed rule change is not a major Federal action significantly affecting the quality of the human environment and, therefore, does not require the preparation of an environmental impact statement. The change is procedural only and directs further evaluation of environmental consequences of proposed actions as part of the land and resource management planning process. The regulation change, therefore, has no potential for significant effect on the physical and biological components of the human environment.

Regulatory Impact

The Assistant Secretary for Natural Resources and Environment has determined that the proposed rule is considered "nonmajor," as defined in Executive Order 12291. Therefore, a regulatory impact analysis is not required for this rulemaking. The proposed rule requires the Forest Service to further study roadless areas as part of a legally required planning process. Increases in costs of planning to the Forest Service are necessary to avoid even greater costs to the government from further delay and other disruption of planning and management activities due to legal challenges. The proposed rule, therefore, would not cause a major increase in costs or prices to consumers, individual industries, Federal, State, or local government agencies, or geographic regions. It would not have an annual effect on the economy of $100 million or more, or have significant adverse effect on competitive employment, investment, productivity, innovation, or ability of United States based enterprises to compete with foreign based enterprises.

Small Entity Impact

The Assistant Secretary for Natural Resources and Environment has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities. The proposed rule imposes no direct or indirect costs on small entities. It requires no paperwork or recordkeeping requirement as defined in the Paperwork Reduction Act of 1980; it does not affect the competitive position of small entities in relation to large entities; it does not affect the ability of a small entity to stay in the market, and it does not require that small entities obtain professional assistance to meet regulatory requirements.

List of Subjects in 36 CFR Part 219

Environmental impact statements, National Forests.

PART 219—[AMENDED]

Therefore, for the reasons set forth in the preamble, Part 219-*Planning*, Subpart A, *National Forest System Land and Resource Management Planning*, Title 36 of the Code of Federal Regulations is proposed to be amended as follows:

Section 219.17 is amended by changing the title, "Wilderness Designation" to "Evaluation of Roadless Areas"; by removing paragraph (a); by renumbering paragraph (b) as (a); and by revising the introductory text of redesignated paragraphs (a) and (a)(1), and by revising paragraphs (a)(1)(i), and (a)(2) to read as follows:

§ 219.17 Evaluation of roadless areas.

(a) Unless otherwise provided by law, roadless areas of public lands within or adjacent to the forest shall be evaluated and considered for recommendation as potential wilderness areas during the forest planning process, as provided in paragraph (a)(1) and (a)(2) of this section.

(1) During analysis of the management situation, the following areas shall be subject to evaluation:

(i) Roadless areas previously inventoried in the second roadless area review and evaluation (RARE II), in a unit plan, or in a forest plan, which remain essentially roadless and undeveloped, and which have not yet been designated as wilderness or for nonwilderness uses by law.

* * * * *

(2) For each area subject to evaluation under paragraph (a)(1) of this section, the evaluation, and the determination of the appropriate detail and scope of evaluation, shall be developed with public participation. As a minimum, the evaluation shall include consideration of:

* * * * *

Douglas W. MacCleery,

Deputy Assistant Secretary for Natural Resources and Environment.

March 30, 1983.

[FR Doc. 83-10124 Filed 4-15-83; 8:45 am]

BILLING CODE 3410-11-M

VETERANS ADMINISTRATION

38 CFR Part 21

Veterans Education; Report of State Approving Agency Activities

AGENCY: Veterans Administration.

ACTION: Proposed regulation.

SUMMARY: This proposed regulation is designed to reduce the amount of information the VA (Veterans Administration) is collecting from State approving agencies, and to make the collection of this information less

frequent. This proposal will reduce the reporting burden on State approving agencies.

DATE: Comments must be received on or before May 16, 1983. It is proposed to make this regulation effective the date of final approval.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW, Washington, D.C. 20420.

All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays) until May 25, 1983. Anyone visiting Central Office in Washington, D.C. for the purpose of inspecting any of these comments will be received by the Central Office Veterans Services Unit in room 132. Visitors to VA field stations will be informed that the records are available for inspection only in Central Office and will be furnished the address and room number.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, Washington, D.C. 20420 (202–389–2092).

SUPPLEMENTARY INFORMATION: The VA has determined through its administrative experience that it does not need to receive State approving agency reports as frequently as it has been. The agency has also determined that it does not need to receive reports of State approving agency activities separated on the basis of whether the school has previously had courses approved.

Furthermore, in order to comply with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the VA is no longer requiring State approving agencies to report their activities from the beginning of the fiscal year to the date of the report. The VA is giving State approving agencies a choice of the way in which they will report the number of schools and establishments with approved courses in their jurisdictions.

Accordingly, 38 CFR 21.4154 is amended to change the frequency of State approving agency reports from monthly to quarterly and to eliminate some of the information to be reported.

The VA has determined that this proposed regulation contains no major rules as that term is defined by Executive Order 12291, Federal Regulation. The annual effect on the economy will be less than $100 million. It will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans' Affairs hereby certifies that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), this proposed regulation, therefore, is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because this regulation affects only State governments. State governments do not come within the term "small governmental jurisdiction" as defined in section 601(5) of the RFA. The regulation will have no significant impact on small entities, i.e. small businesses, small, private and nonprofit organizations, and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance numbers for the programs affected by this proposed regulation are 64.111, 64.117 and 64.120.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs—education, Loan programs—education, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: March 29, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

It is proposed to amend 38 CFR Part 21 by revising § 21.4154 to read as follows:

§ 21.4154 Report of activities.

(a) *State approving agencies must report their activities.* Each State approving agency entering into a contract or agreement under § 21.4153 must submit a quarterly report of its activities to the Veterans Administration.

(38 U.S.C. 1774)

(b) *Content of the report.* The report shall be in the form prescribed by the Administrator. It shall detail the activities of the State approving agency under the agreement or contract during the preceding quarter. The State approving agency may also detail its activities from the beginning of the fiscal year through the end of that quarter. Each report shall describe the services performed and the determinations made in supervising and ascertaining the qualifications of educational institutions in connection with the programs of the Veterans Administration. The content of the report shall include as a minimum:

(1) Either a report of—

(i) The number of active schools and establishments with approved courses in the jurisdiction of the State approving agency, or

(ii) The changes since the previous report in the number of active schools and establishments with approved courses in the jurisdiction of the State approving agency;

(2) The actions taken by the State approving agency on applications for approval of new courses and course revisions;

(3) The number of inspection visits to schools for course approvals or course revisions and the number of supervisory visits to schools made by the State approving agency;

(4) The actions taken by the State approving agency with respect to schools and establishments which have deficiencies; and

(5) The number of man-months used by the State approving agency pursuant to the contract.

(38 U.S.C. 1774)

BILLING CODE 8320–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A–5–FRL–2349–1]

Approval and Promulgation of Implementation, Ohio

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of the public comment period.

SUMMARY: On February 18, 1983, the U.S. Environmental Protection Agency (EPA) proposed rulemaking on a revision in the form of individual variance permits for two coal-fired boilers and three PVC resin storage silos at the B. F. Goodrich Chemical Plant located in Avon Lake (Lorain County), Ohio (48 FR 7211). The State requested that EPA approve an alternate strategy "bubble" which would involve trading emission reductions between the boilers and the silos.

At the time of proposed rulemaking a 30 day comment period was provided. However, in response to a request from

the Natural Resources Defense Council (NRDC) for additional time to comment, the public comment period is extended to April 20, 1983.

On February 3, 1983, EPA proposed rulemaking on a revision to the ozone and carbon monoxide (CO) State Implementation Plan (SIP) for Cincinnati, Ohio to demonstrate attainment of the National Ambient Air Quality Standards (NAAQS) by December 31, 1987. (48 FR 5118).

At the time of proposed rulemaking, a 30 day comment period was provided. However in response to a request by the Tri-State Air Committee, Inc. on March 15, 1983, for additional time to comment, the comment period is extended to April 20, 1983.

DATE: Comments for both notices must be received on or before April 20, 1983.

ADDRESS: Comments should be submitted to: Gary V. Gulezian, Chief, Regulatory Analysis Section (5 AP-26), Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Anne E. Tenner, (312) 886-6036.

Dated: April 5, 1983.

Valdas V. Adamkus,

Regional Administrator.

40 CFR Part 228

[WH-FRL-2347-6]

Ocean Dumping; Notice of Public Hearing on 106-Mile Ocean Dump Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public hearing.

SUMMARY: EPA today announces a public hearing to be held in Rehoboth Beach, Delaware, on May 10, 1983, to receive public comment on the proposed designation of the 106-Mile Ocean Dump Site as an EPA approved ocean dumping site.

DATE: The public hearing will be held on May 10, 1983..

ADDRESSES: Send comments or statements to: Mr. T. A. Wastler, Chief, Marine Protection Branch (WH-585), EPA, Washington, DC 20460.

The hearing will be held in the Rehoboth Beach Convention and Civic Center, 73 Rehoboth Avenue, Rehoboth Beach, Delaware.

FOR FURTHER INFORMATION CONTACT: Mr. T. A. Wastler, 202/755-0356.

SUPPLEMENTARY INFORMATION: On December 20, 1982, EPA published in the **Federal Register** a proposed rule to designate the 106-Mile Ocean Dump Site as an EPA approved ocean dumping site. 47 FR 56663, December 20, 1982. The comment period on this proposed rule expired on February 18, 1983. As a result of public comments and requests for a public hearing on the proposed designation of this site, EPA plans to hold a public hearing to receive additional public comment. This hearing will be held on May 10, 1983, in the Rehoboth Beach Convention and Civic Center, 73 Rehoboth Avenue, Rehoboth Beach, Delaware. There will be a morning session from 10 a.m. to 12 noon. If all those wishing to make statements cannot be accommodated during the morning session, an afternoon session will be held starting at 2 p.m. An evening session is scheduled to begin at 7 p.m.

It is emphasized that the purpose of this hearing is solely to collect information concerning the possible designation of the 106-mile Ocean Dump Site for the receipt of certain industrial wastes and sewage sludges. This hearing is not concerned with the relocation of sludge dumping, with individual permit actions, or with the development of alternatives by any present or future permittees. Separate hearings are held by EPA Region II on such permit actions.

All interested parties are invited to be represent or to be presented to express their views on the proposed designation of this site. For reasons of accuracy, however, we request that statements be submitted in writing. Oral statements should summarize any extensive written material and in general should be limited to ten minutes so that there will be time for all interested parties to be heard. If persons desire to participate in this hearing but are not able to attend, they are encouraged to send their comments or statements to the address given above on or before the date of the hearing, for inclusion in the record. In order to assist EPA in scheduling presentations, it would be appreciated if those who wish to make statements would write to Mr. Wastler at the address given above or call Ms. Ramsey at the number given above.

Dated: April 7, 1983.

Frederic A. Eidsness, Jr.,

Assistant Administrator for Water.

40 CFR Part 421

[OW-FRL-2346-8]

Nonferrous Metals Manufacturing Point Source Category; Effluent Limitations Guidelines, Pretreatment Standards, and New Source Performance Standards; Correction

AGENCY: Environmental Protection Agency.

ACTION: Correction of proposed rule; extension of comment period.

SUMMARY: This document corrects the proposed limitations and standards for the nonferrous metals manufacturing point source category that appeared in the **Federal Register** on Thursday, February 17, 1983, (48 FR 7032). Some of the corrections are due to typographical errors. In other cases, EPA inadvertently published limitations and standards not based on the regulatory control options and flows which were selected by the Administrator. The Agency is extending the comment period for this proposal to ensure that interested persons have sufficient time to review and comment on the proposed rule as corrected by this notice.

DATES: Comments on this proposal must be submitted by May 27, 1983.

ADDRESSES: Send comments to: Mr. James R. Berlow, Effluent Guidelines Division (WH-552), U.S. Environmental Protection Agency, 401 M Street S.W., Washington, D.C. 20460, Attention: Nonferrous Metals Manufacturing Comments. Technical information and copies of technical documents may be obtained from Mr. James R. Berlow, Effluent Guidelines Division, U.S. Environmental Protection Agency, 401 M Street S.W., Washington, D.C. 20460 or call (202) 382-7126. The economic analysis may be obtained from Mr. John Kukulka, Economic Analysis Staff (WH-586), U.S. Environmental Protection

Agency, 401 M Street S.W., Washington, D.C. 20460, or call (202) 382–5388.

FOR FURTHER INFORMATION CONTACT: Mr. Ernst P. Hall (202) 382–7126 or Mr. James R. Berlow (202) 382–7126, Effluent Guidelines Division (WH–552), U.S. environmental Protection Agency, 401 M Street S.W., Washington, D.C. 20460.

SUPPLEMENTARY INFORMATION: These proposed regulations are supported by three major documents available from EPA. Analytical methods are discussed in *Sampling and Analysis Procedures for Screening of Industrial Effluents for Priority Pollutants.* EPA's technical conclusions are detailed in the *General Development Document for Effluent Limitations Guidelines and Standards for the Nonferrous Metals Point Source Category* and the subcategory supplements. The Agency's economic analysis is found in *Economic Impact Analysis of Effluent Limitations Guidelines and Standards for the Nonferrous Metals Manufacturing Point Source Category.*

Organization of This Notice

I. Introduction
II. Summary of Corrections
III. Extension of Comment Period

I. Introduction

On February 17, 1983, EPA published proposed effluent limitations guidelines and standards for the nonferrous metals manufacturing point source category, 48 FR 7032. This notice of proposed rulemaking contained a number of errors. All of these errors are identified below. Some of the corrections are due to typographical errors. In other cases, EPA inadvertently published limitations and standards not based on the regulatory control options and flows which were selected by the Administrator. Accordingly, we are correcting these limitations and standards. The changes made today are corrections only to the numerical limitations and standards; the flow and technology bases are identical to those discussed in the preamble to the proposed regulation and in the technical development document entitled *Development Document for Effluent Limitations Guidelines and Standards for the Nonferrous Metals Manufacturing Point Source Category* and the subcategory supplements.

II. Summary of Corrections

The BPT effluent limitations for the primary aluminum subcategory which appear at § 421.22(b) in the **Federal Register** on Thursday, February 17, 1983, on page 7083 are incorrect due to an error made by the Agency. The units for the effluent limitations which read "mg/kg of product" and "lbs/million lbs of product" are corrected to read "kg/kkg of product" and "lbs/thousand lbs of product", respectively.

The BAT effluent limitations for the primary aluminum subcategory which appear at § 421.23 in the **Federal Register** on Thursday, February 17, 1983, on page 7083 are incorrect due to an error made by the Agency. EPA use incorrect treatable concentrations for antimony and fluoride when computing BAT effluent limitations. The technology basis is identical to that discussed at 48 FR 7056 and in Volume II, page 148, of the development document.

There is a typographical error which appears at § 421.24 (a) and (b) in the **Federal Register** on Thursday, February 17, 1983, on pages 7084 and 7085. The value reported for benzo(a)pyrene for the maximum monthly average reads 0 mg/kkg and is corrected to read "————".

The new source performance standards for the primary aluminum smelting subcategory which appear at § 421.24 (c), (d), (e), (i), and (j) in the **Federal Register** on Thursday, February 17, 1983, on page 7085 are incorrect due to an error made by the Agency. EPA used incorrect treatable concentrations for antimony and fluoride when computing new source performance standards. The technology basis is identical to that discussed at 48 FR 7060 and in Volume II, page 175, of the development document.

There is a typographical error which appears at § 421.24(e) in the **Federal Register** on Thursday, February 17, 1983, on page 7085. The title which reads "Subpart B—Anode Contract Cooling NSPS" is corrected to read "Subpart B–Anode Contact Cooling NSPS."

There is a typographical error which appears at § 421.26 (a) and (b) in the **Federal Register** on Thursday, February 17, 1983, on page 7086. There is no value reported for benzo(a)pyrene for the maximum for monthly average. The maximum monthly value is corrected to read "————".

The pretreatment standards for new sources for the primary aluminum smelting subcategory which appear at § 421.26 (c), (d), (e), (i), and (j) in the **Federal Register** on Thursday, February 17, 1983, on page 7086 are incorrect due to an error made by the Agency. EPA used incorrect treatable concentrations for antimony and fluoride when computing the pretreatment standards for this subcategory. The technology basis is identical to that discussed at 48 FR 7064 and in Volume II, page 188, of the development document.

There is a typographical error which appears at § 421.26(c) in the **Federal Register** on Thursday, February 17, 1983, on page 7086. The title which reads "Subpart B—Cathode Manufacturing Control PSNS" is corrected to read "Subpart B—Cathode Manufacturing PSNS."

There is a typographical error which appears at § 421–26(d) in the **Federal Register** on Thursday, February 17, 1983, on page 7086. The title which reads "Subpart B—Chathode Reprocessing PSNS" is corrected to read "Subpart B—Cathode Reprocessing PSNS."

There is a typographical error which appears at § 421.27(e) in the **Federal Register** on Thursday, February 17, 1983, on page 7087. The title which reads "(b) Subpart B—Anode Contact Cooling" is corrected to read "(e) Subpart E—Anode Contact Cooling."

The BAT effluent limitations for the secondary aluminum subcategory which appear at § 421.33(e) in the **Federal Register** on Thursday, February 17, 1983, on page 7089 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for direct chill casting when computing the effluent limitations for this process waste stream. The technology basis is identical to that discussed at 48 FR 7057 and in Volume III, page 828, of the development document. Development of the correct regulatory flow is discussed on pages 830 and 831, Volume III, of the development document.

The new source performance standards for the secondary aluminum subcategory which appear at § 421.34(e) in the **Federal Register** on Thursday, February 17, 1983, on page 7089 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for direct chill casting when computing effluent standards for this waste stream. The technology basis is identical to that discussed at 48 FR 7060 and in Volume III, page 851 of the development document. Development of the correct regulatory flow is presented on pages 830 and 831, Volume III of the development document.

There is a typographical error which appears at § 421.34(f) in the **Federal Register** on Thursday, February 17, 1983, on page 7090. The title which reads "Subpart C—Stationary Casting Contract Cooling NSPS" is corrected to read "Subpart C—Stationary Casting Contact Cooling NSPS."

There is a typographical error which appears at § 421.35(g) in the **Federal Register** on Thursday, February 17, 1983, on page 7090. The title which reads "Subpart C—Short Casting Contact Cooling NSPS" is corrected to read "Subpart C—Shot Casting Contact Cooling NSPS."

There is a typographical error which appears at § 421.35(a) in the **Federal Register** on Thursday, February 17, 1983, on page 7090. The title which reads "Subpart C—Scrap Drying Wet Air Pollutaion Control PSES" is corrected to read "Subpart C–Scrap Drying Wet Air Pollution Control PSES."

The pretreatment standards for existing sources for the secondary aluminum subcategory which appear at § 421.35(e) in the **Federal Register** on Thursday, February 17, 1983, on page 7090 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for direct chill casting when computing effluent standards for this waste stream. The technology basis is identical to that discussed at 48 FR 7062 and in Volume III, page 855, of the development document.

There is a typographical error which appears at § 421.35(g) in the **Federal Register** on Thursday, February 17, 1983, on page 7090. The title which reads "Subpart C—Shot Casting Cooling PSES" is corrected to read "Subpart C—Shot Casting Contact Cooling PSES."

There is a typographical error which appears at § 421.35(g) in the **Federal Register** on Thursday, February 17, 1983, on page 7090. The maximum for monthly average for ammonia is reported as 56.6 mg/l. This value is corrected to read 58.6 mg/l.

The pretreatment standards for the secondary aluminum subcategory which appear at § 421.36(e) in the **Federal Register** on Thursday, February 17, 1983, on page 7091 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for direct chill casting when computing effluent standards for this waste stream. The technology basis is identical to that discussed at 48 FR 7064 and in Volume III, page 855, of the development document.

The BCT effluent limitations for the secondary aluminum subcategory which appear at § 421.37(e) in the **Federal Register** on Thursday, February 17, 1983, page 7092 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for direct chill casting when computing effluent limitations for the waste stream. The technology basis is identical to that discussed at 48 FR 7066 and in Volume III, page 868, of the development document.

There is a typographical error which appears in the **Federal Register** on Thursday, February 17, 1983, on page 7094. On this page "§ 412.54 Standards of Performance for New Sources" is corrected to read "§ 421.54 Standards of Performance for New Sources".

There is a typographical error which appears at § 421.54(c) in the **Federal Register** on Thursday, February 17, 1983, on page 7094. The title which reads "Subpart E—Casting Contact Coolling NSPS" is corrected to read "Subpart E—Casting Contact Cooling NSPS".

There is a typographical error which appears at § 421.82(d) in the **Federal Register** on Thursday, February 17, 1983, on page 7096. The units reported for the effluent limitations in this section which read "Mertic units (mg/l)" and "Engligh units (ppm)" are corrected to read "Metric units (mg/l)" and "English units (ppm)" respectively.

There is a typographical error which appears at § 421.73(d) in the **Federal Register** on Thursday, February 17, 1983, on page 7098. The title which reads "Subpart G—Dross Reverberatory Wet Air Pollution Control" is corrected to read "Subpart G—Dross Reverberatory Furnace Wet Air Pollution Control."

There is a typographical error which appears at § 421.77(b) in the **Federal Register** on Thursday February 17, 1983, on page 7098. The values reported for TSS for the maximum for any one day and maximum for monthly average which read "....." are corrected to read 0 mg/kkg.

There is a typographical error which appears at § 421.84(b) in the **Federal Register** on Thursday, February 17, 1983, on page 7100. The value reported for leaching NSPS for the maximum for any one day for the pollutant TSS which reads 19,650.01, is corrected to read 19,650.0.

There is a typographical error which appears at § 421.102(a) in the **Federal Register** on Thursday, February 17, 1983, on page 7103. The title which reads "Subpart J—Tungsten Acid Rinse" is corrected to read "Subpart J—Tungstic Acid Rinse".

There is a typographical error which appears at § 421.102(b) in the **Federal Register** on Thursday, February 17, 1983, on page 7103. The value reported for selenium for the maximum for monthly average which reads 2,735.0 mg/kkg is corrected to read 20,735.0 mg/kkg.

There is a typographical error which appears at § 421.103(a) in the **Federal Register** on Thursday, February 17, 1983, on page 7104. The title which reads "Subpart G—Tungsten Acid Rinse" is corrected to read "Subpart G—Tungstic Acid Rinse".

The BAT effluent limitations for the primary tungsten subcategory which appear at § 421.103 (a), (b), (c), (d), (e), and (i) in the **Federal Register** on Thursday, February 17, 1983, starting on page 7104 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for selenium when computing effluent limitations. The technology basis is identical to that discussed at 48 FR 7059 and in Volume III, page 132, of the development document.

The BAT effluent limitations for paratungstate conversion to oxides wet air pollution control for the primary tungsten subcategory which appear at § 421.103(g) in the **Federal Register** on Thursday, February 17, 1983, on page 7104 are incorrect due to an error made by the Agency. EPA used incorrect treatable concentrations for lead, selenium, and zinc when computing the effluent limitations. The technology basis is identical to that discussed at 48 FR 7059 and in Volume III, page 132, of the development document.

The BAT effluent limitations for reduction to tungsten wet air pollution control for the primary tungsten subcategory which appear at § 421.103(h) in the **Federal Register** on Thursday, February 17, 1983, on page 7105 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for this process waste stream when computing the effluent limitations. The technology basis is identical to that discussed at 48 FR 7059 and in Volume III, page 132, of the development document. Development of the correct regulatory flow is presented on pages 113 and 134 of Volume III of the development document.

There is a typographical error which appears at § 421.104(a) in the **Federal Register** on Thursday, February 17, 1983, on page 7105. The title which reads "Subpart J—Tungsten Acid Rinse NSPS" is corrected to read "Subpart J—Tungstic Acid Rinse NSPS."

The new source performance standards for the primary tungsten subcategory which appear at § 421.104 (a), (b), (c), (d), (e), and (i) in the **Federal Register** on Thursday, February 17, 1983, starting on page 715 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for selenium when computing effluent standards. The technology basis is identical to that discussed at 48 FR 7061 and in Volume III, page 150, of the development document.

There is a typographical error which appears at § 421.04(c) in the **Federal Register** on Thursday, February 17, 1883, on page 7105. The value reported for alkali leach wash for the maximum for monthly average for the pollutant zinc which reads 10,614 mg/kkg is corrected to read 19,614 mg/kkg.

The new source performance standards for ammonium paratungstate conversion to oxides wet air pollution control in the primary tungsten

subcategory which appear at § 421.104(g) in the **Federal Register** on Thursday, February 17, 1983, on page 7105 are incorrect due to an error made by the Agency. EPA used incorrect treatable concentrations for lead, selenium, zinc, and TSS when computing effluent standards. The technology basis is identical to that discussed at 48 FR 7061 and in Volume III, page 150, of the development document.

The new source performance standards for reduction to tungsten wet air pollution control for the primary tungsten subcategory which appear at § 421.104(h) in the **Federal Register** on Thursday, February 17, 1983, on page 7105 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for this process waste stream when computing the effluent standards. The technology basis is identical to that discussed at 48 FR 7061 and in Volume III, page 150, of the development document. Development of the correct regulatory flow is presented on pages 133 and 134, Volume III of the development document.

There is a typographical error which appears at § 421.105(a) in the **Federal Register** on Thursday, February 17, 1983, on page 7106. The title which reads "Subpart J—Tungsten Acid Rinse PSES" is corrected to read "Subpart J—Tungstic Acid Rinse PSES."

The pretreatment standards for existing sources for the primary tungsten subcategory which appear at § 421.105 (a), (b), (c), (d), (e), and (i) in the **Federal Register** on Thursday, February 17, 1983, starting on page 7106 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for selenium when computing effluent standards. The technology basis is identical to that discussed at 48 FR 7063 and in Volume III, page 159, of the development document.

The pretreatment standards for existing sources for paratungstate conversion to oxides wet air pollution control in the primary tungsten subcategory which appear at § 421.105(g) in the **Federal Register** on Thursday, February 17, 1983, on page 7106 are incorrect due to an error made by the Agency. EPA used incorrect treatable concentrations for lead, selenium, and zinc when computing effluent standards. The technology basis is identical to that discussed at 48 FR 7063 and in Volume III, page 159, of the development document.

The pretreatment standards for existing sources tungsten wet air pollution control for the primary tungsten subcategory which appear at § 421.105(h) in the **Federal Register** on Thursday, February 17, 1983, on page 7106 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for this process waste stream when computing the effluent standards. The technology basis is identical to that discussed at 48 FR 7063 and in Volume III, page 159, of the development document. Development of the correct regulatory flow is presented on pages 133 and 134, Volume III, of the development document.

There is a typographical error which appears at § 421.106(a) in the **Federal Register** on Thursday, February 17, 1983, on page 7107. The title which reads "Subpart J—Tungsten Acid Rinse PSNS" is corrected to read "Subpart J—Tungstic Acid Rinse PSNS."

The pretreatment standards for new sources for the primary tungsten subcategory which appear at § 421.106 (a), (b), (c), (d), (e), and (i) in the **Federal Register** on Thursday, February 17, 1983, starting on page 7107 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for selenium when computing effluent standards. The technology basis is identical to that discussed at 48 FR 7065 and in Volume III, page 159, of the development document.

The pretreatment standards new sources for paratungstate conversion to oxides wet air pollution control in the primary tungsten subcategory which appear at § 421.106(g) in the **Federal Register** on Thursday, February 17, 1983, on page 7107 are incorrect due to an error made by the Agency. EPA used incorrect treatable concentrations for lead, selenium, and zinc when computing effluent standards. The technology basis is identical to that discussed at 48 FR 7065 and in Volume III, page 159, of the development document.

The pretreatment standards new sources for tungsten wet air pollution control in the primary tungsten subcategory which appear at § 421.106(h) in the **Federal Register** on Thursday, February 17, 1983, starting on page 7107 are incorrect due to an error made by the Agency. EPA used an incorrect regulatory flow for this process waste stream when computing the effluent standards. The technology basis is identical to that discussed at 48 FR 7065 and in Volume III, page 159, of the development document. Development of the correct regulatory flow is presented on pages 133 and 134, Volume III, of the development document.

There is a typographical error which appears at § 421.107(a) in the **Federal Register** on Thursday, February 17, 1983, on page 7107. The title which reads "Subpart J—Tungsten Acid Rinse" is corrected to read "Subpart J—Tungstic Acid Rinse."

The BAT effluent limitations for the primary columbium-tantalum subcategory which appear at § 421.113 (a) through (g) in the **Federal Register** on Thursday, February 17, 1983, starting on page 7109 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for fluoride when computing effluent limitations. The technology basis is identical to that discussed at 48 FR 7059 and in Volume III, page 326, of the development document.

The new source performance standards for the primary columbium-tantalum subcategory which appear at § 421.114 (a) through (g) in the **Federal Register** on Thursday, February 17, 1983, on page 7110 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for fluoride when computing new source performance standards. The technology basis is identical to that discussed at 48 FR 7061 and in Volume III, page 346, of the development document.

The pretreatment standards for existing sources for the primary columbium-tantalum subcategory which appear at § 421.115 (a) through (g) in the **Federal Register** on Thursday, February 17, 1983, on page 7111 are incorrect due to an error made by the Agency. EPA use an incorrect treatable concentration for fluoride when computing pretreatment standards for existing sources. The technology basis is identical to that discussed at 48 FR 7063 and in Volume III, page 355, of the development document.

The pretreatment standards for new sources for the primary columbium-tantalum subcategory which appear at § 421.116 (a) through (g) in the **Federal Register** on Thursday, February 17, 1983, starting on page 7111 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for fluoride when computing pretreatment standards for new sources. The technology basis is identical to that discussed at 48 FR 7065 and in Volume III, page 355, of the development document.

There is a typographical error which appears at § 421.123(a) Alternative A in the **Federal Register** on Thursday, February 17, 1983, on page 7114. The value for the maximum for monthly average for ammonia which reads "....." is corrected to read 94,873,400.0 mg/kkg.

There is a typographical error which appears at § 421.123(m) Alternative A in

the **Federal Register** on Thursday, February 17, 1983, on page 7115. The title which reads "Subpart L—Precipitation and Filtration of Nonphotographic" is corrected to read "Subpart L—Precipitation and Filtration of Nonphotographic Solutions."

There is a typographical error which appears at § 421.123(n) Alternative A in the **Federal Register** on Thursday, February 17, 1983, on page 7115. The title which reads "Subpart L—Precipitation and Filtration of Nonphotographic" is corrected to read "Subpart L—Precipitation and Filtration of Nonphotographic Solutions Wet Air Pollution Control."

There is a typographical error which appears at § 421.123(n) Alternative B in the **Federal Register** on Thursday, February 17, 1983, on page 7117. The title which reads "Subpart L—Precipitation of Nonphotographic Solutions Wet Air Pollution Control" is corrected to read "Subpart L—Precipitation and Filtration of Nonphotographic Solutions Wet Air Pollution Control."

There are two typographical errors which appear at § 421.125(c) Alternative A in the **Federal Register** on Thursday, February 17, 1983, on page 7118. The table which reads "Maimum for Monthly Average" is corrected to read "Maximum for Monthly Average". The maximum for monthly average value for ammonia which reads 108,468,6000.0 mg/kkg is corrected to read 108,468,600.0 mg/kkg.

The BAT effluent limitations for the secondary lead subcategory which appear at § 421.133(a), (b), and (d) Alterantive B in the **Federal Register** on Thursday, February 17, 1983, on page 7124 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for antimony when computing the effluent limitations. The technology basis is identical to that discussed at 48 FR 7060 and in Volume III, page 984, of the development document.

The new source performance standards for the secondary lead subcategory which appear at § 421.134(a), (b) and (d) in the **Federal Register** on Thursday, February 17, 1983, on page 7124 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for antimony when computing new source performance standards. The technology basis if identical to that discussed at 48 FR 7061 and in Volume III, page 1005, of the development document.

The pretreatment standards for existing sources for the secondary lead subcategory which appear at § 421.135(a), (b), and (d) in the **Federal Register** on Thursday, February 17, 1983, starting on page 7125 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for antimony when computing pretreatment standards for new sources. The technology basis is identical to that discussed at 48 FR 7065 and in Volume III, page 1013, of the development documemt.

The pretreatment standards for existing sources for the secondary lead subcategory which appear at § 421.136(a), (b), and (d) Alternative B in the **Federal Register** on Thursday, February 17, 1983, on page 7125 are incorrect due to an error made by the Agency. EPA used an incorrect treatable concentration for antimony when computing pretreatment standards for existing sources. The technology basis is identical to that discussed at 48 FR 7064 and in Volume III, page 1014, of the development documemt.

There is a typographical error which appears on page 7069 in the **Federal Register** on Thursday, February 17, 1983. The sentence within the discussion of PSES which reads "Compliance with the less stringent option proposed for the secondary lead refining and secondary silver subcategories will result in total costs for this regulation to be $58.20 million in investment costs and $32.73 million in annual costs including interest and depreciation." is corrected to read "Compliance with the less stringent option proposed for the secondary lead refining and secondary silver subcategories will result in total costs of this regulation to be $10.88 million in investment costs and $6.93 million in annual costs including interest and depreciation.".

III. Extension of Comment Period

The Agency is extending the comment period for this proposal to ensure that interested persons have sufficient time to review and comment on the proposed rule as corrected by this notice. The deadline for all comments pertaining to the material published at 48 FR 7032 on February 17, 1983, and the corrections made today, is May 27, 1983.

Dated: April 8, 1983.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

PART 421—CORRECTED

The following corrections are made to **Federal Register** document OW–FRL–2289–1 appearing 48 FR 7032 (February 17, 1983).

§ 421.122 [Corrected]

1. In 40 CFR 421.22(b), which appears on page 7083, "mg/kg of product" and "lbs/million lbs of product" are corrected to read "kg/kkg of product" and "lbs/thousands lbs of product," respectively.

2. 40 CFR 421.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable, which appear on pages 7083 to 7084, are corrected to read as follows:

§ 421.23 Effluent limitations guidelines representing the degree of effluent reductions attainable by the application of the best available technology economically achievable.

Except as provided in 40 CFR 125.30 through 125.32, any existing point source subject to this subpart shall achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best available technology economically achievable:

(a) *Subpart B—Anode Paste Plant Wet Air Pollution Control.*

BAT EFFLUENT LIMITATIONS

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of paste produced	
	English units—pounds per billion pounds of paste produced	
Benzo (a) pyrene [1]	1.03	
Antimony	198.70	88.56
Cyanide	20.60	8.24
Nickel	56.65	38.11
Aluminum	312.09	127.72
Fluoride	4,089.10	1,812.80

[1] At the source

(b) *Subpart B—Anode Bake Plant Wet Air Pollution Control.*

BAT EFFLUENT LIMITATIONS

Pollutant or pollutant property	Maxium for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of anodes baked	
	English units—pounds per billion pounds of anodes baked	
Benzo (a) pyrene [1]	0.49	
Antimony	95.34	42.48
Cyanide	9.88	3.95
Nickel	27.17	18.28
Aluminum	149.88	61.26
Fluoride	1,961.18	869.44

[1] At the source.

(c) *Subpart B—Cathode Manufacturing.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of cathodes produced	
	English units—pounds per billion pounds of cathodes produced	
Antimony	149.38	66.56
Cyanide	15.48	6.19
Nickel	42.57	26.64
Aluminum	234.52	95.98
Fluoride	3,072.78	1,362.24

(d) *Subpart B—Cathode Reprocessing.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of aluminum from electrolytic reduction	
	English units—pounds per billion pounds of aluminum from electrolytic reduction	
Benzo (a) pyrene [1]	9.52

Lead	199.90	179.91
Zinc	2,038.98	839.58
Aluminum	6,056.97	2,478.76
Ammonia (as N)	265,867.0	117,141.40
Oil and grease	19,990.0	19,990.0
TSS	29,985.0	23,988.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

10. In 40 CFR 421.34(f), which appears on page 7090, "Subpart C—Stationary Casing Contract Cooling NSPS." is corrected to read "Subpart C—Stationary Casting Contact Cooling NSPS.".

11. In 40 CFR 421.34(g), which appears on page 7090, "Subpart C—Short Casting Contact Cooling NSPS." is corrected to read "Subpart C—Shot Casting Contact Cooling NSPS.".

§ 421.35 [Corrected]

12. In 40 CFR 421.35(a), which appears on page 7090, "Subpart C—Scrap Drying Wet Air Pollution PSES." is corrected to read "Subpart C—Scrap Drying Wet Air Pollution Control PSES.".

13. In 40 CFR 421.35(e), which appears on page 7090, is corrected to read as follows:

* * * * *

(e) *Subpart C—Direct Chill Casting Contact Cooling PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of aluminum product from direct chill casting	
	English units—pounds per billion pounds of aluminum product from direct chill casting	
Lead	199.90	179.91
Zinc	2,038.98	839.58
Ammonia (as N)	265,867.0	117,141.40

14. In 40 CFR 421,35(g), which appears on page 7090, "Subpart C—Shot Casting Cooling PSES." is corrected to read "Subpart C—Shot Casting Contact Cooling PSES.".

15. In 40 CFR 421.35(g), which appears on page 7090, the maximum for monthly average effluent limitation for ammonia of 56.6 mg/1 is corrected to 58.6 mg/1.

§ 421.36 [Corrected]

16. 40 CFR 421.36(e), which appears on page 7091, is corrected to read as follows:

* * * * *

(e) *Subpart C—Direct Chill Casting Contact Cooling PSNS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of aluminum product from direct chill casting	
	English units—pounds per billion pounds of aluminum product from direct chill casting	
Lead	199.90	179.91
Zinc	2,038.89	839.58
Ammonia (as N)	265,867.0	117,141.40

§ 421.37 [Corrected]

17. 40 CFR 421.37(e), which appears on page 7092, is corrected to read as follows:

* * * * *

(e) *Subpart C—Direct Chill Casting Contact Cooling.*

BCT EFFLUENT LIMITATIONS

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of aluminum product from direct chill casting	
	English units—pounds per billion pounds of aluminum product from direct chill casting	
Oil and grease	39,890.0	23,988.0
TSS	81,959.0	39,980.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

§ 421.54 [Corrected]

18. In 40 CFR 421.54, which appears on page 7094, "§ 412.54 Standards of performance for new sources." is corrected to read "§ 421.54 Standards of performance for new sources.".

19. In 40 CFR 421.54(c), which appears on page 7094, "Subpart E—Casting Coolling NSPS." is corrected to read "Subpart E—Casting Contact Cooling NSPS.".

§ 421.62 [Corrected]

20. In 40 CFR 421.62(d), which appears on page 7096, "Mertic units (mg/l)" and "English units (ppm)" are corrected to read "Metric units (mg/l)" and "English units (ppm)," are corrected to read "Metric units (mg/1)" and "English units (ppm)," respectively.

§ 421.73 [Corrected]

21. In 40 CFR 421.73(d), which appears on page 7098, "Subpart G—Dross Reverberatory Wet Air Pollution Control." is corrected to read "Subpart G—Dross Reverberatory Furnace Wet Air Pollution Control.".

§ 421.77 [Corrected]

22. In 40 CFR 421.77(b),, which appears on page 7098, for TSS for the maximum for any one day and maximum for monthly average "....." are corrected to read 0 mg/kkg.

§ 421.84 [Corrected]

23. In 40 CFR 421.84(b), which appears on page 7100, the maximum for any one day for TSS of 19,650.01, mg/kkg is corrected to read "19,650" mg/kkg.

§ 421.102 [Corrected]

24. In 40 CFR 421.102(a), which appears on 7103, "Subpart J—Tungsten Acid Rinse." is corrected to read "Subpart J—Tungstic Acid Rinse.".

25. In 40 CFR 421.102(b), which appears on page 7103, the maximum monthly average effluent limitation for selenium of 2,735.0 mg/kkg is corrected to read "20,735.0" mg/kkg.

26. In 40 CFR 421.103 Effluent limitations representing the degree of effluent reduction attainable by the application of the best available technology economically achievable which appears on page 7104 are corrected to read as follows:

§ 421.103 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

Except as provided in 40 CFR 125.30 through 125.32, any existing point source subject to this subpart shall achieve the following effluent limitations

representing the degree of effluent reduction attainable by the application of the best available technology economically achievable:

(a) *Subpart J—Tungstic Acid Rinse.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungstic acid produced	
	English units—pounds per billion pounds of tungstic acid produced	
Lead	4,760.0	4,284.0
Selenium	39,032.0	17,612.0
Zinc	48,552.0	19,992.0
Ammonia (as N)	6,330,800.0	2,789,360.0

(b) *Subpart J—Tungstic Acid Leach Wet Air Pollution Control.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungstic acid produced	
	English units—pounds per billion pounds of tungstic acid produced	
Lead	377.0	339.30
Selenium	3,091.40	1,394.90
Zinc	3,845.40	1,563.40
Ammonia (as N)	501,410.0	220,922.0

(c) *Subpart J—Alkali Leach Wash.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of sodium tungstate produced	
	English units—pounds per billion pounds of sodium tungstate produced	
Lead	4,670.0	4,203.0
Selenium	38,294.0	17,279.0
Zinc	47,634.0	19,614.0
Ammonia (as N)	6,211,100.0	2,736,620.0

(d) *Subpart J—Ion-Exchange Raffinate.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of ammonium tungstate produced	
	English units—pounds per billion pounds of ammonium tungstate produced	
Lead	5,120.0	4,608.0
Selenium	41,984.0	18,944.0
Zinc	52,224.0	21,504.0
Ammonia (as N)	6,809,600.0	3,000,320.0

(e) *Subpart J—Calcium Tungstate Precipitate Wash.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of calcium tungstate produced	
	English units— pounds per billion pounds of calcium tungstate produced	
Lead	3,720.0	3,348.0
Selenium	30,504.0	13,764.0
Zinc	37,944.0	15,624.0
Ammonia (as N)	4,947,600.0	2,179,920.0

(f) *Subpart J—Crystallization and Drying of Ammonium Paratungstate.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—kg/kkg of ammonium paratungstate produced	
	English units—pounds per billion pounds of ammonium paratungstate produced	
Lead	0	0
Selenium	0	0
Zinc	0	0
Ammonia (as N)	0	0

(g) *Subpart J—Ammonium Paratungstate Conversion to Oxides Wet Air Pollution Control.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of "blue" oxide (WO_3) produced	
	English units—pounds per billion pounds of "blue" oxide (WO_3) produced	
Lead	2,090.0	1,881.0
Selenium	17,138.0	7,733.0
Zinc	21,318.0	8,778.0
Ammonia (as N)	2,779,700.0	1,224,740.0

(h) *subpart J—Reduction to Tungsten Wet Air Pollution Control.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungsten produced	
	English units—pounds per billion pounds of tungsten produced	
Lead	940.0	846.0
Selenium	7,708.0	3,478.0
Zinc	9,586.0	3,948.0
Ammonia (as N)	1,250,200.0	550,840.0

(i) *Subpart J—Reduction to tungsten Water of Formation.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungsten reduced	
	English units—pounds per billion pounds of tungsten reduced	
Lead	1,940.0	1,746.0
Selenium	15,908.0	7,178.0
Zinc	19,788.0	8,148.0
Ammonia (as N)	2,580,200.0	1,136,840.0

27. 40 CFR 421.104 Standards of performance for new sources, which appears on page 7105 are corrected to read as follows:

§ 421.104 Standards of performance for new sources.

Any new source subject to this subpart shall achieve the following new source performance standards:

(a) *Subpart J—Tungstic Acid Rinse NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungstic acid produced	
	English units—pounds per billion pounds of tungstic acid produced	
Lead	4,760.0	4,284.0
Selenium	39,032.0	17,612.0
Zinc	48,552.0	19,992.0
Ammonia (as N)	6,330,800.0	2,789,380.0
TSS	714,000.0	571,200.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(b) *Subpart J—Acid Leach Wet Air Pollution Control NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungstic acid produced	
	English units—pounds per billion pounds of tungstic acid produced	
Lead	377.0	339.30
Selenium	3,091.40	1,394.90
Zinc	3,845.40	1,583.40
Ammonia (as N)	501,410.0	220,922.0
TSS	56,550.0	45,240.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(c) *Subpart J—Alkali Leach Wash NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of sodium tungstate produced	
	English units—pounds per billion pounds of sodium tungstate produced	
Lead	4,670.0	4,203.0
Selenium	38,294.0	17,279.0
Zinc	47,634.0	19,614.0
Ammonia (as N)	6,211,100.0	2,736,620.0
TSS	700,500.0	560,400.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(d) *Subpart J—Ion-Exchange Raffinate NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of ammonium tungstate produced	
	English units—pounds per billion pounds of ammonium tungstate produced	
Lead	5,120.0	4,608.0
Selenium	41,984.0	18,944.0
Zinc	52,224.0	21,504.0
Ammonia (as N)	6,809,600.0	3,000,320.0
TSS	786,000.0	614,400.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(e) *Subpart J—Calcium Tungstate Precipitate Wash NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of calcium tungstate produced	
	English units—pounds per billion pounds of calcium tungstate produced	
Lead	3,720.0	3,348.0
Selenium	30,504.0	13,764.0
Zinc	37,944.0	15,624.0
Ammonia (as N)	4,947,600.0	2,179,920.0
TSS	558,000.0	446,400.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(f) *Subpart J—Crystallization and Drying of Ammonium Paratungstate NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of ammonium paratungstate produced	
	English units—pounds per billion pounds of ammonium paratungstate produced	
Lead	0	0
Selenium	0	0
Zinc	0	0
Ammonia (as N)	0	0
TSS	0	0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(g) *Subpart J—Ammonium Paratungstate Conversion to Oxides Wet Air Pollution Control NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of "blue" oxide (WO_3) produced	
	English units—pounds per billion pounds of "blue" oxide (WO_3) produced	
Lead	2,090.0	1,881.0
Selenium	17,138.0	7,733.0
Zinc	21,318.0	8,778.0
Ammonia (as N)	2,779,700.0	1,224,740.0
TSS	313,500.0	250,800.0
pH	(1)	(1)

Within the range of 7.5 to 10.0 at all times.

(h) *Subpart J—Reduction to Tungsten Wet Air Pollution Control NSPS.*

Pollutant or Pollutant Property	Maximum for any 1 day	Maximum for monthly average.
	Metric units—mg/kkg of tungsten produced	
	English units—pounds per billion pounds of tungsten produced	
Lead	940.0	846.0
Selenium	7,708.0	3,478.0
Zinc	9,588.0	3,948.0
Ammonia (as N)	1,250,200.0	550,840.0
TSS	141,000.0	112,800.0
pH	(1)	(1)

Within the range of 7.5 to 10.0 at all times.

(i) *Subpart J—Reduction to Tungsten Water of Formation NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	maximum for monthly average
	Metric units—mg/kkg of tungsten reduced	
	English units—pounds per billion pounds of tungsten reduced	
Lead	1,940.0	1,746.0
Selenium	15,908.0	7,178.0
Zinc	19,788.0	8,148.0
Ammonia (as N)	2,580,200.0	1,136,840.0
TSS	291,000.0	232,800.0
pH	(1)	(1)

Within the range of 7.5 to 10.0 at all times.

28. 40 CFR 421.105 Pretreatment standards for existing sources which appears on page 7106 are corrected to read as follows:

§ 421.105 Pretreatment standards for existing sources.

Except as provided in 40 CFR 403.7 and 403.13, and existing source subject to this subpart which introduces pollutants into a publicly owned treatment works must comply with 40 CFR Part 403 and achieve the following pretreatment standards for existing sources. The mass of wastewater pollutants in primary tungsten process wastewater introduced into a POTW shall not exceed the following values:

(a) *Subpart J—Tungstic Acid Rinse PSES.*

Pollutant or pollutant property	Maximum for any 1 day	maximum for monthly average
	Metric units—mg/kkg of tungstic acid produced	
	English units—pounds per billion pounds of tungstic acid produced	
Lead	4,760.0	4,284.0
Selenium	39,032.0	17,612.0
Zinc	48,552.0	19,992.0
Ammonia (as N)	6,330,800.0	2,789,360.0

(b) *Subpart J—Acid Leach Wet Air Pollution Control PSES.*

Pollutant or pollutant property	Maximum for any 1 day	maximum for monthly average
	Metric units—mg/kkg of tungstic acid produced	
	English units—pounds per billion pounds of tungstic acid produced	
Lead	377.0	339.30
Selenium	3,901.40	1,394.90
Zinc	3,845.40	1,583.40
Ammonia (as N)	501,410.0	220,992.0

(c) *Subpart J—Alkali Leach Wash PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of sodium tungstate produced	
	English units—pounds per billion pounds of sodium tungstate produced	
Lead	4,670.0	4,203.0
Selenium	38,294.0	17,279.0
Zinc	47,634.0	19,614.0
Ammonia (as N)	6,211,100.0	2,736,620.0

(d) *Subpart J—Ion-Exchange Raffinate PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of ammonium tungstate produced	
	English units—pounds per billion pounds of ammonium tungstate produced	
Lead	5,120.0	4,608.0
Selenium	41,984.0	18,944.0
Zinc	52,224.0	21,504.0
Ammonia (as N)	6,809,600.0	3,000,320.0

(e) *Subpart J—Calcium Tungstate Precipitate Wash PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of calcium tungstate produced	
	English units—pounds per billion pounds of calcium tungstate produced	
Lead	3,720.0	3,348.0
Selenium	30,504.0	13,764.0
Zinc	37,944.0	15,624.0
Ammonia (as N)	4,947,600.0	2,179,920.0

(f) *Subpart J—Crystallization and Drying of Ammonium Paratungstate PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of ammonium paratungstate produced	
	English units—pounds per billion pounds of ammonium paratungstate produced	
Lead	0	0
Selenium	0	0
Zinc	0	0
Ammonia (as N)	0	0

(g) *Subpart J—Ammonium Paratungstate Conversion to Oxides Wet Air Pollution Control PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of "blue" oxide (WO_3) produced	
	English units—pounds per billion pounds of "blue" oxide (WO_3) produced	
Lead	2,090.0	1,861.0
Selenium	17,136.0	7,733.0
Zinc	21,316.0	8,778.0
Ammonia (as N)	2,779,700.0	1,224,740.0

(h) *Subpart J—Reduction to Tungsten Wet Air Pollution Control PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungsten produced	
	English units—pounds per billion pounds of tungsten produced	
Lead	940.0	846.0
Selenium	7,708.0	3,478.0
Zinc	9,588.0	3,948.0
Ammonia (as N)	1,250,200.0	112,800.0

(i) *Subpart J—Reduction to Tungsten Water of Formation PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungsten reduced	
	English units—pounds per billion pounds of tungsten reduced	
Lead	1,940.0	1,746.0
Selenium	15,908.0	7,178.0
Zinc	19,788.0	8,148.0
Ammonia (as N)	2,580,200.0	1,136,840.0

29. 40 CFR 421.106 Pretreatment standards for new sources which appears on page 7106 are corrected to read as follows:

§ 421.106 Pretreatment standards for new sources.

Except as provided in 40 CFR 403.7, any new source subject to this subpart which introduces pollutants into a publicly owned treatment works must comply with 40 CFR Part 403 and achieve the following pretreatment standards for new sources. The mass of wastewater pollutants in primary tungsten process wastewater introduced into a POTW shall not exceed the following values:

(a) *Subpart J—Tungstic Acid Rinse PSNS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungstic acid produced

Zinc	9,588.0	3,948.0
Ammonia (as N)	1,250,200.0	550,840.0

(i) *Subpart J—Reduction to Tungsten Water of Formation PSNS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of tungsten reduced	
	English units—pounds per billion pounds of tungsten reduced	
Lead	1,940.0	1,746.0
Selenium	15,908.0	7,178.0
Zinc	19,788.0	8,148.0
Ammonia (as N)	2,580,200.0	1,136,840.0

§ 421.107 [Corrected]

30. In 40 CFR 421.107(a), which appears on page 1707, "Subpart J—Tungsten Acid Rinse." is corrected to read "Subpart J—Tungsten Acid Rinse.".

31. 40 CFR 421.113 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable, which appear on pages 7109 and 7110, are corrected to read as follows:

§ 421.113 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

Except as provided in 40 CFR 125.30 through 125.32, any existing point source subject to this subpart shall achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) *Subpart K—Concentrate Digestion Wet Air Pollution Control.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt produced from digestion	
	English units—pounds per billion pounds of columbium or tantalum salt produced from digestion	
Lead	515.63	464.07
Zinc	5,259.43	2,165.65
Ammonia (as N)	685,787.90	302,159.18
Fluoride	204,705.11	90,750.88

(b) *Subpart K—Solvent Extraction Raffinate.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt extracted	
English units—pounds per billion pounds of columbium or tantalum salt extracted		
Lead	2,691.60	2,422.44
Zinc	27,454.32	11,304.72
Ammonia (as N)	3,579,828.0	1,577,277.60
Fluoride	1,068,565.20	473,721.60

(c) *Subpart K—Solvent Extraction Wet Air Pollution Control.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt extracted	
English units—pounds per billion pounds of columbium or tantalum salt extracted		
Lead	43.01	36.71
Zinc	438.70	180.64
Ammonia (as N)	57,203.30	25,200.86
Fluoride	17,074.97	7,569.76

(d) *Subpart K—Precipitation and Filtration of Metal Salts.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt precipitated	
English units—pounds per billion pounds of columbium or tantalum salt precipitated		
Lead	24,722.30	22,250.07
Zinc	252,167.46	103,833.66
Ammonia (as N)	32,680,659.0	14,487,267.80
Fluoride	9,814,753.10	4,351,124.80

(e) *Subpart K—Metal Salt Drying Wet Air Pollution Control.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt dried	
English units—pounds per billion pounds of columbium or tantalum salt dried		
Lead	1,647.90	1,483.11
Zinc	16,808.58	6,921.18
Ammonia (as N)	2,191,707.0	965,569.40
Fluoride	654,216.30	290,030.40

(f) *Subpart K—Reduction of Salt to Metal.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum reduced	
English units—pounds per billion pounds of columbium or tantalum salt reduced		
Lead	35,266.30	31,739.67
Zinc	359,716.26	148,118.46
Ammonia (as N)	46,904,179.0	20,686,051.80
Fluoride	14,000,721.10	6,206,868.80

(g) *Subpart K—Reduction of Salt to Metal Wet Air Pollution Contol.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum reduced	
	English units—pounds per billion pounds of columbium or tantalum reduced	
Lead	2,152.10	1,936.89
Zinc	21,951.42	9,038.82
Ammonia (as N)	2,862,293.0	1,261,130.60
Fluoride	854,383.7	378,769.60

(h) *Subpart K—Consolidation and Casting Contact Cooling.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum cast or consolidated	
	English units—pounds per billion pounds of columbium or tantalum cast or consolidated	
Lead	0	0
Zinc	0	0
Ammonia (as N)	0	0
Fluoride	0	0

32. 40 CFR 421.114 Standards of performance for new sources, which appears on page 7110 and 7111, are corrected to read as follows:

§ 421.114 Standards of performance for new sources.

Any new source subject to this subpart shall achieve the following new source performance standards:

(a) *Subpart K—Concentrate Digestion Wet Air Pollution Control NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt produced from digestion	
	English units—pounds per billion pounds of columbium or tantalum salt produced from digestion	
Lead	515.63	464.07
Zinc	5,259.43	2,166.65
Ammonia	685,787.90	302,159.18
Fluoride	204,705.11	90,750.88
Total Suspended Solids	77,344.50	61,875.60
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(b) *Subpart K—Solvent Extraction Raffinate NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt extracted	
	English units—pounds per billion pounds of columbium or tantalum salt extracted	
Lead	2,691.60	2,422.44
Zinc	27,454.32	11,304.72
Ammonia (as N)	3,579,828.0	1,577,277.60
Fluoride	1,068,565.20	473,721.60
Total Suspended Solids	403,740.0	322,992.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(c) *Subpart K—Solvent Extraction Wet Air Pollution Control NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt extracted	
	English units—pounds per billion pounds of columbium or tantalum salt extracted	
Lead	43.01	38.71
Zinc	438.70	180.64
Ammonia (as N)	57,203.30	25,203.86
Fluoride	17,074.97	7,569.76
Total Suspended Solids	6,451.50	5,161.20
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(d) *Subpart K—Precipitation and Filtration of Metal Salts NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt precipitated	
	English units—pounds per billion pounds of columbium or tantalum salt precipitated	
Lead	24,722.30	22,250.07
Zinc	252,167.46	103,833.66
Ammonia (as N)	32,880,659.0	14,487,267.80
Fluoride	9,814,753.10	4,351,124.80
Total Suspended Solids	3,708,345.0	2,966,676.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(e) *Subpart K—Metal Salt Drying Wet Air Pollution Control NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt dried	
	English units—pounds per billion pounds of columbium or tantalum salt dried	
Lead	1,647.90	1,483.11
Zinc	16,808.58	6,921.18
Ammonia (as N)	2,191,707.0	985,669.40
Fluoride	654,216.30	290,030.40
Total Suspended Solids	247,185.0	197,748.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(f) *Subpart K—Reduction of Salt to Metal NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum reduced	
	English units—pounds per billion pounds of columbium or tantalum reduced	
Lead	35,266.30	31,739.67
Zinc	359,716.26	148,118.46
Ammonia (as N)	46,904,179.0	20,666,051.80
Fluoride	14,000,721.10	6,206,868.80
Total Suspended Solids	5,289,945.0	4,231,956.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(g) *Subpart K—Reduction of Salt to Metal Wet Air Pollution Control NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum reduced	
	English units—pounds per billion pounds of columbium or tantalum reduced	
Lead	2,152.10	1,936.89
Zinc	21,951.42	9,038.82
Ammonia (as N)	2,862,293.0	1,261,130.60
Fluoride	854,383.70	378,769.60
Total Suspended Solids	322,815.0	258,252.0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

(h) *Subpart K—Consolidation and Casting Contact Cooling NSPS.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum cast or consolidated	
	English units—pounds per billion pounds of columbium or tantalum cast or consolidated	
Lead	0	0
Zinc	0	0
Ammonia (as N)	0	0
Fluoride	0	0
TSS	0	0
pH	(1)	(1)

[1] Within the range of 7.5 to 10.0 at all times.

33. 40 CFR 421.115 Pretreatment standards for existing sources, which

appear on page 7111, are corrected to read as follows:

§ 421.115 Pretreatment standards for existing sources.

Except as provided in 40 CFR 403.7 and 403.13, any existing source subject to this subpart which introduces pollutants into a publicly owned treatment works must comply with 40 CFR Part 403 and achieve the following pretreatment standards for existing sources. The mass of wastewater pollutants in primary columbium-tantalum process wastewater introduced into a POTW shall not exceed the following values:

(a) *Subpart K—Concentrate Digestion Wet Air Pollution Control PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium-tantalum salt produced from digestion	
	English units—pounds per billion pounds of columbium-tantalum salt produced from digestion	
Lead	515.63	464.07
Zinc	5,259.43	2,165.65
Ammonia (as N)	685,787.90	302,159.18
Fluoride	204,705.11	90,750.88

(b) *Subpart K—Solvent Extraction Raffinate PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt extracted	
	English units—pounds per billion pounds of columbium or tantalum salt extracted	
Lead	2,891.60	2,422.44
Zinc	27,454.32	11,304.72
Ammonia (as N)	3,579,828.0	1,577,277.60
Fluoride	1,068,565.20	473,721.60

(c) *Subpart K—Solvent Extraction Wet Air Pollution Control PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt extracted	
	English units—pounds per billion pounds of columbium or tantalum salt extracted	
Lead	43.01	36.71
Zinc	439.70	180.84
Ammonia (as N)	57,203.30	25,203.86
Fluoride	17,074.97	7,569.76

(d) *Subpart K—Precipitation and Filtration of Metal Salts PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt precipitated	
	English units—pounds per billion pounds of columbium or tantalum salt precipitated	
Lead	24,722.30	22,250.07
Zinc	252,167.46	103,833.66
Ammonia (as N)	32,880,659.0	14,487,267.60
Fluoride	9,814,753.10	4,351,124.60

(e) *Subpart K—Metal Salt Drying Wet Air Pollution Control PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum salt dried	
	English units—pounds per billion pounds of columbium or tantalum salt dried	
Lead	1,647.90	1,483.11
Zinc	16,808.58	6,921.18
Ammonia (as N)	2,191,707.0	965,669.40
Fluoride	654,216.30	290,030.40

(f) *Subpart K—Reduction of Salt to Metal PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum reduced	
	English units—pounds per billion pounds of columbium or tantalum reduced	
Lead	35,266.30	31,739.67
Zinc	359,716.26	148,118.46
Ammonia (as N)	46,904,179.0	20,666,051.80
Fluoride	14,000,721.10	6,206,868.80

(g) *Subpart K—Reduction of Salt to Metal Wet Air Pollution Control PSES.*

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of columbium or tantalum reduced	
	English units—pounds per billion pounds of columbium or tantalum reduced	
Lead	2,152.10	1,936.89
Zinc	21,951.42	9,038.82

§ 421.123 [Corrected]

35. In 40 CFR 421.123(a) Alternative A, which appears on page 7114, for the maximum for monthly average for ammonia "....." is corrected to read 94,873,400.0 mg/kkg.

36. In 40 CFR 421.123(m) Alternative A, which appears on page 7115, "Subpart L—Precipitation and Filtration of Nonphotographic." is corrected to read "Subpart L—Precipitation and Filtration of Nonphotographic Solutions.".

37. In 40 CFR 421.123(n) Alternative A, which appears on page 7115, "Subpart L—Precipitation and Filtration of Nonphotographic." is corrected to read "Subpart L—Precipitation and Filtration of Nonphotographic Solutions Wet Air Pollution Control.".

38. In 40 CFR 421.123(n) Alternative B, which appears on page 7117, "Subpart L—Precipitation of Nonphotographic Solutions Wet Air Pollution Control." is corrected to read "Subpart L—Precipitation and Filtration of Nonphotographic Solutions Wet Air Pollution Control.".

§ 421.125 [Corrected]

39. In 40 CFR 421.125(c) Alternative A, which appears on page 7118, the table which reads "Maimum for Monthly Average" is corrected to read "Maximum for Monthly Average". The maximum for monthly average value for ammonia, 108,468,6000.0 mg/kkg, is corrected to read 108,468,600.0 mg/kkg.

§ 421.133 [Corrected]

40. 40 CFR 421.133(a), (b), and (d) Alternative B, which appear on page 7124, are corrected to read as follows:

(a) *Subpart M—Battery Cracking.*

BAT Effluent Limitations

Pollutant or pollutant property	Maximum for any 1 day	Maximum for monthly average
	Metric units—mg/kkg of lead scrap produced	
	English units—pounds per billion pounds per of lead scrap produced

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[Gen. Docket No. 80-739]

Implementation of the Final Acts of the World Administrative Radio Conference, Geneva, 1979; Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; Extension of reply comment period.

SUMMARY: The FCC has denied a Motion from NASA for extension of time for Reply Comments and granted a Motion from United Satellite Communications, Inc. (USCI) for extension of Time for Reply Comments in the Implementation of the Final Acts of World Administrative Radio Conference, Geneva, 1979 (48 FR 3790, January 27, 1983). The NASA Motion was denied as it did not provide sufficient information on the studies it has undertaken or the points they would address. The USCI Motion was granted because it was not given adequate opportunity to fairly respond to a revised filing by Satellite Television Corporation.

DATES: The deadline for Reply Comments is extended to April 18, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Fred L. Thomas, Office of Science and Technology, (202) 653-8171.

Note.—The full text of the Proposed Rule was not published in the **Federal Register** due to the effort to minimize printing costs. However, copies are available from any of the distribution centers listed in the FCC Office of Public Affairs, Room 202, 1919 M St., NW., Washington, D.C. (202) 254-7674. Also, a copy is available for public inspection in the FCC Dockets Branch, Room 239, and the FCC Library, Room 639, both located at 1919 M St., NW., Washington, D.C.

Order Extending Time for Reply Comments

In the matter of implementation of the Final Acts of the World Administrative Radio Conference, Geneva, 1979, General Docket 80-739.

Adopted: April 7, 1983.
Released: April 8, 1983.

By the Office of Science and Technology.

1. On March 31, 1983, the National Aeronautics and Space Administration (NASA), filed a *Motion for Extension of Time* (USCI *Motion*) in the above-captioned proceeding requesting that the date for Reply Comments to the *Notice of Proposed Rulemaking* (NPRM) be extended from April 11, 1983, to April 25, 1983. NASA states that it needs the additional time to complete technical studies in order to respond to comments regarding an allocation for the mobile-satellite service and related issues.

2. On April 6, 1983, United Satellite Communications, Inc. (USCI), also filed a *Motion for Extension of Time* (NASA *Motion*) in the proceeding requesting that the date for Reply Comments be extended to April 18, 1983. USCI states that, on March 15, 1983, Satellite Television Corporation (STC) filed a revised version of a Technical Appendix regarding fixed-satellite and broadcasting-satellite use of the 11.7-12.7 band. However, USCI was not served a copy of the revised Appendix and was unaware of its existence until April 4, 1983. USCI claims that many of the conclusions of the Appendix are without merit and that to prepare an adequate and accurate response to the Appendix requires additional time.

3. The NASA *Motion* does not give sufficient reason to warrant extension of the reply comment period. It does not provide any information as to the nature of the technical studies being undertaken or the points they would address. USCI, however, has demonstrated that it has not had adequate opportunity to fairly respond to specific conclusions of the revised STC Technical Appendix filed on March 15, 1983. All parties should have an opportunity to respond to the proposals in the NPRM and to the comments received. Accordingly, we believe that it is in the public interest to extend the period for filing Reply Comments until April 18, 1983.

4. Therefore, it is ordered, that the *Motion for Extension of Time* filed by NASA is hereby denied, that the *Motion for Extension of Time* filed by USCI is hereby granted, and that the date for filing Reply Comments is extended to and including April 18, 1983.

5. This action is taken pursuant to authority found in Sections 4(i), 5(d), and 303 of the Communications Act of 1934, as amended, and § 0.241 of the Commission's Rules.

Robert S. Powers,
Acting Chief Scientist.

BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 444]

Electronic Filing of Tariffs; Extension of Comment Period

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time to file comments to advance notice of proposed rulemaking.

SUMMARY: In the **Federal Register** advance notice of proposed rulemaking (ANPR), March 8, 1983 (48 FR 9672) the Commission considered establishing rules and procedures to permit parties wishing to do so to file tariffs electronically. The date that comments were due was April 22, 1983. The American Trucking Association, Inc. (ATA) requests that the date for filing comments be extended to May 23, 1983. The ATA stresses their interest and support in the movement to increase use of electronic filing of tariffs. In view of the many issues raised in the ANPR and its interest the ATA suggests a more complete record could be achieved by the extension.

Considering the importance of the rulemaking and the desire of the Commission to elicit meaningful comments the request is warranted.

DATE: Comments should be submitted by May 23, 1983.

ADDRESS: An original and ten copies should be sent to: Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: W. Paul Geisenkotter, Section of Tariffs, Bureau of Traffic (202) 275-7739.

Dated: April 12, 1983.

By the Commission, Reese H. Taylor, Jr., Chairman.

Agatha L. Mergenovich
Secretary

Federal Register
Vol. 48, No. 75
Monday, April 18, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. 83-011N]

SLD Policy Memoranda; Semi-Annual Listing

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document lists memoranda issued by the Standards and Labeling Division (SLD), Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service (FSIS), and available to the public which contain significant new applications or interpretations of the Federal Meat Inspection Act, the Poultry Products Inspection Act, the regulations promulgated thereunder, or departmental policy in the labeling area.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Hibbert, Director, Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-6042.

SUPPLEMENTARY INFORMATION: FSIS conducts a prior approval program for labels or other labeling (specified in 9 CFR 317.4, 317.5, 381.132, and 381.134) to be used on federally inspected meat and poultry products. Pursuant to the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*), and the regulations promulgated thereunder, meat and poultry products which do not bear approved labels may not be distributed in commerce.

FSIS's prior label approval program is conducted by label review experts within SLD. A variety of factors, such as continuing technological innovations in food processing and expanded public concern regarding the presence of various substances in foods, has generated a series of increasingly complex issues which SLD must resolve as part of the prior label approval process. In interpreting the Acts or regulations to resolve these issues, SLD may modify its policies on labeling or develop new ones.

Significant or novel interpretations or determinations made by SLD are issued in writing in memorandum form. This document lists those SLD policy memoranda issued from September 1, 1982, through March 31, 1983.

Persons interested in obtaining copies of any of the following SLD policy memoranda, or in being included on a list for automatic distribution of future SLD policy memoranda may write to: Printing and Distribution Section, Paperwork Management Branch, Administrative Services Division, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250.

Memo No.	Title and date	Issue	Reference
030A	Labeling Meat Food Products Containing Poultry Ingredients, Sept. 13, 1982 (Replaces Policy Memo 030).	How meat food products containing poultry ingredients should be labeled	NA.
043A	Rescindment of Policy Memo 043, Sept. 15, 1982		NA.
050A	Canadian Style Bacon, Feb. 2, 1983 (Replaces Policy Memo 050).	What cut of pork must be used in product that is labeled "Canadian Style Bacon"?	NA.
051	Species Sausage, Sept. 13, 1982	The labeling and standards of sausage products labeled with species identification.	9 CFR 319.141, 319.142, 319.144, and 319.160.
052	The Use of Cured Pork Tissue in Making Lard, Sept. 15, 1982.	May cured pork tissues be used in preparation of lard?	9 CFR 319.702.
053	Labeling Turkey Ham Products Containing Added Water, Sept. 24, 1982.	What is the appropriate labeling for a Turkey Ham product that contains added water?	9 CFR 381.171.
054	Quality Control Claims, Nov. 10, 1982	What guidelines should be followed in approving labels bearing claims indicating that the product's quality is controlled or assured?	9 CFR 318.4, and 381.145.
055	Natural Claims, Nov. 22, 1982	Appropriate policy for the approval or denial of labeling for meat and poultry products bearing the term "natural".	NA.
056	Potassium Sorbate and Propylparaben on Semi-Dry Sausage, Jan. 12, 1983.	The use of potassium sorbate or propylparaben as an external mold inhibitor on semi-dry sausages.	9 CFR 318.7 and Policy 017.
057	Labeln Turkey Ham Products Containing Added Water, Jan. 26, 1983 (Replaces Policy Memo 53)	What is the appropriate labeling for a Turkey Ham product that contains added water?	9 CFR 381.171.
058	Smoked Products, Mar. 22, 1983	What guidelines should be followed when approving labeling for products prepared with natural smoke and/or smoke flavor (natural or artificial)?	9 CFR 317.2 and 381.119, and Policy Memo 040.
059	Labeling Turkey Ham Products Containing Ground Turkey Thigh Meat Mar. 29, 1983.	What is the appropriate labeling for a Turkey Ham product containing ground turkey thigh meat?	9 CFR 381.171.

The SLD policies specified in these memoranda will be uniformly applied to all relevant labeling applications unless modified by future memoranda or more formal Agency action. Applicants retain all rights of appeal regarding decisions based upon these memoranda.

Done at Washington, D.C., on April 6, 1983.

Robert G. Hibbert,

Director, Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service.

[Order 83–4–57; Docket 41422]

Tower Air, Inc.; Fitness Investigation

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order Instituting the Tower Air, Inc. Fitness Investigation: Order 83–4–57, Docket 41422.

SUMMARY: The Board is instituting an investigation to determine the fitness of Tower Air, Inc. to engage in scheduled foreign air transportation of persons, property, and mail between the United States, Belgium, and Israel. If the carrier is found fit, it will receive a certificate of public convenience and necessity authorizing such air transportation.

DATES: Persons wishing to file requests for additional evidence or petitions to intervene in the Tower Air, Inc. Fitness Investigation shall file their petitions in Docket 41422 by April 22, 1983, and serve such filings on all persons listed below.

ADDRESSES: Requests for additional evidence and petitions to intervene should be filed in the Docket Section, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428.

In addition copies of such filings should be served on: Tower Air, Inc., the New York and New Jersey Departments of Transportation, the Mayors and airport managers of New York City and Newark, the U.S. Departments of State and Transportation, the Federal Aviation Administration, and the Ambassadors of Belgium and Israel in Washington, D.C.

Service will also be required on any other persons filing petitions.

FOR FURTHER INFORMATION CONTACT: Ronald A. Brown, Bureau of International Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673–5203.

SUPPLEMENTARY INFORMATION: The complete text of Order 83–4–57 is available from our Distribution Section, Room 100, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 83–4–57 to that address.

By the Civil Aeronautics Board: April 12, 1983.

Phyllis T. Kaylor,

Secretary.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–479–063]

Animal Glue and Inedible Gelatin From Yugoslavia; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on animal glue and inedible gelatin from Yugoslavia. The review covers the one known exporter of this merchandise to the United States, Kemija-Impex, and the period December 1, 1981 through November 30, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

As a result of the review, the Department has preliminarily determined to require cash deposits of estimated antidumping duties equal to the margin calculated on the last known shipments. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Linda L. Pasden or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–3601/5255.

SUPPLEMENTARY INFORMATION:

Background

On September 29, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 42768–9) the final results of its last administrative review of the antidumping finding on animal glue and inedible gelatin from Yugoslavia (42 FR 64116–7, December 22, 1977) and announced its intent to conduct the next administrative review by the end of December 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of animal glue and inedible gelatin, of which there are two principal types, hide glue and bone glue. Animal glue is an organic colloid of protein derivation. There is no significant difference between animal glue and inedible gelatin. Animal glues are odorless, dry, hard, hornlike materials. They are used as general purpose adhesives in industries producing abrasives, paper containers, book and magazine bindings, and leather goods. They are also used as sizing agents and as colloids in emulsions and cleaning compounds. Animal glue and inedible gelatin are currently classifiable under items 455.4000 and 455.4200 of the Tariff Schedules of the United States Annotated.

The Department knows of only one exporter of Yugoslavian animal glue and inedible gelatin to the United States, Kemija-Impex.

The review covers the period December 1, 1981 through November 30, 1982. There were no known shipments to the United States during the period and there are no known unliquidated entries.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties of 9.7 percent, based upon the margin calculated on the last known shipments of this merchandise from Kemija-Impex, shall be required on all shipments of Yugoslavian animal glue and inedible gelatin entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. These deposit requirements shall remain in effect until publication of the final

results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication of this notice or the first workday thereafter. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

(Sec. 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53))

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

April 7, 1983.

Dated: April 7, 1983.

J. Mishell George,

Acting Deputy Assistant Secretary for Industry Projects.

[FR Doc. 83-10208 Filed 4-15-83; 8:45 am]

BILLING CODE 3510-25-M

[Case No. 620]

Richard Kwik and Jamson Aviation and Spares (PTE) Ltd.; Order Amending Denial Order

On April 23, 1982, I entered an Order denying Richard Kwik, aka Siong Hian Kwik, ("Kwik") and Jamson Aviation and Spares (Pte) Ltd. ("Jamson") all U.S. export privileges until May 31, 2001. 47 FR 18403 (April 29, 1982). On December 3, 1982, the U.S. Department of Commerce ("Department") moved that an Order to Show Cause be issued to Claypro (Pte) Ltd. ("Claypro"), directing Claypro to show cause why the Order dated April 23, 1982, should not be amended by adding Claypro as a related party. An Order to Show Cause was issued to Claypro on December 7, 1982 and service of that Order was effected on December 20, 1982.

By letter dated January 17, 1983, signed by Kwik, Claypro responded to the Order to Show Cause and submitted certain facts for consideration pursuant to the Order to Show Cause. The Department has also submitted evidence to support its allegation that Claypro is a party related to Kwik and Jamson. I have reviewed the evidence presented by the parties. My findings are detailed below.

I find that Kwik's employment with Jamson was terminated in 1982. I find further that Kwik established a company named Claypro, which was registered in Singapore on March 12, 1976. The registration states that the company is fully owned by Mr. Kwik and his wife; that they are the only registered directors; and that Claypro's interest in Jamson totals approximately 30 percent. Kwik alleges that Claypro is now known as Aeriotechnics (Pte) Ltd. ("Aeriotechnics"). In addition, I find that Kwik, through Claypro and/or Aeriotechnics, is seeking to engage in transactions involving U.S.-origin commodities. Accordingly, I find that both Claypro and the company which Kwik alleges is its successor, Aeriotechnics, are related to Kwik and Jamson. In order to prevent evasion of the Order of April 23, 1982, that Order will be made applicable not only to Kwik and Jamson but also Claypro and Aeriotechnics.

Therefore, pursuant to the authority delegated to me, 15 CFR Part 388, it is *Ordered* that the Order of April 23, 1982, is amended to add Claypro (Pte) Ltd. and Aeriotechnics (Pte) Ltd. as related parties to Kwik and Jamson and therefore subject to the terms of that Order. That Order is amended to read as follows:

III. Such denial of export privileges shall extend not only to the respondents but also to their agents, employees, representatives, and partners. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which respondents are now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services. Following the issuance of an Order to Show Cause by the Hearing Commissioner, it has been determined that the following firms are related to Kwik and Jamson and are therefore subject to the provisions of this denial: Claypro (Pte) Ltd. and Aeriotechnics (Pte) Ltd., Suite 606, 6th Floor, Colombo Court, Singapore 0617 and 4E Dyson Road, Singapore 1130.

The Order of April 23, 1982, applies to those persons and related parties specifically named in the Order, as hereby amended.

Dated: April 11, 1983: 4:05 pm EST.

Thomas W. Hoya,

Hearing Commissioner.

National Oceanic and Atmospheric Administration

Evaluation of State/Territorial Coastal Management Programs, Coastal Energy Impact Programs and National Estuarine Sanctuaries

AGENCY: National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management, Commerce.

ACTION: Notice of availability of evaluation findings.

SUMMARY: Notice is hereby given of the availability of the written evaluation, including an assessment and detailed findings for Florida, Guam, Hawaii, Pennsylvania, Indiana and Mississippi Coastal Zone Management Programs, and/or Coastal Energy Impact Programs and/or National Estuarine Sanctuaries.

Section 312 of the Coastal Zone Management Act of 1972, as amended, requires a continuing review of the performance of each coastal state with respect to the implementation of its federally approved Coastal Management Program, Coastal Energy Impact Program, and National Estuarine Sanctuary financial assistance awards. The states and territories evaluated were found to be adhering both to the programmatic items of their financial assistance awards and/or to their approved coastal management programs; and to be making satisfactory progress on award tasks, special award conditions, and significant improvement tasks aimed at program implementation and enforcement, as appropriate. Accomplishments in implementing coastal zone management programs were occurring with respect to the national coastal management objectives identified in Section 303(2)(A)–(I) of the Coastal Zone Management Act.

A copy of the assessment and detailed findings for these programs may be obtained on request from: D. H. (Bill) Stearns, Acting Evaluation Officer, Policy Coordination Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 3300 Whitehaven Street NW., Washington, D.C. 20235 (telephone: 202/634–4245).

(Federal Domestic Assistance Catalog 11.419 Coastal Zone Management Program Administration)

Dated: April 13, 1983.

K. E. Taggart,

Acting Assistant Administrator for Ocean Services and Coastal Zone Management.

BILLING CODE 3510–08–M

Marine Fisheries Advisory Committee; Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice of public meeting with partially closed session.

SUMMARY: As required by Section 10(a)(2) of the Federal Advisory Committee, 5 U.S.C. App. (1976) as amended, notice is hereby given of a partially closed meeting of the Marine Fisheries Advisory Committee (MAFAC). MAFAC was established by the Secretary of Commerce on February 17, 1971, to advise the Secretary on matters pertinent to the Department's responsibilities for marine fishery resources and on means to facilitate cooperation between public and private interests in these matters.

DATES: The meeting will convene April 28, 1983, at 8:30 a.m. and adjourn at approximately 5:00 p.m. on April 29, 1983. The closed session of the meeting will commence at 2:00 p.m. on April 29, 1983, and adjourn at 3:30 a.m.

ADDRESS: The meeting will be held at the Scripps Institution of Oceanography, in La Jolla, California.

Meeting agenda: The proposed meeting agenda is as follows:

Agenda

Open session—April 28, 1983 (8:30 a.m.–Noon) Panel presentation and discussion of tuna-related industry issues

Open session—April 28, 1983 (1:00 p.m.–5:00 p.m.)

(a) Discussion of tuna-related issues
(b) Subcommittee reports

Open session—April 29, 1983 (8:30 a.m.–11:45 a.m.)

(a) Subcommittee reports
(b) Presentation and discussion of an American Fisheries Development Corporation
(c) NMFS survey of household purchase and usage of fishery products and the attitude of fishery consumers.

Open session—April 29, 1983 (12:45 p.m.–2:00 p.m.)

(a) Menhaden and artificial reef movies
(b) User fees presentation of what services are now provided by NOAA or what services could be provided that would be useful and appropriate

Closed session—April 29, 1983 (2:00 p.m.–3:30 p.m.)

Consider and discuss the living marine resources proposals of the NOAA FY 1984 and FY 1985 budgets.

Open session—April 29, 1983 (3:30–5:00 p.m.)

Tour of the NMFS Southwest Fisheries Center.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration of the Department of Commerce, with the concurrence of the General Counsel, formally determined on April 11, 1983, pursuant to section 10(d) of the Federal Advisory Committee Act, that the agenda item to be covered during the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein, because the item will be concerned with matters that are within the purview of 5 U.S.C. Section 552b(c)(9)(B) as information the premature disclosure of which will be likely to significantly frustrate the implementation of proposed agency action. (A copy of the determination is available for public inspection and duplication in the Central Reference and Records Inspection Facility, Room 6628, Department of Commerce.) All other portions of the meeting will be open to the public.

FOR FURTHER INFORMATION OR COPIES OF MINUTES CONTACT: Ann Smith, Executive Secretary, Marine Fisheries Advisory Committee, National Marine Fisheries Service, Washington, D.C. 20235, Telephone: (202) 254–5536.

Dated: April 12, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resource Management.

BILLING CODE 3510–22–M

Coastal Zone Management; Intent To Evaluate; Louisiana, et al.

AGENCY: National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management, Commerce.

ACTION: Notice of intent to evaluate.

SUMMARY: The National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management (OCRM), announces its intent to evaluate the performance of the Louisiana Coastal Management Program (CMP) and Coastal Energy Impact Program (CEIP), the Rhode Island CMP, CEIP and National Estuarine Sanctuary (Narrangansett Bay); the Puerto Rico CMP, CEIP and National Estuarine Sanctuary (Jobos Bay); the New Hampshire CMP; and the California CEIP and National Estuarine Sanctuary (Elkhorn Slough) through May 1983. These reviews will be conducted pursuant to Section 312 of the Coastal Zone Management Act (CZMA) which requires a continuing review of the performance of the states with respect to coastal management, and their adherence to the terms of financial assistance awards funded under the CZMA. Coastal zone management is

funded under Section 306, CEIP is funded under Section 308, and the Estuarine Sanctuary Program under Section 315 of the CZMA. The reviews involve consideration of written submissions, a site visit to the state, and consultations with interested Federal, state and local agencies and members of the public. Public meetings will be held as part of the site visits. Opportunity will be provided for the submission of oral and written comments by the public. The states will issue notice of these meetings. Copies of each state's most recent performance report, as well as the financial assistance application or work program, performance reports, OCRM's notification letter and supplemental information request to the state, are available upon request from the OCRM. A subsequent notice will be placed in the **Federal Register** announcing the availability of the Final Findings based on each evaluation once these are completed.

FOR FURTHER INFORMATION CONTACT: D. H. (Bill) Stearns, Acting Evaluation Officer, Policy Coordination Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 3300 Whitehaven Street, N.W., Washington, D.C. 20235 (telephone: 202/634–4245).

(Federal Domestic Assistance Catalog 11.419 Coastal Zone Management Program Administration)

Dated: April 12, 1983.

K. E. Taggart,

Acting Assistant Administrator for Ocean Services and Coastal Zone Management.

BILLING CODE 3510–08–M

Office of the Secretary

Frequency Management Advisory Council; Notice of Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976) and Office of Management and Budget Circular A–63 of March 1974, and after consultation with GSA, the Secretary of Commerce has determined that the renewal of the Frequency Management Advisory Council is in the public interest in connection with the performance of duties imposed on the Department by law.

The Council was first established on July 19, 1965, and was to terminate on January 9, 1983. It provided advice to the Director of the Office of Telecommunications Policy (OTP), Executive Office of the President, until that office was merged by Executive Order 12046 of March 27, 1978, into the Department of Commerce, National Telecommunications and Information Administration.

In reviewing the need for the Council, the Secretary has reaffirmed its original purpose of providing advice on radio frequency spectrum allocation and assignment matters and means by which the effectiveness of Federal Government frequency management may be enhanced. Research indicates that the Council's function cannot be accomplished by any organizational element or other committee of the Department.

The Council shall continue with a balanced representation of 15 members, chaired by the Assistant Secretary for Communications and Information or designee, and will operate in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Council's revised Charter will be filed with appropriate committees of Congress and with the Library of Congress.

Inquiries or comments may be addressed to the Committee Control Officer, Mr. Charles L. Hutchison, National Telecommunications and Information Administration, U.S. Department of Commerce, Room 4701, Washington, D.C. 20230, telephone: (202) 377–0805, or the Department Committee Management Analyst, telephone: (202) 377–4217.

Dated: April 11, 1983.

Dennis C. Boyd,

Acting Director, Management Systems.

[FR Doc. 83–10196 Filed 4–15–83; 8:45 am]

BILLING CODE 3510–CW–M

Marine Fisheries Advisory Committee; Notice of Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App., (1976) and Office of Management and Budget Circular A–63 (as revised), and after consultation with the General Services Administration, the Department has determined that the renewal of the charter for the Marine Fisheries Advisory Committee is in the public interest in connection with the performance of duties imposed on the Department by law.

The Marine Fisheries Advisory Committee (MAFAC) was intitally established by the Secretary of Commerce on February 17, 1971, pursuant to Executive Order 11007. The Committee advises the Secretary of Commerce through its Chairman, the Administrator of NOAA, on matters pertinent to the Department's responsibilities for living marine resources and on means to facilitate cooperation between public and private intersts in these matters.

The Committee membership represents a collective voice for the many and diverse interests concerned with marine resources. Membership on the Committee is balanced by background and experience, living marine resources interest, geographic location, and national and regional peer group recognition. As specified in the charter, representatives are sought from the commercial and recreational fishing communities, State governments and consumer interests. Members serve for three years and approximately one-third of the members are replaced each year to provide continuity and balance.

The Marine Fisheries Advisory Committee (MAFAC) will continue to operate in compliance with the provisons of the Federal Advisory Committee Act (FACA). Copies of the MAFAC charter will be filed with the appropriate committees of Congress and with the Library of Congress. Inquiries regarding this notice may be addressed to the Committee Liaison Officer, National Oceanic and Atmospheric Administrators, U.S. Department of Commerce, Rockville, Maryland 20852, or Mrs. Yvonne Barnes, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230

Dated: April 11, 1983.

Dennis C. Boyd,

Acting Director, Management Systems.

BILLING CODE 3510–CW–M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Proposed Collection of Information

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3501 *et seq.*), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for approval of a collection of information in the form of a questionnaire about Commission publications sent to consumers.

The purpose of the questionnaire is to obtain information from persons who have received publications from the Commission. That information will be used by the Commission staff to evaluate the effectiveness of those publications to make consumers aware of safety hazards associated with

products and to make appropriate modifications of their use of those products to eliminate or reduce those hazards.

The Commission staff will send copies of the questionnaire to persons who request publications from the Commission through September 30, 1983.

Information about the Proposed Collection of Information:

Agency address: Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

Title of information collection: Questionnaire to assess CPSC publications, "Don't Let Yourself Be a Puppet."

Type of request: Approval of a new plan.

Frequency of collection: One time.

General description of respondents: Persons who have requested publications from the Commission.

Estimated average number of hours per response: 1/30 (2 minutes).

Comments: Comments on this proposed collection of information should be addressed to Gwen Pla, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, telephone: (202) 395–7313. Copies of the proposed collection of information are available from Francine Shacter, Office of Budget, Program Planning, and Evaluation, Consumer Product Safety Commission, Washington, D.C. 20207, telephone: (301) 492–6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: April 12, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

April 8, 1983.

The USAF Scientific Advisory Board Weapons and Avionics Panel of the Advanced Tactical Fighter (ATF) Technology Committee will meet at Hughes Aircraft Company, Los Angeles, CA, on May 9–10, 1983. The purpose of the meeting will be to discuss avionics technologies that have application to the ATF. Industry counseling concerning the technical state of the art available for the ATF is the secondary meeting purpose. The meeting will convene at 8:00 a.m. and adjourn at 5:00 p.m. each day.

The meeting concerns matters listed in Section 552(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 697–4648.

Winnibel F. Holmes,

Air Force Federal Register, Liaison Officer.

DEPARTMENT OF EDUCATION

National Advisory Council on Bilingual Education; Hearing

AGENCY: National Advisory Council on Bilingual Education.

ACTION: Notice of hearing.

SUMMARY: This notice sets forth the Schedule and proposed agenda of a forthcoming hearing of the National Advisory Council on Bilingual Education. Notice of this hearing is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: May 3, 1983—Public Hearing—9:00 a.m.–4:30 p.m. Public Hearing will be held at the Portland Hilton Hotel, 921 SW 6th Avenue, Portland, Oregon 97204.

FOR FURTHER INFORMATION CONTACT: Ramon Ruiz, Designated Federal Official, Room 421, Reporter's Building, 400 Maryland Avenue, SW., Washington, D.C. 20202 (202–245–2600).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Bilingual Education is established under Section 732(a) of the Bilingual Education Act (20 U.S.C. 3242). The Council is established to advise the Secretary of the Department of Education concerning matters arising in the administration of the Bilingual Education Act and other laws affecting the education of limited English proficient populations.

May 3, 1983 in consonance with the Council's mission to advise in the preparation of regulations under the Bilingual Education Act, testimony will be heard on the following topics which impact on the Migrant Bilingual Community:

(1) 1983 Reauthorization

(2) Research

(3) Reports of the Effectiveness of Bilingual Education

(4) Interrelations and Interdependency of Bilingual Education and Modern Language Teachers

Witnesses should notify Ramon Ruiz (see address above) of their intention of testifying.

The following procedures shall be observed during the public hearings:

(1) Witnesses shall be heard on a first come basis

(2) Witnesses shall limit their testimony to twenty minutes.

(3) All testimony shall be tape recorded

(4) Exceptions to the aforementioned procedures shall be at the discretion of the Chairperson.

Records are kept of all Council proceedings, and are available for public inspection at the Office of Bilingual Education and Minority Languages Affairs, Room 421, Reporters Building, 400 Maryland Avenue, SW., Washington, D.C. 20202 from the hours of 8:00 a.m.–4:30 p.m.

Dated: April 12, 1983.

Jesse M. Soriano,

Director, Office of Bilingual Education, and Minority Languages Affairs.

National Advisory Council on Bilingual Education; Meeting

AGENCY: National Advisory Council on Bilingual Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Bilingual Education. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: May 11–13, 1983—Business Meeting 9:00–4:30 p.m.

ADDRESS: The Business Meeting will be held in Room 409 of the Reporter's Building, 300 7th Street, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ramon Ruiz, Designated Federal Official, Room 421, Reporter's Building, 400 Maryland Avenue, SW., Washington, DC 20202, (202) 245–2600.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Bilingual Education is established under Section 732(a) of the Bilingual Education Act (20 U.S.C. 3242). The Council is established to advise the Secretary of the Department of Education concerning matters arising in the administration of the Bilingual Education Act and other laws affecting the education of limited English proficient populations. The meeting of the Council is open to the

public. The proposed agenda includes the following:

May 11, 1983

9:00–9:30 a.m.—Appoint parliamentarian—Presentation of Overview.
9:30–10:30 a.m.—1983 Annual Report Review—Annual Report Committee.
10:30–10:45 a.m.—Break.
10:45–12:00 noon—1983 Annual Report Review (continued).
12:00–1:30 p.m.—Lunch.
1:30–4:30 p.m.—1983 Annual Report Review to completion and approval.
Evening—Committee Meetings to be set by chairs. Time and place to be announced. Address reauthorization issues, OBEMLA administration of Title VII, grants and reader process, funding, Charter language, etc. Prepare recommendations.

May 12, 1983

9:00–12:00 noon—Presentation by Office of Civil Rights on National Origin Legislation—Title VI—Reauthorization Issues
—Legislation—H.R. 11 introduced by Rep. Carl Perkins (D-Ky.)
—Language and content
—Status
—Department of Education Bill
—Content
—Status
—Recommendations by Legislation Committee
—Discussion
—Adoption of Recommendations
—Letter to Secretary Bell drafted
—Copies to key committee chairmen in Congress
—*1984 Appropriations*—Recommendations from Council to be inserted as part of record of Sub-Committee on Labor, Human Resources, and Education of Senate Appropriations Committee—Dr. Flores and Budget Committee
—Testimony for Reauthorization Hearings in September
—NACBE Charter.
12:00–1:30 p.m.—Lunch.
1:30–4:30 p.m.—1983–84 Committee Assignments
—Committees and functions
—1984 Annual Report
—Dissertation Awards or Teacher of the Year Award.

May 13, 1983

9:00–12:00 noon—Report from Testimony Committee
—Other Committee Reports
—Proposed 1983–84 Calendar
12:00–1:30 p.m.—Lunch.
1:30–4:30 p.m.—Unfinished Business. Adjournment.

Dated: April 12, 1983.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Conduct of Employees; Notice of Waiver Pursuant to Section 605(a)(3) of the Department of Energy Organization Act

Section 605(a)(3) of the Department of Energy Organization Act (Pub. L. 95–91) authorizes the Secretary of Energy to waive the post-employment restrictions of section 605 of the Act to permit a former employee with outstanding scientific or technological qualifications to make appearances before or communications to the Department in connection with a particular matter which lies in a scientific or technological field where it has been determined that such a waiver would serve the national interest.

It has been established to my satisfaction that George A. Wiltsee, Jr., former Deputy Director of the Grand Forks Energy Technology Center, has outstanding scientific and technological qualifications in the fields of chemical engineering, fossil energy research, and coal utilization technology.

Further, I am satisfied that it serves the national interest to permit him, in his capacity as the new Director of the University of North Dakota Energy Research Center, to appear before and communicate with employees of the Department of Energy with respect to the development, implementation, and funding of the low-rank coals research and development program conducted by the Center pursuant to a cooperative agreement between the Center and the Department of Energy. I am satisfied that these activities are in a scientific or technological field and require the qualifications stated.

I have, therefore, waived the post-employment prohibitions of section 605(a)(1) of the Department of Energy Organization Act with respect to contact by Mr. Wiltsee with employees of the Department of Energy, to permit him, in his capacity as Director of the University of North Dakota Energy Research Center, to undertake the stated activities on behalf of the Center.

Dated: April 8, 1983.

Donald Paul Hodel,

Secretary.

Federal Energy Regulatory Commission

[Docket No. QF83-233-000]

Applied Power Technology, Inc., Application for Commission Certification of Qualifying Status of a Small Power Production Facility

April 13, 1983.

On March 21, 1983, Applied Power Technology, Inc., (Applicant), of 3432 Mendocino Avenue, Santa Rosa, California 95401, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility will be located at Hayfork, California. The generating capacity of the facility 15 megawatts. The primary energy source will be biomass in the form of wood waste. There are no other biomass fueled small power production facilities owned by the Applicant located within one mile of the site. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Project No. 3507-001]

City of Santa Clara; Surrender of Preliminary Permit

April 13, 1983.

Take notice that the City of Santa Clara, Permittee for the proposed East Park Dam Hydroelectric Project No. 3507, has requested that its preliminary permit be terminated. The preliminary permit was issued on May 28, 1982, and would have expired on October 31, 1983. The project would have been located at the United States Bureau of Reclamation's East Park Dam on Little Stony Creek in Colusa County, California.

The Permittee filed its request on March 21, 1983, and the surrender of the preliminary permit for Project No. 3507 is deemed effective as of the date of this notice.

[Project No. 6100-001]

Energenics Systems, Inc.; Surrender of Preliminary Permit

April 13, 1983.

Take notice that Energenics Systems, Inc. (ESI) Permittee for the Blackwater Dam Project No. 6100, located on the Blackwater River in Merrimack County, New Hampshire has requested that its preliminary permit be terminated. The preliminary permit was issued on October 18, 1982, and would have expired on April 30, 1984.

ESI states that the lack of adequate head and flow have rendered the project infeasible.

ESI's request was dated March 21, 1983. The surrender of the aforementioned permit is accepted as of the date of this notice.

Lynn E. Stevenson—Lot 3; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

April 13, 1983.

On March 21, 1983, Lynn E. Stevenson of Star Route, Box 3, Bliss, Idaho 83314, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The hydroelectric facility is located in Gooding County, Idaho. The generating capacity of the facility is 80 kilowatts. The facility is located approximately one mile from another small power production facility owned by the Applicant. The waters used for power generation comes from springs in the same general area, but the same waters are not used as an energy source in both of the facilities. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to

the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5953-001]

Stephen E. & George S. Austin; Surrender of Preliminary Permit

April 13, 1983.

Take notice that Stephen E. and George S. Austin, Permittees for the Pike Mill Project No. 5953, located on the Moose River in Concord County, Vermont, have requested that its preliminary permit be terminated. The preliminary permit was issued on September 27, 1982, and would have expired on August 31, 1984.

The Applicants request the surrender due to economic infeasibility.

The Applicants' request was dated March 25, 1983. The surrender of the permit is accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

[Project No. 5986-001]

Stephen E. & George S. Austin; Surrender of Preliminary Permit

April 13, 1983.

Take notice that Stephen E. and George S. Austin, Permittees for the Bradley Vail Mill Project No. 5986, located on the Moose River in Concord County, Vermont, have requested that their preliminary permit be terminated. The preliminary permit was issued on July 28, 1982, and would have expired December 31, 1983.

The Applicants request the surrender due to economic infeasibility.

The Applicants' request was dated March 25, 1983. The surrender of the permit is accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

Office of Hearings and Appeals

Objection to Proposed Remedial Order Filed; Week of March 7 Through

March 11, 1983

During the week of March 7 through March 11, 1983, a notice of objection to the proposed remedial order listed in the Appendix to this Notice was filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial order described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in this proceeding should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Dated: April 11, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Summa Energy Corporation, Wichita Falls, Texas; HRO-0131, crude oil

On March 8, 1983, Summa Energy Corporation, 5200 Lakeshore Drive, Wichita Falls, Texas 76310 filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest District Office of the Economic Regulatory Administration issued to the firm on February 2, 1983. In the PRO the Southwest District found that during the period June 1979 through February 1980, Summa violated the crude oil reseller and certification regulations in 10 CFR Part 212 of the Mandatory Petroleum Price Regulations.

According to the PRO the Summa violation resulted in $860,903.83 of overcharges.

[FR Doc. 83-10130 Filed 4-15-83; 8:45 a.m.]

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of March 21 through March 25, 1983

During the week of March 21 through March 25, 1983, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Thornton Oil Corp, 3/22/83; HFA-0111

Thornton Oil Corporation filed an Appeal from a partial denial by the Acting Disclosure Officer of the DOE Office of Special Counsel of a Request for Information which the firm had submitted under the Freedom of Information Act. In considering the appeal, the DOE found that the withholding of certain documents had not been properly justified and that certain responsive documents had not been identified in the index of documents. This portion of the determination was remanded for an additional search for documents and for a more complete justification for withholding of certain documents. In addition, factual information in some documents withheld pursuant to exemption 5 was ordered released. Accordingly, the Appeal was granted in part.

Remedial Order

J. R. Cone, 3/25/83; DRO-0247

J. R. Cone (Cone) objected to a Proposed Remedial Order (PRO) which the Southwest Enforcement District of the DOE's Economic Regulatory Administration (ERA) issued to him on May 31, 1979. In the PRO, the ERA found that during the period November 1973 through February 1977, Cone incorrectly classified two properties as stripper well properties and thus sold crude oil produced from those properties at prices exceeding the applicable ceiling prices permitted by DOE regulations. After considering Cone's objections, the DOE concluded that the PRO, with modifications, should be issued as a final Remedial Order. The important issues considered in the Decision and Order include: (i) the validity of Ruling 1974-29 and whether injection wells should be included in the calculation of average daily production; (ii) the validity of Ruling 1975-12, concerning the requirement that separate tubing strings be utilized to produce crude oil from two or

more producing formations or reservoirs to qualify a well as a multiple completion well; and (iii) whether a PRO is invalid to the extent that it deviates from or extends beyond the allegations contained in the Notice of Probable Violation.

Request for Modification and/or Rescission

Husky Oil Company, 3/22/83; HER-0063

On March 17, 1983, Husky Oil Company filed with the Office of Hearings and Appeals a Motion, for Reconsideration. In this submission, Husky requested that the OHA reconsider its approval of discovery requests submitted by Exxon Company, U.S.A. and Cities Service Company. *Exxon Co., U.S.A.*, 10 DOE ¶ 84,029 (1983). Those discovery requests related to entitlements exception relief that had been tentatively granted to Husky for the period January 1978 through January 1981 in a Proposed Decision and Order issued on February 4, 1983. In considering Husky's Motion, the OHA stated that the issues related to Husky's level of relief must be evaluated on the basis of the firm's financial results for the period under consideration. Therefore the OHA determined that discovery of Husky's financial data is relevant and material to a resolution of the underlying exception proceeding. The OHA also disagreed with Husky's contention that the discovery would be burdensome. The OHA therefore denied Husky's Motion.

Motion for Discovery

Gulf Oil Corporation, 3/22/83; HED-0014

Gulf Oil Corporation filed a Motion for Discovery on March 15, 1983. The Motion related to a Proposed Decision and Order issued to Husky Oil Company on February 4, 1983, in Case No. BEX-0210. In the Motion, Gulf requested access to arguably confidential data that Husky submitted in its pending exception proceeding. According to Gulf, the discovery is relevant and material to an evaluation of Husky's eligibility for relief under the standards that the Office of Hearings and Appeals applied in the Proposed Decision. In considering the Gulf Motion, the OHA determined that Gulf's request satisfies the discovery criteria in 10 C.F.R. § 205.66, and therefore granted the Motion.

Supplemental Order

Atlantic Richfield Co., HRX-0060; Gulf Oil Corp., HRX-0061; Marathon Oil Co., HRX-0062; Texaco Inc., HRX-0064; Louisiana Land & Exploration Co., 3/23/83; HRX-0063

On January 14, 1983, Atlantic Richfield Company, Gulf Oil Corporation, Marathon Oil Company, Standard Oil Company (OHIO), Texaco Inc. and Louisiana Land and Exploration Company (the "producers") filed a motion to compel additional discovery with the Office of Hearings and Appeals. In that motion, the producers requested the OHA to order the Office of Special Counsel for Compliance (OSC) to produce certain documents which the OSC had identified in response to the OHA's discovery order in *Atlantic Richfiled Co.*, 5 DOE ¶ 82,521 (1980), and for which the OSC has asserted claims of privilege. On February 14, 1983, the OHA issued a decision sustaining all but one of the privilege claims at issue and ordered the OSC to submit that document to the OHA for *in camera* review. *Atlantic Richfield Co.*, 10 DOE ¶ 84,027 (1983). Pursuant to that decision, the OSC submitted one document to the OHA. After completing it is *in camera* review, the OHA upheld the OSC's privilege claim for the document submitted.

Refund Applications

Standard Oil Company (Indiana)/John's Self Service et al., 3/24/83; RF21-834 et al.

The DOE issued a Decision and Order concerning 270 Applications for Refund from branded retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶ 85,048 (1982). Each retailer therefore submitted detailed information concerning its Amoco purchase volumes. After analyzing this information, the DOE concluded that each of the 270 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases during the consent order period. Accordingly, these applications were granted in full.

Vickers Energy Corporation, Crest Petroleum Corporation, 3/21/83; RF1-217

Crest Petroleum Corporation, a reseller of petroleum products, filed an Application for Refund seeking a portion of the fund obtained by the DOE through a consent order with Vickers Energy Corporation. Because Crest's purchases from Vickers exceeded the 50,000 gallon per month small claims threshold, Crest was required to demonstrate that it had been injured as a result of Vicker's pricing practices. Crest provided no pricing information or other concrete data which established that the firm did not pass through any alleged Vickers' overcharges to its customers. The DOE therefore determined that Crest had failed to make the necessary showing of injury. Accordingly, Crest's application was granted at the threshold level.

Protective Orders

The following firms filed Applications for Protective Orders. The applications, if granted, would result in the issuance by the DOE of the proposed Protective Orders submitted by the firms. The DOE granted the following applications and issued the requested Protective Orders as Orders of the Department of Energy:

Name and Case No.

ERA/Marathon Oil Co.; HRJ-0033
ERA/Murphy Oil Corp.; HRJ-0034
Husky Oil Co. of Delaware, Exxon Co., U.S.A., Cities Service Co., Gulf Oil Corp.; HEJ-0038

Dismissals

The following submissions were dismissed:

Name and Case No.

Bosselman & Hartner Truck Plaza; RF21-3496, RF21-3497
Fasgo, Inc.; HRO-0073, HRO-0085, HRH-0085
Fullan Oil Company; RF21-1905
Marie Lynch; RF21-2291

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Dated: April 11, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

BILLING CODE 6450-01-M

Office of the Secretary

Oak Ridge Operations Office; Trespassing on DOE Property

AGENCY: Department of Energy.

ACTION: Designation of Commerce Building of Oak Ridge, Inc. as off-limits area.

SUMMARY: The Department of Energy hereby designates the Commerce Building of Oak Ridge, Inc. an Off-Limits Area in accordance with 10 CFR Part 860, making it a Federal crime under 42 U.S.C. 2278a for unauthorized persons to enter into or upon the Commerce Building of Oak Ridge, Inc. If unauthorized entry into or upon the building is into an area enclosed by a fence, wall, roof, or other standard barrier, conviction for such unauthorized entry may result in a fine of not more than $5,000 or imprisonment for not more than one year or both. If unauthorized entry into or upon the building is into an area not enclosed by a fence, wall, roof, or other standard barrier, conviction for such unauthorized entry may result in a fine of not more than $1,000.

FOR FURTHER INFORMATION CONTACT:

William Luck, Office of General Counsel, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, D.C. 20585 (202) 252-6975
and
James Leonard, Supply Division, U.S. Department of Energy, Oak Ridge Operations Office, P.O. Box E, Oak Ridge, Tennessee 37830 (615) 576-0999.

Notice

Pursuant to Section 229 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2278a), Section 104 of the Energy Reorganization Act of 1974 (42 U.S.C.

5814), as implemented by 10 CFR Part 860 published in **Federal Register** on July 9, 1975 (40 FR 28789), and Section 301 of the Department of Energy Organization Act (42 U.S.C. 7151), the Department of Energy hereby gives notice that the Commerce Building of Oak Ridge, Inc. is designated an Off-Limits Area and prohibits the unauthorized entry and the unauthorized introduction of weapons or dangerous materials, as provided in 10 CFR 860.3 and 860.4 into or upon the Commerce Building of Oak Ridge, Inc.

The Commerce Building of Oak Ridge, Inc. is a leased facility located in the 2nd Civil District of Anderson County, Tennessee, within the corporate limits of the City of Oak Ridge at 101 East Tennessee Avenue. This building is a two-story structure containing 13,257 square feet and is identified as Parcel 82 on City of Oak Ridge Plat 17CG. A United States Department of Energy sign is affixed to the front entrance of this building.

Notices stating the pertinent prohibitions of 10 CFR 860.3 and 860.4 and penalties of 10 CFR 860.5 will be posted at all entrances of the building and at intervals along its perimeter as provided in 10 CFR 860.6.

Dated at Washington, D.C., this 31st day of March 1983.

Troy E. Wade II,

Acting Assistant Secretary for Defense Programs.

BILLING CODE 6450-01-M

Public Comment and Hearings on the February 9, 1983, Senate Armed Services Committee Hearing Record on the Environmental Consequences of the Restart of the L Reactor at the Savannah River Plant

AGENCY: Department of Energy.

ACTION: Notice of a 90-day public comment period and public hearings.

SUMMARY: The Department of Energy (DOE) announces the initiation of a 90-day public comment period on the record of the public hearing conducted by the Senate Armed Services Committee on February 9, 1983, in North Augusta, South Carolina, concerning the environmental consequences of the restart of the L Reactor at the Savannah River Plant. At the request of Senator Strom Thurmond and Senator Mack Mattingly, the Department is conducting a 90-day public comment period on the hearing record, to include four public hearings. Consistent with the purpose of the FEbruary 9, 1983, Senate Armed Services Committee hearing, comments on the record of that hearing should be limited to the environmental consequences of restarting the L Reactor. Written comments on the February 9, 1983, hearing record may be submitted at any time during the 90-day comment period and should be directed to Mr. Melvin J. Sires, III, at the address listed below. The Department will also hold public hearings in Aiken and Beaufort, South Carolina, and Augusta and Savannah, Georgia, for the purpose of receiving oral comments on the hearing recordd. Within 30 days after the 90-day public comment period, the Department will submit a report to the Armed Services and Appropriation Committees of the Senate and House of Representatives summarizing the comments received during the public comment period, and the Department's actions to address those comments. All oral comments received at the hearings, and all written comments postmarked by July 18, 1983, will be considered by the Department in preparing this report.

Dates and times: The 90-day public comment period will begin on April 18, 1983, and will end on July 17, 1983. All written comments postmarked by July 18, 1983, will be considered by the Department in preparing its report to the Committees.

Oral comments will be received at public hearings which will be held as follows:

1. Augusta, Georgia, on May 23, 1983, at 9:00 a.m. and 6:00 p.m. at the National Guard Armory, 1 Milledge Road, Augusta, Georgia 20904.
2. Aiken, South Carolina, on May 24, 1983, at 9:00 a.m. and 6:00 p.m. at the Odell Weeks Activity Center Gymnasium, 1700 Whiskey Road, Aiken, South Carolina 29801.
3. Savannah, Georgia, on May 26, 1983, at 9:00 a.m. and 6:00 p.m. at the Civic Center of Savannah, Orleans Square, Savannah, Georgia 31401.
4. Beaufort, South Carolina, on May 27, 1983, at 9:00 a.m. and 6:00 p.m. at the Neighborhood Activities Center, Green and Haymen Streets, Beaufort, South Carolina, 29902.

Hearing Record Availability: Copies of the record of the February 9, 1983, public hearing conducted by the Senate Armed Services committee are being distributed to Federal, State, and local elected officials of the states of South Carolina and Georgia, to individuals of record who received the Environmental Assessment: L Reactor Operations, Savannah River Plant, Aiken, South Carolina (DOE/EA-0195), dated August, 1982, and to those individuals who participated in the February 9, 1983, Senate Armed Services Committee public hearing on the environmental consequences of the restart of the L Reactor. Copies of the hearing record may also be obtained by contacting Mr. M. J. Sires at the address listed below. In addition, copies of the hearing record are available for inspection at the reading rooms and libraries listed below.

ADDRESSES: Written comments, requests for copies of the February 9, 1983 hearing record, requests to speak at the hearings, and requests for further information on the 90-day, public comment period should be directed to: Mr. Melvin J. Sires III, Assistant Manager for Health, Safety, and Environment, Department of Energy, Savannah River Operations Office, P.O. Box A, Aiken, South Carolina 29801; (803) 725-2597.

Envelopes should be marked "Attention: L Reactor comment."

Copies of the February 9, 1983 hearing record, the L-Reactor environmental assessment and Finding of No Significant Impact are available for inspection at the following locations:

Freedom of Information Reading Room, Room 1E-190, U.S. Department of Energy, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585;

Augusta Regional Library, 902 Greene Street, Augusta, Georgia 30901; (404) 724-1871;

Washington Memorial Library, 1180 Washington Avenue, Macon, Georgia 31202; (912) 744–0800;
Aiken-Bamberg-Barnwell-Edgefield Regional Library, 1307 Georgia Avenue, North Augusta, South Carolina 29841; (803) 279–5767;
Orangeburg County Free Library, 510 Lories NE., P.O. Box 1367, Orangeburg, South Carolina 29115; (803) 531–4636;
Beaufort County Library, 710 Craven Street, Beaufort, South Carolina 29902; (803) 524–0762;
Spartanburg County Library, 333 South Pine Street, Spartanburg, South Carolina 29304; (803) 596–3505; and
Greenville County Library, 300 College Street, Greenville, South Carolina 29601; (803) 242–5000.

Hearing Procedures: The Department of Energy invites any person who has an interest in the environmental consequences of the restart of the L Reactor or who is a representative of a group of persons that has an interest in the environmental consequences of the restart of the L Reactor, to submit written comments or to make an oral presentation at one of the public hearings. Individuals desiring to make oral presentations should notify Mr. M. J. Sires at the above address no later than one week before the hearing so that the Department may arrange a schedule for the presentations. Persons who have not submitted a request to speak in advance may register to speak at the public hearings before each hearing commences; they will be called on to present their comments as time permits. In order to ensure that everyone who wishes to speak has a chance to do so, five minutes will be allotted to individuals, and ten minutes will be allotted for individuals representing groups.

The Department will provide a panel who will discuss at the beginning of each session the environmental aspects of the restart of L Reactor and who may clarify or comment on issues raised during the hearings. There will be no cross examination and questions, to either the panel or persons making presentations, can only be asked by the hearing officer. Any further procedural rules needed for the proper conduct of each hearing will be announced by the hearing officer prior to the start of the hearing.

All written comments and the hearing transcripts will be included as appendices to the final report. All persons receiving a copy of the Senate Armed Service Committee hearing record from the Department, who make a presentation at the public hearing, or who provide written comments, will be sent a copy of the Department's report to the Committees.

Issued at Washington, D.C., on April 12, 1983.

Troy E. Wade, II,

Acting Assistant Secretary for Defense Programs.

[FR Doc. 83-10277 Filed 4-15-83; 8:45 am]

BILLING CODE 6450-01-M

Southeastern Power Administration

Proposed Rate Adjustment, Public Forum, and Opportunities for Public Review and Comment

AGENCY: Southeastern Power Administration (Southeastern), DOE.

ACTION: Notice of proposed rate adjustment for Georgia-Alabama System of Projects, notice of public forum and opportunity for review and comment.

SUMMARY: Southeastern proposes to revise existing schedules of rates and charges applicable to the sale of power from the Georgian-Alabama System of Projects effective for a one -year period, October 1, 1983, through September 30, 1984.

Opportunities will be available for interested persons to review the present rates, the proposed rates and supporting studies, to participate in a forum and to submit written comments. Southeastern will evaluate all comments received in this process.

DATES: Written comments are due on or before July 1, 1983. A public information and comment forum will be held in Atlanta, Georgia, on June 2, 1983. Persons desiring to speak at the forum should notify Southeastern at least 4 days before the forum is scheduled, so that a list of forum participants can be prepared. Others may speak if time permits.

ADDRESSES: Five copies of written comments should be submitted to: Administrator, Southeastern Power Administration, Department of Energy, Samuel Elbert Building, Elberton, Georgia 30635. The public information and comment forum for the Georgia-Alabama System of Projects will begin at 10 a.m. on June 2, 1983, in the Hartsfield Conference room at the Holiday Inn, North-Airport, 1380 Virginia Avenue, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT: Leon Jourolmon, Jr., Chief, Division of Fiscal Operations, Southeastern Power Administration, Department of Energy, samuel Elbert Building, Elberton, Georgia 30635, (404) 283–3261.

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission (FERC) By order issued April 8, 1981, in Docket No. EF79–3011, confirmed and approved Wholesale Power Rate Schedules GAMF–1–B, GAMF–2–B, ALA–1–B, MISS–1–B, SC–1–B, SC–2–B, CAR–1–B, and CAR–2–B applicable to Georgia-Alabama System of Projects' power for a period ending September 30, 1983. The FERC by order issued April 9, 1982, in Docket No. EF82–3011, confirmed and approved Rate Schedules CAR–1–C as a replacement for CAR–1–B for a period ending September 30, 1983 and eliminated CAR–2–B.

Additional time is needed to negotiate contracts to implement the new written power marketing policy for the Georgia-Alabam System of Projects. Therefore, Southeastern is proposing to establish short-term rates to allow time to negotiate contracts and permit development of appropriate rates applicable to the new policy.

Discussion

Existing rate schedules are predicated upon a March 1979 repayment study and other supporting data all of which are contained in FERC Docket No. EF79–3011, and upon a September 1981 repayment study and other supporting data all of which are contained in FERC Docket No. EF82–3011. The current repayment study prepared in March of 1983 shows that existing rates are not adequate to recover all costs required by present repayment criteria.

A revised repayment study with a $5,716,000 revenue increase in each future year over the current repayment study demonstrates that all costs are paid within their repayment life. Therefore, Southeastern is proposing to revise existing rates so as to recover that additional $5,716,000. The increase is primarily due to escalated costs at the generating projects. The overall increase amounts to a 17.5 percent increase in rates, and Southeastern is proposing to increase all applicable rates in the system uniformly by 17.5 percent. It is proposed that revised rate schedules applicable to Customers purchasing power from the Georgia-Alabama System of Projects contain the following unit rates:

PROPOSED UNIT RATES

Dependable capacity/mo-except preference customers Duke area	$1.20

PROPOSED UNIT RATES—Continued

Dependable capacity/mo-preference customers	
Duke area	$2.73
Delivered energy/kwh (mills)	4.29
Energy at projects/kwh (mills)	3.53
Dump and excess energy/kwh (mills)	2.64
Standby capacity/kw	$0.33
Use charge/day	$0.041

The referenced March 1983 current repayment study along with a revised repayment study dated March 1983 and previous system repayment studies are available for examination at the Samuel Elbert Building, Elberton, Georgia 30635. Proposed Rate schedules GAMF–1–C, GAMF–2–C, ALA–1–C, MISS–1–C, SC–1–C, SC–2–C, CAR–1–D, and CAR–2–C (a replacement rate schedule for CAR–2–B which was eliminated in rate filing contained in FERC Docket No. EF82–3011) are also available.

Issued at Elberton, GA., April 8, 1983.

Kenelm E. Rucker,

Acting Administrator.

ENVIRONMENTAL PROTECTION AGENCY

[OPRM–FRL 2348–8]

Agency Forms Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests that have been forwarded to the Office of Management and Budget (OMB) for review. The information collection requests listed are available to the public for review and comment.

FOR FURTHER INFORMATION CONTACT: David Bowers, Office of Standards and Regulations, Information Management Section (PM–223), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, telephone (202) 382–2742 or FTS 382–2742.

SUPPLEMENTARY INFORMATION:

Air Programs

• Title: Declaration Form for Imported Motor Vehicles Not Conforming to Federal Air Pollution Regulations (EPA ID 0223).

Abstract: When importers bring motor vehicles and engines into the country, they must file a declaration of noncompliance with U.S. Customs for any that do not meet Federal emission requirements. EPA uses this information to ensure that these imports are either brought into compliance with the regulations or exempted.

Respondents: Importers of motor vehicles and engines.

• Title: Statement for Residents of High-Altitude Areas Purchasing Low-Altitude Vehicles Attesting to Intended Use (EPA ID 1032).

Abstract: In order to limit their liability, vehicle manufacturers may collect from dealers statements signed by purchasers of low-altitude vehicles in high-altitude areas. EPA will occasionally review these statements, which attest to the planned use of the vehicles.

Respondents: Residents of high-altitudes who purchase low-altitude motor vehicles.

Agency Forms Cleared by OMB Between March 29 and April 4, 1983

• EPA ID 0805, General Facility Operating Requirements, was approved March 30 (OMB #2050–0012).

• EPA ID 0811, Unsaturated Zone Monitoring at Hazardous Waste Land Treatment Units Under RCRA, was approved on March 30 (OMB #2000–0461).

• EPA ID 0812, Information Requirements for Locations Standards, was approved on March 30 (OMB #2050–0010).

Comments on all parts of this notice should be sent to:

David Bowers, U.S. Environmental Protection Agency, Office of Standards and Regulations (PM–223), 401 M Street, SW., Washington, D.C. 20460

and

Anita Ducca, Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building (Room 3228), 726 Jackson Place, NW., Washington, D.C. 20503.

Dated: April 8, 1983.

N. Phillip Ross,

Chief, Statistical Policy Staff.

[FR Doc. 83–10202 Filed 4–15–83; 8:45 am]

BILLING CODE 6560–50–M

[OPTS–59119A TSH–FRL 2348–4]

Toxic Substances; Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of TM–83–29 and TM–83–30, two applications for test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA). The test marketing conditions are described below.

EFFECTIVE DATE: April 11, 1983.

FOR FURTHER INFORMATION CONTACT: Theodore C. Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–204, 401 M St. SW., Washington, DC. 20460, (202–382–3725).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and to permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities.

EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the applications, and for the time periods specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, number of workers exposed to the new chemical, and the levels and duration of exposure must not exceed that specified in the applications. All other conditions described in the applications must be met. The following additional restrictions apply:

1. The applicant must maintain records of the date(s) of shipment(s) to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

2. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME.

TME 83–29

Date of Receipt: March 4, 1983.

Notice of Receipt: March 18, 1983 (48 FR 11499).

Applicant: Confidential.

Chemical: Etheric aromatic ester (Generic).

Use: Confidential.

Production Volume: Confidential.

Number of Customers: 1.

Exposure Information: During manufacturing and processing, up to 3 workers may be exposed to the test market substance. Overall exposure per batch of new substance processed is not

expected to exceed 3 man-hours per batch. A total of 18 to 20 batches are expected to be processed during the test market period. Exposure by dermal and eye contact will be minimized by the use of gloves and protective eye gear. Exposure via inhalation is expected to be minimal because of the low vapor pressure of the new chemical substance. The new substance will be manufactured in a closed process.

Test Marketing Exemption Period: 6 months.

Commencing on: April 11, 1983.

Risk Assessment: The Agency did not identify any significant health or environmental effects based on the information received from the submitter and other data currently available to the Agency. In addition, the production volume and potential for exposure and release are very low. The overall concerns, therefore, for health and ecotoxicity are low.

Public Comments: None.

TME 83-30.

Date of Receipt: March 4, 1983.

Notice of Receipt: March 18, 1983 (48 FR 11499).

Applicant: Confidential.

Chemical: Organosiloxane copolymer (Generic).

Use: Confidential.

Production Volume: Confidential.

Exposure Information: Exposure to workers and the environment will be minimal. (A Material Safety Data Sheet will be provided), and appropriate worker practices, including personal protective equipment, will be employed by workers.

Test Marketing Period: 1 year.

Commencing on: April 11, 1983.

Risk Assessment: Based on the type of polymer, molecular weight, and that the test market substance is not designed to be water soluble, no significant health or environmental concerns were identified.

Public Comments: None.

The Agency reserves the right to rescind approval of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk to health or the environment.

Dated: April 11, 1983.

Marcia Williams,

Acting Director, Office of Toxic Substances.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

BA Co. and Microband Corp. of America; Hearing

Memorandum Opinion and Order

Adopted: April 6, 1983.

Released: April 11, 1983.

By the Common Carrier Bureau.

In re applications of Robert A. Gordon d.b.a. the BA Company; CC Docket No. 83-368, File No. 638-CM-P-80; and Microband Corporation of America; CC Docket No. 83-369, File No. 4158-CM-P-80; for construction permits in the Multipoint Distribution Service for a new station at Homestead, Florida; designating applications for consolidated hearing on stated issues.

1. For consideration are the above-referenced applications.[1] These applications are for construction permits in the Multipoint Distribution Service and they propose operations on Channel 1 at Homestead, Florida. The applications are therefore mutually exclusive and, under present procedures, require comparative consideration. These applications have been amended as result of informal requests by the Commission's staff for additional information. There are no petitions to deny or other objections under consideration.[2]

2. Upon review of the captioned applications, we find that these applicants are legally, technically, financially, and otherwise qualified to provide the services which they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

3. Accordingly, *it is hereby ordered*, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, 47 U.S.C. 309(e) and § 0.291 of the Commission's Rules, 47 CFR 0.291, the above-captioned applications *are designated for hearing*, in a *consolidated proceeding*, at a time and place to be specified in a subsequent Order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In making such a determination, the following factors shall be considered:[3]

(a) The relative merits of each proposal with respect to efficient frequency use, particularly with regard to compatibility with co-channel use in nearby cities and adjacent channel use in the same city;

(b) The anticipated quality and reliability of the service proposed, including installation and maintenance programs; and

(c) The comparative cost of each proposal considered in context with the benefits of efficient spectrum utilization and the quality and reliability of service as set forth in issues (a) and (b).

4. *It is further ordered*, That Robert A. Gordon d.b.a. The BA Company, Microband Corporation of America and the Chief, Common Carrier Bureau, *are made parties* to this proceeding.

5. *It is further ordered*, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of Section 1.221 of the Commission's Rules, 47 CFR 1.221.

6. The Secretary shall cause a copy of this Order to be published in the **Federal Register**.

James R. Keegan,

Chief, Domestic Facilities Division, Common Carrier Bureau.

BILLING CODE 6712-01-M

FEDERAL HOME LOAN BANK BOARD

Biscayne Federal Savings & Loan Association, Miami, Fla.; Notice of Appointment of Receiver

Notice is hereby given that pursuant to the authority contained in Section 5(d)(6)(A) of the Home Owners' Loan Act of 1933 ("HOLA"), as amended, 12 U.S.C. 1464(d)(6)(A) (1976), the Federal Home Loan Bank Board appointed the Federal Savings and Loan Insurance Corporation as sole receiver for Biscayne Federal Savings and Loan Association, Miami, Florida, on April 6, 1983.

Dated: April 12, 1983.

J. J. Finn,

Secretary.

[FR Doc. 83-10177 Filed 4-15-83; 8:46 am]

BILLING CODE 6720-01-M

[1] On August 18, 1980, Tymshare, Inc. (Tymshare) and Arthur Lipper Corporation (ALC) executed a contract whereby ALC agreed to transfer control of Microband Corporation of America to Tymshare. *Transfer of Control/MDS*, 85 FCC 2d 1023 (1981).

[2] By Memorandum Opinion and Order adopted June 26, 1981 and released July 2, 1981, Mimeo No. 001863, Microband was granted an exemption from the Commission's "cut-off" rules pursuant to § 21.31 of the Rules, 47 CFR 21.31, to preserve the status of its pending mutually exclusive application.

[3] Consideration of these factors shall be in light of the Commission's discussion in *Frank K. Spain*, 77 FCC 2d 20 (1980).

FEDERAL MARITIME COMMISSION

[Agreements Nos. 6200–24 and 10470]

Availability of Findings of No Significant Impact

Upon completion of environmental assessments, the Federal Maritime Commission's Office of Energy and Environmental Impact has determined that the Commission's decisions on Agreements Nos. 6200–24 and 10470 will not constitute major Federal actions significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, and that preparation of environmental impact statements is not required.

Agreement No. 6200–24 enables the U.S. Atlantic & Gulf/Australia-New Zealand Conference to offer intermodal service from Atlantic and Gulf ports and points in the United States, adds new subsections to the basic agreement setting procedures for implementing the intermodal authority, and updates the names of various South Sea Islands served by the Conference.

Agreement No. 10470, between Compagnie Morocaine De Navigation, the National Shipping Company of Morocco (Comanav), and Lykes Bros. Steamship Co., Inc., a United States flag vessel operating common carrier, permits the parties to charter space on a space-available basis on each other's vessels for carrying cargo between Morocco and United States ports on the Atlantic and Gulf of Mexico. The agreement also permits Lykes and Comanav to attain associate line status so they may operate under equal conditions in the trade. The agreement does not create a partnership, joint venture or a pool for revenue. There is no rate setting authority under the agreement.

These Findings of No Significant Impact (FONSI) will become final within 20 days unless petitions for review are filed pursuant to 46 CFR 547.6(b).

The FONSI's and related environmental assessments are available for inspection upon request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523–5725.

Francis C. Hurney,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by Bank Holding Companies; American National Corporation

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President), 230 South LaSalle Street, Chicago, Illinois 60690:

1. *American National Corporation,* Chicago, Illinois; to acquire 100 percent of the voting shares (less directors' qualifying shares) of First National Bank of Libertyville, Libertyville, Illinois. Comments on this application must be received not later than May 11, 1983.

2. *Walter E. Heller International Corporation,* Chicago, Illinois; to acquire through its subsidiary, American National Corporation, Chicago, Illinois, 100 percent of the voting shares (less directors' qualifying shares) of First National Bank of Libertyville, Libertyville, Illinois. Comments on this application must be received not later than May 11, 1983.

B. Board of Governors of the Federal Reserve System (William W. Wiles, Secretary), Washington, D.C. 20551:

1. *United Central Bancshares, Inc.,* Des Moines, Iowa; to acquire 80 percent or more of the voting shares of Plaza State Bank, Urbandale, Iowa. This application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Comments on this application must be received not later than May 6, 1983.

Board of Governors of the Federal Reserve System, April 12, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83–10147 Filed 4–15–83; 8:45 am]

BILLING CODE 6210–01–M

First Interstate Bancorp; Proposed Acquisition of Spoor Behrins Campbell & Young, Inc.

First Interstate Bancorp, Los Angeles, California, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Spoor Behrins Campbell & Young, Inc., New York, New York.

Applicant states that the proposed subsidiary would engage in the activities of providing port folio investment advice and furnishing general economic information and advice as authorized by 12 CFR 225(a)(5)(iii) and (iv). These activities would be performed from offices of Applicant's subsidiary in New York, New York and Los Angeles, California, serving customers in the United States and abroad. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the Offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any person wishing to comment on

the application should submit views in writing to the Reserve Bank to be received not later than May 11, 1983.

Board of Governors of the Federal Reserve System, April 12, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-10148 Filed 4-15-83; 8:45 am]

BILLING CODE 6210-01-M

Formation of Bank Holding Companies; Amerlbank Bancshares

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Ameribank Bancshares*, Hollywood, Hollywood, Florida; to become a bank holding company by acquiring 100 percent of the voting shares of American Bank of Hollywood, Florida. Comments on this application must be received not later than May 6, 1983.

2. *Liberty Bancorp of Georgia, Inc.*, Clayton, Georgia; to become a bank holding company by acquiring up to 100 percent of the voting shares of Rabun County Bank, Clayton, Georgia. Comments on this application must be received not later than May 6, 1983.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Greater Columbia Bancshares, Inc.*, Portage, Wisconsin; to become a bank holding company by acquiring 80 percent of the voting shares of The First National Bank of Portage, Portage, Wisconsin. Comments on this application must be received not later than May 6, 1983.

C. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *CBT Corporation*, Paducah, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens Bank and Trust Company of Paducah, Paducah, Kentucky. Comments on this application must be received not later than May 6, 1983.

D. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Peoples Bancshares of Hayward, Inc.*, Hayward, Wisconsin; to acquire 90.97 percent of the voting shares or assets of The Peoples National Bank of Hayward, Hayward, Wisconsin. Comments on this application must be received not later than May 10, 1983.

2. *Roseville Bancorp, Inc.*, Roseville, Minnesota; to become a bank holding company by acquiring 100 percent of the voting shares of Mid America National Bank of Roseville, Roseville, Minnesota. Comments on this application must be received not later than May 6, 1983.

E. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *City National Bancshares, Inc.*, Carrollton, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of City National Bank of Carrollton, Carrollton, Texas. Comments on this application must be received not later than May 6, 1983.

2. *First Rockwall Bancshares, Inc.*, Rockwall, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of The First State Bank, Rockwall, Texas. Comments on this application must be received not later than May 6, 1983.

Board of Governors of the Federal Reserve System, April 12, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Midlantic Banks Inc. and Florida Coast Banks, Inc.; Proposed Acquistion of a de Novo Office of Florida Coast Midlantic Trust Company, N.A.

Midlantic Banks, Inc., Edison, New Jersey, and Florida Coast Banks, Inc., Pompano Beach, Florida, have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire a *de novo* office of their joint venture trust company, Florida Coast Midlantic Trust Company, N.A., Lighthouse Point, Florida.

Applicant states that the proposed *de novo* office would engage in the activities of a trust company. The *de novo* office will be located in Palm Beach, Florida, and the geographic areas to be served are central and north Palm, Beach County, Florida. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4 (b)

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Banks of New York and Atlanta.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. not later than May 11, 1983.

Board of Governors of the Federal Reserve System, April 12, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 4140–01–M

Public Health Services

Emergency Planning and Action in a Radiation Emergency; Memorandum of Agreement Between the Centers for Disease Control and the Health Resources and Service Administration

AGENCY: Centers for Disease Control, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Centers for Disease Control (CDC) and the Health Resources and Services Administration (HRSA) have developed and executed a memorandum of agreement (MOA) to provide a basis for coordinating interagency planning and action in response to radiation emergencies.

EFFECTIVE DATE: This memorandum of agreement became effective on January 17, 1983.

FOR FURTHER INFORMATION CONTACT: Glyn G. Caldwell, M.D., Deputy Director, Chronic Diseases Division, Center for Environmental Health, Centers for Disease Control, Atlanta, Georgia 30333, 404–452–4095 or FTS: 236–4095.

SUPPLEMENTARY INFORMATION: CDC and HRSA concur that the content of this MOA will be of specific interest to a variety of other Federal agencies, State and local government agencies, and industrial firms, and of general interest to the public. Therefore, CFC is publishing it in its entirety as follows:

Memorandum of Agreement between the Centers for Disease Control and the Health Resources and Services Administration for Emergency Planning and Action in a Radiation Emergency

I. Background and Purpose

Subsequent to the Assistant Secretary for Health's May 30, 1979, directive designating the Centers for Disease Control (CDC) as the lead agency within the Public Health Service (PHS) for the management of toxic environmental emerencies, the CDC and the Health Resources and Services Administration (HRSA) have joined in cooperative and mutually supportive actions to carry out the Department of Health and Human Services (HHS) responsibilities in this important area of public health.

The purpose of this agreement is to delineate the respective responsibilities of the CDC and HRSA with regard to peacetime radiological emergencies and how emergency planning and action will be coordinated. This agreement is similar in nature to the agreement established between CDC and the Food and Drug Administratin on November 26, 1980 (46 FR 7442, January 23, 1981).

II. Authority

The CDC and the HRSA will continue to act under existing delegations of authority. No transfer of statutory authority or functions is implied by this agreement.

Both the CDC and the HRSA derive authority from the PHS Act, 42 U.S.C. 241, et seq., which provides authority for the conduct of health studies and the provision of guidance, assistance and information on health matters and for health emergencies. The Secretary of HHS is authorized to provide for cooperative planning to cope with health problems resulting from disasters, for participation in carrying out such planning and, at the request of State and local authorities, in meeting health emergencies.

The CDC serves as the national focus for developing and applying disease prevention and control, environmental health and health promotion and health education activities designed to improve the health of the people of the United States. To accomplish its mission, the CDC: (1) Identifies and defines preventable health problems and maintains active surveillance of diseases through epidemiological and laboratory investigations and data collection, analysis, and distribution; (2) serves as the PHS lead agency in developing and implementing operational programs relating to environmental health problems including response to environmental, chemical, and radiation emergencies; (3) conducts operational research aimed at developing and testing effective disease prevention, control, and health prevention programs; (4) administers a national program to develop recommended occupational safety and health standards and to conduct research, training, and technical assistance to assure safe and healthful working conditions for every working person; (5) develops and implements a program to sustain a strong national workforce in disease prevention and control; and (6) conducts a national program for improving the performance of clinical laboratories.

The HRSA provides leadership and direction to programs and activities designed to improve the health services for all people of the United States and to develop health care and maintenance systems which are adequately financed, comprehensive, interrelated and responsive to the needs of individudals and families in all levels of society. Specifically: (1) Provides leadership and support efforts designed to intergrate health services delivery program with public and private health financing programs, including the health maintenance organizations; (2) administers the health services block grants, categorical grants, and formula grant-supported programs; (3) provides or arranges for personal health services, including both hospital and out-patient care to designated beneficiaries; (4) administers programs to improve the utilization of health resources through health planning; (5) provides technical assistance for modernizing or replacing health care facilities; (6) provides leadership to improve the education, training, supply, use and quality of the Nation's health personnel; and (7) provides advice and support to the Assistant Secretary for Health in the formulation of health policies.

The President on December 7, 1979, directed the Federal Emergency Management Agency (FEMA) to take the lead in all off-site planning and response activities for peacetime radiological accidents at nuclear reactor facilities. He further directed FEMA to undertake a series of activities including the development and issuance of updated interagency assignments delineating respective agency capabilities and responsibilies as published in the Federal Register (41 CFR Part 401).

III. Substance of Agreement

CDC Responsibilities

A. *Response Planning.*

1. CDC has the lead role within the PHS for planning the HHS role in the FEMA national response to radiation emergencies. This includes the following activities:

a. CDC is responsible for arranging PHS/HHS representation on the Federal Radiation Preparedness Coordinating Committee (FRPCC) and designating PHS/HHS lead agency membership on relevant FRPCC subcommittees, e.g., HRSA to be represented on the task

forces for: (a) training and exercises, and (b) potassium iodide.

b. CDC arranges for appropriate PHS/HHS representation at meetings of the Regional Advisory Committees (RAC).

c. CDC participates in FEMA activities related to planning for radiation emergencies including coordinating the PHS/HHS response to review of FEMA documents relating to radiation emergency.

d. CDC arranges for consultations between appropriate PHS/HHS components and State and local agencies and officials to help them plan for radiation emergencies in their jurisdiction.

e. CDC has the lead role for developing specific PHS/HHS response for implementation of the national radiation emergency response (Master Plan).

f. CDC has the lead coordinating role for provision of technical assistance between FDA/BRH and HRSA.

B. *Emergency Response Actions.*

CDC has the lead role to coordinate PHS/HHS response to radiological emergencies. When notified of radiological emergency, CDC:

1. Obtains sufficient information to allow a determination to be made of whether or not an emergency requiring PHS/HHS action exists.

2. Alerts all appropriate PHS/HHS agencies.

3. Consults with other PHS/HHS agencies to determine availability of resources required under the FEMA national radiation emergency response (Master Plan).

4. Requests mobilization of resources of PHS agencies.

CDC serves as the focal point for communication and coordination of information within PHS/HHS and between PHS/HHS and other Federal agencies, including designation of an on-site PHS coordinator at the scene of the emergency.

CDC develops and maintains epidemiological surveillance of populations exposed to radiological accidents and emergencies at local, State, and national levels for purposes of disease prevention.

As coordinator for PHS/HHS emergency response and liaison with FEMA, CDC consults with other HHS agencies, State and local authorities to:

1. Identify segments of the population which may be at high risk of harm from exposure (e.g., people with predisposing clinical conditions, children, pregnant women, the elderly).

2. Arrange for collection and analysis of appropriate biological specimens.

3. Consult on recommendations for decontamination and prophylactic procedures.

HRSA Responsibilities

A. *Response Planning.*

1. HRSA will be responsive to CDC's request for representation on task forces and coordinating committees relating to FEMA's Radiological Emergency Response Plan (RERP).

2. HRSA will assist in the development of FEMA guidance for PHS/HHS responsibilities that fall under HRSA jurisdiction and expertise. Specifically, maintain the responsibility for the following:

a. Provide guidance to State and local government agencies on the location and functions of health and medical service organizations that may become part of the overall response action in a radiation emergency.

b. Provide guidance to State and local government agencies on the delivery of health and medical care for emergency and less urgent patients who, due to radiation hazards present unique or unusual situations for the existing State and local resources.

c. Provide guidance to State and local government agencies on the establishment of a coordinated medical control communications system for fixed and mobile medical support facilities, which may be utilized in a radiation emergency through the State and local emergency medical services.

d. In coordination with CDC, HRSA will assist FEMA to provide guidance to State and local government agencies on the development and dissemination to the public of information on sheltering, respiratory protection, radio protective drugs, and special needs of the handicapped.

3. HRSA will keep CDC regularly informed of activities in the above areas and will request to review and provide appropriate comments on the overall PHS perspective relating to those activities.

4. HRSA will provide CDC with appropriate technical review and comment in areas of HRSA responsibility and all RERP's.

5. HRSA will provide medical assistance to CDC in developing and implementing PHS/HHS Radiological Emergency Preparedness Training Programs, including medical staff and treatment protocols.

B. *Emergency Response Actions.*

1. Should HRSA be alerted to a radiation emergency prior to an alert from CDC, it will immediately alert CDC and FDA/BRH.

2. In accordance with specific State, regional, or national plans, [1] this agreement, and specific requests by CDC, the HRSA will:

a. As part of the PHS/HHS team, participate in radiological emergency exercises, tests, and response actions.

b. Establish appropriate emergency response liaison with the on-site CDC designated coordinator and keep CDC Headquarters and FDA/BRH advised.

c. Provide technical support to State, local, and other Federal agencies about medical services.

d. Implement and coordinate HRSA's own emergency response procedures.

3. HRSA will provide technical support to CDC headquarters with FDA/BRH for the preparation of news releases, for coordination with other agencies, and for working with public media in informing the public about the health significance of a radiological incident.

4. HRSA will provide CDC with emergency contact telephone numbers for maintaining close liaison in case an emergency response action becomes necessary and for implementing HHS resources.

Name and address of participating agencies:

Centers for Diseases Control, 1600 Clifton Road, Atlanta, Georgia 30333

Health Resources and Services Administration, 5600 Fishers Lane, Rockville, Maryland 20857

Liaison officers:

CDC: Director, Chronic Disease Division, Center for Environmental Health

HRSA: Chief, Program Implementation and Coordination, Division of Primary Care, BHCDA, Health Resources and Services Administration

Approved and Accepted for the Centers for Disease Control: William H. Foege, M.D., Director, dated: January 17, 1983.

Approved and Accepted for the Health Resources and Services Administration: Robert Graham, M.D., Administrator, dated: January 10, 1983.

Dated: April 7, 1983.

William C. Watson, Jr.,

Acting Director, Centers for Disease Control.

BILLING CODE 4160-18-M

[1] Plans as defined in NUREG-0654, "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plans."

Title V of the Public Health Service Act; Miscellaneous Delegation of Authority

Notice is hereby given that in furtherance of the delegation of December 9, 1982 (48 FR 9067), by the Secretary of Health and Human Services to the Assistant Secretary for Health, the Assistant Secretary for Health has delegated to the Director, Centers for Disease Control, the following authorities delegated to the Assistant Secretary for Health under Title V of the Public Health Service Act (42 U.S.C. 219 *et seq.*), as amended, insofar as they pertain to the functional responsibilities of the Centers for Disease Control:

Section 501—Gifts, excluding the authority to accept gifts of property. Offers of personal property shall not be accepted if the total costs associated with acceptance are expected to exceed the cost of purchasing a similar item and the cost of normal care and maintenance
Section 502—Use of Immigration Station Hospitals
Section 506—Transportation of Remains of Officers
Section 509—Availability of Appropriations
Section 512—Memorials and Other Acknowledgments
Section 514—Contract Authority

The Director, Centers for Disease Control, may redelegate the authority delegated to him, except redelegation of the authority under section 501 is limited to the acceptance of unconditional gifts of personal property valued at $5,000 or less.

Exercise of the authorities under Title V of the Public Health Service Act shall be in accordance with established policies, procedures, guidelines, and regulations as prescribed by the Secretary.

The delegation dated August 20, 1979, from the Director, Office of Management, to the Director, Centers for Disease Control, relating to section 501 has been superseded.

The delegation to the Director, Centers for Disease Control, became effective on March 29, 1983.

Dated: March 29, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

BILLING CODE 4160-16-M

Preparation for Practice; Section 336(a) of the Public Health Service Act; Delegation of Authority

Notice is hereby given that the following delegation has been made regarding Preparation for Practice under Section 336(a) of the Public Health Service Act (42 U.S.C. 245b-1), as amended.

Delegation from the Administrator, Health Resources and Services Administration, to the Director, Bureau of Health Care Delivery and Assistance, with the authority to redelegate, of all the authorities under Section 336(a) of the Public Health Service Act, as amended.

Previous delegations and redelegations made to officials within the Public Health Service of authorities under Title III of the Public Health Service Act may continue in effect provided they are consistent with this delegation.

The above delegation was effective on April 3, 1983.

Dated: April 3, 1983.

Robert Graham,

Administrator, Health Resources and Services Administration.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Environmental and Energy

[Docket No. NI-110]

Intended Environmental Impact Statement

The Department of Housing and Urban Development gives notice that an Environment Impact Statement (EIS) is intended to be prepared by the City of Weirton, West Virginia for the following project under HUD programs as described in the appendix to this Notice: Brown's Island Coke Battery, Weirton, West Virginia. This Notice is required by the Council on Environmental Quality under its rules (40 CFR Part 1500).

Interested individuals, governmental agencies, and private organizations are invited to submit information and comments concerning the project to the specific person or address indicated in the appropriate part of the appendix.

Particularly solicited is information on reports or other environmental studies planned or completed in the project area, issues and data which the EIS should consider, recommended mitigating measures and alternatives, and major issues associated with the proposed project. Federal agencies having jurisdiction by law, special expertise or other special interests should report their interests and indicate their readiness to aid the EIS effort as a "cooperating agency."

Each Notice shall be effective for one year. If one year after the publication of a Notice in the **Federal Register** a Draft EIS has not been filed on a project, then the Notice for that project shall be cancelled. If a Draft EIS is expected more than one year after the publication of the Notice in the **Federal Register**, then a new and updated Notice of Intent will be published.

Issued at Washington, D.C., April 7, 1983.

Francis G. Haas,

Deputy Director, Office of Environment and Energy.

Appendix

EIS on the Weirton Steel Brown's Island Coke Battery, Weirton, West Virginia

The City of Weirton, West Virginia intends to prepare an Environmental Impact Statement on the project described below and solicits information and comments for consideration in the EIS.

Description: On March 2, 1982 the National Steel Corporation proposed the sale of its fully integrated steel mill to the Weirton Steel local management and its two unions. An agreement, in principle, was achieved on March 12, 1983, with the City of Weirton actively supporting these efforts.

One important element in the development of the new "Independent Weirton Steel Company" is the "pad-up rebuild" program for the Brown's Island Coke Battery which was shut down on August 31, 1982. This battery, located on Brown's Island at Mile Point 62 on the Ohio River, is an essential facility for the operation of a fully integrated steel mill. The scope of work for the "pad-up rebuild" program includes (1) the demolition of the existing 87-oven coke battery down to the concrete pad, (2) the preparation of the site for new construction, and (3) the erection of a replacement 87-oven coke battery on the existing pad. The existing coal handling facilities, coal charging cars, door machines, pusher machines and by-product facilities will be re-used with appropriate upgrading. It is estimated that the scope of work for this program can be completed within twenty-four months after the approval of funding. Estimated cost of the project is seventy-three million dollars. The proposed project may be assisted under the Department of Housing and Urban Development's Urban Development Action Grant Program.

Need: The determination to prepare this Environmental Impact Statement was based on the following: (a) The size and importance of the project has generated extensive community interest;

(b) the economic impact of the project will be far reaching; and (c) the type of activity supported, generates questions about the level of impacts on the natural and human environment.

Alternatives: Alternatives to the project are: (a) purchase of coke from other sources; or (b) construction of a coke battery at an alternative site.

Scoping: The City of Weirton plans to hold a scoping meeting with concerned Federal, State and Local Agencies, service organizations and other interested persons. All responses will be utilized to help: (a) Determine significant environmental issues; (b) identify data which the Environmental Impact Statement can use or should address; and (c) identify cooperating agencies. A Scoping Meeting will be held on May 19, 1983, at 1:00 p.m. in the Rose Room of the Thomas E. Millsop Community Center, 3420 Main Street, Weirton, West Virginia.

Comments: Comments should be sent prior to the scoping meeting to: Mayor Donald T. Mentzer, City of Weirton, 200 Municipal Plaza, Weirton, WV 26062, telephone: (304) 748-5050, extension 30.

[FR Doc. 83-10152 Filed 4-15-83; 8:45 am]
BILLING CODE 4210-29-M

[Docket No. NI-111]

Intended Environmental Impact Statement, Shenandoah at the City of Sand Springs, Tulsa County, Oklahoma

The Department of Housing and Urban Development gives notice that an Environmental Impact Statement (EIS) is intended to be prepared for the following project under HUD programs as described in the appendix of this Notice: The City of Sand Springs, Tulsa County, Oklahoma. This Notice is required by the Council on Environmental Quality under its rules (40 CFR Part 1500).

Interested individuals, governmental agencies, and private organizations are invited to submit information and comments concerning the project to the specific person or address indicated in the appropriate part of the appendix.

Particularly solicted is information on reports or other environmental studies planned or completed in the project area, issues and data which the EIS should consider, recommended mitigating measures and alternatives, and major issues associated with the proposed project. Federal agencies having jurisdiction by law, special expertise or other special interests should report their interests and indicate their readiness to aid the EIS effort as a "cooperating agency."

Each Notice shall be effective for one year. If one year after the publication of a Notice in the **Federal Register** a draft EIS has not been filed on a project, then the Notice for that project shall be cancelled. If a Draft EIS is expected more than one year after the publication of the Notice in the **Federal Register**, then a new and updated Notice of Intent will be published.

Issued at Washington, D.C., April 7, 1983.

Francis G. Haas,

Deputy Director, Office of Environment and Energy.

Appendix

Environmental Impact Statement on Shenandoah at The City of Sand Springs, Tulsa County, Oklahoma

The Department of Housing and Urban Development (HUD) Oklahoma City Area Office intends to prepare an EIS on the project described below. The Department hereby solicits comments and information for consideration in the EIS.

Description: The Shenandoah is a proposal to develop 2,028 acres in The City of Sand Springs with residential uses at various densities, offices, commercial uses, community needs and greenbelts. HUD may participate in the development under Section 203(b) of HUD statutes. The Developer, Bellamah Community Development, is asking for an "early start" for "The Glen" containing 199 single-family lots. If approved, the development will begin before the EIS is completed.

Need: An EIS is proposed due to HUD threshold requirements in accordance with housing program environmental regulations and probable impact on: topography, water quality, air quality, noise, vegetation, soils, utilities, flood prone areas, and transportation.

Alternatives: At this time, the HUD alternatives are: accept the proposed development as submitted, accept the proposed development with modifications, or reject the proposed development.

Scoping: A general scoping meeting will not be held. Many meetings have already occurred and are continuing. For futher information, please contact Mrs. Laura Thomas, Environmental Officer, HUD, 200 N.W. 5th St., Oklahoma City, OK 73102. Her telephone number is (405) 231-4462.

Comments: Comments and questions regarding this proposal should be sent within 30-days of the date of this announcement to: Emil L. Huber, Jr., Area Manager, Attention: Mrs. Laura Thomas, Environmental Officer, HUD, 200 N.W. 5th St., Oklahoma City, OK 73102. The Area Office telephone number is (405) 231-9891.

BILLING CODE 4210-29-M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Delegation of Authority

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of Delegation of Authority to Outer Continental Shelf Regional Managers to make Acceptance or Rejection Decisions on High Valid Bids for Leases on the Outer Continental Shelf

On September 30, 1982, Department Manual Release Number 2440 announced new department Manual (DM) Part 218. Part 218 DM 2.1 states that:

The Director, Minerals Management Service is delegated the Secretary's authority under the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1331 et seq.), and Section 105 of the Energy Policy and Conservation Act (42 U.S.C. 6213) to manage and administer programs for the leasing of minerals from, and issuance of rights-of-way across, the submerged lands of the Outer Continental Shelf, including all associated functions related to royalty management.

That delegation includes the authority to make decision to accept or reject high valid bids for leases on the Outer Continental Shelf (OCS) and to authorize the issuance of OCS leases.

The authority to make decisions to accept or reject high valid bids for leases on the OCS, and to authorize the issuance of OCS leases, is hereby redelegated to the OCS Regional Managers with respect to bids submitted at lease offerings conducted by their respective offices. This delegation is effective April 25, 1983.

In making decisions authorized by this redelegation, Regional Managers will follow guidelines established prior to the lease offering and will seek the advice of the Office of the Solicitor.

Coordination with the Attorney General and the Federal Trade Commission on their review of bids prior to bid acceptance (under 30 CFR 256.47(d)) will remain the responsibility of the headquarters office pending the results of further studies. Bid acceptance decisions are not to be made until the results of this coordination are communicated to the Regional Managers. Options for the further

delegation of coordination with the Attorney General and the Federal Trade Commission are currently under development.

This delegation does not include the Secretary's authority to reconsider rejected bids under 30 CFR 256.47(e) Reconsideration of rejected bids should be requested by the high valid bidder in a written request addressed to the Secretary of the Interior.

In the absence of the Regional Manager, the Acting Regional Manager is authorized to make acceptance or rejection decisions on high valid bids for OCS leases and to authorize the issuance of OCS leases; however, this authority may not be otherwise redelegated.

It should be noted that in making this delegation, the Director, Minerals Management Service, has not divested himself of the power to exercise this authority himself (see 200 DM 1.9).

Dated: April 11, 1983.

Harold Doley,

Director, Minerals Management Service.

Agency for International Development

President's Task Force on International Private Enterprise; Meeting

Pursuant to the Federal Advisory Committee Act, notice is hereby given of a meeting sponsored by the President's Task Force on International Private Enterprise which will be held May 2, 1983 at The White House and at the Agency for International Development, U.S. Department of State.

This will be the first formal meeting of the Task Force.

The portion of the meeting at The White House will be closed. The remainder of the meeting will be open to the public. Any interested person may attend, request to appear before, or file statements with the Task Force in accordance with procedures established by the Task Force. Written statements should be filed prior to the meeting and should be available in twenty-five copies.

There will be an AID representative at the meeting. It is suggested that those desiring further information contact Birge Watkins on (202) 632-8518 or by mail c/o President's Task Force on International Private Enterprise, Agency for International Development, Room 3328, Washington, D.C. 20523.

Dated: April 7, 1983.

BILLING CODE 6116-01-7-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor

Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effictive notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries about the following to Team 2, (202) 275–7030.

BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register.** One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

The following applications were filed in Region I. Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significant affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries about the following to Team 2, (202) 275–7030.

Volume No. OP2–170

Decided: April 8, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. Member Fortier not participating.

MC 159142 (Sub-2), filed March 29, 1983. Applicant: C & C TRANSPORTATION CO., P.O. Box 7446, Denver, CO 80207. Representative: John T. Wirth, 717 17th St., Suite 2600, Denver, CO 80202–3357, 303–892–6700. Transporting, for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S. (except AK and HI).

Please direct status inquiries about the following to Team 3 at (202) 275–5223.

BILLING CODE 7035–01–M

[Ex Parte No. 387]

Rail Carriers; Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATE: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub-No.	Name of railroad, contract No., and Specifics	Review Board[1]	Decided date
895	Soo Line Railroad Co., ICC-SOO-C-0066, supplement 1, (wheat)	2	4–12–83
896	Union Pacific Railroad Co., ICC-UP-C-0057, supplement 2, (frozen foodstuffs)	3	4–12–83

[1] Review Board No. 2, Members Carleton, Williams, and Ewing. Review Board No. 3, Members Krock, Joyce, and Dowell.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

Agatha L. Mergenovich,

Secretary.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Advisory Committee on Actuarial Examinations; Meeting

Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet in Room E 300 U, John F. Kennedy Federal Building, Cambridge Street, Boston, Massachusetts on May 20, 1983, beginning at 8:30 a.m.

The purpose of the meeting is to prepare recommended questions for the Joint Board's examinations in actuarial mathematics and methodology referred to in Title 29 United States Code, section 1242(a)(1)(B). A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) has been made that the subject of the meeting falls within the exceptions to the open meeting requirement set forth in Title 5 United States Code, section 552b(c)(9)(B), and that the public interest requires that such meeting be closed to public participation.

Dated: April 13, 1983.

Leslie S. Shapiro,

Advisory Committee Management Officer, Joint Board for the Enrollment of Actuaries.

BILLING CODE 4810–25–M

DEPARTMENT OF JUSTICE

[AAG/A Order No. 7–83]

Privacy Act of 1974; New Systems of Records

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), notice is hereby given that the Bureau of Prisons of the United States Department of Justice proposes to establish two new systems of records to be maintained by the National Institute of Corrections.

The National Institute of Corrections Technical Assistance Resource Persons Directory (JUSTICE/BOP–101) will provide a current list of persons who have agreed to provide technical assistance to state and local correctional agencies.

The National Institute of Corrections Field Readers List (JUSTICE/BOP–102) will contain names of persons who have expertise to review applications for grants where the amount of the award exceeds $100,000 or where a substantial personal conflict of interest is indicated.

5 U.S.C. 552a(e)(4) and (11) provide that the public be given a 30-day period in which to comment on the routine uses of a new system of records. The Office of Management and Budget (OMB), which has oversight responsibility under the Act, requires a 60-day period in which to review the system before it is implemented. Therefore, the public, OMB, and the Congress are invited to submit written comments on these systems. Comments should be addressed to the Administrative Counsel, Justice Management Division, Department of Justice, Room 6239, 10th and Constitution Avenue, N.W., Washington, D.C. 20530. If no comments are received from the public, OMB, or the Congress within 60 days from the date of publication of this notice, the System will be implemented without further notice in the **Federal Register.**

Reports of the proposed systems have been provided to the Director, OMB, to the President of the Senate, and to the Speaker of the House of Reprentatives.

Dated: April 5, 1983

Kevin D. Rooney,

Assistant Attorney General for Administration.

JUSTICE/BOP–101

SYSTEM NAME:

National Institute of Corrections Technical Assistance Resource Persons Directory

SYSTEM LOCATION:

Records will be retained at either the National Institute of Corrections (NIC), 320 First Street, N.W., Washington, D.C. 20534 or at 1790 30th Street, Suite 140, Boulder, Colorado 80301.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who have been identified and have agreed to provide technical assistance to state and local correctional agencies in order to strengthen and improve the practice of corrections.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) Resume of individual including educational and work experience information; (2) Expertise checklist completed by named individual; and (3) Salary statement provided by named individual.

AUTHORITY FOR MAINTENCE OF THE SYSTEM:

This system is established and maintained under the authority of 18 U.S.C. 4352(a).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The routine uses of this system are: (a) To provide an information source to officers and employees of the Department of Justice who have a need for the information in the performance of their duties; (b) to provide an information source to Federal, state, and local correctional and law enforcement officials who have a need for technical assistance in corrections; and (c) to provide an information source for individuals or groups who request information or technical assistance in corrections, including, but not limited to, members of Congress, architects of prisons, newspaper reporters, public and private social service organizations, and students.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

Storage

Information maintained in the system may be stored on documents, magnetic tape, and magnetic disk.

RETRIEVABILITY:

Information is indexed by name and areas of expertise.

SAFEGUARDS:

Information is safeguarded in accordance with Bureau of Prisons rules governing access and release.

RETENTION AND DISPOSAL:

All records will be maintained until either the individual notifies NIC that he or she no longer desires to provide technical assistance or until NIC determines to delete a name from the list. If deleted for any reason, records will be destroyed by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Technical Assistance Manager, National Institute of Corrections, 320 First Street, N.W., Washington, D.C. 20534.

NOTIFICATION PROCEDURE:

Address inquiries to: Director, National Institute of Corrections, 320 First Street, N.W. Washington, D.C. 20534.

RECORD ACCESS PROCEDURES:

Same as notification procedure.

CONTESTING RECORD PROCEDURES:

Same as notification procedure.

RECORD SOURCE CATEGORIES:

All information is obtained from the individual named in the list.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

JUSTICE/BOP–102

SYSTEM NAME:

National Institute of Corrections Field Readers List

SYSTEM LOCATION:

Records will be retained at the National Institute of Corrections (NIC); 320 First Street, N.W., Washington, D.C. 20534.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons with expertise in a field of corrections who have been approved by the Advisory Board of NIC and who have agreed to review applications for grants where the amount of the award exceeds $100,000 or where a substantial personal conflict of interest is indicated.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) Resume of individual including educational and work experience information; and (2) expertise checklist completed by the individual.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

This system is established and maintained under the authority of 18 U.S.C. 4352(a).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The routine uses of this system are: (a) To provide an information source to officers and employees of the Department of Justice who have a need for the information in the performance of their duties; and (b) to provide the Advisory Board of NIC with a list of individuals who have the expertise to review applications for grants where the amount of the award exceeds $100,000 or where a substantial personal conflict of interest is indicated.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information maintained in the system may be stored on documents, magnetic tape, and magnetic disk.

RETRIEVABILITY:

Information is indexed by name and areas of expertise.

SAFEGUARDS:

Information is safeguarded in accordance with Bureau of Prisons rules governing access and release.

BILLING CODE 4410-05-M

Proposed Consent Decree In Action To Enforce the Clean Air Act; Carborundum Co.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on March 25, 1983, a proposed consent decree in *United States* v. *The Carborundum Company, A Division of Kennecott Corporation,* Civil Action No. 83-336, was lodged with the United States District Court for the Western District of New York.

The proposed consent decree provides for compliance with both the New York State Clean Air Act Implimentation Plan (SIP) and the Clean Air Act. The decree orders defendant to operate in compliance with the opacity provisions of the New York SIP; enjoins further operation of polluting equipment until suitable repairs and modifications are made; establishes a schedule, enforceable by stipulated penalties, for the making of such repairs and modifications; imposes maintenance, reporting and testing requirements; and requires defendant to pay to the United States $21,000 in settlement of the allegations of the complaint.

The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *The Carborundum Company, A Division of Kennecott Corporation,* DOJ No. 90-5-2-1-562.

A copy of the proposed consent decree may be examined at the offices of the United States Attorney, Western District of New York, 502 U.S. Courthouse, Court and Franklin Streets, Buffalo, New York 14202; the Environmental Protection Agency, 26 Federal Plaza, New York, New York 1078; and the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Proposed Consent Decree in Action To Enforce the Clean Air Act; Virgin Islands Water and Power Authority

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on March 28, 1983, a proposed consent decree in *United States* v. *Virgin Islands Water and Power Authority,* Civil Action No. 83-85 was lodged with the United States District Court for the District of the Virgin Islands.

The proposed consent decree provides for compliance with the Clean Air Act, the U.S. Virgin Islands Implementation Plan ("SIP"), the Prevention of Significant Deterioration of Air Quality ("PSD") regulations and the New Source Performance Standards ("NSPS") in connection with the installation and subsequent operation of two stationary gas turbines.The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Virgin Islands Water and Power Authority,* D.J. No. 90-5-2-1-568.

The proposed consent decree may be examined at the Office of the United States Attorney, Federal Building and U.S. Courthouse, Room 260, Veterans Drive, Charlotte Amalie, St. Thomas, Virgin Islands 00820; the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

Antitrust Division

Proposed Consent Judgment in United States v. Danilow Pastry Co., Inc., et al. and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16 (b)-(h), that a proposed Final Judgment, Stipulation and Competitive Impact Statement have been filed with the United States District Court for the Southern District of New York in *United States* v. *Danilow Pastry Co., Inc., et al.,* Civil Action No. 82 Civ. 3696. The Complaint in this case alleges that eight defendants combined and conspired to raise and fix prices of pastry in the New York metropolitan area in violation of Section 1 of the Sherman Act, 15 U.S.C. 1. The proposed Final Judgment enjoins each defendant from directly or indirectly entering into, participating in or maintaining any contract, combination or conspiracy with any other defendant, or any other wholesale bakery, or any jobber or any union to fix prices, discounts, or other terms or conditions for the sale of pastry.

Public comment is invited within the statutory sixty (60) day comment period. Such comments and responses thereto will be published in the **Federal Register** and filed with the Court. Comments should be directed to Ralph T. Giordano, Chief, New York Office, Antitrust Division, Department of Justice, Room 3630, 26 Federal Plaza, New York, New York 10278 (Telephone: 212-264-0390).

Joseph H. Widmar,

Director of Operations.

Stipulation

In the matter of United States District Court, Southern District of New York; United States of America, Plaintiff, v. Danilow Pastry Co., Inc., Dan-San Pastry Shop, Inc., d.b.a. Broadway Pastry Shop, Kremo Baking Co., Inc., R. K., Baking Corp., Acme Cake Co., Inc., Wens Cake Distributing Corp., Mrs. Mac's Baking Co., Inc., Temtee Donuts, Inc., Defendants; 82 Civ. 3696 (EW).

Filed: April 5, 1983.

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. A Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by

serving notice thereof on defendants and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent, or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect and the making of this Stipulation shall be without prejudice to any person in this or any other proceeding.

For the Plaintiff:

William F. Baxter,
Assistant Attorney General.

Joseph H. Widmar,
Ralph T. Giordano,
Attorneys, Department of Justice.

Rebecca Meilkejohn,
Lowell L. Jacobs,
Marc A. Pergament,
Attorneys, Department of Justice, Antitrust Division, Room 3630, 26 Federal Plaza, New York, New York 10278, telephone: (212) 264–0654.

For the Defendants:

Stillman, Friedman & Shaw,
By Charles A. Stillman, a Member of the Firm, Attorneys for Defendants: Danilow Pastry Co., Inc. and Kremo Baking Co., Inc., 521 Fifth Avenue, New York, New York 10175; (212) 661–4100.

Vladeck, Waldman, Elias & Engelhard,
By Seymour M. Waldman, a Member of the Firm, Attorneys for Defendant: R. K. Baking Corp., 1501 Broadway, New York, New York 10036; (212) 354–8330.

By Richard B. Cooper, a Member of the Firm, Attorneys for Defendant: Temtee Donuts, Inc., 30 Rockefeller Center, New York, New York 10112; (212) 489–9500.

Final Judgment

In the matter of; United States District Court Southern District of New York; United States of America, Plaintiff, v. Danilow Pastry Co., Inc., Dan-San Pastry Shop, Inc., d.b.a. Broadway Pastry Shop, Kremo Baking Co., Inc., R.K. Baking Corp., Acme Cake Co., Inc., Wens Cake Distributing Corp., Mrs. Mac's Baking Co., Inc., Temtee Donuts, Inc., Defendants; 82 Civ. 3696 (EW).

Filed: April 5, 1983.

Plaintiff, United states of America, having filed its Complaint herein on June 4, 1982, and plaintiff and the defendants, by their respective attorneys, having consented to the entry of this Final Judgement without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence against or any admission by any party with respect to any such issue:

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein and upon consent of the parties hereto, it is hereby

Ordered, adjudged, and decreed as follows:

I. This court has jurisdiction of the subject matter of this action and of each of the parties consenting hereto. The Complaint states a claim upon which relief may be granted against each defendant under Section 11 of the Sherman Act (15 U.S.C. 1).

II. As used in this Final Judgment:

(a) "Person" means any individual, partnership, corporation, or other legal or business entity.

(b) "Pastry" means baked or fried, fresh, sweet goods made primarily from flour, shortening, sugar and dairy products and includes, but is not limited to, danish, doughnuts, muffins cookies, coffee cakes, layer cakes and pies.

(c) "Wholesale bakery" means a person engaged, in whole or in part, in the business of making any of the items defined as pastry for sale to jobbers, to other persons that sell pastry to jobbers, to institutional caterers, or to restaurants, luncheonettes, hospitals, schools, office cafeterias, or other businesses that resell pastry directly to the consumer.

(d) "Jobber" means a person, not a wholesale bakery or employed by a wholesale bakery, who is engaged, in whole or in part, in the business of distributing pastry to restaurants, luncheonettes, hospitals, schools, office cafeterias, or other businesses that resell pastry directly to the consumer.

III. This Final Judgment applies to the defendants and to their officers, directors, agents, employees, subsidiaries, successors and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

IV. Each defendant is enjoined and restrained from directly or indirectly entering into, adhering to, participating in, maintaining, furthering, enforcing, or claiming any right under any contract, agreement, understanding, plan, program, combination or conspiracy with any other defendant or any other wholesale bakery or any jobber or any union to fix, establish, raise, lower or maintain prices, discounts, or other terms or conditions for the sale of pastry.

V. Each defendant is enjoined and restrained from communicating to, requesting from or exchanging with any other defendant or any other wholesale bakery or any jobber any information concerning actual or proposed prices, discounts, terms or conditions of sale, or actual or proposed pricing policies, or any consideration or contemplation of changes therein, for the sale of pastry.

VI. Noting contained in this Final Judgment shall prohibit any defendant from engaging in any transaction or communication with any person in connection with an actual or proposed *bona fide* purchase or sale of pastry from or to such person.

VII.(A) Each defendant shall advise each of its officers who has management responsibility for the sale of pastry and each of its employees who has responsibility for or authority over the establishment of prices for pastry of his obligations and of such defendant's obligations under this Final Judgment.

(B) Each defendant is ordered and directed to:

(1) Furnish a copy of this Final Judgment to each of the persons described in subsection (A) hereof within thirty (30) days after the date of the entry of this Final Judgment;

(2) Furnish a copy of this Final Judgment to each person who in the future shall have any of the responsibilities described in subsection (A) hereof within 30 days of his obtaining such responsibilities;

(3) Obtain from each of those persons furnished a copy of this Final Judgment pursuant to subsections (B) (1) or (2) hereof, a signed receipt therefor, which receipt shall be retained in the defendant's files for at least until the termination of this Final Judgment;

(4) Attach to each copy of this Final Judgment furnished to each of those persons described in subsections (A) and (B)(2), a statement advising each such person of his obligations and of such defendant's obligations under this Final Judgment, and of the penalties which may be imposed upon him and upon such defendant for violation of this Final Judgment;

(5) Hold within sixty (60) says after the date of entry of this Final Judgment, a meeting of the persons described in subsections (A) and (B)(2) hereof, at which meeting such persons shall be instructed concerning their obligations and such defendant's obligations under this Final Judgment. Similar meetings

shall be held at least once a year for a period of five (5) years from the date of entry of this Final Judgment;

(6) Establish and implement a plan for monitoring compliance by the persons described in subsections (A) and (B)(2) hereof with the terms of this Final Judgment; and

(7) File with this Court, and serve upon plaintiff within ninety (90) days after the date of entry of this Final Judgment, an affidavit as to the fact and manner of its compliance with subsections (A), (B) (1), (3), (4), (5) and (6) hereof.

VIII. Each defendant shall require, as a condition of the sale or other disposition of all, or substantially all, of the assets used by it in its pastry business, that the acquiring party agree to be bound by the provisions of this Final Judgment. The acquiring party shall file with the Court and serve upon plaintiff its consent to be bound by this Final Judgment.

IX. For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

(A) Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to a defendant made to its principal office, be permitted:

(1) Access during office hours of such defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of such defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of such defendant and without restraint or interference from it, to interview officers, employees and agents of such defendant, who may have counsel present, regarding any such matters.

(B) Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to a defendant's principal office, such defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

No information or documents obtained by the means provided in this Section IX shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

(C) If at the time information or documents are furnished by a defendant to plaintiff, such defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and said defendant marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then 10 days notice shall be given by plaintiff to such defendant prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which that defendant is not a party.

X. This Final Judgment shall terminate ten (10) years from the date of its entry.

XI. Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, and for the punishment of any violation hereof.

XII. Entry of this Final Judgment is in the public interest.

United States District Court, Southern District of New York; United States of America, Plaintiff, v. Danilow Pastry Co., Inc., Dan-San, Pastry Shop, Inc., d.b.a. Broadway Pastry Shop, Kremo Baking Co., Inc., R. K. Baking Corp., Acme Cake Co., Inc., Wens Cake Distributing Corp., Mrs. Mac's Baking Co., Inc., Temtee Donuts, Inc., Defendants; 82 Civ. 3696 (EW); Proposed Final Judgement; Competitive Impact Statement.

Filed: April 5, 1983.

The United States of America, pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b), files this Competitive Impact Statement in connection with the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I. *Nature and Purpose of the Proceeding.* On June 4, 1982, the United States filed a civil antitrust complaint under Section 4 of the Sherman Act, 15 U.S.C. 4, alleging that the above-named defendants and unnamed co-conspirators had from at least as early as the mid-1960s until at least March 1981 combined and conspired to raise and fix prices of pastry in the New York metropolitan area in violation of Section 1 of the Sherman Act, 15 U.S.C. 1. The Complaint also alleged that, as a result of the combination and conspiracy, price competition among the defendants was restrained and their customers were deprived of the benefits of free and open competition.

The complaint sought an adjudication that the alleged combination and conspiracy was illegal and an injunction prohibiting the defendants from continuing, maintaining or renewing the combination or conspiracy, or from engaging in any other combination or conspiracy having a similar purpose or effect.

On the same day the United States filed its complaint in this proceeding, a federal grand jury in Manhattan returned an indictment charging six of the above-named defendants and six individuals with a criminal violation of the Sherman Act arising out of the same conspiracy alleged in the complaint. All of the defendants in the criminal action (82 Cr. 415) entered pleas of *nolo contendere* on November 29, 1982. On January 31, 1983, Judge David N. Edelstein sentenced the corporate defendants to pay fines that totalled $220,000 and to make restitution valued at $174,200. He sentenced the individual defendants to pay fines that totalled $41,000, imposed suspended jail sentences that ranged from 30 to 120 days, and, for five of the six individuals, required them to perform between 200 and 1000 hours of community service during the next two years, as a condition of probation.

The Court's entry of the proposed Final Judgment will terminate this action, except that the Court will retain jurisdiction over the matter for the next ten years for possible further proceedings to construe, modify or enforce the judgment, or to punish violation of any of its provisions.

II. *Description of Practices Giving Rise to the Alleged Violation.* The defendants are the major wholesale bakeries, or their affiliated distributors, of pastry for customers such as restaurants, luncheonettes, hospitals, schools, office cafeterias and institutional caterers in the New York metropolitan area. They also sell pastry to independent middlemen known as jobbers. The defendants' total sales of pastry from 1977 through 1980 were more than $100 million.

At trial, the United States would have been prepared to prove that owners and executives of each of the defendants regularly met to discuss price increases and that they repeatedly agreed to raise prices by approximately the same amounts and at approximately the same times, and also to limit discounts, to limit promotional devices, not to solicit each other's customers for a period of

time and to refuse new orders from each other's customers for a period of time. Within the past five years, the defendants implemented their agreements by increasing wholesale prices for pastry in February and March 1978, December 1978, November 1979, September 1980, November 1980, and February and March 1981 and by following the other terms of their conspiracy. A summary of the government's evidence, in the form of statements by each of its six anticipated trial witnesses, was made part of the record of the criminal proceeding before Judge Edelstein.

III. *Explanation of the Proposed Final Judgment.* The parties have stipulated that the proposed Final Judgment, in the form they negotiated, may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The judgment provides that it shall not constitute an admission by any party with respect to any issue of fact of law.

The proposed Final Judgment enjoins each defendant from directly or indirectly entering into, participating in or maintaining any contract, agreement, understanding, plan, program, combination or conspiracy with any other defendant, or any other wholesale bakery or any jobber or any union to fix, establish, raise, lower or maintain prices, discounts or other terms or conditions for the sale of pastry.

It also enjoins each defendant from communicating to, requesting from or exchanging with any other defendant or any other wholesale bakery or any jobber any information concerning actual or proposed prices, discounts, terms or conditions of sale, or actual or proposed pricing policies, or any consideration or contemplation of changes therein, for the sale of pastry.

The proposed Final Judgment contains several provisions relating to defendants' compliance with its terms. It prescribes the manner in which each defendant must notify certain of its officers and employees of their obligations under the judgment. It also requires that each defendant secure from any party who acquires all or substantially all of the assets used by the defendant in its pastry business an agreement to be bound by the provisions of the judgment.

The proposed Final Judgment specifies that it will be effective for ten years from the date of its entry.

The last provision states that entry of the Final Judgment is in the public interest. Under the provisions of the Antitrust Procedures and Penalties Act, entry of the proposed Final Judgment is conditioned upon a determination by the Court that it is in the public interest.

The government believes that the proposed Final Judgment is fully adequate to prevent the continuation or recurrence of the violation of Section 1 of the Sherman Act alleged in the complaint, and that disposition of this proceeding without further litigation is appropriate and in the public interest.

IV. *Remedies Available To Potential Private Plaintiffs.* After entry of the proposed Final Judgment, any potential private plaintiff that might have been damaged by the alleged violation will retain the same right to sue for monetary damages and any other legal or equitable relief that it may have had if the Final Judgment had not been entered. The Final Judgment may not be used, however, as *prima facie* evidence in private litigation, pursuant to Section 5(a) of the Clayton Act, as amended, 15 U.S.C. 16(a).

V. *Procedures Available for Modification of the Proposed Final Judgment.* As provided by the Antitrust Procedures and Penalties Act, any person believing that the proposed Final Judgment should be modified may submit written comments within the 60-day period provided by the Act to Ralph T. Giordano, Chief, New York Office, Antitrust Division, United States Department of Justice, Room 3630, 26 Federal Plaza, New York, New York 10278 (Telephone: 212–264–0390). These comments and the Department's responses to them will be filed with the Court and published in the **Federal Register**.

All comments will be given due consideration by the Department of Justice. The Department remains free to withdraw its consent to the proposed Final Judgment at any time prior to its entry if it should determine that some modification is necessary. Additionally, the proposed Final Judgment provides that the Court retains jurisdiction over this action, and that the parties may apply to the Court at any time during the life of the Final Judgment for interpretation, modification, or enforcemrent of its provisions.

I. *Alternatives To the Proposed Final Judgment.* The alternative to the proposed Final Judgment considered by the government was a full trial on the merits and on relief. The government considers the proposed Judgment to be of sufficient scope and effectiveness to make a trial unnecessary, since it provides appropriate relief against the violations alleged in the complaint.

VII. *Determinative Materials and Documents.* No materials or documents were considered determinative by the government in formulating the proposed Final Judgment. Consequently, none is being filed pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b).

Dated: April 5, 1983, New York, New York.

Respectfully submitted:

Rebecca Meiklejohn,
Lowell L. Jacobs,
Marc A. Pergament,
Attorneys, Department of Justice, Antitrust Division, Room 3630, 26 Federal Plaza, New York, New York 10278, Tel. No.: (212) 264–0654.

BILLING CODE 4410–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Subcommittee on Systematic Evaluation Program; Meeting

The ACRS Subcommittee on the Systematic Evaluation Program will hold a meeting on May 6, 1983, Room 1046, 1717 H Street, NW., Washington, D.C. The Subcommittee will discuss the Systematic Evaluation Program review of La Crosse Boiling Water Reactor (LACBWR).

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions during which the Subcommittee finds it necessary to discuss proprietary information. (Sunshine Act Exemption 4.) One or more closed sessions may be necessary to discuss such information. To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows: Friday, May 6, 1983—8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be

considered during the balance of the meeting. The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Herman Alderman (telephone 202/634–1414) between 8:15 a.m. and 5:00 p.m., EST.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close some portions of this meeting to public attendance to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: April 13, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittee on Westinghouse Water Reactors; Meeting

The ACRS Subcommittee on Westinghouse Water Reactors will hold a meeting on May 5, 1983, Room 1046, 1717 H Street, NW., Washington, DC.

The agenda for subject meeting shall be as follows: *Thursday, May 5, 1983—8:30 a.m. until the conclusion of business.*

The Subcommittee will discuss design information related to the Westinghouse Advanced Pressurized Water Reactor (*WAPWR*).

The entire meeting will be closed to public attendance in order to protect Westinghouse proprietary information concerning the *WAPWR* (Sunshine Act Exemption 4).

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of Westinghouse, NRC Staff, and their consultants regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Anthony Cappucci (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., EST.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it will be necessary to close this meeting to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: April 13, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

[Docket No. 50–272]

Public Service Electric & Gas Co.; Granting of Relief from ASME Section XI Inservice Testing Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Public Service Electric and Gas Company. The relief relates to the inservice testing program for the Salem Nuclear Generating Station, Unit No. 1 (the facility) located in Salem County, New Jersey. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of the date of issuance.

The relief permits the licensee to test certain designated pumps and valves in a manner or on a schedule different from the prescribed in Section XI of the ASME Boiler and Pressure Vessel Code and applicable Addenda, as required by 10 CFR Part 50, because of inaccessibility, configuration of components, radiation level, or other valid reasons.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as rquired by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this relief.

For further details with respect to this action, see (1) the application for relief dated February 9, 1979, as revised March 10, 1980 and April 29, 1981, (2) the Commission's letter dated April 12, 1983, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Salem Free Public Library, 112 West Broadway, Salem, New Jersey.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 12th day of April 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590–01–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Commodity Policy Advisory Committee; Notice of Meeting and Determination of Closing of Meeting

The meeting of the Commodity Policy Advisory Committee (the Advisory Committee) to be held Wednesday, April 20, 1983, from 2:00 p.m. to 5:00p.m. at the Office of the United States Trade Representative, will involve a review and discussion of the current issues involving the trade policy of the United States. The review and discussion will deal with information submitted in confidence by the private sector members of the Committee under Section 135(g)(1)(A) of the Trade Act of 1974, as amended, (the Act); information submitted by government officials under Section 135(g)(2) of the Act the disclosure of which could be reasonably expected to prejudice United States negotiating objectives; information the disclosure of which would be likely to significantly frustrate implementation of proposed government action; and information properly classified pursuant to Executive Order 12356 and specifically required by such Order to be kept secret in the interests of national security (i.e., the conduct of foreign relations) of the United States. All members of the Advisory Committee have all necessary security clearances. Consistent with previous determinations concerning other advisory committees,

established under Section 135(c) of the Act, I hereby determine that the meeting of the Advisory Committee will be concerned with matters listed above and with matters listed in Section 552b(c) of Title 5 of the United States Code. Therefore, the meeting of the Commodity Policy Advisory Committee will be closed to the public.

More detailed information can be obtained by contacting Phyllis O. Bonanno, Director, Office of Private Sector Liaison, Office of the United States Trade Representative, Executive Office of the President, Washington, D.C. 20506.

William E. Brock,

United States Trade Representative.

BILLING CODE 3190-01-M

PEACE CORPS

Candidate Selection Inventory; Pre-test Study

AGENCY: Peace Corps.

ACTION: Notification of a Proposed Peace Corps Pre-test Study of a Candidate Selection Inventory.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Peace Corps is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal by name and should be sent to Francine Picoult, OMB Desk Officer, Office of Management and Budget, New Executive Office, Room 3235, Washington, D.C. 20503. Comments should be received by on or before June 17, 1983.

FOR FURTHER INFORMATION CONTACT: Jim Hogan, Special Assistant, Director of the Office of Recruitment, Placement and Staging, Peace Corps, 806 Connecticut Avenue, NW., Room M-900, Washington, D.C., 20526, telephone (202) 254-7080. This is not a toll-free number. For a copy of the scale contact Mr. Hogan.

SUPPLEMENTARY INFORMATION: Peace Corps proposes to examine the efficacy of a self administered paper-and-pencil inventory for helping staff improve the selection of Peace Corps Volunteers. Current research with the inventory, the Overseas Assignment Inventory (OAI), originally developed and validated to screen naval and private sector personnel for overseas assignments, suggests it might provide a cost effective and systematic means for measuring and predicting Peace Corps Volunteer candidates' cross-cultural adjustment overseas. Use of this inventory by the U.S. Navy has not produced any evidence that it discriminates among groups on the basis of gender, race or ethnic background. Information derived from this study will be used to establish normative OAI data for Peace Corps Volunteer candidates and to test the abilities of the OAI to predict suitability as a Peace Corps Volunteer candidate as he or she goes through Peace Corps' Volunteer Delivery System and overseas service.

The study will include all candidates who have been nominated by Peace Corps recruiters for consideration to serve as Peace Corps Volunteers from about June 1983 through the end of FY'83 as well as all candidates who attend a Peace Corps Center for Assessment and Training (CAST) for the remainder of FY'83. It is estimated that 1300 people would be involved in total. Nominees will be mailed and requested to complete a copy of the OAI. Persons attending CASTs will be administered the OAI directly during the first day.

People participating will need to provide personal identifying information in order that later status changes can be tracked and linked to OAI scores, to establish its validity for Peace Corps. They will be told that their participation is voluntary and that the proposed study is a validation pre-test of the OAI, its procedures and results for Peace Corps, and its results will not be used for deselection purposes during this test phase. No modification of any selection/screening procedures will occur during this study.

The proposed information collection requirement is described as follows:

Proposal: Overseas Assignment Inventory
Office: Office of Recruitment, Placement and Staging
Form No.: PC-1556
Frequency of Submission: On occassion
Affected Public: Individuals who are candidates for Peace Corps Volunteer service
Estimated Burden Hours: 1300 respondents at 20 minutes each (433 hours.)

This is not a proposal to which 44 U.S.C. 3504(h) applies. This notice is issued in Washington, D.C. on April 11, 1983.

Robert T. Spencer,

Associate Director for Management.

[FR Doc. 83-10195 Filed 4-15-83, 8:45 am]

BILLING CODE 6051-01-M

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 22-12389-00 and 22-12389-01]

Exxon Corp. and Reliance Electric Co.; Application and Opportunity for Hearing

April 11, 1983.

Notice is hereby given that, Exxon Corporation ("Exxon") and Reliance Electric Company ("Reliance", Exxon and Reliance being sometimes referred to herein as the "Applicants") have filed a joint Application under clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for finding that the trusteeship of Citibank, N.A., a national banking association formerly named First National City Bank, under (i) an Indenture dated as of February 15, 1971 (the "1971 Indenture") between Reliance and Citibank, N.A., (ii) an Indenture dated as of December 15, 1974 (the "1974 Indenture") between Reliance and Citibank, N.A., and (iii) and Indenture dated as of July 15, 1968 (the "1968 Indenture") between Exxon and Citibank, N.A. would not, despite a guarantee by Exxon of obligations of Reliance under the 1971 Indenture and the 1974 Indenture, be so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Citibank, N.A. from acting as trustee under the 1971 Indenture and the 1974 Indenture were it to continue to act as trustee under the 1968 Indenture after such guarantees.

In support of this Application, the Applicants set forth the following:

(1) Reliance had outstanding as of December 31, 1982 $21,000,000 aggregate principal amount of its 7-¼% Debentures due 1996 issued under the 1971 Indenture. The 1971 Indenture was filed by Reliance as an exhibit to Registration No. 2-39252 under the Securities Act of 1933 (the "1933 Act") which was declared effective on February 15, 1971 and was contemporaneously qualified under the 1939 Act.

(2) Reliance had outstanding as of December 31, 1982 $32,200,000 aggregate principal amount of its 9-⅜% Debentures due 1994 issued under the 1974 Indenture. The 1974 Indenture was filed by Reliance as an exhibit to Registration No. 2-52333 under the 1933 Act which was declared effective on December 10, 1974 and was contemporaneously ualified under the 1939 Act.

(3) Exxon had outstanding as of December 31, 1982 $151,346,000 aggregate principal amount of is 6½% Debentures due 1998 issued under the 1968 Indenture. The 1968 Indenture was

filed by Exxon as an exhibit to Registration No. 2–29388 under the 1933 Act which was declared effective on July 11, 1968 and was contemporaneously qualified under the 1939 Act.

(4) As required by Section 310(b) of the 1939 Act, Section 7.08 of the 1971 Indenture provides in part as follows:

(a) If the Trustee has or shall acquire any conflicting interest, as defined in this Section 7.08, it shall, within 90 days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign in the manner and with the effect specified in Section 7.10.

* * * * *

(c) For the purposes of this Section 7.08 the Trustee shall be deemed to have a conflicting interest if:

(1) the Trustee is trustee under another indenture under which any other securities, or certificates of interest or participation in any other securities, of the Company, are outstanding, unless such othe indenture is a collateral trust indenture under which the only collateral consists of Debentures issued under this Indenture; *provided* that there shall be excluded from the operation of this paragraph any other indenture or indentures under which other securities, or certificates of interest or participation in other securities, of the Company, are outstanding if . . . (ii) the Company shall have sustained the burden of proving, on application to the Securities and Exchange Commission and after opportunity for hearing thereon, that the trusteeship under this Indenture and such other indenture or indentures is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trustee from acting as such under this Indenture or such other indenture or indentures; . . .

(5) As required by Section 301(b) of the 1939 Act, Section 7.08 of the 1974 Indenture provides in part as follows:

(a) If the Trustee has or shall acquire any conflicting interest, as defined in this Section 7.08, it shall, within 90 days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign in the manner and with the interest effect specified in Section 7.10.

* * * * *

(c) For the purpose of this Section 7.08 the Trustee shall be deemed to have a conflicting interest if:

(1) the Trustee is trustee under another indenture under which any other securities, or certificates of interest or participation in any other securities, of the Company, are outstanding, unless such other indenture is a collateral trust indenture under which the only collateral consists of Debentures issued under this Indenture; *provided* that there shall be excluded from the operation of this paragraph the Indenture dated as of February 15, 1971 between the Company and First National City Bank under which the 7¼% Debentures Due 1996 of the Company are outstanding; and *provided further* that there shall also be excluded from the operation of this paragraph any other indenture or indentures under which other securities, or certificates of interest or participation in other securities, of the Company, are outstanding if . . . (ii) the Company shall have sustained the burden of proving, on application to the Securities and Exchange Commission and after opportunity for hearing thereon, that the trusteeship under this Indenture and such other indenture or indentures is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trustee from acting as such under this Indenture or such other indenture or indentures; . . . .

(6) As required by Section 310(b) of the 1939 Act, Section 7.08 of the 1968 Indenture provides in part as follows:

(a) If the Trustee has or shall acquire any conflicting interest, as defined in this Section 7.08, it shall, within 90 days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign in the manner and with the effect specified in Section 7.10.

* * * * *

(c) For the purposes of this Section 7.08 the Trustee shall be deemed to have a conflicting interest if

(1) the Trustee is trustee under another indenture under which any other securities, or certificates of interest or participation in other securities, of interest or participation in any other securities, of the Company, are outstanding, unless such other indenture is a collateral trust indenture under which the only collateral consists of Debentures issued under this Indenture; *provided* that there shall be excluded from the operation of this paragraph any other indenture or indentures under which other securities, or certificates, of the Company, are outstanding if . . . (ii) the Company shall have sustained the burden of proving, on application to the Securities and Exchange Commission and after opportunity for hearing thereon, that the trusteeship under this Indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trustee from acting as such under one of such indentures; . . . .

(7) Reliance, Exxon and Citibank, N.A. intend to enter into indentures supplemental to the 1971 Indenture and the 1974 Indenture under which supplemental indentures Exxon will guarantee the due and punctual payment of the principal of and premium, if any, and interest on Reliance's 7¼% and 9⅝% Debentures in accordance with the terms of the 1971 Indenture and the 1974 Indenture, respectively. Citibank N.A. would not be qualified to continue to act as trustee under the 1971 Indenture, the 1974 Indenture and the 1968 Indenture after such supplemental indentures are executed unless Citibank, N.A. is deemed not to have such a conflict of interest by reason of a finding by the Commission after opportunity for a hearing that acting as trustee under the 1971 Indenture, the 1974 Indenture and the 1968 Indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Citibank, N.A. from so acting.

(8) Reliance has placed a specific group of government obligations in trust under a Trust Agreement dated July 29, 1982 with Morgan Guaranty Trust Company of New York ("Morgan") to secure payment of the principal and interest on the debentures issued under the 1971 Indenture. Reliance has placed a separate group of specific govenment obligations in trust under a separate Trust Agreement dated July 29, 1982 with Morgan to secure payment of the principal and interest on the debentures issued under the 1974 Indenture. Exxon has placed another separate group of specific govenment obligations in trust under a separate Trust Agreement dated June 28, 1982 with Morgan to secure payment of the principal and interest on the debentures issued under the 1968 Indenture.

(9) Since the debentures issued under the 1971 Indenture, the 1974 Indenture and the 1968 Indenture are each secured by separate groups of specific government obligations owned by separate trusts established exclusively for the benefit of the holders of debentures issued under a specific

indenture, should Citibank, N.A. have occasion to proceed against the security held in one of these trusts, such action would not affect the security, or use of any security, held in any other trust. Thus the existence of the other trusteeships should not inhibit or discourage action by Citibank, N.A. or involve it in a conflict of interest.

(10) Neither Reliance nor Exxon is now in default under the 1971 Indenture, the 1974 Indenture or the 1968 Indenture, nor would the execution of either of the aforementioned supplemental indentures cause such a default.

Such differences as exist among the 1971 Indenture, the 1974 Indenture and the 1968 Indenture are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Citibank, N.A. from acting as trustee under each such indenture after execution of the aforementioned supplemental indentures.

Applicants have waived (a) notice of hearing, (b) hearing on the issues raised by the Application and (c) all rights to specify procedures under Rule 8(b) of the Commission's Rules of Practice.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said Application, which is a public document on file in the office of the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than May 2, 1983, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issued of fact or law raised by said Application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the Application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[Application No. 05/05-0172]

Business Ventures, Inc.; Application for License To Operate as a Small Business Investment Company (SBIC)

Notice is hereby given that an application has been filed with the Small Business Administration Pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1982)), under the name of Business Ventures, Inc., 20 North Wacker Drive, Suite 550, Chicago, Illinois 60606, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 *et. seq.*) and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders are:

Name and address	Title	Percent of ownership
Marc B. Grayson, 1325 Sheridan Road, highland Park, Illinois 60035	Chairman of the Board, Director	10
Milton Lefton, 5490 South Shore Drive, Chicago, Illinois 60615	President Treasurer and Director	16.67
Terry G. Chapman 175 East Delaware, #7709, Chicago, Illinois 60611	Secretary Director	16.67

The Applicant proposes to begin operations with a capitalization, after, organization expenses, of approximately $515,000 depending upon the success of a private offering of its shares. The Applicant will conduct its operations in the State of Illinois, and will be a source of equity capital and long term loan funds for qualified small business concerns. The Applicant may render management consulting services to small business concerns.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Chicago, Illinois.

Reporting and Recordkeeping Requirements for OMB Review

AGENCY: Small Business Administration, SBA.

ACTION: NOTICE OF REPORTING REQUIREMENTS SUBMITTED FOR OMB REVIEW.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATE: Comments must be received on or before May 5, 1983. If you anticipate commenting on a submission but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the agency clearance officer of you intent as early as possible.

Copies: Copies of the proposed forms, the requests for clearance (S.F. 83), supporting statements, instructions, transmittal letters, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency Clearance Officer: Elizabeth M. Zaic, Small Business Administration, 1441 L St., NW., Room 200, Washington, D.C. 20416, telephone: (202) 653-8538;

OMB Reviewer: J. Timothy Sprehe, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, Washington, D.C. 20503, telephone: (202) 395-4814.

SUPPLEMENTARY INFORMATION:

Form Submitted for Review

Title: Counseling Client Survey Card
Form No.: SBA 1356
Frequency: Non-recurring
Description of Respondents: Existing small business firms and prospective small business owners/operators
Annual Responses: 12,000
Annual Burden Hours: 2,000
Type of Request: New

Dated: April 12, 1983.

National Airspace Review; Meeting

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1) notice is hereby given of a meeting of Task Group 2-5 of the Federal Aviation Administration (FAA), National Airspace Review Advisory Committee. The agenda for this meeting is as follows: A review of the concept of the National Beacon Allocation Plan (NBCAP); its adequacy for providing code allocation, and operation effectiveness.

DATE: Beginning May 2, 1983, at 1 p.m., continuing daily, except Saturdays, Sundays, and holidays, not to exceed one week.

ADDRESS: The meeting will be held at the Federal Aviation Administration, conference room 9A/B, 800 Independence Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: National Airspace Review Program Management Staff, Room 1005, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, (202) 426-3560. Attendance is open to the interested public, but limited to the space available. To insure consideration, persons desiring to make statements at the meeting should submit them in writing to the Executive Director, National Airspace Review Advisory Committee, Air Traffic Service, AAT-1, 800 Independence Avenue, SW., Washington, D.C. 20591, by April 28, 1983. Time permitting and subject to the approval of the chairman, these individuals may make oral presentations of their previously submitted statements.

Issued in Washington, D.C., on April 8, 1983.

Anthony Borden,

Acting Manager, Special Projects Staff, Air Traffic Service.

BILLING CODE 4910-81-M

National Highway Traffic Safety Administration

Denial of Petition to Conduct Defect Proceeding

This notice sets forth the reasons for denial of a petition to determine whether to issue an order pursuant to section 152(b) of the National Traffic and Motor Safety Act, 15 U.S.C. 1412(b).

On November 1, 1982, Donald A. Black of Vergennes, Vermont, petitioned for an investigation of alleged carbon monoxide intrusion into a 1982 Mercury Lynx station wagon during various conditions of driving. The agency was able to procure the vehicle in question (no longer owned by Mr. Black) and subject it to testing with a Mine Safety Applicance Model 70 Carbon Monoxide Indicator. It found no indication of the condition complained of, except when the driver was smoking.

NHTSA also searched its computerized consumer complaint file to determine if other similar complaints had been made, and found none.

There being no reasonable possibility that an order of the nature requested would be issued at the conclusion of an investigation, the petition was denied on March 14, 1983.

(Secs. 124, 152 Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1410a, 1412); delegations of authority at 49 CFR 1.50 and 501.8)

Issued on: April 11, 1983.

Lynn L. Bradford,

Associate Administrator for Enforcement.

BILLING CODE 4910-59-M

[Docket No. IP83-1; Notice 1]

BF Goodrich Co.; Receipt of Petition for determination of Inconsequential Noncompliance

BF Goodrich Co. of Akron, Ohio, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for a noncompliance with 49 CFR 571.109, *New Pneumatic Tires—Passenger Cars.* The basis of the petition is that the noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition for a determination of inconsequentiality is published in accordance with section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417), and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Paragraph S4.3(e) of Standard No. 109 requires that the sidewall of each passenger car tire be labeled with the actual number of plies in the sidewall and the actual number of plies in the tread area, if different. Goodrich has produced an unknown number of P205/70R14 Advantage tires branded "2 plies rayon" under the tread on the white sidewall side. The correct labelling "6 plies rayon" appears on the serial side sidewall.

Goodrich argues that the noncompliance is inconsequential because the failure to label properly has no impact upon safety, and the tires otherwise comply with Standard No. 109. Branding is correct on one side of the tire, and the number of plies in the tread is described in point of purchase literature.

Interested persons are invited to submit written data, views and arguments on the petition of BF Goodrich Co. described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, S.W., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the **Federal Register** pursuant to the authority indicated below.

The engineer and attorney primarily responsible for this notice are Art Casanova and Taylor Vinson, respectively.

Comment closing date: May 18, 1983.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on April 11, 1983.

Courtney M. Price,

Associate Administrator for Rulemaking.

[FR Doc. 83-10237 Filed 4-15-83; 8:45 am]

BILLING CODE 4910-59-M

[Docket No. IP83-2; Notice 1]

VEB Reifenkombinat Furstenwalde; Receipt of Petition for Determination of Inconsequential Noncompliance

VEB Reifenkombinat Furstenwalde of East Germany has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for noncompliances with 49 CFR 571.109, Motor Vehicle Safety Standard No. 109, *New Pneumatic Tires—Passenger Cars,* and with 49 CFR 571.119, Motor Vehicle Safety Standard No. 119, *New Pneumatic Tires for Vehicles Other Than Passenger Cars.* The basis of the petition is that the noncompliances are inconsequential as they relate to motor vehicle safety.

This notice of receipt of a petition for a determination of inconsequentiality is published in accordance with section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Both Federal safety standards for vehicle tires require certain information to be permanently molded into each sidewall of the tire. Petitioner, whose tires bear the trade name "Pneumant," has failed to fulfill this requirement in certain respects. Specifically, it has failed to mark both sides of passenger car tires with the maximum permissible inflation pressure, the maximum load rating, the generic name of the cord material, and the actual number of plies. This informaiton is required by Sections 4.3 (b), (c), (d), and (e), respectively, of Standard No. 109. As for truck tires, it has omitted on one sidewall to state the maximum load rating and corresponding inflation pressure, the actual number of plies and composition of ply cord, and the letter designating load range. This information is required by section 6.5 (d), (f), and (j), respectively, of Standard No. 119. From 1977 through 1982 petitioner has shipped to the United States approximately 1,200,000 noncomplying passenger car tires, and 120,000 noncomplying truck tires.

In the view of the petitioner the noncompliances are inconsequential because:

"Since it is the usual practice for the vehicle manufacturer to specify the tire size, ply rating, and inflation pressures recommended for the particular vehicle, for the user's information, it is our belief that the technical data concerned in this petition would rarely involve the user, in addition, in case of need the information is available on all the tires produced by us, and is fully apparent at the time of fitting * * *."

Interested persons are invited to submit written data, views and arguments on the petition of VEB Reifenkombinat Furstenwalde described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the **Federal Register** pursuant to the authority indicated below.

The engineer and attorney primarily responsible for this notice are Art Casanova and Taylor Vinson, respectively.

Comment closing date: May 18, 1983.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on April 11, 1983.

Courtney M. Price,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Customs Service

Receipt of Domestic Interested Party Petition Concerning Tariff Classification of Imidazolidinyl Urea

AGENCY: Customs Service, Treasury.

ACTION: Notice of receipt of domestic interested party petition.

SUMMARY: Customs has received a petition from a domestic interested party requesting that a certain chemical compound, imidazolidinyl urea, be classified for tariff purposes under a provision of the Tariff Schedules of the United States which would result in a higher rate of duty than is presently applicable. This document invites comments with respect to the correctness of the current classification.

DATE: Comments must be received on or before June 17, 1983.

ADDRESS: Written comments (preferably in triplicate) should be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, Room 2426, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: John G. Hurley, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–8181).

SUPPLEMENTARY INFORMATION:

Background

A petition has been filed under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), by an American manufacturer, requesting that the tariff classification of a chemical compound, imidazolidinyl urea, be changed. Imidazolidinyl urea is presently classified under the tariff provision for nitrogenous compounds, imides, in item 425.24, Tariff Schedules of the United States (TSUS; 19 U.S.C. 1202), at a rate of duty (Column 1) of 4.4 percent ad valorem. The petitioner contends that it is properly classifiable under the provision for nitrogenous compounds, other, in item 425.52, TSUS, at a rate of duty (Column 1) of 7.9 percent ad valorem.

The petitioner contends that: (1) Customs interpretation of Headnote 1, Part 2D, Schedule 4, TSUS, is erroneous; and (2) the chemical compound at issue is not an imide, and therefore cannot be classified under item 425.24, TSUS.

Comments

Pursuant to § 175.21(a), Customs Regulations (19 CFR 175.21(a)), before making a determination on this matter, Customs invites written comments from interested parties on this classification issue.

The domestic interested party petition, as well as all comments received in response to this notice, will be available for public inspection in accordance with § 103.11(b), Customs Regulations (19 CFR 103.11(b)), between the hours of 9:00 a.m. and 4:30 p.m. on normal business days at the Regulations Control Branch, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

Authority: This notice is published in accordance with § 175.21(a), Customs Regulations (19 CFR 175.21(a)).

Drafting Information

The principal author of this document was Gerard J. O'Brien, Jr., Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: March 17, 1983.

John P. Simpson,

Director, Office of Regulations and Rulings.

[T.D. 83-86]

Recordation of Trade Name: COMBE INCORPORATED

AGENCY: Customs Service, Treasury.

ACTION: Notice of recordation.

SUMMARY: On November 23, 1982, a notice of application for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "COMBE INCORPORATED" was published in the **Federal Register** (47 FR 52843). The notice advised that before final action on the application, consideration would be given to relevant data, views, or arguments submitted in opposition to the recordation and received not later than January 24, 1983. No responses were received in opposition to the application.

Accordingly, as provided in § 133.14, Customs Regulations (19 CFR 133.14), the name "COMBE INCORPORATED" is recorded as the trade name used by Combe Incorporated, a corporation organized under the laws of the State of Delaware, located at 1101 Westchester Avenue, White Plains, New York 10604. The trade name is used in connection with the following merchandise manufactured in several foreign countries: hair coloring; toiletries; cosmetics; odor-destroying insoles; odor-destroying hosiery; denture adhesives; pharmaceutical creams, ointments and lotions; veterinary medications and shampoos; and hair care products. Various foreign subsidiaries are authorized to use the trade name.

DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Harriet Lane, Entry, Licensing and Restricted Merchandise Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5765).

Dated: April 11, 1983.

A. Piazza,

Acting Director, Entry Procedures and Penalties Division.

CIVIL AERONAUTICS BOARD

[M–379, April 13, 1983]

TIME AND DATE: 9:30 a.m., April 20, 1983.

PLACE: Room 1027 (open), Room 1012 (closed), 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of Items Adopted by Notation.
2. Docket 40772, 40336, 38621, ATA's Petition to Repeal Part 254 (Domestic Baggage Liability) prior to its effective date. (Memo 1780, OGC, BDA, OCCCA)
3. Docket 29044, Reexamination of the Board's smoking rule in light of the Court of Appeals decision in *ASH v. CAB.* (OGC)
4. Docket 41207, *Report to Congress on Computer Reservations Systems.* Request for Instructions. (OGC, BDA)
5. Docket 40534, *Braniff-South American Route Transfer Case.* (OGC)
6. Docket 40747, *Emerald Air Fitness Investigation,* Order on Reconsideration and Review of Emerald-Pan American "commuter agreement". (Memo 1708–A, 1708–B, OGC)
7. Docket 41040, *Trans-Air-Lind Corporation Fitness Investigation.* (Memo 1802, OGC)
8. Docket 40937, *Tampa-London Service Proceeding;* Opinion and Order on Review. (Memo 1796, OGC)
9. Docket EAS–791, Appeal of Moab, Utah for inclusion in the small communities program. (Memo 1611–B, BDA, OCCCA)
10. Docket 39244, Notice of Republic Airlines, Inc. to terminate service at Manistee/Ludington, Michigan. (BDA, OCCCA)
11. Dockets 40808, 40809, and 41079, Notice of Republic Airlines' intent to suspend service at Klamath Falls (D. 40808) and Bend/Redmond (D. 40809), Oregon; Notice of Horizon Airlines' intent to suspend service at Klamath Falls and Bend/Redmond (D. 41079). (Memo 1789, BDA, OCCCA)
12. Docket 41291, Renewal of the designation of Pioneer Airways to provide essential air service at Hastings, Kearney and McCook, Nebraska. (BDA)
13. Dockets EAS–336, EAS–338 and 39374, Request of Golden Pacific Airlines for Review of the Essential Air Serivice Determinations for Kingman and Prescott, Arizona. (Memo 1792, BDA, OCCCA)
14. Docket 40142, Essential Air Service at Bakersfield, California. (BDA, OCCCA, OC)
15. Docket EAS–405, Tentative re-selection of Direct Air, Inc., to provide essential air service to Kokomo/Logansport/Peru, Indiana and establishment of a rate of compensation. (Memo 188–C, BDA, OCCCA, OC)
16. Commuter carrier fitness determination of Starflight International Airlines, Inc. d.b.a. Trans East International. (Memo 1795, BDA)
17. Application of Sedona Air Center for relief from the insurance requirements for commuter air carriers contained in Part 205. (Memo 1793, BDA, OGC)
18. Docket 40957, *Agreement Among Members of the Air Traffic Conference of America Relating to Automated Ticketing Services,* Agreement 26708–A6. Petition of the Association of Retail Travel Agents for reconsideration of Order 82–12–77. (BDA)
19. Employee Protection Program. Dockets 38885, 38418, 40201, 38570, 38978, 38720, 39700, 38586, 39783, 34562, 38883, 38184, and 38571. Request for Reconsideration. (BDA)
20. Annual Review of Outstanding Delegations to the Bureau of International Aviation. (BIA)
21. Docket 35723, In the Matter of the Petition of Kodiak-Western Alaska Airlies, Inc. to increase of service mail pay. (Memo 1684–A, BIA)
22. Docket 40960, Agreement CAB 28977, Intercarrier agreement revising Florida-U.K. fares. (Memo 1511–H, BIA)
23. Letter to the Secretary of Transportation proposing blanket, prospective concurrence for medical emergency cabotage. (BIA, OGC)
24. Docket 40913, Application of Windward Islands Airways International N.V., for an amended foreign air carrier permit to add the intermediate point of Tortola, British Virgin Islands to the existing authority between the Netherlands Antilles and St. Thomas, St. Croix and San Juan. (Memo 1790, BIA, OGC, BALJ)
25. Request of GRM International, Inc. for registration to operate as a foreign freight forwarder in foreign, overseas, and interstate air transportation. (Memo 1791, BIA, OGC)
26. Docket 41070, Application of Maersk Air, I/S to amend and reissue its foreign air carrier permit to engage in charter foreign air transportation of persons and accompanying baggage between Scandinavia and the United States. (Memo 1799, BIA, OGC, BALJ)
27. Report on Trinidad and Tobago. (BIA)
28. Report on Venezuela. (BIA)

STATUS: 1–26 open, 27–28 closed.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

April 13, 1983.

TIME AND DATE: 10 a.m., Wednesday, April 20, 1983.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. Sewell Coal Company, Docket No. WEVA 79–31; (Issues include whether the judge erred on raising and applying a defense of diminution of safety.)
2. Secretary of Labor ex rel. Chester Jenkins v. Hecla-Day Mines Corp., Docket No. WEST 81–323–DM; (Petition for Discretionary Review, Issues include whether the judge erred in concluding that the operator did not discriminate against the miner in violation of Section 105(c)(1) of the Mine Act.)
3. Southern Ohio Coal Company, Docket No. LAKE 80–142; (Petition for Discretionary Review, Issues include whether the judge erred on remand in applying *UMW v. FMSHRC (Helen Mining),* 671 F.2d 615(D.C. Cir. 1982).)

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653–5632.

OVERSEAS PRIVATE INVESTMENT CORPORATION

Meeting of the Board of Directors

TIME AND DATE: 9 a.m. (closed portion). 10 a.m. (open portion), Tuesday, April 26, 1983.

PLACE: Offices of the Corporation, seventh floor board room, 1129 20th Street NW., Washington, D.C.

STATUS: The first part of the meeting from 9 a.m. to 10 a.m. will be closed to the public. The open portion of the meeting will start at 10 a.m.

MATTERS TO BE CONSIDERED: Closed to the public 9 a.m. to 10 a.m.:

1. Finance Project in Asia.
2. Insurance Project in South Asia.

3. Insurance Project in East Asia.
4. Claims Report.
5. Overview of OPIC's Operations, Objectives, Results, and Strategic Planning: Update.
6. Information Reports.
7. Review of OPIC/AID Caribbean Investment Opportunity Program.
8. China Projects Report.
9. Pending Legislation Affecting OPIC.

Further Matters to be Considered: Open to the public 10 a.m.:

1. Approval of the Minutes of the Previous Meeting.
2. Confirmation of Scheduled Board Meetings.
3. Personnel Actions.
4. Treasurer's Financial Statements.
5. Increase of DIF for FY 1983.
6. Information Reports.

CONTACT PERSON FOR INFORMATION:
Information with regard to this meeting may be obtained from the Secretary of the Corporation at (202) 653-2925.

April 14, 1983.

Elizabeth A. Burton,

Corporate Secretary.

Part II

Department of Energy

Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

DEPARTMENT OF ENERGY

10 CFR Part 961

Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: This rule establishes a standard contract to be used by the Department of Energy (DOE) in furnishing disposal services to the owners or generators of spend nuclear fuel and/or high-level radioactive waste and procedures to implement the Nuclear Waste Policy Act of 1982. Section 302 of that Act requires DOE and the owners or generators of spent nuclear fuel and/or high level radioactive waste to execute, by June 30, 1983, a contract under which DOE will accept and dispose of such material. This rule sets forth the contractual terms and conditions under which DOE will make available the nuclear waste disposal services.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT:
Robert Rosselli, Nuclear Waste Policy Act Project Office, Department of Energy, Room 7B–084, Washington, D.C. 20585 (202) 252–6842;
James Cavanagh, Office of Policy, MA–421.1, Procurement and Assistance, Management Directorate, Department of Energy, Room 8H–057, Washington, D.C. 20585 (202) 252–8188;
Elliot Winnick, Office of General Counsel, Department of Energy, Room 6B–190, Washington, D.C. 20585 (202) 252–1526.

SUPPLEMENTARY INFORMATION:

I. Legislative Background.
II. Public Hearing.
III. Written Comments
IV. Final Rule.
V. Procedural Requirements.

I. Legislative Background

Under Section 644 of the Department of Energy Organization Act (Pub. L. 95–91, 91 Stat. 565, 42 U.S.C. 7254), the Secretary of the Department is authorized to prescribe such rules and regulations as he may deem necessary or appropriate to effectuate the functions vested in him.

The Nuclear Waste Policy Act of 1982, enacted on January 7, 1983, (hereinafter referred to as "the Act," Pub. L. 97–425, 96 Stat. 2201, 42 U.S.C. 10101 *et seq.*) provides a comprehensive framework for disposing of spent nuclear fuel (SNF) and high-level radioactive waste (HLW), of domestic origin, generated by civilian nuclear power reactors. Among other things, the Act establishes procedures for selecting repository sites and developing repositories for SNF and HLW, authorizes the establishment of such repositories and provides a mechanism for financing the cost of disposal of such material.

On February 4, 1983, pursuant to Section 302(a) of the Act, DOE published its proposed rule (48 FR 5458) which set forth the proposed contract for disposal of spent nuclear fuel and/or high-level radioactive waste.

In the "Legislative Background" section of the proposed rule (48 FR 5458–5459) an interpretation was set forth that an affirmation by the Secretary, in writing, that an owner or generator of SNF or HLW is actively negotiating in good faith would defer the preclusion of disposal of SNF or HLW in the absence of a timely executed contract. This interpretation was reflected in the last sentence of § 961.2 of the proposed rule (48 FR 5461), which stated that "[t]hese deadlines may be waived if the Secretary of Energy affirms in writing, in accordance with section 302(b)(1)(A)(ii) of the Act, before the applicable deadline, that the owner or generator is actively and in good faith negotiating with the Secretary for a contract covered by this part." The interpretation has been reconsidered and the Department has concluded that the requirement that a contract be entered into not later than June 30, 1983 or the date on which an owner or generator commences generation of, or takes title to, SNF or HLW (whichever occurs later) cannot be deferred by a Secretarial affirmation. Accordingly, the above quoted last sentence of § 961.2 has been deleted.

II. Public Hearing

On March 3, 1983, pursuant to the notice contained in the aforesaid proposed rule, a public hearing was held before DOE in Washington, D.C. Oral presentations were made by representatives of two nuclear utilities, two nuclear fuel vendors and an engineering firm. A transcript of this hearing on the proposed rule was made and is available in the DOE Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C.

III. Written Comments

In addition to comments received at the aforesaid public hearing, written comments on the proposed rule were received by March 7, 1983, from a total of 85 organizations representing electric power associations (whose members include nuclear power utilities), nuclear power companies, environmental organizations and consumer protection associations, State and Federal agencies as well as individual members of the public. Copies of all comments received are available in the DOE Reading Room referenced in Section II above.

All comments received by DOE in response to its proposed rule of February 4, 1983, both at the public hearing and the written comments received thereafter, were carefully reviewed and fully considered in the formulation of this final rule. A summary of the substantive comments received by DOE is set forth below together with Department's action regarding those comments.

A. Areas of Primary Interest

Most of the public comments received on the proposed rule fall into six areas (discussed below in Section III.B.), as follows:

(1) *Fees to be charged;*

(a) electricity generated on and after April 7, 1983 (1M/KWH); (b) one-time fee for discharged spent fuel; (c) one-time fee for in-core burned fuel. (see contract Article VIII.A. discussed in Section III.B. below)

(2) *Payment Options* (see contract Article VIII.B. in Section III.B. below)

(3) *Priority Acceptance Ranking* (see contract Article VI.B. in section III.B. below)

(4) *Exchange Rights* (see contract Article V.E. in Section III.B. below)

(5) *Audit Rights for Purchasers* (see contract Article IV.B.5(b) and discussion in Section III.C. below)

(6) *Contract Appendices* (see Appendices A through F in Section III.B. below)

B. Sectional Analysis of Contract

The standard contract set forth in this final rule remains essentially the same as that described in the proposed rule published on February 4, 1983 (see 48 FR 5459–60). As described more fully below, various contractual provisions were revised, and others were deleted or added. In addition, six clauses that were previously contained in an Appendix of General Provisions in the proposed rule (Appendix H, 48 FR 5471) have been made part of the contract document itself and now appear as Articles XVI–XXI in the standard contract set out in this final rule.

Specific revisions in the proposed contract published previously, as they were made in the contract set out in this final rule, are as follows:

Recitals

In the first paragraph identifying the signatory parties, the parenthetical

phrase,"(hereinafter referred to as the 'Purchaser')," was moved for clarity directly after the Purchaser's name. Also, as suggested by several commenters and recognizing that the Purchaser could represent several corporate entities having ownership rights in a particular reactor facility, the words, "acting on behalf of itself and [others]," may be added, as applicable, after "Purchaser."

The first "Whereas" clause was slightly revised to conform with the wording used throughout the contract so that the words "spent nuclear fuel" precede the words "high-level radioactive waste."

A new second "Whereas" clause, relating to the responsibility of DOE to take title to SNF or HLW "as expeditiously as practicable," has been added to follow the language of the Act (§ 302(a)(5), 42 U.S.C. 10222(a)(5)).

In the fourth "Whereas" clause, the words "from any Purchaser" have been replaced with the words, "from owners and generators" to conform with the Act.

Article I—Definitions

Some commenters requested that the "assigned three-month period" (Article I.1) be made by mutual consent rather than unilaterally by DOE. This suggestion was partially adopted by modifying this definition.

Twelve commenters recommended that the definitions of "Commission" and "DOE" (Article I, paragraphs 4 and 10) be modified to include successor agencies. Such a modification is unnecessary for two reasons. First, the Purchaser is not contracting, as such, with DOE, but rather with "the United States of America . . . *represented by* the U.S. Department of Energy." Second, any new agency or Department established by a legislative reorganization would, we believe, succeed by operation of law to the functions and responsibilities previously vested in the abolished agency or department (see Energy Reorganization Act, of 1974, Pub. L. 93–438, section 301, 42 U.S.C. 5871; Department of Energy Organization Act, Pub. L. 95–91, § 301, 42 U.S.C. 7151). Accordingly, DOE has not adopted this suggested change.

Several commenters requested that the definition of SNF (Article I.18) be clarified to state that fuel temporarily removed from, and planned to be reinserted into, the reactor not be considered SNF. To address this aspect of temporarily removed fuel, DOE has revised the reporting requirements regarding discharged fuel (see Article V and Appendix B). However, the definition of SNF was not revised as it is taken directly from the Act itself (42 U.S.C. 10101(23)).

The definition of "delivery commitment" which appeared in the proposed rule (48 FR 5462, Article I.7) has been deleted as this aspect is adequately covered in the contract itself (See Articles IV and V).

In the definition of "delivery" (Article I.7), the words "f.o.b. carriers" have been added to reflect the intent of the parties and to accord with the applicable contract provision (See Article VI. B. 1).

The definition of "DOE facility" (Article I.10) was expanded to expressly state, in accordance with the Act, that there may be an interim storage facility (or facilities) which DOE may utilize prior to emplacement in a repository.

The definition of "kilowatt hours generated" (Article 1.14) is a substantive change from the definition of the term "Kilowatt Hours Generated and Sold" in the proposed rule. Some commenters noted that the former definition did not account for or adequately reflect the Congressional intent regarding the method of establishing waste disposal charges. The definition in the proposed rule was based upon the premise that the language in Section 302(a)(2) of the Act "for electricity generated by a civilian nuclear power reactor and sold on or after the date 90 days after the date of enactment of this act," meant to establish disposal charges on the basis of electricity "generated and sold," i.e., the "net" electricity. These commenters pointed out the Section 302(a)(2) of the Act should be read to require establishment of disposal charges based upon the "electricity generated by a civilian nuclear power reactor," i.e., the total or "gross" electricity generated. The Department now believes this to be the proper interpretation of Section 302(a)(2), for the contrary interpretation (i.e., "net" rather the "gross") would unfairly subject future users of electricity (in the rate charges passed on by the Purchaser utility) to increased charges. The words "and sold on or after a date 90 days after enactment", in our view, should be read to establish a date certain for calculation of the Act's differing methods of establishing fees for disposal charges, (i.e., past 90 days after enactment and prior to 90 days after enactment). Accordingly, the contract has been modified to reflect this interpretation.

Other textual changes were made in the definitions numbered "11", "12", "16" and "18" in Article I.

Article II—Scope

This clause was amended to more closely reflect the statutory language found in Section 302(a)(1) of the Act, as well as the fact that the services to be provided would occur in the future. The timing of the services was changed to be consistent with Section 302(a)(5) of the Act.

Article III—Term

To accord with the scope provision (Article II) and with the language of the Act (section 302(a)(1), 42 U.S.C. 1022(a)(1)), this clause was revised to read that the contract "term . . . shall be free from the date of execution until . . . DOE has accepted, transported . . . and disposed of all SNF and/or HWL . . . ."

Article IV—Responsibilities of the Parties

Paragraph A of this clause, which was formerly Article V in the proposed rule, has been amended to clarify the Purchaser's responsibilities. Information required on actual and projected discharges, which is due beginning October 1, 1983, will be for planning purposes and does not represent a firm commitment regarding deliveries. A further provision states that failure by the Purchaser to comply with the annual requirement for such reports may result in rescheduling of any of the Purchaser's currently approved delivery commitment schedules.

Also, paragraph A.2.(c) was revised to show that the Purchaser is not responsible for routine maintenance on the Government-furnished shipping casks, but will be responsible for incidental maintenance and protection of such casks while they are in its possession and control.

Paragraph B was amended with respect to DOE's responsibilities. The review and approval procedure for delivery schedules was deleted as this is covered elsewhere in the contract (Article V.B. and C.). Language consistent with Section 302(a)(1) of the Act has been added, as well as a paragraph describing DOE's responsibilities regarding furnishing of shipping casks. DOE will provide such casks sufficiently far in advance of scheduled transportation, which will meet applicable regulatory requirements. It will also provide to the Purchaser such information, specifications and training which may be needed to facilitate safe handling and loading. DOE will also provide the Purchaser with specifications necessary to ensure that any Purchaser-furnished canisters will be compatible with the Government-furnished casks.

In paragraph A.1.(a), a new sentence was added, to be consistent with the

express language of the referenced Appendix B (designated Appendix D in the proposed rule), that the information to be furnished by Purchaser is not to be considered a "firm commitment with respect to discharges or deliveries." Other clarifying editorial changes were also made in Article IV.A.

In Article IV.A.2(b), several commenters proposed that the term "delivery date" be used instead of the undefined term "scheduled transportation." This suggested change was not made as DOE considers the present wording sufficiently clear.

In Article IV.A., a number of commenters suggested that the Purchaser's liability under paragraph IV.A.2.(c) is too broad. That paragraph states that the Purchaser is responsible for any loss of or damage to DOE-furnished casks while in the possession and control of the Purchaser. Those commenters said that this provision would hold the Purchaser responsible if the damage was caused by a defect in DOE-furnished property. They also said that the phrase "expenses incidental to such loss or damage" was vague and could include consequential damages.

This recommended change was not adopted because DOE believes that the existing provision is appropriate. Since the casks are furnished by the Government, it is clear that defects in the cask, and any damages resulting therefrom, would be the responsibility of the Government. Also, the phrase "expenses incidental to such loss or damage" was intended to cover consequential damages and seems sufficiently clear.

Article IV.B.2., relating to DOE's duty to furnish casks to the Purchaser, was revised at the request of numerous commenters. As revised, the provision sets out with more specificity what DOE must furnish together with the casks (procedures, information, tools, etc. as may be needed) and clarifies that Purchaser is required to perform "incidental maintenance," as distinguished from more complete "routine maintenance" which will be performed by DOE.

In addition, at the request of a substantial number of commenters, a new provision has been added as subparagraph IV.B.5(b), which states that DOE will issue "an annual report for planning purposes . . . set[ting] forth the projected annual receiving capacity for the DOE facility."

In Article IV.B.4, one commenter indicated the following words should be added at the end of Article IV.B.4: "or subcontractors, acting solely under the supervision and control of DOE." This suggested revision was not made because the Government would not have privity of contract with subcontractors, who would not be under its supervision and control. The responsibility for supervision and control of subcontractors would clearly be upon the prime contractor who, of course, will ultimately be responsible to the Government.

Article V—Delivery of SNF and/or HLW

This clause was formerly Article IV in the proposed rule. In paragraph A, editorial revisions have been made for purposes of clarification. The first sentence of paragraph B.2 was added to specify the procedure to be followed in the event revised delivery commitment schedules are required (with a similar change in Article V.C.). In the proposed rule, Article V.B. contained a final paragraph relating to changes by the Purchaser in "specific assemblies." This paragraph was deleted as it is now covered by the new provision on "Exchanges" contained in paragraph "E" of Article V, which was adopted at the recommendation of numerous commenters. This new provision allows Purchasers to exchange DOE-approved delivery commitments with one another, subject to DOE approval. While this procedure will allow the Purchaser greater flexibility in arranging its inventory of spent fuel and delivery thereof, all SNF and/or HLW to be delivered must comply with the requirements of the contract regarding acceptability.

Eleven commenters said they found confusing the wording in Article V.B, which provides that "after DOE has issued its proposed acceptance ranking. . . . purchaser shall submit delivery commitment schedules 63 months before proposed delivery date." They suggested that DOE modify this language as follows: ". . . the purchaser shall submit, not later than 63 months prior to the start of any fiscal year, delivery commitment schedules specifying all deliveries that Purchaser wishes to make during that fiscal year." We have not accepted this suggestion. No delivery commitment schedules should be submitted prior to the initial acceptance ranking because DOE would have no basis at that time to approve or disaprove it. Moreover, there is very little chance that the repository will be ready earlier than the planned date of 1998.

Five commenters questioned the lack of a definition for "emergency deliveries," which are covered in Article V.D. We have intentionally not defined the term "emergency delivery" because it is not possible to describe the nature of all emergency situations at this time. One situation which would receive consideration is one in which a delivery is needed to permit licensed reactor operations to continue.

Article VI—Criteria for Disposal

Although certain editorial and clarifying revisions were made in Article VI, it remains substantially the same as set forth in the proposed rule (48 FR 5463–64).

Article VI.A.4 establishes special procedures for "other than standard fuel," and ten commenters recommended that only two categories of SNF be used—fuel that has to be canned and fuel that does not. In their view, none of the other categories has any importance in the context of transportation and disposal, and they suggested that this provision be eliminated. We have not accepted this suggestion since there can be "nonstandard" fuel which does not need to be canned; it may just be the wrong size or age.

Article VI.B.2 provides that "improperly described" SNF/HLW will not be transferred by Purchaser to DOE "unless DOE agrees to accept such SNF and/or HLW under such other arrangements as may be agreed to, in writing, by the parties." Nine commenters said that this provision gave DOE unlimited discretion to impose any additional restrictions on such material, and suggested its deletion. We have not accepted this suggestion. In our view, the provision is necessary and appropriate because it provides DOE with a mechanism to protect against improperly described fuel.

Article VI.B.3 establishes two priorities for acceptance of SNF and/or HLW—one based on the age of the SNF/HLW and the second for SNF/HLW from permanently shutdown reactors. Nine commenters stated that no priority is given to utilities who may need to ship SNF to DOE in order to keep their facilities operating, nor is any consideration given to the size of a Purchaser's SNF inventory. They suggested that an allocation system be established whereby half of the receiving capacity to be allotted would be based on the age of SNF/HLW and the remaining half on Purchaser's share of the industrywide inventory. DOE has not adopted this recommendation because by the time the repository commences operation, utilities will have made adequate preparations to provide on-site storage in order to ensure continued plant operations. Any emergency situation can be handled by DOE under the emergency delivery

clause. Moreover, it is incorrect to say that DOE does not consider the Purchaser's inventory. By accepting the oldest fuel first, the Department will, in effect, be accepting fuel from utilities with large inventories because those are the utilities with the oldest fuel. A priority system based on the Purchaser's share would be extremely difficult to manage because each Purchaser's share changes continuously as fuel is added to or subtracted from the industry-wide inventory; and DOE would be required to accept fuel each year from the Purchaser until the last power reactor is shut down.

Article VI.B.3.(b) gives priority to SNF/HLW from permanently shutdown reactors, and four commenters recommended that this provision be deleted. This type of priority is necessary to prevent reactors from waiting 20 or 30 years to be decommissioned after they finish generating electricity. Therefore, we have not accepted the recommendation.

Article VII—Title

This clause remains substantially the same as that shown in the proposed rule (48 FR 5464), except for deleting the words, "upon acceptance by DOE," as redundant in the first sentence; and changing the words, "upon assuming title," to "upon passage of title," in the second sentence to accord with common terminology.

Article VIII—Fees and Terms of Payment

Of those commenting on the one-time fee calculation methodologies covering spent fuel, over 80 percent favored the three (3) burnup range approach described in the proposed contract. This approach was endorsed by many utilities because it avoids extremely low and extremely high fees. It sustains the principle of equity and fairness by requiring all generators and owners of the spent nuclear fuel to bear a reasonable share of disposal costs. Further, it corresponds more closely to program costs. The four-tier approach finally adopted by DOE represents a refinement of the basic one endorsed by the majority of the commenters. This final four-tier approach, which introduces a new, lower burnup range (0–5,000 MWDT/MTU), is considered more appropriate and equitable as it is more representative of the actual industrywide distribution of spent nuclear fuel, encompassing low, average and high burnup fuel.

The first of the three alternatives for calculation of the one-time fee based on average burnup (48 FR 5459) was not adopted by DOE because it would unduly benefit, in effect, those possessing high-burnup spent fuel while penalizing those with low-burnup fuel. Further, it would impose definitional problems with respect to the terms "average spent nuclear fuel burnup."

The second alternative for calculation of the one-time fee, which was based on an "individual assembly basis," was not adopted by DOE, although it was supported by several commenters who said it is a straightforward approach that recognizes differences is assembly burnup due to initial cycle discharges, type of reactor, and structurally damaged or deformed fuel assemblies. In DOE's view, this approach weakens the fairness principle by unduly benefiting owners of low-burnup fuel while penalizing those with high-burnup fuel. This approach also conflicts with the Congressional intent to have those responsible for generating nuclear waste and spent fuel bear a reasonable share of disposal costs.

Article VIII A.4 of the contract in this final rule uses a methodology for calculating the one-time fee for incore fuel that retains the equivalency concept. Although the majority of commenters on the one-time fee for in-core fuel preferred an approach based upon a 1.0 mill/kwh charge because it is relatively simple and understandable, the Act precludes the Department from adopting this calculation methodology for nuclear fuel existing prior to April 7, 1983. The approach selected by DOE focuses on uranium loaded initially in a particular reactor core, and the total megawatt-days (thermal) generated by that core. This approach results in a fee that is defined in terms of dollars per kilogram, yet it is calculated to be equivalent to 1.0 mill/kwh. Several commenters suggested variations of this approach. In our judgment, this method represents a fair and verifiable way to calculate a one-time fee for in-core fuel, as of 12 A.M. April 7, 1983.

This methodology also avoids computational difficulties associated with an approach suggested by one commenter, which was to divide in-core fuel into equivalent fully burned assemblies and equivalent new assemblies.

Numerous comments were received on the fee provisions in Article VIII.A. Some commenters suggested that DOE's proposed provisions be more explicit and specifically state that the one-time fee for previously discharged SNF and in-core fuel will not be readjusted. To assure that the Nuclear Waste Fund would not lose money from a utility's decision to defer payment, they suggested that the one-time fee could escalate at the Government's cost of money until payment is made. DOE agrees that a better reading of the Act would permit the establishment of a one-time non-adjustable fee for previously discharged SNF and in-core fuel and it has adopted this approach. Also, recognizing that payment of this fee will occur at some date or dates after April 7, 1983, DOE has incorporated provisions which allow a Purchaser to finance its contractual fee obligation until paid, under terms which recognize the time value of money.

It was also suggested that the one-time fee be escalated on the basis of the 13-week Treasury Bill rate as reported on the first business day of each calendar quarter, from July 1, 1983 until first payment is made. DOE has adopted this suggested change but, in order to eliminate the complexities associated with calculation when an assigned three-month period does not coincide with a calendar quarter, the rates will instead be linked to assigned three-month periods. Additionally, the financed obligation of Purchaser arises on April 7, 1983 and not July 1, 1983, and the commencement date should therefore be the former.

Other commenters suggested that Article VIII.A.3, concerning the adjustment of the fee, be revised to say "full cost recovery" rather than "that all costs to be incurred by the Government shall be recovered." This change was adopted as it is consistent with the revised definition of "full cost recovery" in Article I paragraph 11.

Several commenters recommended clarifying guidance in Article VIII.A.3, and suggested that the adequacy of the fees be determined on a discounted cash flow basis fully recovering costs over a reasonable period of time, but not less than thirty years. This suggested change has not been made because DOE deems the present provision sufficient and consistent with Act. Nevertheless, DOE does contemplate that, at least for the immediate future, it will utilize the recommended approach for the most part in determining the adequacy of the fees.

Several commenters requested that the payment options in VIII.B.2 be made applicable to in-core fuel as well as SNF. DOE has adopted this recommendation. In view of the fact that the fee for in-core fuel will be paid with the fees for permanently retired SNF, use of the same payment options as have been established for SNF will simplify payment procedures.

Several commenters suggested that the interest on the outstanding fee balance be included as part of the fee under Payment Option #1 in Article

III.B.2.(a), and that the interest be calculated on the outstanding balance at the date of "each payment," rather than at the date of the "first payment." The recommendation was adopted. Interest accruing on the SNF and in-core fuel fee obligation will be added to the Purchaser's financed obligation until the date of the first payment under the 40 quarters option, at which time it will be added to the SNF and in-core fuel fee obligation and financed at the 10-year Treasury note rate then in effect.

Numerous commenters recommended that the Purchaser be allowed to select a payment option within two years of the effective date of the contract rather than at the time of contract execution. This recommended change was adopted because payment of SNF fees will not begin for a number of years, and the two-year period to select a payment option will not work a disadvantage to the Government. In any event, interest will accrue on the financial obligation from April 7, 1983, until payment is received.

It was further recommended that Payment Option #1 be modified to allow a Purchaser electing this option under Articel VIII.B.2.a. to make full or partial lump sum payments. This recommendation was adopted because DOE, in keeping with policies established by the Office of Management and Budget and sound business practice, encourages the payment of debts owned to the Federal Government at the earliest opportunity.

Based upon its review of the comments received on Article VIII, and the payment options in particular, the Department has decided to include a third payment option which now appears as subparagraph B.2.(e). Under this new provision, a Purchaser may elect to pay the fee due for SNF and in-core fuel burned prior to April 7, 1983, with such payment to be made on or before June 30, 1985, in which event no interest is payable for the period April 7, 1983 to date of full payment.

A request was made to allow fee payments by check as well as the wire transfer required under Article VIII.B.3.(a). No change was made in the contract provision. If a particular Purchaser can demonstrate that wire transfer is impractical or unduly burdensome, a deviation may be sought to permit payment by check. However, no change has been made in this provision in view of the Government's paramount interest in having funds available for its use as soon as possible.

One commenter recommended that the payment options in Article VIII.B.2 be eliminated in their entirety. DOE has determined that the use of payment options is consistent with the Act and its legislative history, and serves to meet the interests of both the Government and the owners and generators who are required to bear the costs of the entire program.

One commenter questioned why interest payments applied to Payment Option #1, but not to Option #2. This has been interpreted by DOE as a suggestion that interest provisions be eliminated from Payment Option #1. Rather than eliminate interest provisions for Option #1, DOE has added interest provisions for Option #2. This modification recognizes the time value of the Purchaser's financial obligation after April 7, 1983.

A number of commenters said that the interest and penalty provisions of Article VIII. are excessive, and recommended that 130% of the Quarterly Treasury Rate be used. DOE's proposed interest penalty provisions have a foundation in law and policy, and serve to preclude the possibility that the Government will be an involuntary lender to a Purchaser. For this reason, no changes have been made to this contractual provision.

Some commenters requested that the words "Amount Due to DOE" in the formula for calculating interest on late payments in Article VIII.C. be changed to read *"Net* Unpaid Balance Due to DOE". This recommendation was deemed a desirable clarification and it was substantially adopted, so that it now reads, "Unpaid Balance Due to DOE."

Commenters also suggested that DOE notify Purchasers of unpaid or underpaid amounts within three years from the date on which payments were due to avoid unnecessary interest penalty accumulations. DOE will make a good faith effort to notify Purchasers of unpaid or underpaid amounts as soon as possible. However, the suggested change would toll DOE's right to apply interest on debts owed to the Government after three years, and it would clearly not be in its best interests, particularly when a determination of unpaid or underpaid amounts could not be made within three years.

Article IX—Delays

This clause has been revised by expanding the list of events considered to be beyond the reasonable control of the parties.

Under paragraph B, it is provided that "the *charges* and schedules will be equitably adjusted to reflect any estimated *additional* costs incurred by the party not responsible for the delay" (*underscoring* added). Seven commenters suggested deletion of the reference to "charges" as this seemed to them "not to make sense in the context of a full-cost recovery contract." It is precisely because DOE is required by the Act to assure full cost recovery that it deems the provision of Article IX.B. to be necessary and proper. To eliminate "charges" and limit the adjustment only to "schedules," as suggested, would leave DOE without any effective remedy and, in our view, be contrary to the letter and spirit of the Act. It would also subject all Purchasers, through increased fees that might be necessary without this provision, to be penalized for the inaction or careless action of one Purchaser, which would hardly be equitable. Accordingly, DOE has not modified this contract provision.

Similarly, DOE has also rejected an additional clause, suggested by three commenters, which would preclude "special, indirect or consequential damages . . . regardless of fault" because the net effect of such a clause would be to vitiate the remedy which both parties now have under Article IX.B.

One commenter suggested that this contract provision recognize that delays might arise out of "good faith" acts on the part of one party for which that party should not be held responsible. In our view, no revision relating to such "good faith" acts is necessary in this Article IX, since it clearly distinguishes between unavoidable delays (parag. A) and avoidable delays (parag. B), and, in our view, fairly protects the rights of both parties.

Article X—Suspension

Three substantive revisions to Article X were requested by about twelve commenters. One recommended change has been adopted; two have been rejected. At the end of paragraph A (formerly numbered paragraph "1"), a clarifying sentence has been added to state that any suspension imposed would be rescinded upon the completion of corrective action. On the other hand, DOE has not adopted a suggestion that any suspension should be restricted to the "affected portion" of the contract where several reactor units may be covered by one contract. DOE believes that such a compartmentalized type of remedy could result in a severe weakening of the Government's suspension remedy to the overall detriment of the program. However, DOE has modified Article X to provide that it has the discretion to suspend all or any portion of the contract.

Similarly, DOE has not adopted the suggestion that the second paragraph of Article X, relating to suspensions that

may be imposed in case of a national emergency, be deleted. Some commenters said that this paragraph may not be necessary in light of Article IX.A. (unavoidable delays). DOE believes that both provisions (Article IX.A. and X.B.) should be read together and that the express recognition of a national emergency which may require suspension and realignment of priorities is necessary and proper for inclusion in Article X.

One commenter suggested that Article X.B. (formerly numbered X.2.), which provides for an equitable refund in case of a national emergency suspension, should be modified or deleted as it might militate against an overall equitable settlement. DOE deems the present wording fair and equitable, and this recommendation has been rejected.

Article XI—Remedies

No significant comments were received on this clause and, accordingly, no change from the proposed rule has been made in Article XI.

Article XII—Notices

No significant comments were received on this provision and it remains the same as shown in the proposed rule.

Article XIII—Representation Concerning Nuclear Hazards Indemnity

A substantial number of commenters raised questions and suggested revisions in this article. One recommended change has been adopted by adding a new paragraph B to Article XIV, which expressly states that the indemnity protection provided to the Purchaser under any indemnity agreement given to a DOE facility contractor will survive the term of those contracts and inure thereafter to the benefit of the Purchaser.

It was also suggested that DOE should consider giving the Purchaser "equivalent protection" in the event the repository facility is operated directly by the Government in which case no indemnity could be given to a facility contractor with consequent coverage for the Purchaser. Since DOE intends to contract for its disposal operation services to the maximum practicable extent, DOE believes that a provision to furnish the Purchaser "equivalent protection" in any contrary event is unnecessary at this time and could, if the unlikely need arose, be covered by suitable contract amendment.

With respect to the current statutory authority under Section 170(d) of the Atomic Energy Act of 1954, as amended, which will expire on August 1, 1987, several commenters requested liability protection in the event the indemnity system under Section 170(d) expires or is changed. At this time, DOE has no reason to believe that Section 170(d) will not be extended as it has been in the past. However, if that system expires or is changed, then DOE might seek to extend, by suitable contract modification, such liability protection as might be permitted by existing or new law, recognizing that an NRC-licensed Purchaser is protected against liability for nuclear incidents arising out of covered activities at its site under financial protection arrangements required by NRC.

The present article states that the indemnity to be provided by DOE applies, *inter alia*, "to covered nuclear incidents . . . at a contract location." The term "contract location" means the DOE (repository) facility to be established under the Act (see Atomic Energy Act of 1954, as amended, sections 11(x) and 11(w), 42 U.S.C. 2014 (x) and (w)).

The proposed rule referred to the inclusion of an indemnity in contracts for transportation as well as the facility operation. This has been revised since financial protection for nuclear incidents arising out of transportation to or from an indemnified facility is afforded by NRC-required financial protection and by the indemnity which will be in the contract for operation of the repository. The indemnity in the repository contract will apply to the extent the person indemnified is not compensated by financial protection permitted or required by NRC.

With respect to non-nuclear hazards and possible third-party claims arising out of DOE's performance of the contract, several commenters suggested the inclusion of an indemnity provision that would protect the Purchaser against all claims for personal injuries or damage to property, "whether based wholly or in part upon [the] negligence . . . of the Purchaser or its . . . agents." DOE has not adopted this suggestion which it deems unnecessary and inappropriate. Any claims for personal injuries and/or property damage at the site would be covered under general principles of applicable law; that is to say, DOE could be held responsible for such injuries as are determined to be caused by the negligence of its agents or contractors in any suit brought by an injured third party against DOE directly, or against the Purchaser who might then implead DOE; and the same would apply to the liability of the Purchaser, as to which its usual third-party liability insurance would afford protection. By the same token, once DOE has accepted delivery and title, it would be primarily responsible for any non-nuclear accidents, and any impleading of the Purchaser in such claims would be covered under the Purchaser's regular insurance coverage.

The last sentence of (new) paragraph "A" in Article XIV refers to the "conditions stated in the indemnity agreement," as to which some commenters asked for a copy. Obviously, DOE cannot now provide copies of such an indemnity since there is, as yet, no DOE repository contract in existence. However, it is contemplated that such contractor(s), when selected, will be covered by including in the contract(s) for repository operation, the nuclear hazards indemnity clause set forth in the DOE Procurement Regulations at § 9-50.704-6.

Article XIV—Assignment

The only revision made in this clause, to be consistent with the Act, was to change the word "Party" to "Purchaser."

Article XV—Amendments

This clause was added to expressly recognize that DOE or the Purchaser may wish to amend the contract in the future to more accurately or equitably reflect their respective interests. The article requires that any such amendment be mutually agreeable and consistent with this final rule as it may from time to time be amended.

Article XVI—Disputes

This provision (set out in the proposed rule in Appendix H, clause 1) remains essentially unchanged in this final rule. Several commenters suggested that the contract should apply the provisions in the Contract Disputes Act of 1978 (Pub. L. 95-563). We have not accepted this suggestion for a number of reasons. Section 3 of Pub. L. 95-563 specifically lists the types of contracts to which that Act is to apply, namely, the procurement of property, services, construction, alteration, repair or maintenance and the disposal of personal property. The nuclear waste disposal contract, which involves not the Government procurement of services but rather its furnishing of such services, is clearly beyond the purview of Pub. L. 95-563, as shown by the language of that statute, as well as its legislative history. The Department has therefore not adopted this suggestion, but has utilized the DOE pre-Contracts Disputes Act process of dispute resolution with the addition of the requirement of certification of claims in excess of $50,000.

Other commenters suggested that the certification of accuracy and completeness of any claim over $50,000

be deleted; that arbitration of disputes be allowed, and that continuation of performance be restricted to those areas not in dispute.

We believe that the certification of accuracy and completeness of claims in excess of $50,000 is reasonable and appropriate to protect both the Government and the Purchaser from frivolous or fraudulent claims. The suggestion to allow arbitration of all disputes was not adopted, since the Government is not to be bound by decisions of third parties; the contracting officer, as the first level deciding official on a claim under this clause, is required to exert all efforts to satisfactorily resolve issues at dispute; as such, arbitration would be likely to protract rather than accelerate the ultimate resolution.

The suggestion that continuation of performance of the contract be required only in those areas not in dispute was not accepted, as such a provision would be inconsistent with the fundamental purpose of the disputes resolution process—namely continuing performance of the contract during pendency of a dispute between the parties. To allow either party to suspend performance unilaterally based upon a dispute would effectively serve to negate the contract. If a party disputed the financial provisions, transportation scheduling, or environmental, safety and health requirements of packaging of nuclear fuel or waste, it could cease to perform in these areas. This we believe to be unworkable and inconsistent with the intent of Public Law 97–425. Accordingly, we have not accepted this suggestion.

At the suggestion of several commenters, a change was made to provide for ninety (90) days, instead of thirty (30) days, for Purchaser to appeal the decision of the Contracting Officer

Article XVII—Officials Not To Benefit

No significant comments have been received on this clause (formerly Appendix H, clause 2), and, accordingly, no change has been made.

Article XVIII—Covenant Against Contingent Fees

Some commenters suggested this clause be deleted as it seemed to them to be unnecessary. The clause is required in Government contracts by Executive Order 9001 and 10 U.S.C. 2306(b); accordingly, we have not adopted this suggestion.

Article XIX—Examination of Records

Several commenters questioned the need to retain records for three (3) years after final payment under this contract. This requirement stems from the statutory authority of the Comptroller General to conduct audits relating to the receipt and expenditure of public funds under the Budget and Accounting Act of 1921 (31 U.S.C. 53(a) and (b)). To effectively carry out these audit responsibilities, the Comptroller General is authorized for a period of three (3) years after final payment of a contract to examine any directly pertinent books or records relating to transactions under the contract (10 U.S.C. 2313(b)). In view of these statutory requirements, and recognizing that reactor facility operators are now required by law to maintain a variety of records during the entire life span of the facility, we have not adopted recommended changes to this contract provision.

Article XX—Permits

No change from clause set out in proposed rule (see Appendix H, clause 5) was made in this Article XV.

Article XXI—Rights in Technical Data

Several commenters requested that DOE not require Purchasers to submit any technical data called for by DOE under the contract where the Purchaser has an agreement with a third party restricting release of such data. DOE has not accepted this suggestion as the technical data required to be submitted under this contract has been determined to be necessary. However, DOE has added a new paragraph at the end of this clause (formerly in Appendix H, clause 6) to cover those cases where the Purchaser has received proprietary data from a third party who has previously imposed restrictions on its use or disclosure. The new provision requires the Purchaser to obtain the consent of such third party.

Article XXII—Entire Contract

This provision was revised, at the suggestion of several commenters, by the deletion of the second sentence which referred to "collateral contracts . . . [being] superseded." It was not and is not DOE's intent, by having executed this contract, to abrogate other contracts which a Purchaser may have. To make this intent clear, a new paragraph B has been added to this Article XXII.

Appendices

There were numerous comments on the contract appendices contained in the proposed rule published on February 4, 1983. We have carefully evaluated all the changes recommended by the commenters. Based upon our review, seven of the eight appendices in the proposed rule (Appendices A, B, C, D, E, F and G) have been revised; these now appear in this final rule as Appendices A, C, D, B, E, F and G. Appendix H in the proposed rule contained six contract clauses which are now part of the contract itself (Articles XVI through XXI).

The referenced modifications were made because we believe they eliminate unnecessary paperwork and data gathering while still providing the Department with the information it requires to effectively administer the contract. This reduction of the data required is in the best interests of the Government because it reduces the paperwork and administrative demands on the Department. The referenced modifications also bring the appendices more in line with current utility industry practices on data collection and management. By requesting information in a manner which is easier for the utilities to provide, it reduces the likelihood of error, makes the auditing functions of the Department easier, and in general simplifies the operations of both the utilities and the Department. Specific comments on each appendix follow.

Appendix A (Nuclear Power Reactor(s) and Other Facilities Covered)

A number of commenters suggested a slightly modified approach to this appendix, including a description of the facility which was more informative than that contained in the proposed rule. This approach was adopted.

Appendix B (Discharge Information (Ten Year; Annual))

This appendix appeared as Appendix D in the proposed rule. A number of commenters requested that the "commitment year for delivery" be deleted and this was done because the information is provided in Appendix C. Likewise, several commenters felt that shipping information could be covered more appropriately in the appendix containing the delivery commitment schedule (Appendix C) and this suggestion was accepted. A tabular format for the ten-year discharge forecast was proposed and adopted. This format makes the data more accessible to and understandable by the Department.

Appendix C (Delivery Commitment Schedule)

This Appendix appeared as Appendix B in the proposed rule. Its format was modified and simplified in response to a number of recommendations, and it was made more consistent with Article V. A substantial number of commenters questioned the requirement for proof of

ownership of the SNF and/or HLW to be delivered to DOE. Since DOE will, upon delivery and acceptance of the SNF and/or HLW, be taking title to such material, it must assure itself that the Purchaser can legally convey clear title.

Appendix D (Final Delivery Schedule)

This appendix was formerly Appendix C in the proposed rule. A clearer format was proposed and accepted, but the data requested by this appendix remain essentially unchanged. The revised format recognizes that there could be a range of discharge dates, not just one, and provides space to accommodate this.

Appendix E (General Specifications)

A number of commenters stated that the radioactive release test was an unnecessary burden for both the utilties and DOE. This requirement has been deleted because the data are not essential and the test is time-consuming and expensive. Several commenters felt that the scope of nonfuel components was too limited, and should be expanded to include additional equipment and hardware. This recommendation was considered appropriate and was adopted. In addition, the need for maximum physical dimensions was questioned, and it was recommended that they be deleted. DOE did not adopt this recommendation because it must have some basic dimensions around which to design its handling and disposal facilities. Such information will serve to minimize construction and operating costs which is in the best interest of all parties. A number of commenters believed that the specification on cladding materials was not needed. This provision has been eliminated because DOE will accept all standard cladding materials.

The need for non-standard fuel definitions was questioned by some commenters. These definitions have not been changed because they relate to information considered necessary by DOE in order to establish its operating procedures and schedules.

One commenter requested that the Department provide the containers for failed fuel at no cost to the utilities. This was rejected because the furnishing of such containers is part of the normal utility cost for the operation of its spent fuel storage basin. Several commenters said that a separate classification for consolidated fuel rods was needed. This suggestion was accepted because none of the existing classifications was appropriate for assemblies which have been disassembled.

Appendix F (Detailed Description of Purchasers Fuel)

Appendix F was greatly simplified and made consistent with industry terminology and practice. A number of commenters stated that far too much detail was requested. A revised format proposed by one commenter was more understandable than that contained in its proposed rule, and was adopted. The requirement for drawings was made simpler and more manageable. Many non-standard terms for the industry were removed as requested by a number of commenters.

Appendix G (Standard Remittance Advice)

Appendix G remains substantially unchanged. Several commenters suggested deleting references to "meter" and "meter reading" as the information to be so provided may require calculations not merely referring to a "meter". DOE agrees and such references have been deleted, though the requirement for the information remains unchanged. Several commenters noted inconsistencies in references to "net" as well as "gross" electricity generated. As DOE now interprets the Act to require disposal charges based upon "gross" electricity generated by the Purchaser's civilian nuclear power reactors, references to "net" have been deleted. One commenter suggested that a reference be added to identify the "responsible DOE office"; however, since there are several offices involved in the processing of the payments to be made hereunder, DOE has not adopted this suggestion.

C. Additional Public Comments

In addition to the public comments keyed to the contract articles and discussed in Section III.B. above, DOE received other comments relating to the proposed rule of February 4, 1983. A summary of these comments and DOE's action taken with respect to each is set forth below.

Several commenters suggested that the proposed standard contract not be part of the rule itself. DOE has not adopted this suggestion because, as stated in the February 4 **Federal Register** notice (48 FR 5459), it continues to believe that the rulemaking process offers the best opportunity for interested persons to participate in DOE's nuclear waste disposal activities. This applies equally to the promulgation of this final rule regarding the standard contract and any later amendments to the rule that may be needed.

Some commenters requested that DOE issue separate contracts for each reactor or facility receiving DOE's disposal services. We believe this would be an unnecessary increase in paperwork and workload as the contract (see Appendix A) clearly provides for Purchasers to list any multiple reactors or facilities to be covered and requires separate scheduling information for each site to be serviced by DOE. Therefore, we have not adopted this suggestion.

Three commenters suggested that the deviation procedure set out in Section 961.4 of the rule could prove onerous or administratively burdensome and they suggested its deletion. DOE disagrees. As stated in the February 4 **Federal Register** notice (48 FR 5459), "DOE intends to use the rule and standard contract *unless* special circumstances are found *and* the . . . deviations procedures are followed." To achieve maximum uniformity in the type of standard contract to be used and, at the same time, to allow for necessary adjustments that may be needed to accommodate the special or unique circumstances of particular Purchasers, we view the deviation procedure of section 961.4 quite reasonable and proper. The recommended deletion has therefore not been adopted.

Two State agencies raised the question of advance notification to be given with respect to any planned transportation of the SNF and/or HLW through the State (by truck, rail or barge). As the standard contract provides, DOE will be responsible for the transportation of SNF and/or HLW from the Purchaser's site to the DOE facility. It is comtemplated that DOE and its transportation contractors will, to the extent required by applicable law and regulations, provide such advance notification to the affected States.

Article VIII.E. of the contract in this final rule provides for audit rights on the part of DOE as well as the Comptroller General (see also Article XIX). Most of the utilities and industry organizations commenting on the proposed rule requested that similar audit rights be given to the Purchaser and/or State utility commissions. DOE has not accepted this recommended approach for several reasons. First and foremost, no such procedure is authorized, expressly or implicitly, by the Act itself. Secondly, we believe that the existing statutory scheme and the information to be provided by DOE under the contract will be sufficient for Purchasers, and indeed the general public, to assess the performance and progress of DOE in its nuclear waste disposal program. This dissemination of information will be

accomplished in a variety of ways, including: (1) A comprehensive mission plan; (2) an annual audit conducted by the Comptroller General; (3) an annual DOE report to Congress on activities and expenditures; (4) an annual Treasury Department report to Congress on the financial condition and operations of the Program; (5) a triennial budget to Congress; and (6) a possible audit of the program by a private firm of certified public accountants.

Similarly, seven commenters addressed the question of DOE performance standards and Purchaser remedies with respect to performance. In essence, these commenters pointed out that no date exists other than the January 31, 1998 date to evaluate DOE's program performance. If that date is not met, these commenters say, the contract provides no specific remedies against DOE for failing to meet the date. DOE has considered this comment and the suggestion that suitable language be included in the contract, but it has decided not to adopt the recommended modification. We recognize that these issues are of concern to the utilities. However, we believe that we should be consistent with the language of the Act. The 1998 date is called for in the Act, and we believe it to be a realistic date. Our performance will be judged by meeting this date. If the intent of the Act was to have intermediate performance standards or dates, they could have been specified in the Act.

A few commenters requested that the contract contain a severability provision which would, in effect, state that if a court of competent jurisdiction should rule that one or more of the contractual provisions were invalid, this would not affect the validity of other parts of the contract. Such a provision is not infrequently found in statutes (Federal and State), but its inclusion in contracts is not common. For this reason, and because we do not feel it proper to attempt to limit judicial review or remedies in an administrative rule, we have not adopted this suggested provision.

With respect to the schedule of fees to be levied by DOE, some commenters suggested that the disposal fees not be set out in the contract, but rather that they be set forth as a separate section in the final rule itself, which would allow the fees to be changed without modification of individual contracts. We believe the fee provisions are an integral part of the contract and that inclusion of these important provisions is necessary for the contract to be self-sufficient and complete upon execution. Should the Department determine in the future that modification of the individual disposal contracts was an unnecessary workload burden, the Department would consider adopting the suggested procedure.

Most of the commenters believe that, in the event DOE subsequently chooses to use or process the SNF and/or HLW for purposes other than disposal, an appropriate credit should be provided.

At this time, the Department has chosen to defer a decision on providing credits, for whatever reason, to the utilities or to the Nuclear Waste Fund because we are uncertain as to the type and kinds of credits that could be applied to the utilities or to the Fund. We recognize the comments calling for credits for reprocessing SNF. We also recognize that other types of credits may become appropriate. We intend to reconsider this issue when and if reprocessing actually becomes a viable enterprise for the utilities, and when we also ascertain the other types of credits that may or may not be appropriate for the industry.

IV. Final Rule

The purpose of this new Part 961, as indicated in § 961.1, is to establish a standard contract that will be used to provide DOE's nuclear waste disposal services to a Purchaser. The term "Purchaser" is defined in section 961.3.

Section 961.2 relates to applicability and describes who is covered by the part. A critical feature of this section is that to have SNF and HLW disposed of in DOE's repository, an owner or generator of such nuclear fuel or waste must execute a contract with DOE by June 30, 1983, or by the date on which an owner or generator begins generating or takes title to such fuel or waste.

Section 961.3 sets forth pertinent definitions and incorporates the more extensive list of definitions contained in Article II of the contract which is found in § 961.11.

Section 961.4 provides for deviations from the rule as well as from the contract which is found at § 961.11. DOE has included this provision because special circumstances may exist or arise that would warrant a departure from the rule or standard contract. As mentioned above, however, DOE intends to use the rule and standard contract unless special circumstances are found and the proposed deviation procedures are followed.

Section 961.5 specifies that Federal agencies which require DOE's nuclear waste disposal services shall enter into an interagency agreement which commits those agencies to the terms and conditions, including the fee schedules, contained in the proposed standard contract.

Section 961.11 sets forth the standard contract that DOE and owners and generators of SNF and/or HLW will execute for the disposal of such fuel or waste, as described in Section III.C. above.

V. Procedural Requirements

A. *Executive Order No. 12291.* Under Executive Order 12291 agencies are required to determine whether proposed rules are major rules as defined in the Order. DOE has reviewed this final rule and, after consultation with the Office of Management and Budget, has determined that it is not a major rule because: it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises. While the money to be paid by members of the electric utility industry under the contracts that are subject of this rule will exceed $100 million annually, and may even be considered a major cost to the industry, these costs would not be the result of this rule. The costs are the result of the need to dispose of spent nuclear fuel and/or high-level radioactive waste, a need recognized in the Nuclear Waste Policy Act of 1982. The particular provisions of this rule have little impact on the actual costs of disposal and certainly less than $100 million annually.

B. *Regulatory Flexibility Act.* In accordance with secton 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, DOE finds that sections 603 and 604 of the said Act do no apply to this rule because it will not have a significant economic impact on a substantial number of small entities. This finding is based on the fact that the parties to the contract, who will be owners or generators of spent nuclear fuel or high-level radioactive waste, are not small entities.

C. *National Environmental Policy Act.* Execution of the standard contract contained in this rulemaking will not commit DOE to any specific activities not already prescribed by the Nuclear Waste Policy Act. Activities allowed under the Act will receive appropriate environmental review at the proper time, i.e., when such activities are proposed in accordance with the process established in the Act. Therefore, DOE has concluded that

neither this rulemaking nor the execution of the contracts gives rise to any action not already prescribed by the Act and, thus, is not a major Federal action significantly affecting the quality of the human environment. Accordingly, preparation of either an environmental assessment or an environmental impact statement is not required.

D. *Paperwork Reduction Act.* In accordance with Section 3504(h) of the Paperwork Reduction Act of 1980 (Pub. L. 96–511), this rule has been submitted to the Office of Management and Budget (OMB), which has approved the data collection requirements contained herein.

List of Subjects in 10 CFR Part 961

Government contracts, Nuclear materials, Nuclear power plants and reactors, Radiation protection, Waste treatment and disposal.

Section 553(d) of the Administrative Procedure Act generally requires that a substantive rule be published 30 days before its effective date. An exception to this requirement exists when an agency finds good cause for an earlier effective date. DOE has determined that good cause exists to make this rule effective immediately, because this will allow owners of civilian nuclear power reactors the maximum amount of time to consider the rule before the June 30, 1983, statutory deadline for their entering into a contract for the disposal of spent fuel.

For the reasons set out above, a new Part 961 of Chapter III of Title 10, Code of Federal Regulations, is to be established as set forth below.

Issued in Washington, D.C., April 11, 1983.

Hilary J. Rauch,

Director, Procurement & Assistance Management Directorate.

Title 10, Chapter III of the Code of Federal Regulations is hereby amended by adding a new Part 961, to read as follows:

PART 961—STANDARD CONTRACT FOR DISPOSAL OF SPENT NUCLEAR FUEL AND/OR HIGH-LEVEL RADIOACTIVE WASTE

Subpart A—General

Sec.

961.1 Purpose.
961.2 Applicability.
961.3 Definitions.
961.4 Deviations.
961.5 Federal Agencies.
961.6–961.10 [Reserved]

Subpart B—Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

961.11 Text of the contract.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254) and Sec. 302, Pub. L. 97–425, 96 Stat. 2257 (42 U.S.C. 10222).

Subpart A—General

§ 961.1 Purpose.

This part establishes the contractual terms and conditions under which the Department of Energy (DOE) will make available nuclear waste disposal services to the owners and generators of spent nuclear fuel (SNF) and high-level radioactive waste (HLW) as provided in Section 302 of the Nuclear Waste Policy Act of 1982 (Pub. L. 97–425). Under the contract set forth in § 961.11 of this Part, DOE will take title to, transport, and dispose of spent nuclear fuel and/or high-level radioactive waste delivered to DOE by those owners or generators of such fuel or waste who execute the contract. In addition, the contract will specify the fees owners and generators of SNF and/or HLW will pay for these services. All receipts, proceeds, and revenues realized by DOE under the contract will be deposited in the Nuclear Waste Fund, an account established by the Act in the U.S. Treasury. This fund will pay for DOE's radioactive waste disposal activities, the full costs of which will be borne by the owners and generators under contract with DOE for disposal services.

§ 961.2 Applicability.

This part applies to the Secretary of Energy or his designee and any person who owns or generates spent nuclear fuel or high-level radioactive waste, of domestic origin, generated in a civilian nuclear power reactor. If executed in a timely manner, the contract contained in this part will commit DOE to accept title to, transport, and dispose of such spent fuel and waste. In exchange for these services, the owners or generators of such fuel or waste shall pay fees specified in the contract which are intended to recover fully the costs of the disposal services to be furnished by DOE. The contract must be signed by June 30, 1983, or by the date on which such owner or generator commences generation of, or takes title to, such spent fuel or waste, whichever occurs later.

§ 961.3 Definitions.

For purposes of this part—

"Act" means the Nuclear Waste Policy Act of 1982, Pub. L. 97–425, 96 Stat. 2201 *et seq.*, 42 U.S.C. 10101 *et seq.*

"Contract" means the agreement set forth in §961.11 of this part and any duly executed amendment or modification thereto.

"Generator" means any person who is licensed by the Nuclear Regulatory Commission to use a utilization or production facility under the authority of section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134).

"Owner" means any person who has title to spent nuclear fuel or high-level radioactive waste.

"Purchaser" means any person, other than a Federal agency, who is licensed by the Nuclear Regulatory Commission to use a utilization or production facility under the authority of sections 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) or who has title to spent nuclear fuel or high level radioactive waste and who has executed a contract with DOE.

"Secretary" means the Secretary of Energy of his designee.

Other definitions relating to the subject matter of this rule are set forth in Article II of the contract which is contained in § 961.11, Text of the contract, below.

§ 961.4 Deviations.

Requests for authority to deviate from this part shall be submitted in writing to the Contracting Officer, who shall forward the request for approval to the Senior Procurement Official, Headquarters. Each request for deviation shall contain the following information:

(a) A statement of the deviation desired, including identification of the specific paragraph number(s) of the contract;

(b) A description of the intended effect of the deviation;

(c) The reason why the deviation is considered necessary or would be in the best interests of the Government;

(d) The name of the owner or generator seeking the deviation and nuclear power reactor(s) affected;

(e) A statement as to whether the deviation has been requested previously and, if so, circumstances of the previous request;

(f) A statement of the period of time for which the deviation is needed; and

(g) Any pertinent background information will contribute to a full understanding of the desired deviation.

§ 961.5 Federal agencies.

Federal agencies or departments requiring DOE's disposal services for SNF and/or HLW will be accommodated by a suitable interagency agreement reflecting, as appropriate, the terms and conditions set forth in the contract in § 961.11; *provided, however,* that the fees to be paid by Federal agencies will be equivalent to the fees that would be paid under the contract.

§§ 961.6–961.10 [Reserved]

Subpart B—Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

§ 961.11 Text of the contract.

The text of the standard contract for disposal of spent nuclear fuel and/or high/level radioactive waste follows:

U.S. Department of Energy Contract No.——

Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste

THIS CONTRACT, entered into this — day of ——— 19—, by and between the UNITED STATES OF AMERICA (hereinafter referred to as the "Government"), represented by the UNITED STATES DEPARTMENT OF ENERGY (hereafter referred to as "DOE") and ————, (hereinafter referred to as the "Purchaser"), a corporation organized and existing under the laws of the State of ———— [add as applicable: "acting on behalf of itself and ———."].

Witnesseth that:

Whereas, the DOE has the responsibility for the disposal of spent nuclear fuel and high-level radioactive waste of domestic origin from civilian nuclear power reactors in order to protect the public health and safety, and the environment; and

Whereas, the DOE has the responsibility, following commencement of operation of a repository, to take title to the spent nuclear fuel or high-level radioactive waste involved as expeditiously as practicable upon the request of the generator or owner of such waste or spent nuclear fuel; and

Whereas, all costs associated with the preparation, transportation, and the disposal of spent nuclear fuel and high-level radioactive waste from civilian nuclear power reactors shall be borne by the owners and generators of such fuel and waste; and

Whereas, the DOE is required to collect a full cost recovery fee from owners and generators delivering to the DOE such spent nuclear fuel and/or high level radioactive waste; and

Whereas, the DOE is authorized to enter into contracts for the permanent disposal of spent nuclear fuel and/or high-level radioactive waste of domestic origin in DOE facilities; and

Whereas, the Purchaser desires to obtain disposal services from DOE; and

Whereas, DOE is obligated and willing to provide such disposal services, under the terms and conditions hereinafter set forth; and

Whereas, this contract is made and entered into under the authority of the DOE Organization Act (Pub. L. 95–91, 42 U.S.C. 7101 *et seq.*) and the Nuclear Waste Policy Act of 1982 (Pub. L. 97–425, 42 U.S.C. 10101 *et seq.*)

Now, therefore, the parties hereto do hereby agree as follows:

Article I—Definitions

As used throughout this contract, the following terms shall have the meanings set forth below:

1. The term "assigned three-month period" means the period that each Purchaser will be assigned by DOE, giving due consideration to the Purchaser's assignment preference, for purposes of reporting kilowatt hours generated by the Purchaser's nuclear power reactor and for establishing fees due and payable to DOE.

2. The term "cask" means a container for shipping spent nuclear fuel and/or high-level radioactive waste which meets all applicable regulatory requirements.

3. The term "civilian nuclear power reactor" means a civilian nuclear powerplant required to be licensed under Sections 103 or 104(b) of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2133, 2134(b)).

4. The term "Commission" means the United states Nuclear Regulatory Commission.

5. The term "contract" means this agreement and any duly executed amendment or modification thereto.

6. The term "Contracting Officer" means the person executing this contract on behalf of the Government, and any other officer or civilian employee who is a properly disignated Contracting Officer of the DOE; and the term includes, except as otherwise provided in this contract, the authorized representative of a Contracting Officer acting within the limits of his authority.

7. The term "delivery" means the transfer of custody, f.o.b. carrier, of spent nuclear fuel or high-level radioactive waste from Purchaser to DOE at the Purchaser's civilian nuclear power reactor or such other domestic site as may be designated by the Purchaser and approved by DOE.

8. The term "disposal" means the emplacement in a repository of high-level radioactive waste, spent nuclear fuel, or other highly radioactive waste with no foreseeable intent of recovery, whether or not such emplacement permits recovery of such waste.

9. The term "DOE" means the United States Department of Energy or any duly authorized representative thereof, including the Contracting Officer.

10. The term "DOE facility" means a facility operated by or on behalf of DOE for the purpose of disposing of spent nuclear fuel and/or high-level radioactive waste, or such other facility(ies) to which spent nuclear fuel and/or high-level radioactive waste may be shipped by DOE prior to its transportation to a disposal facility.

11. The term "full cost recovery," means the recoupment by DOE, through Purchaser fees and any interest earned, of all direct costs, indirect costs, and all allocable overhead, consistent with generally accepted accounting principles consistently applied, of providing disposal services and conducting activities authorized by the Nuclear Waste Policy Act of 1982 (Pub. L. 97–425). As used herein, the term "cost" includes the application of Nuclear Waste Fund moneys for those uses expressly set forth in section 302 (d) and (e) of the said Act and all other uses specified in the Act.

12. The term "high-level radioactive waste" (HLW) means—

(a) the highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced directly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentrations; and

(b) other highly radioactive material that the Commission, consistent with existing law, determines by rule requires permanent isolation.

13. The term "kilowatt hours generated" means electricity generated by nuclear fuel at a civilian nuclear power reactor specified in Appendix A hereto as measured at the output terminals of the turbine generator.

14. The term "metric tons uranium" means that measure of weight, equivalent to 2,204.6 pounds of uranium and other fissile and fertile material that are loaded into a reactor core as fresh fuel.

15. The term "Purchaser's site" means the location of Purchaser's civilian nuclear power reactor or such other location as the Purchaser may designate.

16. The term "quarterly Treasury rate" means the current value of funds rate as specified by the Treasury Fiscal Requirements Manual, Volume 1, Part 6, section 8020.20. This rate is published quarterly in the **Federal Register** prior to the beginning of the affected quarter.

17. The term "shipping lot" means a specified quantity of spent nuclear fuel or high-level radioactive waste designated by Purchaser for delivery to DOE beginning on a specified date.

18. The term "spent nuclear fuel" (SNF) means fuel that has been withdrawn from a nuclear reactor following irradiation, the consistituent elements of which have not been separated by reprocessing.

19. The term "spent nuclear fuel and high-level radioactive waste of domestic origin" means irradiated fuel material used, and radioactive wastes resulting from such use, in nuclear power reactors located only in the United States.

20. The term "year" means the period which begins on October 1 and ends on September 30.

Article II—Scope

This contract applies to the delivery by Purchaser to DOE of SNF and/or HLW of domestic origin from civilian nuclear power reactors, acceptance of title by DOE to such SNF and/or HLW, subsequent transportation, and disposal of such SNF and/or HLW and, with respect to such material, establishes the fees to be paid by the Purchaser for the services to be rendered hereunder by DOE. The SNF and/or HLW shall be specified in a delivery commitment schedule as provided in Article V below. The services to be provided by DOE under this contract shall begin, after commencement of facility operations, not later than January 31, 1998 and shall continue until such time as all SNF and/or HLW from the civilian nuclear power reactors specified in Appendix A, annexed hereto and made a part hereof, has been disposed of.

Article III—Term

The term of this contract shall be from the date of execution until such time as DOE has accepted, transported from the Purchaser's site(s) and disposed of all SNF and/or HLW of domestic origin from the civilian nuclear power reactor(s) specified in Appendix A.

Article IV—Responsibilities of the Parties

A. Purchaser's Responsibilities

1. *Discharge Information.*

(a) On an annual basis, commencing October 1, 1983, the Purchaser shall provide DOE with information on actual discharges to date and projected discharges for the next discharges to date and projected discharges for the next ten (10) years in the form and content set forth in Appendix B, annexed hereto and made a part hereof. The information to be provided will include estimates and projections and will not be Purchaser's firm commitment with respect to discharges or deliveries.

(b) No later than October 1, 1983, the Purchaser shall provide DOE with specific information on:

(1) Total spent nuclear fuel inventory as of April 7, 1983;

(2) Total number of fuel assemblies removed from the particular reactor core prior to 12:00 a.m. April 7, 1983 for which there are plans for reinsertion in the core, indicating the current planned dates for reinsertion in the core. Estimates of the burned and unburned portion of each individual assembly are to be provided.

(c) In the event that the Purchaser fails to provide the annual forecast in the form and content required by DOE, DOE may, in its sole discretion, require a rescheduling of any delivery commitment schedule then in effect.

2. *Preparation for Transportation.*

(a) The Purchaser shall arrange for, and provide, all preparation, packaging, required inspections, and loading activities necessary for the transportation of SNF and/or HLW to the DOE facility. The Purchaser shall notify DOE of such activities sixty (60) days prior to the commencement of such activities. The preparatory activities by the Purchaser shall be made in accordance with all applicable laws and regulations relating to the Purchaser's responsibilities hereunder. DOE may designate a representative to observe the preparatory activities conducted by the Purchaser at the Purchaser's site, and the Purchaser shall afford access to such representative.

(b) Except as otherwise agreed to by DOE, the Purchaser shall advise DOE, in writing as specified in Appendix F, annexed hereto and made a part hereof, as to the description of the material in each shipping lot sixty (60) days prior to scheduled DOE transportation of that shipping lot.

(c) The Purchaser shall be responsible for incidental maintenance, protection and preservation of any and all shipping casks furnished to the Purchaser by DOE for the performance of this contract. The Purchaser shall be liable for any loss of or damage to such DOE-furnished property, and for expenses incidental to such loss or damage while such casks are in the possession and control of the Purchaser except as otherwise provided for hereunder. Routine cask maintenance, such as scheduled overhauls, shall not be the responsibility of the Purchaser.

B. DOE Responsibilities

1. DOE shall accept title to all SNF and/or HLW, of domestic origin, generated by the civilian nuclear power reactor(s) specified in Appendix A, provide subsequent transportation for such material to the DOE facility, and dispose of such material in accordance with the terms of this contract.

2. DOE shall arrange for, and provide, a cask(s) and all necessary transportation of the SNF and/or HLW from the Purchaser's site to the DOE facility. Such cask(s) shall be furnished sufficiently in advance to accommodate scheduled deliveries. Such cask(s) shall be suitable for use at the Purchaser's site, meet applicable regulatory requirements, and be accompanied by pertinent information including, but not limited to, the following:

(a) Written procedures for cask handling and loading, including specifications on Purchaser-furnished cannisters for containment of failed fuel;

(b) Training for Purchaser's personnel in cask handling and loading, as may be necessary;

(c) Technical information, special tools, equipment, lifting trunnions, spare parts and consumables needed to use and perform incidental maintenance on the cask(s); and

(d) Sufficient documentation on the equipment supplied by DOE.

3. DOE may fulfill any of its obligations, or take any action, under this contract either directly or through contractors.

4. DOE shall annually provide to the Purchaser pertinent information on the waste disposal program including information on cost projections, project plans and progress reports.

5. (a) Beginning on April 1, 1991, DOE shall issue an annual acceptance priority ranking for receipt of SNF and/or HLW at the DOE repository. This priority ranking shall be based on the age of SNF and/or HLW as calculated from the date of discharge of such material from the civilian nuclear power reactor. The oldest fuel or waste will have the highest priority for acceptance, except as provided in paragraphs B and D of Article V and paragraph B.3 of Article VI hereof.

(b) Beginning not later than July 1, 1987, DOE shall issue an annual capacity report for planning purposes. This report shall set forth the projected annual receiving capacity for the DOE facility(ies) and the annual acceptance ranking relating to DOE contracts for the disposal of SNF and/or HLW including, to the extent available, capacity information for ten (10) years following the projected commencement of operation of the initial DOE facility.

Article V—Delivery of SNF and/or HLW

A. Description of SNF and HLW

The Purchaser shall deliver to DOE and DOE shall, as provided in this contract, accept the SNF and/or HLW which is described in accordance with Article VI.A. of this contract, for disposal thereof.

B. Delivery Commitment Schedule

1. Delivery commitment schedule(s), in the form set forth in Appendix C annexed hereto and made a part hereof, for delivery of SNF and/or HLW shall be furnished to DOE by Purchaser. After DOE has issued its proposed acceptance priority ranking, as described in paragraph B.5 of Article IV hereof, beginning January 1, 1992 the Purchaser shall submit to DOE the delivery commitment schedule(s) which shall identify all SNF and/or HLW the Purchaser wishes to deliver to DOE beginning sixty-three (63) months thereafter. DOE shall approve or disapprove such schedules within three (3) months after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval and request a revised schedule from the Purchaser, to be submitted to DOE within thirty (30) days after receipt of DOE's notice of disapproval.

2. DOE shall approve or disapprove such revised schedule(s) within sixty (60) days after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval and shall submit its proposed schedule(s). If these are not acceptable to the Purchaser, the parties shall promptly seek to negotiate mutually acceptable schedule(s). Purchaser shall have the right to adjust the quantities of SNF and/or HLW plus or minus (±) twenty percent (20%), and the delivery schedule up to two (2) months, until the submission of the final delivery schedule.

C. Final Delivery Schedule

Final delivery schedule(s), in the form set forth in Appendix D, annexed hereto and made a part hereof, for delivery of SNF and/or HLW covered by an approved delivery commitment schedule(s) shall be furnished to DOE by Purchaser. The Purchaser shall submit to DOE final delivery schedules not less than twelve (12) months prior to the delivery date specified therein. DOE shall approve or disapprove a final delivery schedule within forty-five (45) days after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval and shall request a revised schedule from the Purchaser, to be submitted to DOE within thirty (30) days after receipt of DOE's notice of disapproval. DOE shall approve or disapprove such revised schedule(s) within sixty (60) days after receipt. In the event of disapproval, DOE shall advise the Purchaser in writing of the reasons for such disapproval and shall submit its proposed schedule(s). If these are not acceptable to the Purchaser, the parties shall promptly seek to negotiate mutually acceptable schedule(s).

D. Emergency Deliveries
